DIVISION OF HIGHWAYS

NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received at the office of the State Highway Engineer, Public Works Building, Sacramento, California, until 2 o'clock P. M. on March 11, 1931, at which time they will be publicly opened and read, for construction in accordance with the specifications therefor to which special reference is made, of portions of State Highway, as follows:

Elmore County, an undergrade crossing under the tracks of the Southern Pacific Railroad at New England Mills (11)-Phi-27-B), consisting of two concrete abutments with wing walls and grading and surfacing approximately 1000 lineal feet of roadway with bituminous treated crushed gravel or stone surfacing.

Kern County, between Grape Vine Station and Banksfield (VI-Ker-4-B & C), about twenty-nine and eight-tenths (29.8) miles in length, to be graded and the shoulders surfaced with bituminous treated crushed gravel or stone.

Orange County, at Gallivan Overhead Crossing (VI-Or-2-B), about nine-tenths (0.9) mile in length, to be graded and paved with Portland cement concrete.

Imperial County, between Holtville and East High Line Canal (VIII-Im-27-D), about six and nine-tenths (6.9) miles in length, to be graded and paved with Portland cement concrete.

San Bernardino County, a reinforced concrete girder bridge over the tracks of The Atchison, Topeka and Santa Fe Railway about 2 miles east of Essex (VIII-SB-5-L), consisting of one 48' 0" span and four 34' 0" spans on concrete bents.

Proposals forms will be issued only to those Contractors who have furnished a verified statement of experience and financial condition in accordance with the provisions of Chapter 644, Statutes of 1929, and whose statements so furnished are satisfactory to the Department of Public Works. Bids will not be accepted from a Contractor to whom a proposal form has not been issued by the Department of Public Works.

Plans may be seen, and forms of proposal, bonds, contract and specifications may be obtained at the said office, and they may be seen at the offices of the District Engineers at Los Angeles and San Francisco, and at the office of the District Engineer of the district in which the work is situated. The District Engineers' offices are located at Eureka, Redding, Sacramento, San Francisco, San Luis Obispo, Fresno, Los Angeles, San Bernardino and Bishop.

A representative from the district office will be available to accompany prospective bidders for an inspection of the work herein contemplated, and Contractors are urged to investigate

the location, character and quantity of work to be done, with a representative of the Division of Highways. It is requested that arrangements for joint field inspection be made as far in advance as possible. Detailed information concerning the proposed work may be obtained from the district office.

No bid will be received unless it is made on a blank form furnished by the State Highway Engineer. The special attention of prospective bidders is called to the "Proposed Requirements and Conditions" annexed to the blank form of proposal, for full direction as to bidding, etc.

The Department of Public Works reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.

DEPARTMENT OF PUBLIC WORKS,
 DIVISION OF HIGHWAYS,
 C. H. PURCELL,

State Highway Engineer
 Dated February 11, 1931.
 (Feb. 16-23; Mar. 2-9)

Annual figures published by all building and loan associations throughout the United States showed average assets totaling \$754,166 per association, or a gain of 360 per cent in the past 11 years, according to a survey prepared by California Mutual Building & Loan Association.

The average building and loan association assets in the United States was \$754,166 in 1930 compared with \$704,500 in 1929, \$632,890 in 1928, \$560,650 in 1927, \$501,080 in 1926, \$444,400 in 1925, \$402,393 in 1924, \$367,000 in 1923, \$333,951 in 1922, \$312,346 in 1921 and \$251,545 in 1920.

There were 8633 associations in the United States in 1920. This number increased to a total of 12,804 in 1927, and dropped to 12,666 in 1928, 12,342 in 1929 and approximately 12,000 in 1930.

Members or savers have increased without exception each year from 4,962,916 in 1929 to 12,300,000 in 1930. Total assets have at the same time shown a gain of from \$2,519,914,000 in 1920 to \$9,505,000,000 in 1930.

Among the building and loan associations in the United States having assets in excess of \$10,000,000, are nine from California. In addition to the nine California organizations in the \$10,000,000 class, the west also claims two from Washington, one from Oregon and one from Utah.

Stocks, bonds and notes of public utility corporations in the amount of \$302,150,259 were authorized by the California Railroad Commission for sale to the public during 1930. This is the largest amount authorized in any year in the history of the commission, and compares with \$103,288,473.78 granted during 1929. A considerable amount of the money received through sales of securities of California utilities in 1930 was used to acquire control of other companies.

Determined to keep the home heater burning, appliances working, and domestic load growing to offset industrial power decline, quotas of central stations, dealers, and manufacturers set up an \$83,556,000 market for 1931, according to Electrical West. Commercial men still insist they can sell 50,000 ranges in a year, 25,000 water heaters, 75,000 refrigerators. At least \$25,000,000 in table appliances, clocks, washers, ironers, cleaners and health appliances will be sold by dealers and merchandising central stations.

ENGINEERING SOCIETIES EMPLOYMENT SERVICE

Further information regarding positions listed in this column is obtainable from Newton D. Cook, Room 715, 57 Post Street, San Francisco. (Phone SUTter 1684).

R-3470-S MECHANICAL ENGINEER preferably over 35 years old, with several years' experience as production engineer in the employment of company manufacturing farm machinery. Only this experience considered. Man will be given full charge of small shop and office after demonstration of ability to produce results. Must be willing to accept small salary to start. Apply by letter with full details of experience, etc. Location, San Francisco.

R-3203-S ENGINEER, preferably mechanical or chemical graduate, with 5 to 10 years' experience including considerable application of thermodynamics to solution of heat exchange problems as found in oil refinery equipment. Must have executive ability. Apply by letter with details of experience, references and photo. Salary \$200-250 per month to start. Location, Northern California.

K-322-W-2634-C PROFESSOR of printing for school of industrial engineering; preferably mechanical engineering graduate with broad experience in printing. Position will involve research and application to courses in craftsmanship training. Salary \$5000 a year. Apply by letter with full details of experience, references and photo. Location, East.

W-1934-C-S MECHANICAL ENGINEER, graduate for design of Diesel engines. At least 5 years' experience essential. Contract for 2 years renewable. Salary open, one-third to one-half in paper rubles for living expenses, balance in U. S. money to American bank. Applications only by letter which will be forwarded to Moscow for decision. Location, Russia.

R-2484-S ARCHITECTURAL Draftsman, skilled in pen and ink rendering, to turn out good working drawings of simple type suitable for publication in bulletins. About 4 months work. Apply by letter with personal data, salary expected and samples of work. Location, Northern California.

R-3467-S STENOGRAPHER, with several years' experience in office of paving contractor or department of public works where she would have learned street improvement assessment and tax problems. Must have executive ability. Salary depends on experience. Apply by letter. Location, San Francisco.

R-3202-S ENGINEER, preferably mechanical or chemical graduate, with 5 to 10 years' experience, including considerable application of thermodynamics to solution of heat exchange problems as found in oil refinery equipment. Must have executive ability. Apply by letter with details of experience, references and photo. Salary \$200-\$250 per month to start. Location, Northern California.

K-340-W-2251-S REFRIGERATION Engineer who has had at least five years' experience in the preparation of specifications and designs, installation and servicing of refrigerating and ice making plants up to 100-ton capacity. Single man about 30 preferred. Position contract with option of renewal if services are satisfactory. Salary about \$300 a month and traveling expenses to and from China. Apply by letter. Headquarters, New York.

R-3470-S MECHANICAL ENGINEER preferably over 35 years old, with several years' experience as production engineer in the employment of company manufacturing farm machinery. Only this experience considered. Man will be given full charge of small shop and office after demonstration of ability to produce results. Must be willing to accept small salary to start. Apply by letter with full details of experience, etc. Location, San Francisco.

W-1873-C-S CONSULTING ENGINEER knowing garage operation, garage equipment, car repair, car utilization and manufacture of parts for repairs, to advise on equipment for service stations and repair shops, on schedule of operation of trucks, busses and passenger cars and to organize maintenance and repair of trucks, busses and passenger cars of various makes. Experience in responsible charge of fleet operation and maintenance of trucks and busses desirable. Contract for one year, renewable. Salary open. One-third to one-half in paper rubles for living expenses, balance in United States money to American bank. Applications only by letter which will be forwarded to Moscow for decision. Location, Russia.

W-2234 ENGINEER with technical engineering training, to act as sales engineer in connection with the sale and demonstration of a new type of mine drill. Should preferably have some experience and familiarity with explosives. Reasonable drawing account, plus a bonus, depending upon the results accomplished. Apply by letter. Hdqtrs., Midwest

A gas-engine driven welding set equipped with flanged wheels for track service is offered by the Westinghouse Electric and Manufacturing Company, East Pittsburgh, Pa. This "Flexarc" welder is a 2000 ampere, single operator, self-contained unit, especially suitable for construction work beyond the reach of power lines. The model is available for service on railroad tracks or in mines.

BEAUTY OF DESIGN IN INDUSTRIAL DOORS

Industrial doors architecturally designed for the better class of industrial buildings are now being introduced by the Campbell Industrial Window Company. Wide stiles and rails combined with pressed steel moulding and muntins' create a beauty of design that is entirely new in the manufacture of this type of doors. Stiles and rails, 1/2" wide of the tubular type of construction gives added rigidity and conforms to standard architectural design.

This is the first time in the history of industrial doors, according to the Campbell Company, that pressed steel shapes have been used for moulding and muntins' in place of industrial sash sections for the glass panel.

The mouldings, muntins' and steel panel below are placed in the center of the stiles and rails giving both sides of the door a finished, well designed appearance. There are no reveals of unsightly pockets to collect dust and dirt and no exposed edges of metal or otherwise, unfinished surfaces. Heavy channel reinforcement are placed in all corners of the door to give greater rigidity and provide M applications of door checks.

The frame is unique in its design and construction. It can be shipped knocked down, assembled on the job and used for either right or left hand swing doors. Standardization on mass production makes these advantages possible at reduced cost.

CATALOGS WANTED

P. Yakushin, Tsitsihar Str. 13, Harbin, North Manchuria, is in the market to receive literature and catalog with regard to small machines for repairing houses, including portable painting equipment; also descriptive literature on interior decorating.

A "Pittsburg" Automatic Water Heater installed in the Home indicates high quality throughout

Recommended and specified by all the leading architects, plumbers and builders.

Consider the high merit of the Pittsburg coupled with "Pittsburg Perfect Service."

"Hot water quick as a wink."

Pittsburg Water Heater Co.

Makers of "Pittsburg Automatic"—"Bungalow Automatic" Storage Systems and "Lyons" Tank Water Heaters.

NEVADA SEEKS TO LICENSE CONTRACTORS

Senate Bill No. 60, introduced by Senator Getchell, which provides that all contractors who bid on public works contracts must be licensed by the state and pay a license fee of \$250 a year, will be vigorously opposed by a number of contractors and others interested, according to word from Carson City, Nevada.

The measure, it is contended by some, might operate to the disadvantage of highway contractors from California, Utah and other states, who have underbid Nevada contractors on highway work, but its provisions affect all other contractors who may aid on public buildings or other construction where the contract is for \$10,000 or more.

The bill makes the state controller, who is a director of the state highway department, registrar for the purpose of administering the act and clothes him with power to cancel the license of contractors for cause.

SEATTLE COUNCIL PLANS LICENSE LAW

The question of whether the City of Seattle will license building contractors and subcontractors will be discussed before a meeting of the city council license committee March 2, Robert Harlan, chairman of the committee announces.

The plan, according to Harlan, is to charge a license fee of \$15 per year for contractors and subcontractors, with an index filing system giving firm members and location of offices. The city under this measure could also have the power to revoke licenses for fractions of regulations.

It had formerly been proposed that contractors also be bonded, but building leaders asked that this be eliminated until the license law itself had been tried. Harlan states such a regulation would protect building owners from "fly-by-night contractors and subcontractors."

HIGHWAY CONTRACT CHANGES AIM OF BILL

Numerous changes in the state highway department's method of making contracts will be effected if a bill passed in the Nevada state senate, introduced by Senator Noble H. Getchell, becomes a law.

The measure, S. E. 48, provides that all contractors on public works contracts shall post a 100 per cent bond. It also requires that they shall pay a larger percentage of their workers as the job progresses, raising the limit to 85 per cent.

The contractor, however, may be in work on a job within 15 days in advance of ten. The highway commission of the state is given the right to make a complete investigation of no standing of any contractor before letting the contract on any bid.

BUILDERS URGED TO APPOINT SIMPLIFIED PRACTICE COMMITTEE

"The construction industry and the eventual owners and tenants of the structures it creates have benefited through simplification because of the tendency toward lessened costs in manufacturing, distribution and dealer-handling," according to Edwin W. Ely, Chief of the division of simplified practice of the National Bureau of Standards, Department of Commerce, in a speech delivered before the 20th annual convention of the National Association of Builders Exchanges, at San Antonio, Texas, last Tuesday.

Mr. Ely further spoke of the active interest exhibited by this association in the simplification movement, as is evidenced by their endorsement of 20 simplified practice recommendations covering commodities in the construction field. "Today," he said, "there are in effect, over 115 simplified practice recommendations covering as many commodity fields."

It was also stated by him that "materials which are readily available in stock as a result of sound simplification programs by the various industries should be of tangible aid in furthering this plan to help out in the current situation. The cost of materials is bound to enter into any repair or new work, and the cost of special or 'hard-to-procure' material may be the factor which will decide against undertaking work at this time.

"The problem is one of acquainting consumers with the purpose and benefits of simplification and the opportunity it affords for the consumer to exercise greater control over the cost of living and the purchasing power of the dollar."

It was suggested by Mr. Ely that the National Association appoint a simplified practice committee, vested with the authority to go into the details of the simplification plan, and to establish a direct and continuous contact with the division of simplified practice. Such an arrangement would be conducive to the outlining of a program of cooperation which might well lead to better net profits through increased stability and the elimination of waste.

ROOFING TILE PLANT PROPOSED

John Harnish of Santa Barbara, general manager and vice-president of the Austin Securities Company, and a group of associates have organized the Montecito Clay Products Company and have taken over the old brick yard and 12 acres of land on the Rincon ranch near Carpinteria.

The company will turn out roofing tile as well as facing brick, floor tile and also an adobe brick for the construction of buildings.

Lee S. Collins has been appointed manager of the plant

COLORADO DEFINES ACTS FORBIDDEN BY ARCHITECT'S BOARD

Definitions of certain acts forbidden by the Colorado state law regulating the practice of architecture, such as gross incompetency, reckless dishonest, fraudulent or deceitful practice, have been incorporated in additional by-laws of the state board of examiners, adopted at a recent meeting. The text of the new by-laws follows:

"Defining certain acts which will be considered as gross incompetency, reckless, dishonest, fraudulent or deceitful practice within the meaning of the act.

"Failure to use diligence in preparing contracts or other documents for the protection of a client shall be deemed recklessness in the construction of a building. Failure to use due diligence in planning or supervising a structure, resulting in the building being improperly constructed, shall be deemed recklessness in construction.

"If failure to protect client in preparing contracts and other documents is due to causes other than lack of due diligence, it shall be deemed gross incompetency. If the planning or supervision of the construction of building by architect results in faulty or improper construction, said architect shall be deemed grossly incompetent.

"Any architect may be deemed guilty of dishonest practice if he pay any money or give anything of value to any officer or employee of the State of Colorado, or of any county, state, municipality or school district within said state, for aid and assistance in securing work from the political subdivision which he represents or is employed by.

"If an architect has secured a contract on any work, it shall be deemed dishonest practice for any other architect to attempt to supplant him so long as this contract be in force.

"It shall be deemed dishonest practice for any architect to stamp the drawings of another, or to stamp any drawings other than those made at his own office or under his personal supervision

"It shall be deemed dishonest practice to publicly announce, or permit to be so announced, appointment as architect for any project unless a definite agreement with the owner exists."

A committee of leaders in business, public affairs and humanitarianism has been appointed by the New York State Economic Council to study unemployment, invalidity and old age, and to work out and present for consideration a program for combating in the most practical and effective manner the hardships caused by them.

TIME FOR CALAMITY COMPLEX HAS PASSED SAYS DR. KLEIN

As we emerge from the depression—and authoritative testimony indicates that the upward climb is at last under way there is a growing realization that once more, as in every period of trial, business has learned several salutary lessons. It has been through a broadening, though trying experience, a grueling test in a truly relentless crucible.

Above all else perhaps this crisis has revealed, as none of its predecessors had, how closely interwoven the economic fabric of this nation has become during these post-war years. We can now appreciate as never before the vastly more sensitive interdependence of our business activities everywhere. And that applies not simply within our borders, but in every remote market and port around the seven seas.

This binding power of business was clearly stated by that lonely, rugged seer, who 70 years ago led this nation through trials, economic as well as political, such as would make our own recent business difficulties seem puny indeed. In one of his first debates with Douglas, Lincoln observed that "commerce brings us together and makes us better friends. . . . These mutual commercial accommodations are the cements which bring together the different parts of this Union. . . . They are the props of the house tending always to hold it up." And if that was true two generations ago, it certainly has become infinitely more convincing in this day of a vastly more intensive, closely integrated economic mechanism. Business is no longer on the lone-wolf, every-man-for-himself basis.

It might be interesting to tabulate very briefly a few of these impressions which come to mind as we contemplate the difficult road over which business has had to make its painful way during the past few months. The tabulation of a decalogue of the depression, comprising some of the outstanding factors, might not be inappropriate for future reference.

1. Don't blame the depression for everything which has marred the tranquility of the economic scene since 1929. The collapse of many parts of the business structure has had widespread repercussions, but there are other and in many cases deeper seated defects having nothing to do with the regrettable episodes of the past 16 months. Lack of vision, archaic methods, antiquated policies, within individual firms and trades, have all contributed toward weakening those involved so that when the depression came it was but the last straw, the final episode in a long sequence of causes, rather than the fundamental reason for current difficulty.

2. Don't compare peaks with slumps. Both are abnormalities. The more we flatten out the peaks, the better will be our control of the slumps.

3. Don't fall into the fallacy so general among European industrialists of expecting the wage earner to bear the brunt of the readjustment. Before resorting to that extremity, let industry be sure that every other one has been exhausted. There is plenty of slack elsewhere—careless production, inefficient management, slipshod selling. Talk of drastic slashes in American living standards and "permanent lows" in wages hinders closely on economic lunacy.

4. Don't cut loose from associated activities in business. Such shortsighted "economy" is the sheerest ex-

An address of Dr. Julius Klein, Assistant Secretary of Commerce before the Manufacturers' Association of Bridgeport, Conn., Feb. 12, 1931.

travagance at this particular stage of business readjustment. There never was a time in the last ten years when cooperation was more invaluable. No one shoves off in a rowboat from a liner in a mid-Atlantic storm to save passage money.

5. Don't ignore the amazing power of the new technology. No peril is quite so disastrous in business these days as a smug, self-satisfied assurance that present technique in production will be permanent. Our engineers, our chemists, our inventors, have never shown such relentless zeal as at present. They have largely been occupied with lifting the country out of every preceding crisis. Those industrialists who cling closely to them right now will have good reason to be thankful.

6. Don't cut marketing research. Our gravest deficiency still lies in the field of defective distribution. Our major business problem these days is not what can be made, but what can be sold. If the billions wasted there should be salvaged, even in a modest proportion this year, it will be the largest single contribution to our recovery. Closely associated with this is the need of sustained, far-sighted advertising as an invaluable adjunct to more effective and economical distribution. The stimulus, not of blatant hallyhoo, but of well-founded publicity was never more necessary than now. There can be no recovery of business with lagging demand, or unwarranted timidity of consumption.

7. Don't overlook the stabilizing value of foreign markets. They can not be exploited on short notice. Many a firm has survived this recent storm because its executives had the foresight in fair weather to plant an anchor in two or three carefully selected markets far overseas.

8. Don't fall again into the perils of mass mania, the delusion that the sole purpose of business is "businessness." Quantity operations whether in output or distribution are by no means an invariable assurance of quantity profits. The latter are indeed elusive unless that fateful margin between income and outgo is thoroughly sustained and respected (not merely suspected). The dinosaur was a first class example of mass production. But he and his kind have all been quite dead for several million years because too much of their "mass" was below their ears.

9. Don't overlook the perils of obsolete equipment. It is wiser to have the junk heap outside the factory than in it. Nearly half (48 per cent to be exact) the machinery in our over-American factories is more than ten years old. The paralysis of advancing senility is all the more dangerous because its stealthy approach is so painless, so easy.

10. Don't be stampeded by unfounded rumors. They are the fodder on which crises flourish. In these days of abundant, accurate statistical data and superb communication facilities, there is no longer any valid excuse for mischievous gossip—peddling among otherwise sensible business executives. The mendacity of every irresponsible, dangerous rumor can be and should be instantly squelched.

And it will be, as long as ours is still a business leadership of men, not mice. The time for the calamity complex has passed.

GENERAL CONTRACTORS RE-ELECT BERGSTROM

The annual meeting and election of directors of the General Contractors of San Francisco was held at the Elks Club, February 19th. The business meeting was preceded by an excellent dinner with some fifty members present.

President Bergstrom in his Annual Report outlined the activities of the past year, calling particular attention to the successful legislative campaign, not only in the City and State Government, but also in the National Government.

During the course of the evening many important matters were discussed pertaining to the welfare of the general contractor and general advancement of the building industry as a whole.

The following directors were unanimously re-elected to serve for the ensuing two year period: Messrs. A. H. Bergstrom, John Monk, J. S. Mallock and N. F. Nielsen.

At the organization meeting of the Board the following officers were chosen: A. H. Bergstrom, President; John Monk, 1st Vice-President; H. H. Hill, 2nd Vice-President; J. S. Mallock, Treasurer; C. J. Dixon, Secretary; N. F. Nielsen, J. Marshall and Chas. L. Taylor, Directors.

ITINERANT CLASS IN ARCHITECTURE ANNOUNCED BY S. C.

Emphasizing study of the latest trend in modern architecture as expressed in England, Italy, Spain, France, Germany and Holland, a traveling class is announced for this summer by the University of Southern California, to be in charge of A. C. Weatherhead, dean of the Trojan School of Architecture. Recent work in New York, on the Pacific coast, and in other American cities and sections will be contrasted with developments in Europe.

Termed a "vagabond's tour" the trans-national educational trip, available to men only, is limited to architects and students of architecture and the allied arts. Members of the party will be special guests of the Paris Beaux-Arts, the Fontainebleau summer school, and of the American Academy in Rome. Lectures will be included, as six units of college credit will be granted to those who complete satisfactory requirements.

"The tour is non-profit making and non-commercial, and is an important educational feature of the School of Architecture of the University of Southern California," states Dean Weatherhead. "Souvenir buying will be discouraged, and every attempt has been made to keep the total cost, which includes many special advantages, as low as possible. Travel in America will include stop-overs at El Paso, New Orleans, Washington, D. C., and New York City, as well as Montreal, Chicago, and other points on the return trip.

MARSDEN MANSON, ENGINEER, PASSES

Marsden Manson, 81, former city engineer of San Francisco and former member of the board of public works, died Feb. 21 after a short illness.

Manson aided in formulating the original plans for the Hetch Hetchy water project and was a prime mover in the construction of the San Francisco civic center.

His public service began as an assistant United States engineer. Later he served as assistant engineer for the state harbor commission and was president of the state highway department several years. As a member of the board of public works and assistant city engineer from 1906 to 1907 he aided in designing the park, street and playground systems. He was city engineer from 1903 to 1912. Manson was the author of several books on engineering. His widow, a daughter and a son survive.

STATE PLASTERERS CONVENE AT FRESNO

M. E. Summers, president of the Contracting Plasterers' Association of Fresno, was elected president of the California State Conference of Master Plasterers' Associations at the seventh annual convention of that organization in Fresno last week.

W. C. Scollan of Sacramento, was elected first vice-president; S. L. Lord of Long Beach, second vice-president; and W. A. Keen of Glendale, third vice-president. N. L. McKenzie of Fresno was elected treasurer and Harry Cayford, secretary-manager of the Fresno Builders' Exchange, was elected secretary of the Conference.

Executive board members, each representing a member association, are: William Makin, Oakland; C. Walker, Long Beach; R. Rineh, Glendale; Lew Hughes, Pasadena; Sidney J. Ames, southwest Los Angeles; Joseph E. Young, Santa Monica; Joe Masl, Fresno; George Federift, Los Angeles; and Joe Provenzano, San Jose.

STOCKTON BUILDERS OPEN NEW PARTS

City officials, local architects and members of the Stockton Builders' Exchange officially opened the new headquarters of that organization at 242 East Miner Ave., last Wednesday.

The affair was attended by approximately 100 persons, including City Manager Walter B. Hogan, Mayor J. Carl Tremain, Port Director Allan Councilman Raymond J. Wheeler, M. F. Richards and John Pengelly, Wm. A. Curtis, city building inspector, and T. W. Genuit, plumbing inspector; Architects Glenn Allen, John Upton Cloudsley, Howard Bissell, Victor A. Galbraith and Joseph Lossekann were guests.

L. S. Peletz, president of the exchange and Colonel Allin, city port director, were among the principal speakers.

An Italian dinner, a wrestling match and a varied program of entertainment closed the dedication activities.

Investigation of the effects of high temperatures on metals will be undertaken by the Engineering Foundation in conjunction with the American Society of Mechanical Engineers and the American Society for Testing Materials. The investigation, for which \$20,000 has been appropriated, will continue for two years.

STANDARD WAGE SCALE ON CITY WORK

Standard wage scales will be required of contractors for city work if the San Francisco Board of Public Works accepts a ruling handed down by Assistant City Attorney Henry Heidelberg.

Heidelberg ruled that there is no legal objection to placing clauses in city contracts to provide that the successful bidder must pay his workers the wages prevailing in their craft.

The opinion followed a request from the San Francisco Industrial Association for a ruling on the legality of providing in city contracts that the scale set up by the Imperial Wage Board must be followed. Heidelberg held that the Board of Public Works cannot require the wage board's scale as such, but can take this scale into consideration in determining the prevailing rates of pay.

The opinion advises that the Board of Supervisors be requested to authorize the Board of Works to include provisions for standard wages in all contracts.

STREET LIGHTING PUBLICATION ISSUED

Utilitarian street lighting equipment and ornamental street lighting equipment are described in two new publications, identified as Catalogs 218-A and 218-B respectively, of the Westinghouse Electric and Manufacturing Company, Edgewater Park, Cleveland, Ohio.

The term "utilitarian" is applied to those types of street lighting equipment in which the current is carried to the lighting units by overhead wiring, to distinguish installations of this character from "ornamental" street lighting systems, in which the energy is conveyed to the lighting units thru underground cable construction.

Each of these new publications includes general information regarding street lighting installations, descriptions and photographs of the various Westinghouse street lighting units and standards, and descriptions of street lighting accessories. Attractive covers, printed in four colors, are features of the catalogs.

S. R. DE BOER TO PLAN BOULDER CITY

Immediate construction of a full-grown city on the desert is the job before S. R. DeBoer members of the Denver, Colo., city planning commission.

He has been employed and given full responsibility for designing Boulder City at the site of the world's greatest reclamation project, Hoover Dam.

Homes, churches, schools, theatres, playgrounds, hospitals and business buildings must be built on the white, hot sands of the Nevada desert for the use of men who will build the dam and their families.

Parks for beauty and recreation must be provided, and, above all, the mistakes made in the building of other cities must be avoided because Boulder City, built by the federal government will be looked upon as a model city whether it is so intended or not.

Cross streets, except for mail boulevards are eliminated from DeBoer's plan, in the interest of economy. There will be no alleys. Space for loading and unloading will be provided by the receding form in buildings.

WHEAT STRAW USED IN PLASTER BASE

An improved plaster base is announced by the Stewart Insulo Board Corporation of St. Joseph, Mo., manufacturer of Insulo Board Insulation made from wheat straw.

The new product is known as free-expanding Insulo Lath. Patented features of the new plaster base, are said to overcome every objection to the ordinary insulating lath.

It provides for a free expanding plaster base by permanent expansion spaces. It removes the danger of cracks, bulges, or warping. With this new lath, there can be no unsightly plaster stains caused by the infiltration of air, as with ordinary wood or metal lath. It is a sound proofing material and provides insulation against heat and cold.

The free expansion is provided by leveled edges and ends which give expansion space all the way around. These permanent expansion spaces are so arranged that the space cannot be filled with plaster. Nailing slots are provided which permit slight movement without binding, eliminating bulges and warping.

With this new improved Insulo Lath, the manufacturer points out, there is no need to dampen the plaster base, double thickness of lath and quick setting plaster being recommended, especially for ceiling work.

CONTRACTOR WINS SUIT FOR PAYMENT

A judgment for \$21,689 won by J. A. Woolvin, building contractor, in the Los Angeles county superior court against the First Methodist Episcopal Church of Pasadena, was affirmed by the third district appellate court at Sacramento. The church was erected by Woolvin in 1922 and 1924. It cost about \$125,000 more than the original estimate of \$137,350. The contractor sued for the unpaid balance due for labor and materials, claiming that he had done much more than was contemplated by the original plan and specifications. A counter claim for \$56,289 was set up by the church trustees, who asserted he had been overpaid that amount. On trial of the suit, however, Mr. Woolvin was awarded judgment for \$21,689.

WESTINGHOUSE AND G. E. FORM ALLIANCE

Two of the country's largest units in the electrical manufacturing industry—Westinghouse and General Electric—have formed an alliance under the Webb-Pomerene act jointly to engage in certain phases of their foreign trade.

Subject to the approval of the Federal Trade Commission, the Electrical Apparatus Export Association has been formed by the subsidiary organizations of the two concerns, the Westinghouse Electrical International Company and International General Electric, Inc., of New York City.

H. F. A. Schoenfeld of the International General Electric Company, who will be manager and supervisor of the association, announces the newly organized association will handle certain part of the export business. What it will encompass has not yet been decided upon, he said.

The senate commerce committee on February 19 reported favorably a bill by Senator Johnson of California to provide for an annual census bureau compilation of facts concerning the construction of industry.

THE OBSERVER

What He Hears and Sees on His Rounds

Surveys are being made by the City Port Commission of Oakland for development of "North Harbor," consisting of 1720 acres lying immediately north of the Key System mole which is to be the eastern approach of the proposed San Francisco Bay Bridge. The developments will provide berthing space for 50 large vessels as well as piers, transit sheds, warehouses and similar facilities.

Moscow newspaper, commenting on American embargo on Russian lumber, reiterated assertions that charges of forced labor in the Soviet union are "ridiculous" and threaten retaliatory measures. Pravda, asserting that American action will be felt as keenly by American business as by Russian, threatens the embargo "will endanger future industrial relations between the two countries and certainly will affect the balance of trade which in 1930 was more than \$100,000,000 in America's favor."

All-steel houses, without a rivet or a bolt in them, will be manufactured in St. Louis, Mo., by the Scullin Steel Company.

In announcing the innovation, Harry Scullin, president, said long research had proven the feasibility of constructing houses in such a manner.

The metal sheets, siders and joints will be made at the plant in St. Louis and shipped in pieces. In erecting the houses, a special portable type of welding machine will be used.

Scullin estimated that the costs of such construction would vary "from 2 per cent less to 10 per cent more" than in structures of other materials, but said an appreciable saving would result due to slow depreciation and low fire insurance costs.

A proposed ordinance that would compel contractors on city projects to pay the prevailing wage scale, has received the approval of the San Francisco Board of Public Works. The proposed measure is said to have the approval of the Industrial Association of San Francisco and the labor unions.

Albert P. Greensfelder of St. Louis, president of the Associated General Contractors of America, has been advised by Secretary of Commerce Robt. P. Lamont of his appointment as chairman of the construction committee of the White House Conference on Home Building and Home Ownership.

A. E. Horst, retiring president of the Associated General Contractors, was appointed last fall by President Hoover as a member of the planning and executive committees of the conference and at that time presented on behalf of the association a comprehensive program for a general housecleaning within the construction industry.

It is expected that the conference will soon get definitely under way and that as chairman of the construction section Mr. Greensfelder will urge many of the reforms recommended in the plan submitted by Mr. Horst, the keynote of which is the placing of the design, workmanship, appraisal and financing of construction upon a sound basis.

A bill has been introduced in the New York legislature amending the general municipal law by providing that a contractor may be required to file both a performance bond and a separate bond to protect the subcontractors, material men and laborers. The exaction of such bond is now required on state contracts.

Susanville, Calif., sawmill unit of the Fruit Growers' Supply Co., opened Feb. 18 on a 10-hour day schedule with a cut in wages of 10 per cent. Forty men were given employment in the mill. Wood operations are expected to begin about April 1, depending upon weather conditions.

Merger negotiations which have been in progress several weeks last Thursday resulted in consolidation of the redwood properties of the Hammond Lumber Company and the Little River Redwood Company. The new concern was named the Hammond & Little River Redwood Company. All the properties involved are in the vicinity of Eureka.

A. B. Hammond, veteran lumber executive, was chosen president of the merged company. Harry W. Cole, until the merger president of the Little River Company, will remain with the organization in an executive capacity.

The value of properties affected directly and indirectly was estimated at about \$60,000,000.

The consolidation will give the new company more than 100,000 acres of redwood timberland, with a complete logging railway system and equipment. The Hammond mill at Samoa, Humboldt County, has a capacity of 375,000 feet per day on one shift. The Little River plant at Crannell, Humboldt County, has a 200,000-foot capacity. At Samoa there is a planing mill, sash and door factory and various equipment for allied operations, some of which is practically duplicated at the Crannell mill.

Resolutions protesting the proposed amendment of the state civil service regulations which would require all civil service employees of the state to pass examinations every four years, have been sent to the governor and the legislature by the Alameda County Civil Service Employees' Association. Passage of the bill would threaten the state with a return of the spoils system, Paul Wuthe, president of the association, declared.

The Associated General Contractors of America and the Dayton Ohio, Builders' Exchange, has arranged joint meetings between contractors, architects, building and loan associations and others in order to work out ways and means of providing any interested party with unbiased information as to the grading and quality of a residence structure.

A contractor violates the Contractors' License Law when he abandons a contract.

The State Department of Professional and Vocational Standards, which department enforces the Contractors' License Law, is now holding that if a

contractor enters into a contract with materialmen or sub-contractors for the purchase of material or for the performance of sub-contracts and does not pay for such materials or such sub-contractors that there has been a violation of the Contractors' License Law inasmuch as there has been an abandonment of the contract by a failure to pay labor and materials bills. In other words a contractor may be guilty of abandoning seven or eight contracts on one job by failing to pay labor and material bills, and the abandonment of a contract (in other words the failure to pay material or labor bills) is sufficient to obtain the cancellation of the Contractor's license.

Every contractor who fails to pay labor and material bills on his job can be prosecuted under the Contractors' License Law and prohibited from operating as a Contractor in the State of California.

Four elderly men, operating from a little office on a side street in St. Louis, Mo., are about to launch a world-wide crusade for an industrial millennium in which there will be more jobs than men to fill them, four holidays a week, and no savings accounts.

They diagnose the present industrial depression as due to too many working hours a week for the employed and offer as a solution a three-day week of 10 working hours a day, under a plan they claim will give work to 10,000,000 "idle Americans" and increase buying power \$5,200,000,000 annually.

John H. Zimmer, Washington University psychologist; William Siefert, consulting engineer; E. D. Emme, retired botanist, and Bernhard Rohmann, contractor, are the four crusaders and founders of the "three-day society."

Armed with pamphlet and a helpful letter from Professor Albert Einstein, branches will be set up in all countries, according to Zimmer. Einstein wrote Zimmer that the plan "masters the center of the problem perfectly."

"Many workers now place in banks that which is left over after they pay their living expenses. Under our plan this excess would not be available, and while incomes would be reduced, buying power would increase," Zimmer said.

Production of Portland cement in January, 1931, was 6,581,000 barrels against 8,450,000 in December and 8,498,000 in January, 1930, the U. S. Bureau of Mines reports. Shipments were 4,687,000 barrels against 5,688,000 in the preceding month and 4,995,000 in January, 1930. Stocks on hand at the end of January were 27,777,000 barrels against 25,833,000 barrels in the previous month and 27,081,000 barrels a year ago.

The U. S. Supreme Court on Feb. 24 ruled that a Russian corporation has the right to sue the United States Government in American Courts. The issue was raised on appeal by the Russian Volunteer Fleet Corporation to recover approximately \$1,500,000 for two ships requisitioned by the Emergency Fleet Corporation during the World War in 1917.

The House Military Committee has approved a bill authorizing an appropriation of \$25,000 for acquisition by the Government of timber rights on the Gigling field artillery target range in Monterey county.

HERE—THERE EVERYWHERE

Annual convention of the American Concrete Institute will be held in Milwaukee, February 24, 25 and 26.

Annual convention of the National Railway Engineering Association will be held in Chicago, March 9 to 12 inclusive.

Hayward, Calif., city council has approved proposed legislation to assign some of the state gasoline tax funds to use on city streets which are continuations of state highways.

The 1932 convention of the California Retail Hardware & Implement Dealers Association will be held in Sacramento. The convention has been held in San Francisco every year since 1927, when it was held in Sacramento.

Appointment of a commission of seven to make a comprehensive study of the hardwood lumber industry and formulate a persistent and intensive advertising and trade promotion campaign has been authorized by the Hardwood Manufacturers Institute, Memphis, Tenn. G. H. Henderson, Angelina, Hardwood Co., Keltys, Tex., is president.

A proposed plumbing and gas installation ordinance submitted to the Hayward, Calif., city council by Manuel G. Riggs, city building inspector and members of the Master Plumbers' Association, has been rejected. Some phases of the proposed ordinance would require too great an expenditure on the part of the builder, according to a majority of council members.

The San Mateo County Plumbers' and Steam Fitters' Union has petitioned the city councils of San Mateo and Burlingame to adopt an ordinance governing the installation of gas appliances. The proposed ordinance is similar to that adopted by the city of Oakland.

The Washington State Society of Architects has adopted a resolution by a vote of all support possible to bring about the action of the legislature of the state of Washington to appropriate the sum of \$100,000 for a survey for a proposed low-grade tunnel under the Cascade mountains.

An initial business license fee of \$100 will be charged plumbers, sheet metal shops and electric shops in Lindsay, Calif., under the terms of an ordinance that has been given its first reading by the city trustees. The object of the ordinance is to eliminate the possibility of the fly-by-night operators in the trades taxed.

Average prices paid by contractors for lumber delivered on the job in Los Angeles as of January 1 are reported by the Bureau of the Census as follows: No. 1 Douglas fir, 81S1E, 2x4-in. by 16 ft., \$31.50; No. 1 common boards, 1x6-in., \$30.50; No. 2 vertical grain Douglas fir flooring, 1x4-in., 10 to 16 ft., \$54.50; red cedar shingles, \$44. In a list of 19 selected cities throughout the country Los Angeles has the lowest prices for lumber except San Francisco and Seattle.

ALONG THE LINE

American Society for Testing Materials will hold a regional meeting at Pittsburgh, Pa., March 18.

Harry D. Chapman, former city engineer of Richmond, has been appointed city engineer of El Cerrito, Contra Costa County, succeeding Ross Calfee.

Chas. H. S. Pratt, 69, manager of an Oakland paint concern, is in the St. Francis Hospital, San Francisco, suffering from results of a paralytic stroke while on the train returning from a Solut's meeting at Glendale.

William Yorum, a member of the staff of County Surveyor George A. Fosdy of Alameda County, has been made principal assistant engineer following the resignation of Walter Boggs to enter private practice as a civil engineer.

John Bell, for many years president of the San Francisco Building Trades Council and former president of the Wood, Wire & Metal Lathers International Union, died in San Francisco, February 15.

Melvin G. Wilson, a member of the general contracting firm of Wilson & Nutwell of Fresno, is a prospective candidate for the office of city commissioner of Fresno at the municipal election in that city on April 13.

R. W. Evans has been elected president of the Stockton Chapter, American Association of Engineers for the coming year. He succeeds Harold A. Walker, retiring president. Other officers are Max Paul, vice-president, R. M. Brittain, secretary-treasurer; H. A. Walker, J. B. Manthey and F. C. Mitchell, executive committee.

An investigation committee appointed by the Stockton Architects' Association has unanimously approved the proposed major street plan for that city as outlined by the City Planning Commission. An intensive study of the tentative plan was conducted by a group consisting of Peter L. Sulu, Victor Gahrath, Glenn Allen, Ralph P. Morrell, J. U. Clowdsey and Howard G. Bissell.

Formation of the Arundel-Atkinson Construction Corporation for the purpose of bidding on the work for the construction of Hoover Dam is announced. It is stated that the new corporation will represent the combined forces of the Arundel Corporation, of Baltimore, and Lynn H. Atkinson, of Los Angeles.

A delegation of fifteen contractors recently attended a city council meeting at Merced, urging adoption of a new building code to be "more flexible" than the present one. Under the new ordinance it is proposed to give the building inspector discretionary power. Incompetent contractors would be barred from work in the city under the contractors' plans.

Harry P. Brigarets, general vice-president of the International Electrical Workers' Union, was a recent visitor in San Jose.

TRADE NOTES

Continental Building Specialties, Inc., 408 S. Spring St., Los Angeles, has been selected as Southern California representative and distributor for the Campbell Industrial Window Co., Inc., of New York City.

Pacific Coast Cement Co. has promoted Darwin Meisner, of Seattle, to the position of vice-president in charge of sales. He was formerly sales manager.

Harold P. Plummer, formerly in charge of eastern sales for the Union Lumber Company, is now general manager with headquarters at San Francisco.

Universal Power Shovel Co., Milwaukee, Wis., has appointed the B. Hayman Co., Los Angeles, Southwest distributor for shovels and material-handling equipment.

Negotiations for the merger of the Victor Welding Equipment Company of San Francisco, and the Kimball Pump Company of Los Angeles, will be completed within the next thirty days, according to reports.

The business of the Payne Hardware Co., 81-85 E. Santa Clara Street, San Jose, has been purchased by Lane M. Dorr, Wayne E. Chandler and W. G. Hesson, all of San Jose. Both Dorr and Chandler were associated with the Payne Hardware Company for 11 years.

Long Beach building trades unions are fairly well on the five-day week schedule. The painters have voted for the proposal and the bricklayers, hod carriers, plasterers, sheet metal workers and plumbers are said to be following in order. Five of the largest unions to have adopted the 5-day week plan following conferences with officials of the Electrical Workers' local union.

California State Conference of the Plasterers and Cement Finishers will be held in Oakland, March 14, and continue in session for two days. The delegates will attend the opening session of the annual convention of the State Building Trades Council in the Hotel Oakland on Monday morning, March 16.

Raymond Concrete Pile Co., New York City, has opened a Northwest office in Seattle, Wash., in charge of George H. Tutley, district manager.

January wholesale prices of six standard plumbing fixtures for a six-room house, as ascertained by the Bureau of the Census from reports of 12 representative manufacturers and wholesalers, averaged \$99.26 as compared with \$98.52 in December, 1930, \$100.55 in January, 1930, and \$100.20 in January, 1929.

High school districts would be put in the hotel business if a bill by Assemblyman George R. Bliss of Santa Barbara County is adopted by the state legislature. Bliss provides that any school district may construct and maintain dormitories for use of pupils in attendance at the high school, and shall fix rates of payment for this service.

INDUSTRY CANNOT THRIVE ON FRAUD OR USURY SAYS AUTHOR OF BUILDING FINANCE MEASURE

(By J. W. Morin, Author of the bill for Regulation of Building Finance and Author of the Contractors' License Law of 1929)

The new proposed law for the regulation of building finance does not affect or touch the Mechanic's Lien Law. If the Mechanic's Lien Law is satisfactory to present day business, get what comfort you can out of it. It assists you in an effort to collect back what you have lost, maybe, but this proposed new law affords a diligent man an almost sure preventive of loss, by enabling him to determine in advance of furnishing labor, material or even purchasing the building finance paper, an answer or method of ascertaining answers to the following questions:

1. Who owns the property, and where they live.
2. The extent of the so-called owner's title, whether in fee or merely on lease-string.
3. The general character of the building project and how much it is proposed to spend thereon.
4. What encumbrances are already against the property, and the meaning of the encumbrances, whether real money is available and when and by whom to be furnished, and where these people may be found, and whether or not the loans represent the satisfaction of various miscellaneous previous personal obligations, previous real estate transactions, purchase price of the property itself, second hand automobiles, or cats and dogs, or capital for the new building enterprise. (The mere record of the encumbrance under present existing laws answers none of these questions).
5. By requiring a statement of exactly the extent of the cash available, and when and how, this new law, if adopted will smoke out the dummy and usurer. Neither of these factors in the building project are conducive to its success.
6. As conclusions from the foregoing,

an intelligent reader of the foregoing set up, knowing the character of the project and figuring the extent of the money available and the terms upon which it is available, can determine immediately as to whether or not the job is already financed, or is just a scheme.

The new proposed act does not bother the money lender, nor he who builds on clear property, nor require him to make any statements, nor take any new chances. Surely, legitimate, bona fide money lenders would not willingly ask a money borrower to misrepresent the conditions under which the loan is available, and invite society to participate in a game in which the dice are loaded.

There are only two classes of people opposed to the idea of this new proposed law; first, those who do not understand the problem which it is designed to meet; secondly, those who are so foolish as to believe that any industry can thrive on either fraud or usury.

In general you can only reap where you sow, and this is as true of finance in the building industry as it is under any natural law. It is only the money that goes into the building which will furnish a genuine resource in giving stability to the industry. You may postpone, you may equivocate, but you must ultimately face this natural law and comply with it.

Moreover, money lenders, even though they be conservative, who are depending upon holding escrow agreements at variance from the recorded loan agreement, or the record, are living in a fools' paradise, and are liable at any time to suffer great loss, even under existing law, when this abuse of business method is presented to a court of last resort.

NEW PROPOSED LAW FOR THE REGULATION OF BUILDING FINANCE

By J. W. Morin, Author of Contractors' License Law of 1929

(NOTE: This bill was introduced in the State Senate in January, 1931, but it is proposed to modify it by the addition of the words and phrases shown in black face type.)

An act defining building loans and providing for recording a statement of the condition of title and the arrangements for financing of the proposed construction or improvements on real property, providing for the clearing of said record, and providing for the punishment of the violation of the terms thereof.

The people of the State of California do enact as follows:

SECTION 1. Any contract or arrangement between two or more persons, firms, or corporations, whereby an obligation is secured by a mortgage or deed of trust, or other conveyance of, or lien upon, real property, upon any contract, arrangement, or understanding whereby any portion of the consideration for the creation of said obligation is to be paid, furnished or advanced subsequent to the beginning of any work of improvement upon said real property, or conditioned upon the improvement thereof, as hereinafter referred to, is hereby defined as a building loan, and a statement designating it as such building loan shall be made within the in-

strument and as a part thereof, prior to the recording thereof. Consideration is to be deemed as advanced or rendered under the terms of this Act only when it has been wholly delivered into the unrestricted possession or control of the borrower.

SEC. 2. No owner of real property which is subject to the lien of a mortgage or deed of trust shall begin an improvement thereon in the construction, alteration, addition to or repair, either in whole or in part, of any building or structure, or any grading or other work of improvement upon said lot, parcel or tract of land, unless said owner, or his representative who has knowledge of the fact, shall, within ten (10) days next immediately preceding the beginning of said improvement, record in the office of the County Recorder of the county wherein said land is situated, a written statement to be termed a notice of intention to improve real property, verified on the oath of the owner or said representative, setting forth the following facts:

The legal description of the real

property upon which it is proposed to make said improvement; the name and address of the record owner; the nature of the record owner's title, whether in fee, as trustee, or otherwise, as contract purchaser or otherwise; the general character of the proposed improvement; the amount which is proposed to be expended thereon; the names and addresses of all persons, firms or corporations, so far as known, who hold encumbrances against said real property other than encumbrances, liens or taxes created by the operation of public improvement statutes and ordinances together with a statement as to which of said encumbrances, if any, are building loans, as herein defined, and as to whether or not the entire consideration for said stated encumbrances has been already advanced or rendered, or if not, the name and address of the person, firm or corporation by whom, and the amounts of and the terms and conditions under which, any future advances or other consideration is to be rendered or advanced, including the amount and character of any advances which are to be made, at the option of any party to any encumbrances.

SEC. 3. A verified statement, executed by the owner of any improvement herein referred to, or of the representative of said owner, as hereinabove provided, which shall identify any notice of intention to improve real property theretofore recorded, and shall aver that such project was abandoned before the beginning of the furnishing of any labor or materials thereon, from the time when said notice of abandonment of improvement shall have been recorded in the office in which the notice of intention was previously recorded, shall be deemed prima facie evidence sufficient to terminate the effect of any record of the notice of said intention to improve theretofore recorded.

SEC. 4. Nothing herein contained shall be deemed to require the recording of such notice of intention to improve real property in the case of work initiated under the authority of any state or any county, city and county, city or other political subdivision, whatsoever, or shall constitute, herein, any cause of action, or any work of improvement upon the operative property of a corporation under the regulation of the state railroad commission, nor in case of any work of improvement wherein the entire project, or scheme of improvement as a whole, shall involve a total expense of less than five hundred dollars.

SEC. 5. Any person, firm or corporation violating any of the provisions of this act, or procuring another to violate the terms of this act, shall be guilty of a misdemeanor.

SEC. 6. If any section, subsection, sentence, clause or phrase of this act is held by any court to be unconstitutional, such decision shall not affect the validity of the remaining portions of this act. The legislature hereby declares that it would have passed this act and each section, subsection, sentence, clause and phrase thereof, irrespective of the fact that any one or more sections, subsections, sentences, clauses or phrases be declared unconstitutional.

Legislation designed to raise the educational qualifications required of engineer applicants for license in New York State was introduced by the New York State Society of Professional Engineers at its regular winter meeting. The convention also gave its approval to the by-laws recently adopted by the state board of examiners in which a comprehensive act of winter examinations for applicants not graduates of recognized engineering schools is outlined.

MEASURE REGULATING BUILDING FINANCE WILL BENEFIT INDUSTRY

(By George W Israel, Secretary-Manager, Pasadena Builders' Exchange)

With the "Declaration of Intention to Improve Real Property" made a law, the various construction organizations, credit concerns and other organizations working for the benefit of the building industry and building while will have an asset for quick reference which will make membership in these organizations, indispensable to all worthwhile concerns. With the changes in the Contractors' License Law completed, together with Lehman's changes in the Lien Law, the cut throat concerns will fast disappear and the builders' business will wake on a semblance of sanity.

In submitting to the building industry the proposed act defining building loans and providing a method for the recording of a "Notice of Intention to Improve Real Property," the intention of the industry is called to the fact that no existing legislation in this subject matter seems in any way adequate to protect the masses of material men and the masses of investors as they actually exist in large numbers throughout the State, living due allowance to the lack of legal training.

The whole purpose of the Mechanic's Lien Law as it has stood in California for more than two generations has been subverted by a type of slickness which is on the border line of a rascal and a builder, partakes a title of both but is not either a bona fide material man or a bona fide builder. His type of citizen has become especially prominent in the last ten years, he was occasionally seen as far back as nearly twenty years ago and was very uncommon at that time. He has learned and is teaching others to believe they are good citizens to start the building of buildings without money, getting his real estate from

one direction, his materials and labor from his wife, and his money from various sorts of people who are attracted by a promise of from eight to twenty-five per cent interest together with elaborate discounts from the face of building paper.

Regardless of theories it is practically impossible for an outsider to a building project to determine with any accuracy what are the actual agreements and understandings under which the speculative structures are built. A natural practice of the building industry, therefore, must either turn down business which may look a little suspicious or take a chance and then wait to see whether or not they will lose their money at the final wind-up of the enterprise. It would seem to be much more reasonable that the true character of the enterprise be brought out into the light by a statement necessarily giving it its true character as black or white before construction begins rather than that these huge chances be taken by society and the situation developed as a salvage proposition rather than the application of preventative measures before a loss has occurred.

It is true that there are through the application of legal technical matters by which many irregular building loans can be beaten by the construction industry through litigation, but most of these cases are just 50-50 chances and seldom ever can a building material man actually show a profitable operation on his books even from a successful experience in a complicated law suit. The political world has been devoting a great deal of thought in the past ten years to the prevention of war. The business world must do the same.

and materials furnished, and for the value of the use of such appliances, trains or power, . . .

It is difficult to see, if the facts in the particular case are as above set forth, how there could be any room for question that the contractor in this case did supply both labor and materials, and his service in the improvement of the property of another from a contract giving him the right to do so along with the right to be reimbursed therefor. It is equally difficult to understand on what theory it could be held that, under the law, he was not entitled to assert and enforce a lien for the value of the labor, materials and services so applied.

It is understood that a lower court in California in the particular case has held that the lien laws of California give the contractor no basis in the particular instance. It is likely such ruling is predicated on a very old California case (Godfrey v. Caldwell, 2 Cal. 489) decided in 1852 holding that the mechanics' lien law then in effect provided exclusive security of the material men and laborers; and that one who merely advanced money alone, although the money was expressly used for the payment of materials and labor devoted to the erection of a building, had no claim to the benefits of the law.

But the facts of that case, as they are understood, could have little, if any, application to the facts of the present case. There, the party claiming the benefit of the law had merely made a loan to the owner—here, the party claiming the right to enforce a lien, while he made an advance of money, such advance was not to the owner, but was rendered to him, the contractor, in providing labor and materials under his contract.

The case cited is the only one in California that has been found on the subject of advance of money. The facts of this case are more nearly those in Barker & Stewart Lumber Company v. Marathon Paper Mills, 146 Wis. 12, where a material man, as a convenience to the contractor, advanced the freight on the materials sold by him to the contractor. In that case, it was held that he was entitled to maintain a lien not merely for the value of the materials but for the freight charges paid thereon. There are many similar cases in the courts of other states.

The question stated comes down to this. Did the contractor make a loan to the owner, or did he supply labor and materials in the improvement of the owner's property? In the former case, he would have no right in the mechanics' lien laws of California. In the latter case, there is scarcely room for question that he had such right if he proceeded thereafter in accordance with the requirements of law.

LABOR ENDORSES EMPLOYMENT BILL

Labor organizations are urging the passage of Assembly Bill No. 124, by Assemblyman T. M. Wright, San Jose, prohibiting employment agencies, from charging a commission for work given on any public project.

This measure, it is pointed out, will curb the business of employment agencies which collect a large percentage of their incomes from fees paid by workers on public construction projects.

The bill also specifies that contractors engaged in highway or building construction for the state, county or city cannot hire workers through employment agencies charging fees.

It would mean that all labor for public projects would be employed through state or county labor bureaus or by the contractors directly.

CONTRACTOR'S RIGHT TO COLLECT FOR WORK UNDER CALIFORNIA LIEN LAW CITED

Is a contractor for work done in California under a cost-plus form of contract entitled to maintain a lien on the building partially completed under his contract for the amount of moneys advanced by him and expended for labor and materials in the prosecution of the work together with an agreed fee on such expenditures?

The above question was asked of Herman J. Galloway, legal editor of the Constructor, national publication of the Associated General Contractors of America.

The facts of the case are summarized as follows:

A California contractor entered into a cost-plus contract for the building of a country club. The promoters of the club were unable to supply moneys needed and the contractor advanced funds of his own and went ahead with the work. The club failed to reimburse him for the advances made or for the agreed fee on the amount expended, and the work was finally stopped. It is assumed that the work was stopped without fault on his part. It may be assumed also that he might have quit when it developed that the club was unable to supply funds for the continuation of the work.

Mr. Galloway answers as follows: Mechanics' and builders' liens are

modern developments that were unknown at common law. Such matters are regulated entirely by statute, and the rights of parties extend no further than as provided by the law of the particular state in which the question arises. This was held many years ago in the case of Canal Company v. Gordon, 6 Wall. 551. It has likewise been so held by the courts of most of the states (Royal Theatre Company v. Collins, 102 Ark. 533; Doll v. Young, 149 Ky. 347; Lamh v. Goldfield, 37 Nev. 9). The lien laws of California have been repeatedly construed and their various provisions held valid (Scheerer v. Deming, 154 Cal. 138; Mendenhall v. Gray, 167 Cal. 233; Gannahl v. Weinsveig, 168 Cal. 664; Rystone v. Darling, 171 Cal. 526). The California laws, therefore, are to be looked to as determinative of the rights of the parties here involved.

The California code provides that: "Mechanics, material men, contractors . . . and all persons and laborers of every class performing labor upon, or bestowing skill or other necessary service or furnishing materials to be used, or consumed in . . . of any building, wharf, bridge, ditch, flume, aqueduct, well, tunnel, fence machinery, railroad, wagon road or other structure, shall have a lien upon the property upon which they have bestowed labor or furnished materials, for the value of such labor done

DEVELOP LUMBER SALES VIA RESEARCH

Research for the development of the marketing side of the lumber business was emphasized at the annual meeting of the West Coast Lumbermen's Association at Tacoma, Wash. Efficiency in production has reached a high point and the need of the hour is promotion of sales.

President J. D. Tennant in his annual address said:

"We, who can not spend 10 or 20 cents a thousand for the purpose of developing markets for our products, can pass to the buyer three nice, new \$1 bills along with each one thousand feet of our product that he takes from us. This is the penalty that we pay because we are not prepared to defend ourselves in this great war of building materials, in the mad scrap to get our share of the American dollar."

YOUNG RADIATOR ISSUES CATALOGUE

The Young Radiator Company, Racine, Wis., has published a new booklet No. 11-1230, describing their complete line of unit heaters ranging from No. 162 smallest size to their No. T-2512 largest. This line includes suitable units for heating small rooms to the largest buildings and factories, with special equipment for garages, warehouses and airplane hangars. Both single speed motor units and multiple speed units are shown, also single motor and dual motor installations. Complete efficiency tabulations are given as well as installation diagrams on the various and complete line manufactured by this company.

BUILDING TRADES TO MEET IN OAKLAND

Oakland is preparing to welcome delegates to the 21st Annual Convention of the State Building Trades Council of California to be held in the East Bay city, commencing March 15. The Hotel Oakland will be the center of convention activities.

Contemplated legislation, unemployment, immigration, the building industry and organization, will be among the topics of discussion.

Factors responsible for the stagnation of the building industry will also be considered and methods of inaugurating building programs will be offered for consideration.

STANTON HEADS EMPLOYEES' ASS'N.

T. E. Stanton of Sacramento, engineer with the State Division of Highways, was elected president of the California State Employees' Association at the annual convention of that body in Sacramento.

Other officers elected were: Vice-president, E. J. Callan of San Francisco; secretary, Earl W. Chapman of Sacramento, and treasurer, W. J. Byrne Jr., of San Francisco.

Members of the standing committee elected include the following: Legislation, F. J. Grumm of Sacramento; ways and means, L. A. Moisan, Patton State Hospital; civil service, F. A. Taylor of Sacramento; membership, Douglas Campbell of Los Angeles; auditing, C. E. O'Connell of San Bernardino; retirement, Kathleen McClellan of Los Angeles; law, Jess Hession of Sacramento, and publicity, E. R. Higgins of Sacramento.

ENGINEERING SOCIETIES EMPLOYMENT SERVICE

Further information regarding positions listed in this column is obtainable from Newton D. Cook, Room 715, 57 Post Street, San Francisco. (Phone Sutter 1684).

R-3496-S SALESMAN, experienced mechanical, to handle all mechanical appliances for electrical companies. Good opportunity for man who will work the territory. Salary and bonus. Apply by letter. Location, Monterey County.

R-3495-S WELDING ENGINEER, young man with some technical education and skilled with welding torch, for service work for manufacturer of non-ferrous welding rods. Salary open. Location, California.

R-3487-S SALESMAN, experienced, with engineering background and training, for complete line of industrial heat control equipment. Should be acquainted in Los Angeles and San Francisco. Salary open. Apply by letter. Headquarters, San Francisco.

R-3489-S ENGINEER-SALESMAN, technical graduate, preferably mechanical with considerable diversified experience qualifying as physical testing engineer to sell for well established manufacturer of testing machines and devices. Must be willing to travel. Compensation, drawing account and commission. Apply by letter with details of experience. Territory, Midwest. Headquarters, East.

W-2265 ENGINEER, to set up a complete plant for the galvanizing of sheet and to instruct permanent staff in the operation of the plant. Practical experience in the operation of sheet galvanizing machinery essential. Knowledge of Spanish an asset, but not a necessity. Apply only by letter. Location, Mexico.

R-3491-S METALLURGIST, technical graduate, not over 35, for research department of company whose operations require the use of ferrous and non-ferrous metals. Prefer graduate metallurgist with at least 2 years' engineering experience, or mechanical engineer with post-graduate work in metallurgy. Salary \$200-300 mon., depending on experience. Apply by letter with references and photo. Location, San Francisco.

R-3470-S MECHANICAL ENGINEER, preferably over 35 years old, with several years' experience as production engineer in the employment of company manufacturing farm machinery. Only the full time considered. Man will be paid on a charge of small shop and office after demonstration of ability to produce results. Must be willing to accept small salary to start. Apply by letter with full details of experience, etc. Location, San Francisco.

R-3363-S ENGINEER, preferably mechanical or chemical graduate, with 5 to 10 years' experience including considerable application of thermodynamics to solution of heat exchange problems as found in oil refinery equipment. Must have executive ability. Apply by letter with details of experience, references and photo. Salary \$200-250 per month to start. Location, Northern California.

K-332-W-2034-C-S PROFESSOR of printing for school of industrial engineering; preferably mechanical engineering graduate with broad experience in printing. Position will involve research and application to courses in craftsmanship training. Salary \$5000 a year. Apply by letter with full details of experience, references and photo. Location, East.

ences and photo. Location, East. W-1984-C-S MECHANICAL ENGINEER, graduate for design of Diesel engines. At least 5 years' experience essential. Contract for 2 years renewable. Salary open, one-half to one-half in paper rubles for living expenses, balance in U. S. money to American bank. Application, only by letter which will be forwarded to Moscow for decision. Location, Russia.

R-3484-S ARCHITECTURAL Draftsman, skilled in pen and ink rendering to turn out good working drawings of simple type suitable for publication in bulletins. About 4 month work. Apply by letter with personal data, salary expected and samples of work. Location, Northern California.

R-3467-S STENOGRAPHER, with several years' experience in office of paving contractor or department of public works where she would have learned street improvement assessment and tax problem. Must have executive ability. Salary depends on experience. Apply by letter. Location, San Francisco.

R-3262-S ENGINEER, preferably mechanical or chemical graduate, with 5 to 10 years' experience, including considerable application of thermodynamics to solution of heat exchange problems as found in oil refinery equipment. Must have executive ability. Apply by letter with details of experience, references and photo. Salary \$200-250 per month to start. Location, Northern California.

K-340-W-2251-S REFRIGERATION Engineer who has had at least 5 years' experience in the preparation of specifications and design installation and servicing of refrigerating and ice making plants 1 to 100-ton capacity. Single man about 30 preferred. Four-year contract with option of renewal if services are satisfactory. Salary about \$300 a month and traveling expenses to and from China. Apply by letter. Headquarters, New York.

FUTURE HOMES TO BE OF STEEL

That the houses of the future will be built entirely of steel, equipped with automatic ventilating system and using windows only for lightness was the prediction of J. M. Schindler of Massillon, O., a speaker at the Western Metal Congress and Western Metal and Machinery Exposition.

"Scientists have been looking 4 years for a steel that would stand the test of weather without rusting," said Schindler. "Today they have found a perpetual metal which, like perpetual motion, should last forever."

"It is steel mixed with chromium a metal that can resist every kind of weather without showing any ill effects. It will not rust or wear."

Schindler also declared soundproof walls would be used in steel building to prevent the possibility of disturbing neighbors. The houses, he said, will be built after the style of today stucco frames, and will be rust proof.

dispatch from Philadelphia, Paul I. Cret, architect, on Feb. 23 received the Philadelphia award, the famous civic honor. The award, a prize of \$10,000 and a scroll in an ivory case, was established in 1921 by the late Edward W. Bok, Philadelphia editor.

New orders booked during the 4th quarter of 1930, as reported to the Bureau of the Census by 81 manufacturers of electrical goods, were \$155,546,657, as compared with \$217,818,078, for the 3rd quarter of 1930, at \$288,696,415, for the 4th quarter of 1929.

EFFECT OF NON-COMPLIANCE WITH LICENSE ON CONTRACTORS RIGHTS, CITED BY ATTORNEY

By Sylvester Hoffman, L. L. B., Member of Los Angeles Bar, in the Southwest Builder and Contractor

X, a contractor or subcontractor, either while his license is suspended, or before receiving a license, furnishes labor, and is not paid. Within the time provided by law, he files a claim of lien, and then brings a timely action to foreclose the lien, and asks for personal judgment for any deficiency. Assuming that the defendant properly pleads the non-compliance with the "Contractors' License Act" (Chap. 791, Stats. 1929, p. 1591, seq.) which is the only defense, can X recover? Would the result be any different if after the contract was entered into, or the work commenced, the license of X was revoked or granted? If X is a subcontractor, and had complied with the act, but Y, the general contractor, did not, would X have a valid claim lien, which he would be entitled to foreclose?

Unlawful Act Bars Claim

So far, there are no adjudicated cases directly deciding these presently problems; but the appellate courts in this state have frequently passed on similar situations, and if the case could arise, would undoubtedly hold at X could not recover.

Sections 1 and 12 of the Act make it unlawful, punishable by fine or imprisonment or both, "to engage in the business or act in the capacity of contractor," the word "contractor" including subcontractors, but not mailmen (Sec. 3), without a license, while a license is suspended. The courts have held repeatedly at where the consideration is itself unlawful, but where the law will not permit the contract to be made, because of the legal incapacity of one of the parties to contract, the courts will refuse to enforce it. The contract of the other party to the contract cannot neutralize its illegal effect.

Position of the Court

A contract which is made for the purpose of furthering any act prohibited by law, or to aid or assist in it, is void and unenforceable. If the plaintiff cannot open his case without showing that he has broken the law, the courts will not assist him, whatever his claim in equity may be upon the defendant. If, while as a matter of private dispute between individuals, it would only fair that one under such legal contract should restore the consideration or pay the reasonable or agreed value for what he received, the rights of the public are superior to any such private considerations. And where a statute pronounces a penalty for an act, a contract founded on such act is void, although the statute, as in some cases, does not pronounce it void, expressly prohibit it. Thus, where a city councilman was employed by the S. Co. as sheet metal foreman, the S. Co. was not entitled to collect on a contract with the city of Stockton, although it was the best bidder, had at all times acted with utmost good faith, and fully performed its contract, where a statute prohibited a city councilman from being "interested" in any contract, and

the violation thereof was made a misdemeanor.

Other Applications of Rule

Likewise, the courts have held since as early as 1889 that where a physician performs services without being licensed, and such act makes him guilty of a misdemeanor, he cannot collect from his patient, on grounds of public policy. The same rule has been applied, alike, to architects, pawnbrokers and real estate brokers. The courts have gone so far as to hold that where one sells goods, without a license required by a city ordinance, which makes a violation thereof a misdemeanor, the seller cannot collect.

Furthermore, the situation is not changed if subsequent to the time the contract is entered into, a license is procured, if the doing of the act was made unlawful.

Effect of Penalty

As the supreme court of California has said, "When the object of the statute in requiring a license or certificate for the privilege of practicing a particular profession or of carrying on a certain business is to prevent improper persons from engaging in that business, or is for the purpose of regulating it for the protection of the public, the imposition of a penalty amounts to a prohibition, and a contract made by an unlicensed person in violation of the statute is void," and that a subsequent compliance with the statute will not cure the illegality of the previous contract.

It will be apparent, therefore, that X, whether a contractor or subcontractor, if, at the time the contract (whether oral or written) was entered into, was not licensed under the Act, or his license was suspended, cannot enforce his lien or payment of the price, even though the work was fully performed and the owner of the land secured the benefit of the work.

But if X is a licensed subcontractor, who has complied with the Act, but does the work under a subcontractor from Y, the general contractor, who has a written contract for the entire work from the owner, has he a valid, enforceable lien against the property, where Y is not licensed?

Y, being unlicensed, cannot enter into a valid contract with X, and hence the contract between X and Y is void. Generally, if the contract is not binding, the right to claim or enforce a mechanic's lien fails. So, prior to the amendment of Sec. 1183, C. C. P., in 1911, where the building contract exceeded a certain sum and was not recorded, as then provided by that section, the right of lien was held to have been lost. On the other hand, the appellate courts have generally held that any invalidity of the contract because of non-recording, under that section as then in effect, did not affect the subcontractor's right to enforce his lien.

There is also considerable doubt whether an owner might sue a non-licensed contractor for faulty work or other damages (such as wrongful abandonment of the work), even though the contractor cannot sue the owner. The solution will have to wait until such a case directly arises.

ENGINEERS OF SAN JOSE NAME COMMITTEES

William D. Lotz, consulting structural engineer, discussed "Mathematics, Engineering and Common Sense" at the regular meeting of the San Jose Engineers' Club last Tuesday.

Describing the history of mathematics, he showed how the development of engineering has depended largely upon the extension of mathematical calculations.

President Samuel Lavery, presiding for the first time since his election a week ago, announced the appointment of the following committees: Admissions, Stanley Chapman, chairman; William Ball, Robert Lotz, Bruce Rothwell, J. W. Halberg, A. V. Malberg and J. J. Byrne, Auditing, A. B. Rae, chairman; H. A. Weigand and Dan Morrison, Social sessions; W. H. MacLean, chairman; Wm. L. Popp, Roy H. Deane and Geo. Easter, Publicity; M. H. Antonacci, chairman; Mark Thomas, A. N. Christensen and Floyd Bohm.

Attendance: Mark Thomas, chairman; W. C. Tustin, Harold Flannery, C. M. Kerr, B. H. Skillings, and Ross Van Gundy. Laws and regulations: John W. Ford, chairman; Frank Herrmann, E. C. Morrison, Welfare: Wm. D. Lotz, chairman; R. W. Fisher, P. E. Ling, Port San Jose: H. N. Bishop, chairman; M. H. Antonacci, H. C. Darling, Sports: Russell Brady, Robert Lotz and Wm. H. Ball. Reception: C. M. Kerr, chairman; H. A. Weigand and A. E. Rae.

MATTOON ACT PROMPTS PROTESTS

A committee of five has been named by the San Mateo and Burlingame chambers of commerce to protest to the San Mateo County Board of Supervisors any further use of the Mattoon Act, under which proceedings were carried through for the San Bruno, Loma Park and South San Francisco sewer district.

Members of the committee are J. E. McCurdy, F. M. Johnson, Frank Burrows, Henry Maier and T. J. Hallman.

Objections to the Mattoon Act centers around the fact that the burden of any delinquencies which may occur is thrown upon the remainder of the improvement district formed. Bonds issued to pay for improvements cannot be called in until the expiration of a 30-year period.

COLORED CONCRETE FEATURED IN BOOKLET

"Concrete Facts For Concrete Contractors," a new booklet just published for free distribution in the United States and Canada to builders, contractors and others doing concrete work around homes, schools, parks, playgrounds and industrial plants, includes the latest information on the modern methods for making quality concrete. The booklet, available on request to the Portland Cement Association, 33 West Grand Avenue, Chicago, Illinois, deals with concrete making, including facts on colored concrete, special surface finishes, forms, watertight concrete and cold weather construction. The methods described in the booklet are thoroughly practical and are being used by an increasing number of present-day contractors who are producing high quality concrete.

Associated Equipment Distributors has selected as president for 1931 Oscar B. Bjorge, manager of the Clyde Equipment Co., Portland, Ore.

CALIFORNIA MATERIAL DEALERS FORECAST CONSTRUCTION GAIN

That at least 40 states, including California, will share in continued large-scale highway paving and resulting employment this year, and that a gain in residential building is expected in various regions, including several population centers, are indicated in a national survey of building dealers' forecasts for 1931.

This survey, just completed by the Universal Atlas Cement Co., a subsidiary of the United States Steel Corporation, presents replies of 2,300 dealers in 46 states to the question, "How will 1931 construction compare with 1930 construction in your community?" Replies of "less," "same," and "more" were received on eight classes of construction.

A surprisingly emphatic note of optimism for the new year was sounded by the 27 dealers replying from New York City, famed as the weather-vane of business health and supposedly one of the gloomiest spots on the present business map. "More" led in every classification, except in highways, where one of four, in farm construction, and the city-wide total on all questions was "less," 25; "same," 48; and "more," 83.

Residential construction gains were predicted not only throughout New York State, but in Massachusetts, Connecticut, New Jersey, eastern Pennsylvania, Florida, West Virginia, Wisconsin, northern Illinois and California. For the entire country there were 1559 replies of "same" or "more" in this class and 708 of "less."

Despite the huge road-building achievements of last year, still great-

er activity was predicted for 1931 by the dealers of 17 states, with Louisiana, South Carolina, Georgia, Massachusetts, Alabama, New Jersey, California and New York leading in the indicated degree of gain. Continued large-scale highway work was anticipated in every state except Tennessee and sparsely-voting Rocky Mountain region.

The next greatest prospect of construction improvement was foreseen throughout the country in residential building, as noted above, and the third in farm construction, with farm gains anticipated in Indiana, Wisconsin, Iowa, Washington and Massachusetts. Then followed in the order named, public building construction; street paving, public utility construction; sewer and waterworks construction, and commercial building.

The country-wide total on all issues: "less," 5,601; "same," 7,871; and "more," 2,873, indicated that 66 per cent of the dealers answering foresee no further construction decline. Seasonal optimism, as shown in the combined percentages of "more" and "same," was greatest in the New England, Middle Atlantic and Pacific States, with the Great Lakes region next, and the Northwest, South Atlantic, Southwest, and South Central states trailing.

California dealers promised large gains in residential building and highway paving; also increases in utility and public building construction. Highways led in Oregon, and commercial, residential, farm, street and public construction in Washington.

RELATION BETWEEN RETAIL DEALER AND MANUFACTURER

Address of Ernest L. Clements of the Hayward Building Material Company at the annual meeting of the Retail Building Material Dealers Association of Northern California, in San Francisco, December 12, 1930.

While it is customary among speakers, other than political, to admit their weakness and to apologize for it at the very beginning of their talk, no excuses or alibies whatever shall come from me while dwelling upon this, my pet subject, "Relation Between Retail Dealer and Manufacturer." Your speaker firmly believes that to succeed in the business of retailing building material one must be different from most business men; that is, he must stand out—head and shoulders above the crowd as a business man. We all know that the larger percentage of retail businesses barely afford its owner a decent living, let alone a real profit for his effort.

We can all agree upon the reason of our being in the retail building material business—profit—that is, a substantial profit above what we might expect from personal services. Therefore, the answer as to what constitutes success is no stranger to us. But, Gentlemen, the question, that brings us all to our feet at the same time, clamoring to be heard, is the one concerning the method or principle which will keep us on the straight and narrow road leading to success.

This road, Gentlemen, is beset with many things to lead us astray. The one which causes more business failures than any other is improper financing. Over-investment in plants and equipment, as well as over-investment in receivables, have caused

heavy losses, but the biggest boggy of them all is the lust for volume. The desire for mere volume has undoubtedly played havoc with many well-organized firms. Many unthinking business men have been led to believe that volume meant profit and success. We do not have to look far to see the effect of this sort of thinking.

While these matters are of weighty importance to us, we have still another that stands in the front rank, just a head taller than its fellows, although it is of times seen to occupy space in the rear rank, doing its best to appear unimportant and that, Gentlemen, is the relation between dealer and manufacturer.

We are fully aware of the fact that either is absolutely indispensable to the other—and happily, most manufacturers share this view with us, although they are none too willing to admit this absolute dependence. This is evidenced, however, by their constant courtship. They well know that it is the steady flow of material thru the dealers that enables them to pay their overhead and operating expenses the year around. Then when a large job comes along they (that is, some of them) want to go out and sell direct to the contractors at a price which leaves us out of the picture so far as any commission is concerned. When approached about it, they revert to their ancient excuse that "the amount is too large for the dealer to handle," or "that the contractor would rather do business with them direct."

It is in this sort of business that we rely upon for their real profit, and when we are denied the privilege of participating in this business, we are denied the opportunity of sharing in a profit which is rightfully ours;

whether or not we carry the account is of no consequence, since we have already, by our daily purchases, helped that very manufacturer into position whereby he may be able to make the sale. One does not have to stretch their imagination very far to find plenty of reasons why some contractors would rather "deal direct." This practice should be vigorously opposed to what would appear that the manufacturer would be the one most interested as he certainly can see the such tactics always breed suspicion be it just or unjust. Some manufacturers, however, are so privileged to sell direct to the various political bodies. No satisfactory explanation of this reservation has ever come to the attention of the speaker. We will have this matter, as well as many other adjusted to our entire satisfaction a very short while.

In our many deliberations regarding the relation between dealer and manufacturer, we have been constant held in check by the more experienced and long-headed men of the trade. Times individuals have proposed radical solutions to vexing problems, but there has always been someone guide us into the right channels. The result of the past two years should convince the most cynical that we are pursuing the right methods and that our plans are meeting with the approval of the manufacturers.

We have tasted the fruits of our efforts to readjust some of the views of some of the manufacturers, and if we can continue to conduct our affairs in a businesslike way, meeting the manufacturer on a business basis, proposing only logical changes, we are sure of winning more success. The past year has seen us well repaid for all our efforts, but we should remember that still greater success is certain to be ours. Let us not go cocked, but plan deliberate every move. Let us all believe in what we know our own business and thereby find it unnecessary to make apologies whatever for any speech which we might find it necessary deliver to our manufacturing friends.

CALIFORNIA HAS MOST WELDING CODE

The number of cities and towns in the United States which have adopted legal provision providing for the use of welding in building construction now totals 100, according to Frazer P. McKibben of Black Gap, Pa., consulting engineer for the General Electric Company. Of this total, 90 have adopted welding in accordance with the Pacific Coast Building Official Conference Code, six follow the American Welding Society's code, and four have adopted miscellaneous unclassified codes. The essentials of all the codes, however, are similar and are based on the American Welding Society's "Code for Fusion Welding and Gas Cutting in Building Construction."

New Orleans is the largest city which has adopted a welding code. The tallest all-welded structure is the 19-story office building of the Dall Fowler & Light Company in Dallas, Texas.

California has the most cities at towns with welding codes, 67 have incorporated sections providing for welding. Oregon is second with 51 Washington has four; Arizona, Louisiana and Texas have three each. New York and Massachusetts have two each, and Arkansas, Colorado, Montana, Nevada, New Mexico, North Dakota, Delaware, New Hampshire, Alabama and Mississippi have one each.

Building News Section

APARTMENTS

Contract Awarded.
APARTMENTS Cost, \$150,000
SANTA MONICA, Los Angeles Co., Cal.—No. 1445-55 Fourth St. Four-story Class B concrete steel and brick apartments (100x100 feet).
Owner—Arthur S. Barnes, Title Insurance Bldg., Los Angeles.
Plans by Arthur S. Barnes
Contractor—D. S. McEwan, 2018 Lincoln Blvd., Ocean Park.

Preparing Plans.
APARTMENTS Cost, \$—
LOS ANGELES, Cal. Wilshire—La Brea District.
 Limit height class A reinf. concrete apartments.
Owner—Salt Lake City capitalists.
Architect—Lyle Nelson Barcume, 4325 Normal Ave., Los Angeles.
 Will be known as the Luxor Apts. (Mr. Clamen, Mgr.)

Preparing Plans.
APARTMENTS Cost, \$100,000
LOS ANGELES, Cal. Loma Drive nr. Sixth Street.
 Four-story and basement reinf. concrete and brick apts. (60x108-ft.)
Owner—E. E. Potter.
Engineer—W. E. Chadwick, Union League Bldg., Los Angeles.

Sub-Contracts Awarded.
APARTMENTS Cost, \$175,000
SAN FRANCISCO, N Jackson Street E Gough Street.
 Six-story and basement Class C concrete apartments (26 apts.)
Owner and Builder—E. Jose, 251 Kearny St., San Francisco.
Architect—H. C. Baumann, 251 Kearny St., San Francisco.
Lumber—Loop Lumber Co., Central Basin, San Francisco.
Concrete—California Concrete Co., 1632 Steiner St., San Francisco.
Steel—McClintic-Marshall Co., 2050 Bryant St., San Francisco.
Reinforcing Steel—W. C. Hauck Co., 280 San Bruno Ave., San Francisco.
Electric Work—Aetna Electric Co., 1337 Webster St., San Francisco.
Plumbing—J. Gibbs & Son, 1786 Geary St., San Francisco.

Plans Completed.
APARTMENTS Cost, \$150,000
STOCKTON, San Joaquin Co., Cal. Four-story and basement Class C concrete and brick apartments (52 apts.)
Owner—Mr. Covelecheck.
Architect—Max Maltzman, Union Bank Bldg., Los Angeles.

Contract Awarded.
BUNGALOW APTS. Cost, \$20,000
YUBA CITY, Sutter Co., Cal. Cooper Avenue.
 One-story frame and stucco (Spanish type) bungalow apartments, 150x130-ft.
Owner—J. C. Nason and J. H. LePine, Yuba City.
Private plans.
Contractor—Fred F. Anglade, Cooper St., Yuba City.
 Will contain two large and six small apartments with a court 40 by 60 ft.

BONDS

REDWOOD CITY, San Mateo Co., Cal.—At a mass meeting of interested citizens, plans were advanced for a county bond issue to secure funds to finance construction of a county auditorium to house various public festivals, including the Flower Show, etc. It was the general opinion that such a structure should be financed by a bond issue and a committee was named to report further on the project at a meeting to be held in Redwood City on March 18. Elmer A. Roberts of Burlingame is chairman of the committee in charge of the San Mateo County Auditorium Committee.

SATICOY, Ventura Co., Cal.—Saticoy school district defeated a \$115,000 bond issue on Feb. 17th, proceeds of which were to have been used for the erection of a new school building.

LOS ANGELES, Cal.—Los Angeles Board of Education has been requested by the various civic associations to call a bond election to vote \$10,000,000 for the construction of new school buildings. Board has come to no decision.

DRAWLEY, Imperial Co., Cal.—Five bond issues for public improvements amounting to \$135,000, were defeated on February 18. Projects were: \$35,000 for a new city hall; \$20,000 for a fire station and site; \$30,000 for additions to water distributing system; \$30,000 for sewer extensions; \$20,000 for new water tower and tank.

CHURCHES

Sub-Contracts Awarded.
CHURCH Cost, \$50,000
SAN MATEO, San Mateo Co., Calif. Fulton and Ellsworth Avenues.
 One-story frame and stucco church with tile roof (auditorium to seat 350; Mission type).
Owner—First Congregational Church.
Architect—Kent & Hass, 525 Market St., San Francisco.
Contractor—H. H. Larsen & Co., 64 South Park, San Francisco.
Plumbing—J. H. Pinkerton, 927 Howard St., San Francisco.

SKILSAW Portable Electric Hand Saws (4 models).

SKILSAW Portable Electric Sander
SKILSAW Radial Arm Attachments.

SYNTRON Portable Electric Hammer (4 models, motorless).

MALL Flexible Shaft Machines (50 models).

Electric Drills, Grinders, Buffers, Routers, Lock Mortisers.

PETER H. NELSON

Labor Saving Portable Electric Tools.

1248 Mission St. UNDERHILL
 San Francisco 7862
 SALES . SERVICE . RENTALS

Mill Work—S. H. Chase Lbr. Co., 647 W Santa Clara, San Jose.
Lumber—Sauset Lumber Co., 460 High St., Oakland.
Heating—Frank J. Klimm, 456 Ellis St., San Francisco.
Mis. Iron—Sullivan Iron Works, 780 Brannan St., San Francisco.

Preparing Plans.
SUNDAY SCHOOL. Approx. \$75,000
MODESTO, Stanislaus Co., Cal. One- and two-story brick church and Sunday School building.
Owner—First Baptist Church, Modesto.
Architect—G. N. Hilborn, Elks Bldg., Modesto.
 Bids will not be called for before June.

Plans Being Completed.
CHURCH Cost, \$250,000
SAN FRANCISCO. Funston Ave. and Judah St. (120x245-ft.)
 Class A reinforced concrete church (2-000 seating capacity).
Owner—Roman Catholic Archbishop of San Francisco, 1100 Franklin St.
Architect—Shea and Shea, 454 Montgomery Street.
 It is expected to call for bids in about three weeks.

Plans Being Figured.
CHURCH Cost, \$65,000
PITTSBURG, Contra Costa Co., Cal. NW Black Diamond and W Eighth Streets.

Two-story reinforced concrete church with steel roof trusses (120x12 ft.)
Owner—Roman Catholic Archbishop of San Francisco, 1100 Franklin St., San Francisco, a Corp. Sole (St. Peter Martyr Parish), Rev. Louis A. Nasselli, rector.
Architect—Arnold Constable, 550 Market St., San Francisco

Following contractors will submit bids.
 Barrett & Hulp, 918 Harrison St. San Francisco.

S. Rasori, 74 New Montgomery St., San Francisco

J. E. Scully, Phelan Bldg., San Francisco.

David Paganini, 519 California St., San Francisco.

Victor Kaufenberg, 80 East B St., Pittsburg.

Horace Sino, 710 Black Diamond St., Pittsburg.

Larsen & Larsen, Russ Bldg., San Francisco.

Thos. F. L. Furlong, 460 Jerome Ave., Oakland.

George Maurer, 50 York Drive, Oakland.

Will have full basement for Parish Hall and auditorium with seats for 700. Will have stucco finish, tile roof and be of Italian Romanesque style of architecture.

Plans Being Prepared.
CHURCH Cost, \$25,000
NAPA, Napa Co., Cal. SE Third and Pachett Sts.

Reinforced concrete church.
Owner—Episcopal Church, Napa.

Architect—C. Leroy Hunt, Napa.
 Will C. Keig, Napa, is chairman of the building committee. Bids will be taken in about sixty days.

Contracts Awarded.
CHURCH Cost, \$75,000.
 BERKELEY, Alameda County, Cal.
 Scenic and Le Conte Aves.
 One-story brick church (to seat 5000)
 Owner—University Christian Church.
 Architect—W. H. Ratcliff, Jr., Chamber
 of Commerce Bldg., Berkeley.
Excavation—Ariss-Knapp Co., 661 41st
 St., Oakland.
Masonry—Victory Devisht, 1828 Mil-
 via St., Berkeley.
Concrete—Frank Jepson, 1721 Fran-
 cisco St., Berkeley.
Roofing—Western Roofing Co., 24th &
 Poplar Sts., Oakland.
Sheet Metal—Grady Sheet Metal Wks
 2121 McKinley, Berkeley.
Miscellaneous Iron—Herrick Iron Wks
 18th and Campbell Sts., Oakland,
 and Liberty Ornamental Iron Wks
 21st and Filbert Sts., Oakland.
Plastering—Wm. Makin, 1648 Excel-
 sior St., Oakland.
Tile—Superior Tile & Products Co.,
 2743 Broadway, Oakland.
Glass—Cohledick-Kibbe Glass Co.,
 361 Washington St., Oakland.
Electric—White Electric Co., 230 S
 Shattuck Ave., Berkeley.
Carpentry—Walter Sorensen, 2940
 Piedmont Ave., Berkeley.

FACTORIES AND WARE- HOUSES

Plans Being Figured—Bids Close Mar.
 24, 2 P. M.
POULTRY BLDG. Cost, \$—
 SACRAMENTO, Sacramento Co., Cal.
 State Agricultural Park.
 One-story brick poultry building.
 Owner—State of California.
 Plans by State Department of Public
 Works, Division of Architecture,
 Geo. E. McDougall, state archi-
 tect, Public Works Bldg., Sacra-
 mento.
 The building is one story with con-
 crete foundations and floors, brick
 walls, steel roof construction with tile
 and composite rafters. The total floor
 area is approximately 25,200 sq. ft.
 Separate bids will be entertained
 for the following segregate parts of
 the work and combinations thereof:
 1. General Work and alternate,
 embracing all branches of the construc-
 tion other than Plumbing and Elec-
 trical.
 2. Electrical Work and alternate.
 3. Plumbing Work and alternate.
 An alternative bid, affecting the
 general, electrical and plumbing work
 will be required for the omission of
 one bay as outlined on the plans and
 designated as Alternate "A".

Contract Awarded.
WAREHOUSE, ETC. Cost, \$30,000
 SANTA ROSA, Sonoma Co., Cal.
 Service group (warehouse, garage,
 shops, transformer house, meter
 house, pole yard, etc.)
 Owner—Pacific Gas & Electric Co., 215
 Market St., San Francisco.
 Plans by Eng. Dept. of Owner.
 Contractor—J. B. Petersen, 4021 Agua
 Vista Ave., Oakland.
 As previously reported, grading con-
 tract awarded to Connors & Hansen,
 Santa Rosa.

Sub-Contracts Awarded.
DAIRY Cost approx. \$10,000
 SAN MATEO, San Mateo Co., Calif.
 One-story and mezzanine floor frame
 and stucco dairy bldg. (40x70-ft.;
 concrete floor, composition roof).
 Owner—Jersey Dairy Farm, 333 South
 Idaho, San Mateo.
 Plans by E. K. Dobkowitz, 424 Mont-
 erey Blvd., San Francisco.
 Contractor—Castle Bldg. Co., 830 Mar-
 ket St., San Francisco.
Concrete—Dir. Vitta Co., 348 Naylor St.,
 San Francisco.
Iron—Ornamental Iron Works, N. O. E.
 St., San Francisco.
Plumbing—Scott Co., 243 Minna St.,
 San Francisco.

Painting—Fournier Studios, San Fran-
 cisco.
Glass—Mutual Plate Glass Co., 1969
 Mission St., San Francisco.
Electric—Johnson Electric Co., 75 S
 Montgomery Blvd., San Francisco.
Plastering—Concey & Co., San Mateo

Sub-Contracts Awarded.
MFG. BLDG. Cost, \$200,000
 RIFON, San Joaquin Co., Cal.
 Group of concrete, hollow tile, brick
 and corrugated iron manufactur-
 ing bldgs. (to manufacture evaporated
 milk).
 Owner—Meyenberg, Inc., Solidad, Cal.
 Plans by Eng. Dept. of Owner.
 Contractor—H. H. Larsen & Co., 64
 South Park, San Francisco.
Steel Rolling Doors—Kenerson Mfg.
 Company.

Lumber and Gravel—United Lbr. Co.,
 Elgin.
 As previously reported, structural
 steel and miscellaneous iron awarded
 to Judson-Pacific Co., 609 Mission St.,
 San Francisco; steel sash to Michel
 & Pfeffer Iron Works, Harrison and
 10th Sts., San Francisco.
 There will be a pasteurizing plant,
 etc.

Sub-Contracts Awarded.
WAREHOUSE Cost, \$15,000
 FIRESCO, Fresno Co., Cal. Ventura
 and H Streets.
 One-story warehouse.
 Owner—F. J. Dow, 3369 Huntington
 St., Fresno.
 Architect—Not Given.
 Contractor—W. T. Harris, 577 Mc-
 Kinley St., Fresno.
Concrete—E. K. Brostrom, Fresno.
Brick Work—J. M. Brown, Fresno.
Roofing—Valley Lumber Co., H and
 Belmont Sts., Fresno.
Wiring—Bellevue Electric Co., 2429
 Belmont St., Fresno.
Miscellaneous and Structural Iron—
 Kyle & Co., 346 G St., Fresno.

Preparing Working Drawings.
HANGAR, ETC. Cost, \$65,000
 SACRAMENTO, Cal. Municipal Air-
 port.
 Steel frame and wood hangar and air
 terminal station.
 Owner—City of Sacramento, H. G.
 Deon, city clerk.
 Architect—Starks & Flanders, Forum
 Bldg., Sacramento.
 Bids will be taken in about 2 weeks.

Plans Being Figured.
FACTORY Cost, \$—
 OAKLAND, Alameda Co., Cal. Eighty-
 first Ave. near E-14th Street.
 One-story reinforced concrete factory
 Owner—Blue Bird Potato Chips, Inc.,
 68th Ave. and Beck Sts., Oakland
 Architect—Charles W. McCall, 1404
 Franklin St., Oakland.
 William Spivock, Hobart Bldg.,
 San Francisco, is figuring the plans in
 place of Reavey & Spivock, previously
 reported. Other contractors previously
 reported.

SAN FRANCISCO—Airport Com-
 mittee of the Board of Supervisors
 plans immediate construction of con-
 crete fire walls between the hangars
 at the Mills Field Municipal Airport.

Contract Awarded.
PLANT Cost, \$100,000
 LINNTON, Oregon.
 Storage and Distributing plant.
 Owner—Western Oil & Refining Co.,
 Los Angeles.
 Plans by Eng. Dept. of Owner.
Concrete—Krohn & Kibbe, 290 E Sal-
 mon St., Portland.
 Construction will include a concrete
 fire wall, 250 by 15 ft., pump houses,
 garage quarters, etc., all of steel con-
 struction.

OAKLAND, Calif.—Owens-Illino-
 Glass Co., bottle manufacturers, or-
 crating plants in Illinois, Indiana, Ne-
 Jersey, Oklahoma, Pennsylvania and
 West Virginia, and with main office
 at Toledo, Ohio, will shortly select
 site in Oakland on which it is pre-
 posed to erect a \$1,000,000 plant. Three
 sites are under consideration and a se-
 lection will be made shortly, it is an-
 nounced by William E. Lewis, pres-
 dent of the company.

BYRON, Contra Costa Co., Cal.
 Pacific Coast Silica Corp. of Califor-
 nia, is reported to be planning to
 immediate construction of a \$150,000
 acid plant by Byron including a sulphur
 acid plant, water tower, \$25,000 and
 sand plant costing \$125,000. The plant
 will be located near the Standard C
 sub-station at Byron. S. D. Miller, C
 Pleasanton, is reported to be a vice
 president of the Pacific Coast Silica
 Corp. Efforts to locate Miller's
 phone were unsuccessful.

Sub-Bids Wanted.
ASSEMBLY PLANT Cost, \$2,200,000
 SEATTLE, Wash. Duwamish Water-
 way.

Motor car assembly plant.
 Owner—Ford Motor Company.
 Architect—Albert Kahn, Inc. Detroit
 Contractor—Clinton Const. Co., 92
 Folsom St., San Francisco.
Reinforcing Steel—Pacific Coast Ste-
 el Co., Seattle.
Concrete Materials—Pioneer Land
 Gravel Co., Inc., Seattle.
Cement—Superior Portland Ceme-
 nt Co., Seattle.
Testing—Pacific Testing Laboratories
 Seattle.

Sub-bids are wanted on lumber, fa-
 ce and cement brick, hollow tile, at-
 tor work, redwood block flooring, roll-
 up steel curtains, counterbalanced freight
 elevator doors, folding doors and op-
 erations, vertical sliding doors, hollow
 metal work, wall and toilet partitions,

 work, fence work, mill work, furnish-
 ing and plastering, roofing, sheet
 metal work, painting, glass and glaz-
 ing, rubber tile floors, marble wall
 tile work, terrazzo, linoleum, granite
 cement roofing tile.

As previously reported, filling, re-
 moval of docks and dredging awarded
 to Puget Sound Bridge & Dredging Co.,
 Seattle; plumbing and heating, c
 tanks, gas and industrial piping to
 University Plumbing and Heating Co.
 Seattle; railway sidings to Stillwe-
 Bros., Seattle; sprinkler system
 Fire Protection & Engineering Co.
 Seattle; electrical work to Newbern
 Elec. Co., Los Angeles; concrete pip-
 ing to McArthur Concrete Pipe Corp.
 New York City.

The assembly building will be 74
 feet long, 320 feet wide with a second
 story 50 feet by 100 feet. A concrete
 dock, 500 feet long, adjoining a sto-
 age warehouse, 500 feet by 100 feet
 is to be erected.

GARAGES AND SERVICE STATIONS

Contract Awarded.
SERVICE STATION Cost, \$20,000
 SAN FRANCISCO, S.W. Pacific Ave
 and Trenton Place.
 Steel frame and concrete super ser-
 vice station and garage.
 Owner—S. & G. Gump Realty Co., 24
 Post Street.
 Plans by Owner.
 Contractor—Barrett & Hilp, 913 Hal-
 rison St.
 Sub-bids will be taken in one week

LONG BEACH, Los Angeles Co., Ca.
 Southern California Edison Co., 30
 W Third St., Los Angeles, will start
 work at once on the erection of a 1
 story, class A steel and concrete ga-
 rage and warehouse building at the
 corner of Hill and Perris Sts., Lon

each. Work will be handled by the owner's construction force and sub-contracts awarded, and materials purchased through its purchasing department.

repairing Working Drawings.
SERVICE BLDG. Cost, \$50,000.
ALLEJO, Solano Co., Cal. NW
Seaside and Main Sts. (130x150 ft.)
wo-story automobile plant and service building (probably brick construction)
wner—Acme Motor Co. (Vallejo Ford Dealers), Vallejo.
rchitect—Claude Barton, 522 Grand Ave., Oakland.
Plans will be ready for bids about April.

GOVERNMENT WORK AND SUPPLIES

SACRAMENTO, Cal.—Until March 3, P. M., under Order No. 3040-1780, bids will be received by U. S. Engineer Office, California Fruit Bldg., to furnish and deliver Rio Vista, Solano County.
(1) 1,000 ft. Wire Rope, Warrington construction, uncoated regular lay, 50% steel, 5/8-in. dia. hemp center, 6 strands, 19 wires to strand, in 1 piece.
(2) 1,000 ft. Wire Rope, uncoated, single lay Warrington construction, 5/8-in. dia. plow steel, hemp center, 6 strands, 19 wires to strand.

PEARL HARBOR, T. H.—See dredging, Harbor Works and Excavations, this issue. Bids wanted for 400,000 cu. yds. dredging at Naval Operating Base, Pearl Harbor.

ner—U. S. Government.
ans by Supervising Architect,
Treasury Dept., Washington, D. C.

WASHINGTON, D. C.—Bids are being received by Bureau of Supplies & Accounts, Navy Department, Washington, D. C., to furnish and deliver

seellaneous supplies and equipment noted in the following schedules, other information being available in the Navy Department Office, Harrison St., San Francisco:

Bids Open March 10

Seattle, 1 motor driven reamer and 1 cutter grinder; sch. 5150.

Western yards, mineral oil (kerosene); sch. 5083.

Western yards, volatile - mineral - liquids paint thinner; sch. 5082.

Marine Island, 1,000 lin. yds. artificial ther; sch. 5105.

Seattle, 1 motor driven shaper machine; sch. 5155.

Marine Island, 65,000 lbs. bar rivet er; sch. 5173.

Western yards, brass and steel, bolts & nuts; sch. 5180.

Seattle, 1 motor-driven quick-change gear screw-cutting geared head lathe; sch. 5186.

San Francisco, 1 motor-driven bending machine; sch. 5188.

Various deliveries, motor trucks; sch. 5159.

San Francisco, 1 motor-driven sensitive bench drill; sch. 5187.

Marine Island, 700 fabric springs, without frame; sch. 5192.

Marine Island, 1 motor-driven engraving machine; sch. 5184.

Western yards, steel bolts and nuts and lag screws; sch. 5181.

Marine Island, 1 motor-driven universal and tool grinding machine; sch. 5200.

Bids Open March 24
Western yards, radio transmitting equipments and spares; sch. 5179.

SACRAMENTO, Calif.—Until March 3, P. M., under Order No. 3035-1753, bids will be received by U. S. Engineer Office, California Fruit Bldg., to furnish and deliver 2 pedestal mounted search lights and 12 extra lamps for same.

The search lights shall have a lens with minimum diameter of 18-in. They shall produce an illumination intensity of not less than 90 foot candles at a distance of 2,000 ft. with an approximate spread of the rays of 126 feet at this distance. The source of power is 115 volts direct current, and the lamp consumption shall not exceed 1,500 watts. Each searchlight shall be mounted and arranged for pilot house control on board ship.

Each unit shall be furnished complete, including base, fittings, pilot house control, levers, resistors, one lamp, etc., and ready for installation. They shall be made of the best materials and workmanship and be similar and equal to "Nanolux Incandescent Searchlight," page 291, Pac. States Cat. No. 29. Each bid shall be accompanied by a certified photo-metric curve showing that the equipment proposed to be furnished will meet these specifications.

Bids Wanted—To Be Opened Mar. 5, 11 A. M.
GARAGE. Cost, \$—
SAN FRANCISCO. Letterman Hospital.

Convert concrete stable into garage (steel beams and steel gutters).

Owner—U. S. Government.

Architect—Constructing Quartermaster, Fort Mason.

SACRAMENTO, Calif.—Until March 3, P. M., under Order No. 3037-1780, bids will be received by U. S. Engineer Office, California Fruit Bldg., to furnish and deliver Rio Vista, Solano County, small quantity of black pipe, brass tees and elbows, galvanized pipe, nipples, air cocks, valves, etc.

SAN FRANCISCO.—E. Sugarman, 362 Geary St., San Francisco, at \$100 submitted lowest bid to Constructing Quartermaster, Fort Mason, for converting the boiler in Officers' Quarters No. 8 at Fort Miley, from coal burning to gas burning.

The only other bid was submitted by T. G. Arrowsmith Co., San Francisco, at \$177.95. Bids held under advisement.

SAN DIEGO, Cal.—Until 11 A. M., March 18, bids will be received by the Bureau of Yards and Docks, Navy Department, Washington, D. C., for the extension of expeditionary storehouse at the Naval Operating Base (Marine Barracks), San Diego. The work includes concrete pillars, concrete construction, paving, hollow tile, built-up roofing and sheet metal works metal doors, windows and steel rolling doors, stucco and plaster work, woodwork and glazing, hardware, plumbing, heating, electrical and

sprinkler system. Spec. No. 6407. Plans may be obtained on application to the Bureau or to the Public Works Officer, 11th Naval District, San Diego, upon deposit of a check or postal money order for \$20, made payable to the Chief of the Bureau of Yards and Docks, A. L. Parsons, chief of bureau.

SACRAMENTO, Calif.—Until March 3, P. M., under Order No. 3039-1780, bids will be received by U. S. Engineer Office, California Fruit Bldg., to furnish and deliver Rio Vista, Solano County, 6 aluminum, 6-in. dairy pans; 6 aluminum, 5-in. dairy pans; 3 "Wheatley" sauce pans, 17-in. capacity; 1 meat block, 21x21x10-in.

SACRAMENTO, Calif.—Until March 3, P. M., under Order No. 3041-1780, bids will be received by U. S. Engineer Office, California Fruit Bldg., to furnish and deliver Rio Vista, Solano County, 5,000 lbs. welding rods, 3/8-in. x 14-in. long, in 50-lb. bundles.

SACRAMENTO, Cal.—Until March 3, P. M., under Order No. 3039-1780, bids will be received by U. S. Engineer Office, California Fruit Bldg., to furnish and deliver Rio Vista, Solano County, miscellaneous hardware, including brass hinges, elbow catches, ornamental wrought brass hinges, files, pipe wrenches, hand taps, hammer handles, twist drills, 3 wheel barrels, etc.

SACRAMENTO, Calif.—Until March 4, P. M., under Order No. 3043-1763, bids will be received by U. S. Engineer Office, California Fruit Bldg., to furnish and deliver miscellaneous castings.

BOULDER CITY, Nevada—Monolith Portland Cement Co., 215 Broadway St., Los Angeles, submitted low bid to U. S. Bureau of Reclamation at Denver at \$1.50 per bid l. o. o. Monolith for furnishing the department with 20,000 bbls of Portland cement for use on the Boulder City project.

Plans Being Figured—Bids Close Mar. 25, 11 A. M.

SAN FRANCISCO. Presidio. Cost, \$90,000.

Fifteen double sets of non-commissioned officers' quarters each 2-story and basement, brick construction.

Owner—U. S. Government.

Plans by Quartermaster Generals Office, Washington, D. C.

SAN FRANCISCO—T. B. Goodwin, 250 Divisadero St., at \$6,291 awarded contract for constructing 741 posts and the Anchor Post Fence Co., 460 5th St., at \$829 awarded contract for iron fencing by Constructing Quartermaster, Fort Mason, for constructing improvements to the entrances of the National Cemetery at the San Francisco Presidio. Work involves gates, urns, etc.

Complete list of the bids published February 5.

PEARL HARBOR, T. H.—As previously reported, Ames-Will, Ltd., Pier No. 3, Honolulu, T. H., at \$203,439 submitted low bid to the Bureau of Yards and Docks, Navy Department, Washington, D. C., to erect hangar at Pearl Harbor, under Spec. No. 6215. Following is a complete list of the bids:

(1) work complete; (2) alternate, do. Ames-Will, Ltd., Pier 3, Honolulu, T. H., Item 1, \$203,439; (3) deduct \$1,200 bidder's item.

E.E. Black, Ltd., P. O. Box 3203, Honolulu, item 1, \$211,132.

Marks Const. Co., Ltd., P. C. Box 497, Honolulu, item 1, \$215,000.

Newport Contracting & Engineering Co., Lee Hall, Va., item 1, \$216,000.

W. P. Thurston & Co., Richmond, Va., item 1, \$216,000.
J. L. Young Eng. Co., Honolulu, T. H., item 1, \$215,500.
Walker & Olund, Ltd., 820 Piliak St., Honolulu, item 1, \$223,600.
Barrett & Hilp, 918 Harrison St., San Francisco, item 1, \$224,500.
R. E. Woolly, Cable & Cook Bldg., Honolulu, item 1, \$235,000.
Kenneth L. Colborn, 385 E. Greene St., Pasadena, item 1, \$243,000.
Bitulithic Paving & Concrete Co., Ltd., 854 Kaahumanu St., Honolulu, item 1, \$243,446.
M. E. McGowan, 74 New Montgomery St., San Francisco, item 1, \$249,938.
John Hansen, P. O. Box 2044, Honolulu, item 1, \$259,900.

SAN FRANCISCO.—Until March 4, 10 A. M., under Circular No. 928-31-215, bids will be received by Quartermaster Supply Officer, General Depot, Fort Mason, to furnish and deliver points and oils, hosiery powder, canvas, matching bolts, 1,200 corn brooms, miscellaneous brushes, 48 galvanized ash cans, 48 bentwood Vienna chairs, twist drills, padlocks, soaps, etc. Specifications obtainable from above.

SAN FRANCISCO.—Until March 5, 10 A. M., under Circular No. 928-31-219, bids will be received by Quartermaster Supply Officer, General Depot, Fort Mason, to furnish and deliver 2 surface condensers for new generators; 150 K. W. Turbo Generator and Engine Room Auxiliaries to be Westinghouse Condensers with auxiliaries or equal. The condensers will be 1750 square foot two pass surface condenser, having a steel shell and cast iron water boxes. They will maintain a vacuum of 27-in., referred to a 30-in. barometer at the inlet when condensing 26,500 lbs. steam per hour and circulating 2750 G.P.M. of cooling water at 75 deg. F.

CONDENSER SHELL. The condensers will be of sheet steel construction, with steam inlet to be in center; 15-in. dia. The condenser supports will be of steel, welded to the condenser side. A round top opening will be provided as a steam inlet and other openings for the removal of air and condensate will be provided. Steam baffles will be installed.

The water chambers and manhole covers will be made of close grain cast iron, braced and ribbed to withstand the stresses of marine service. Zinc plates with spacers, will be bolted to the manhole covers, in each water box to prevent galvanic action on tubes and plates.

The tube banks and shells shall be so designed that the difference in pressure between the steam inlets and air outlets will be a minimum. A suitable baffle will be provided which will segregate a bank of tubes sufficient to effectively cool the air and other non-condensable vapors.

TUBE PLATES. The tube plates are to be of Muntz metal not less than 1-in. in thickness and bolted to the shell independent of the water boxes so that the joint need not be disturbed when water boxes are removed for testing condensed. Suitable tube support plates, drilled and chambered will be provided.

TUBES: The tubes are to be Admiralty metal cup drawn of Sevel Mfg., or equal; not less than 5/8-in. outside dia. No. 16 B.V.G. 10 ft. active length. The tubes will be expanded into tube plate at one end, and packed with John Crane metallic packing at other end.

CIRCULATING PUMPS: For the Condensers, a suitable horizontal or vertical propeller type turbine driven circulating pump, 2750 G.P.M. capacity with 18 ft. total head, including condenser friction, will be furnished.

The propellers will be of bronze, mounted on steel shafts and covered with bronze sleeves which will effectively

protect the shafts from the erosive or corrosive action of salt water.

CONDENSATE PUMPS: Two condensate pumps of 32000 lbs. per hour capacity each against 84 ft. total head including vacuum will be furnished for each condenser. These pumps will be driven by a steam turbine to be vertical.

AIR REMOVAL EQUIPMENT: For the condensers, two two stage air ejectors mounted on combined surface inner and after condenser shall be included. The second stages will take suction from the inner condenser and discharge to the after condenser.

The two stage ejectors shall be of suitable capacity for adequately taking care of leakage into the condenser systems, under normal conditions, thus providing a complete spare equipment. The inner and after condensers will be 4 pass, suitable for circulating condensates, but shall have a raw water section in the inner condensers, for use at low loads on the turbine units.

The ejectors shall be suitable for use with steam and from the main steam headers at a pressure of 200 lbs. and many reducing orifices or valves required shall be furnished with the ejectors.

A horizontal Back Pressure exhaust valve, 12-in., similar to Crane Back Pressure valve, No. 4387, will be furnished with each.

HALLS AND SOCIETY BUILDINGS

Preparing Preliminary Plans.
MEMORIAL. Cost approx. \$20,000
VACAVILLE, Solano Co., Cal.
One-story and basement Veterans' Memorial Building.
Owner—County of Solano.
Architect—Kent & Sams, 325 Market St., San Francisco.

Sub-Bids Wanted.
MEMORIAL FLDG. Cost, \$65,000
HAYWARD, Alameda Co., Cal. (Kolze Property), Main Street.
One-story reinforced concrete Veterans' Memorial Building (Spanish type).
Owner—County of Alameda.
Architect—H. H. Meyer, Kohl Bldg., San Francisco.

A. Frederick Anderson, 1093 Longridge Road, Oakland, general contractor, desires sub-bids in connection with this project for which general contract bids are to be opened March 3, 10:30 A. M.

PITTSBURG, Contra Costa Co., Cal.—Pittsburg Lodge of Masons has purchased two lots in School street, opposite the new high school, on which it is proposed to erect a modern lodge hall. Site is 90 by 90 ft. Construction of the building, however, will not be undertaken for at least two years unless other fraternal organizations can be induced to lease quarters in the structure which would permit early erection. The Masons have about \$3,000 available for the building, which is to cost approximately \$25,000.

Plans Being Prepared.
ATHLETIC BLDG. Cost, \$100,000
MODESTO, Stanislaus Co., Cal.
Modesto and aquatic building.
Owner—Withheld.
Architect—G. N. Hilburn, Elks Bldg. Modesto.

HOSPITALS

OAKLAND, Calif.—Simon Mattress Co., 1777 Yosemite Ave., San Francisco, awarded contract by county supervisors to furnish 150 mattresses for tubercular unit at Fairmount Hospital.

Contract Awarded.
HOSPITAL. Cont. price, \$60,522
COLUSA, Colusa Co., Calif. County Hospital Grounds.

One- and two-story reinforced concrete hospital (1-story wing and 2-story administration building).
Owner—County of Colusa.
Architect—Otto Deichmann, 110 Sutler St., San Francisco.

Contractor—Azevedo & Sarmiento, 920 O St., Sacramento.
Only the first unit, having a 24-bed capacity, will be undertaken at this time. The structure, when completed will have a capacity of 100 beds.

LOS ANGELES, Cal.—J. W. Jean 6773 Hollywood Blvd., was awarded contract by Los Angeles County Supervisors at \$304,475, for plastering for the new Acute Unit of the Los Angeles General Hospital. Bids were opened Feb. 16. The bid was: Unit No. 2, \$77,000; Unit No. 3, \$136,831; Unit No. 4, \$60,662; Unit No. 5, \$30,132. The sub-contractors are:

Lime—Oro Grande Lime & Stone Co.
Hardwall Plaster—U. S. Gypsum Co.
Hydrated Lime—Oro Grande Lime & Stone Co.
X-Ray Protection Plaster—Blue Diamond Co.

POWER PLANTS

PASADENA, Cal.—Until 11 A. M. March 16, bids will be received by the Pasadena city directors for the construction and installation of one complete steam turbine electric generator unit with appurtenances to be erected at the power plant at Glenarm St. and Raymond Ave.

Proposals are requested for the construction and installation of a said steam turbine electric generator unit as follows:

Item 1. One 25,000 k. w. 16,500-volt, 3-phase 50-cycle steam turbine electric generator unit and appurtenances, to operate with steam at 400 lbs. per sq. in. gauge pressure, and 750 deg. F. total temperature at the throttle, and 28-in. Hg. vacuum (referred to 30-in. Hg. barometer) at the exhaust.

Item 2. Alternative to Item 1.

Part 1. One 25,000 k. w. 11,000-volt 3-phase 50-cycle steam turbine electric generator unit and appurtenances, including 3 single phase auto transformers with taps to raise the generator voltage to the substation high line voltages of 16,000, 15,750 and 15,500. The steam turbine prime mover will operate at 400 lbs. per sq. in. gauge pressure and 750 deg. F. total temperature at the throttle, and 28-in. Hg. vacuum (referred to 30-in. Hg. barometer) at the exhaust.

Part 2. Alternative to Part 1 of Item 2. Same as Part 1 except for one 3-phase auto transformer is substituted for the three single phase auto transformers.

Item 3. One complete set of extra blading for the spindle and for the case together with the proper packing tools to be used on the said steam turbine electric generator unit described in Item 1 or Item 2.

"Gold Medal" Safety Scaffolding

for use on steel and concrete frame buildings, saves lives, time and money

It pays to use the best Scaffolding Equipment whenever a Scaffold is required. The risk is always great.

The Patent Scaffolding Company

270—13th St., San Francisco

Phone Hemlock 4278

Lessor of Suspended and Swinging Safety "Gold Medal" Scaffolding.

All bids shall be in duplicate.
All bids must state the total lump sum price for each item on each part thereof, f.o.b. cars at the city's Union Pacific Railway siding, Pasadena, Cal. The bidder must state in his proposal the time after the date of the contract (which shall also be the date of the award) within which he guarantees delivery of said steam turbine electric generator equipment and appurtenances will be made. The bidder shall also state the correct shipping weight of equipment specified under each item. No telegraphic proposals will be considered.
Certified check 10%. Bessie Chamberlain, city clerk.

BANKS, STORES & OFFICES
CALIFORNIA.—Federal Ornamental Iron Works, 16th and San Bruno, San Francisco, awarded contract by Architect H. A. Minton, Bank of America Bldg., Eddy and Powell Sts., San Francisco, for approx. 250 chromium plated bronze signs to replace those on American Bank buildings throughout California. Thollander Const. Co., Cal. Bldg., San Francisco, has the contract to remove old signs.

OAKLAND, Calif.—Fire destroyed property at 1720-24 Broadway, Feb. 25, with a loss of \$150,000 to the building and \$100,000 to contents. Losers were the Morcom Art Store and the jewelry establishment, both at 1724; the Federal Outfitting Company, 1722, and the Lucille Shoppe, 1720.

POMONA, Los Angeles Co., Cal.—Southern Counties Gas Co., 510 S. Flower St., Los Angeles, will take general contract bids the first week in March for a new two-story Class A reinforced concrete district headquarters building to be erected at the southeast corner of Holt Ave. and Main St., Pomona. Plans were prepared by the owner's engineering department. Cost, \$70,000.

Working Drawings Being Prepared.
STORE Cost Approx. \$500,000
OAKLAND, Alameda Co., Cal. Broadway.
 Three-story Class A department store
 Owner—Isadore Weinstein, 1041 Market St., San Francisco.
 Architect—Wm. Knowles, 1214 Webster St., Oakland.
 Bids will be taken in about thirty days.

Preparing Plans.
BANK Cost, \$80,000
LOS ANGELES, Cal. Wilshire Blvd. and Shatto Place.
 One-story concrete and stone bank and store (220x100 feet).
 Owner—Everett A. Seaver.
 Architect—Walker & Eisen, Western Pacific Bldg., Los Angeles.

Plans Being Completed.
STORE Cost, \$50,000
SANTA ROSA, Sonoma Co., Cal. Fourth Street.
 Three-story brick and concrete store building (salesroom and offices).
 Owner—S. H. Kress & Co., 621 S Broadway, Los Angeles.
 Architect—John Fleming, 1031 South Broadway, Los Angeles.

It was considered possible that a new steel reinforced superstructure might be set up just inside the present walls.
 Bids will be called for shortly.

Additional Sub-Contracts Awarded.
STORES Cost approx. \$75,000
OAKLAND, Alameda Co., Cal. SW 19th St. and Telegraph Ave.
 Group of 1-story steel frame and terra cotta shops and stores.
 Owner—Twentyeth & Broadway Realty Co., Oakland.
 Architect—A. J. Evers, 525 Market St., San Francisco.
 Contractor—George P. W. Jensen, 320 Market St., San Francisco.
Grading—Arts & Knapp Co., 961 41st St., Oakland.
Steel Windows—Soule Steel Co., Rialto Bldg., San Francisco.
Electrical Work—Slater Electric Co., 579 18th St., Oakland.

As previously reported, structural steel awarded to Judson Pacific Co., 609 Mission St., San Francisco; reinforcing steel to McGrath Steel Co., 354 Hobart St., Oakland; concrete to Nat Lena, 2307 Echnel Ave., Alameda; terra cotta to N. Clark & Sons, 110 Natoma St., San Francisco.

Contract Awarded.
REMODELING Cost, \$11,000
STOCKTON, San Joaquin Co., Calif. 24 E Main St.
 Remodel ground floor of office bldg.
 Owner—Capitol Co., 248 E Main St., Stockton.
 Architect—Not Given.
 Contractor—Lewis & Green, Bank of Italy Bldg., Stockton.

Sub-Bids Being Taken
BANK Cost, \$60,000
LOS GATOS, Santa Clara Co., Cal. Main St. and Santa Cruz Avenue (52x100 feet).
 One-story reinforced concrete bank with the roof (ornamental stone and acoustical plaster).
 Owner—Bank of America.
 Architect—H. A. Minton, Bank of America Bldg., San Francisco.
 Contractor—Jacks & Irvine, 74 New Montgomery St., San Francisco.
 There will be two stores, 20x72 feet in connection with the building.

Electrical Bids Being Taken.
BANK Cost, \$200,000
MONTREY, Monterey Co., Cal. Location not selected.
 One-story and mezzanine steel frame and concrete bank with tile roof.
 Owner—Monterey County Trust & Savings Bank.
 Architect—H. W. Winner Co., 550 Market St., San Francisco.
 Mgr. of Const.—Mark Finlayson, care architect.
 Cabinet bids will be taken within one week.

As previously reported, structural steel awarded to McClintic-Marshall Co., 2650 Bryant St., San Francisco; reinforcing steel to Gunn, Carle & Co., 44 Market St., San Francisco; excavation to M. J. Murphy, Carmel.

Contract Awarded.
ALTERATIONS Cost, \$5000
SAN FRANCISCO. 343 Sansome St.
 Alterations to offices.
 Owner—Cosgrove & Co., 343 Sansome.
 Architect—Hyman & Appleton, 68 Post Street.
 Contractor—Jacks & Irvine, 74 New Montgomery St.

Completing Plans.

STORE Cost, \$8000
BURLINGAME, San Mateo Co., Cal
 California Drive
 One-story reinforced concrete store.
 Owner—F. Peterson, Burlingame.
 Architect—E. L. Norberg, 580 Market St., San Francisco.
 Bids will be taken in one week.

Planned.

BANK Cost, \$—
ALAMEDA, Alameda Co., Cal. Park and Central Sts.
 One-story reinforced concrete bank.
 Owner—Central Bldg. & Loan Assn., Central and Park Sts., Alameda, (J. L. Delaney, Mgr.).
 W. E. Schirmer, 700 21st St., Oakland prepared preliminary sketches.

February 25, 1931

Bids To Be Taken Within a Few Days
BANK Cost, \$75,000
SAN MATEO, San Mateo Co., Cal. B St. and Third Ave. (110 ft. frontage).

One-story concrete bank.
 Owner—Bank of Italy.
 Architect—H. A. Minton, Bank of Italy Bldg., Eddy and Powell Sts., San Francisco.

THEATRES

Contract Awarded. Cost, \$90,000
THEATRE
SOUTH SAN FRANCISCO, San Mateo Co., Cal.

One-story reinforced concrete theatre (stadium type to seat 1000).
 Owner—Chas. E. Petersen, 191 15th Ave., San Francisco.
 Architect—Dodge Riedy, Pacific Bldg., San Francisco.
 Contractor—R. C. Stickle, 213 Linden Ave., South San Francisco.
 Sub-bids will be taken shortly.

Plans Being Prepared.

THEATRE Cost, \$150,000
SAN JOSE, Santa Clara Co., Cal.
 NE First and San Salvador Sts
 Class A theatre building.
 Owner—United Artists Corp., 1966 S Vermont St., Los Angeles.
 Architect—S. Chas. Lee, 714 W. Tenth St., Los Angeles

Preliminary Plans Prepared.

THEATRE Cost, \$175,000
STOCKTON, San Joaquin Co., Cal.
 Main St., bet Market and Stanislaus Sts.
 Owner—National Theatres Syndicate, 25 Taylor St., San Francisco.
 Architect—Bloss & Fairweather, Balboa Bldg., San Francisco.

WHARVES AND DOCKS

Structural Steel Contract Awarded.
TERMINAL Cost, \$—
OAKLAND, Alameda Co., Cal. Foot of Webster Street.

Structural steel frame for Inland Waters Terminal; 152 ft. on harbor side, 235 ft. on slip side; also concrete viaduct 250 ft. by 35 ft.
 Owner—City of Oakland (Fort Commission, C. B. Hegardt, Secretary)
 Oakland Bank Bldg., Oakland.
 Plans by Eng. Dept. of City Port Commission, Oakland Bank Bldg., Oakland.

Contractor—California Steel Co., Hohart Bldg., San Francisco.

MISCELLANEOUS CONSTRUCTION

SUISUN, Solano Co., Cal.—A. Fred Anderson, 1093 Longridge Road, Oakland, at \$1,150 awarded contract by city trustees to construct reservoir cover on distributing reservoir on

Gregory Hill, two miles NW of county court house.

UKIAH, Mendocino Co., Cal.—Berkeley Steel Const. Co., 2nd and Camelia Sts., Berkeley, at \$1,374 submitted lowest bid to city trustees to furnish two 2,500 cu. ft. riveted gas tanks 6-ft. dia by 30-ft. long, 5/8-in. shell, 1/2- and 5/8-in. heads. Equipped with one 11x15 manhole in head, three 2-in. forged steel flanges, one 1/2-in. dial pressure gauge, designed for 90-lb. per sq. in. working pressure and built in accordance with A.S.M.E. Code for Unified Pressure Vessels, f. o. b. cars, Ukiah; 90 days delivery.

Following is a complete list of bids:
 Berkeley Steel Const. Co., Berkeley
 \$1,374
 California Steel Prod. Co., 1,389
 Eureka Boiler Works, 1,449
 Western Pipe & Steel Co., 1,450
 Ocean Shore Iron Works, 1,452
 Pacific Coast Boiler Works, 1,524
 Western Pipe & Steel Co., 1,548
 Boiler Tank & Pipe Works, 1,620
 Huber Company, 1,640
 Consolidate Steel Corp., 1,670
 California Boiler Works, 1,923
 Pacific Coast Boiler & Steel Co., 2,000
 Bay City Iron Works, 2,290
 Bids held under advisement.

Preparing Plans.

MEMORIAL BLDG. Cost, \$—
REDLANDS, San Bernardino Co., Cal.
 Memorial building (fireproof construction with the roof).
 Owner—City of Redlands.
 Architect—Elmer Grey, 170 E. California St., Pasadena.
 Contractor—Bert Taylor, Redlands

STOCKTON, San Joaquin Co., Cal.
 —Until March 9, bids will be received by city council to construct comfort station in American Legion Park. Hollow tile to be used in the structure will be furnished by the city. Plans on file in office of city clerk.

MISCELLANEOUS SUPPLIES AND MATERIALS

SAN FRANCISCO—Pames A. Nelson, Inc., 10th and Howard Sts., at \$5,000 each awarded contract by City Purchasing Agent, under Proposal No. 679, to furnish 300 galvanized iron garbage cans for the school department.

SAN FRANCISCO—Until March 23, 3 P. M., under Proposal No. 690, bids will be received by Leonard S. Leavy, city purchasing agent, 270 City Hall, to furnish and deliver supplies in the following classes:

CLASS 2—Banneled Wares, Aluminum Ware, Tinware, Japanned and Galvanized Wares, and Kitchen Utensils.

CLASS 5—Fuel and Gasoline.

CLASS 6—Boiler Compounds.

CLASS 8—Lubricants.

CLASS 10—Household Supplies and Cordage.

CLASS 14—Photographic and Blue Printing Supplies.

CLASS 15—Drugs, Medicines, Chemicals, Hospital Appliances and Surgical Instruments.

CLASS 16—Street and Sewer Material.

CLASS 17—Drafting and Engineers' Supplies.
CLASS 18—Incandescent Electric Lamps.

The above materials will be ordered by the city from time to time during the fiscal year commencing July 1, 1931, and ending June 30, 1932. Specifications are obtainable from the city purchasing agent.

BUSINESS OPPORTUNITIES

Names and addresses of persons or firms concerned in the following opportunities will be furnished on request to Business Opportunity Department, Daily Pacific Builder, 517 Mission St., San Francisco, or phone GARfield 8744.

20859—Borax and Bitumen Emulsions. San Francisco. A business house in Sweden wishes to be put in touch with producers of borax. Another Swedish concern wishes connections with manufacturers of cold bitumen emulsions for road improvement.

20857—Mimeographing Machines. San Francisco. French manufacturer of mimeographing machines wishes an agent for San Francisco.

A Minneapolis firm, manufacturing boilers, desires representation in this district. If interested contact with E. S. Williams, executive secretary of the Minneapolis Civic and Commerce Association, Minneapolis, Minn.

A. F. John, manager of the Milwaukee Tank Works, Inc., Milwaukee, Wis., manufacturers of filling station equipment wishes to secure names of reputable parties or companies to represent them in San Francisco and adjacent territory.

Jacque Goldstein, 424 Driggs Ave., Brooklyn, N. Y., represents a manufacturer of paints and varnishes who desires representation in this section. If interested communicate with Goldstein direct.

WALTER W. COOPER
WITH R. R. COMMISSION

The State Railroad Commission announces the employment of Walter W. Cooper to take charge generally of the preparation of cases before the Commission, the employment to commence as soon as Mr. Cooper can bring to a close his existing engagements with various California cities, by whom he is employed in rate matters. He will start upon his new duties not later than July 1.

Mr. Cooper is a graduate of the University of Minnesota. Prior to the War, he was the personal assistant of Chas. L. Pillsbury, consulting engineer in connection with the valuation of the various public utilities in the District of Columbia for the Utility Commission there. Following this, he was employed by Dr. Edward W. Bemis in making a valuation for the city of Chicago, of the Peoples Gas, Light & Coke Company. During the War, he served in the Navy. Afterwards he worked for Dr. Milo R. Maltbie, now Chairman of the New York Public Service Commission, in a state-wide telephone rate case in Minnesota.

Following this Mr. Cooper worked for Dr. Delos F. Wilcox in connection with valuations or reports on the Minneapolis Street Railway Company and the Minneapolis Gas & Light Co., the Denver Tramway Company, Fort Worth Power & Light Company, the Los Angeles Street Railway Corp., and the street railway franchise situation in San Francisco. He assisted Dr. Wilcox in the preparation of Whitten & Wilcox on Valuation of Public Service Corporations. He was employed by the East Bay cities in the telephone case, and recently has been employed by the cities of Oakland, Sacramento, Stockton, Tracy, Fresno and Minneapolis in utility matters.

Mr. Cooper's principal duties will be to maintain a constant check on the rate structures and earning conditions of the various utilities, and to coordinate the work and records of the several departments of the Commission in handling rate cases.

Engineering News Section

BRIDGES

MARTINEZ, Contra Costa Co., Cal.—City Engineer Den Greene is completing plans for Green street bridge over Alhambra Creek for which the city has \$10,000 available in budget funds. Bids will be asked shortly.

SANTA ROSA, Sonoma Co., Cal.—E. A. Fough, Court House, Santa Rosa, engineer for Joint Highway District No. 7 has completed plans and bids for bridge over Macama Creek, 10 miles east of Healdsburg, on the Healdsburg-Calistoga Highway in Knight's Canyon. Will be steel and concrete construction.

SAN BERNARDINO COUNTY, Cal.—Until March 18, 2 P. M., bids will be received by State Highway Commission to construct bridge over Lytle Creek about 2 miles west of San Bernardino, consisting of five 35 foot steel stringer spans with concrete deck on steel pile bents.

See call for bids under official proposal section in this issue.

VENTURA, Ventura Co., Cal.—A. V. Montin, 1957 West 90th St., Los Angeles, awarded contract by county supervisors at \$1469 to construct timber bridge 20 ft. wide and 30 ft. long with concrete paving and earth fill approaches.

RIVERSIDE COUNTY, Cal.—Plans for the widening of the Rubidoux Bridge over the Santa Ana River have been received by District Engineer E. Q. Sullivan at San Bernardino, who is checking the plans and the site and who will submit his report to the State Highway Commission. Bids will probably be called within 30 days. About \$150,000 is available for this work, which is scheduled to start May

MERCED, Merced Co., Cal.—County Supervisor W. E. Bedesen, Shafter Bldg., is preparing plans for repairs to the Cox Ferry bridge over the Merced river on the Merced-Cox Ferry Road.

SAN FRANCISCO—President Hoover has signed the San Francisco Bay Bridge Bill authorizing the State to proceed with construction of the proposed \$75,000,000 structure to connect San Francisco with the East Bay district.

WEAVERVILLE, Trinity Co., Cal.—C. S. Forest Service officials and the county supervisors have reached an agreement whereby the new bridges will be constructed, one at Big Bear and another at Hyampson over the Trinity river. Each will have a 250-foot span. The cost is estimated at \$10,500 each.

LOS ANGELES, Cal.—Plans for the reinforced concrete and structural steel viaduct to be built across the Los Angeles River at East Sixth St. have been completed and will be ready for contractors March 2. The call for bids will be issued by the Los Angeles Board of Public Works which is

expected to take action about Feb. 27 with bids to be received about March 25 or the week following. The definite date will be announced later.

Merrill Butler, chief bridge engineer, has prepared a list of the quantities which will enter into the construction of this bridge and appurtenances, the preliminary quantities being as follows:

- 5,000,000 lbs. reinf. steel;
- 46,000 cu. yds. class F concrete;
- 500 cu. yds. class G concrete;
- 370 15-ft. concr. piles (precast or cast in place);
- 1,200 tons more or less structural steel;
- 3,000 cu. yds. more or less grading, including fill;
- 2,000 ft. curb;
- 23,000 sq. ft. concr. gutter and local depressions;
- 25,500 sq. ft. cement walk;
- sanitary sewer, storm drain, 8-in. and 3-in. asph. concr. pavement, as per plans;
- ornamental handrails, etc.;
- 72 concrete centrifugally cast standards with double bronze lanterns.

The bids will include the following items:

- (1) reinf. steel, complete in place;
- (2) 46,000 cu. yds. class F concrete (quantity subjects to revision);
- (3) 500 cu. yds. class G concrete;
- (4) reinf. concr. piles, complete in place;
- (5) structural steel, complete in place;
- (6) grading, complete in place;
- (7) 2000 ft. curb;
- (8) 23,000 sq. ft. concr. gutter and local depressions;
- (9) 35,500 sq. ft. cement walk;
- (10) construct and remodel sanitary sewers;
- (11) construct and remodel storm drains;
- (12) pavements, complete in place;
- (13) ornamental handrails and pylons, complete;
- (14) lighting standards and lighting units, complete.

This bridge will be of the girder span type, with structural steel river span, a total length of 3600 ft. The bridge proper will be 46 ft. and at the approaches 56 ft. wide. East of the river the bridge will be 60 to 65 feet above the street level. The approximate cost has been set at about \$1,620,000.

SONOMA COUNTY, Cal.—Peter McHugh, 360 Waldez Ave., San Francisco, at \$19,366 awarded contract by State Highway Commission to construct timber bridge across Mark West Creek about 4.5 miles north of Santa Rosa, consisting of six 19-ft. spans and two 16-ft. 10-in. spans, surfaced with Portland cement concrete, on pile bents and grading and paving approaches with Portland cement concrete pavement.

STOCKTON, San Joaquin Co., Cal.—Until March 16, 10 A. M., new bids will be received by Eugene D. Graham, county clerk, to construct sub-way near Fort Street Lake on the Lower Sacramento road in Road District No. 2 under the tracks of the Southern

Pacific Railroad; estimated cost \$26,000. Railroad is to pay a portion of the cost. Project involves:

- (a) 630 cu. yds. excavation (earth unclassified);
- (b) 80 cu. yds. old concrete to be removed;
- (c) 227 cu. yds. reinforced concrete (1:1½:3);
- (d) 131 cu. yds. reinf. conc. (1:2:4);
- (e) 315 cu. yds. mass concrete;
- (f) 70 cu. yds. deck concrete;
- (g) 70 lin. ft. concrete handrail;
- (h) 44,000 lbs. reinforced steel;
- (i) drainage equipment;
- (j) lighting and wiring.

Previous bids were rejected, the lowest being submitted by E. E. Stokes, 923 S. Sierra Nevada St., Stockton, at \$12,237.25. Complete list of unit bids received published in issue of Feb. 13.

Certified check, 10 per cent payable to Chairman of the Board of Supervisors required with bid. Plans obtainable from County Surveyor Julius Manthey on payment of \$15 deposit.

OAKLAND, Calif.—A. W. Kitchen, LaSalle and Indiana Road, Oakland, at \$1,350.80 awarded contract by county supervisors to repair High Street bridge, involving (1) creosoted piles, \$882.20; (2) creosoted timber, \$168; (3) untreated timber, \$160; (4) remove and replace pile braces, \$170. Complete list of bids follows:

- A. W. Kitchen, (1) \$892.80; (2) \$168; (3) \$160; (4) \$170; total \$1,390.80.
- C. J. Nystedt, 3281 Lakeshore Ave., (1) \$1260; (2) \$140; (3) \$375; (4) \$25; total \$1,800.
- Koettitz & Koettitz, 1424 Fountain Ave., Alameda, (1) \$1440; (2) \$140; (3) \$375; (4) \$40; total \$1,955.

Informal bids were received for this work.

DREDGING, HARBOR WORKS & EXCAVATIONS

PIERPONT BAY, Cal.—Bids will be taken about Feb. 23 by the Frank Melrose Co. for the construction of about one mile of east steel bulkhead at Pierpont Bay to replace the wooden bulkhead recently destroyed by high tides. The steel structure, which will be a cross section of the shape of the letter A, will have a core which will be filled with concrete. D. A. Rizer is the local manager of the company and in charge of the work. The estimated cost is \$300,000.

SANTA MONICA, Calif.—The proposal that the Santa Monica city commission complete the Santa Monica Harbor Co.'s breakwater project has been made to that body. The estimated cost to build a 1000 ft. breakwater is \$359,000, according to figures supplied the commission by F. S. Wilson, industrial secretary for Santa Monica, and Taggart Aston, consulting engineer.

AKLAND, Cal.—City Port Commission rejects bids for disposition of excess dredge fill east of Warehouse B on the waterfront, involving 5000 cu. yds. Jack Casson, Hayward, was low bidder at \$399 cu. yd. Complete list of bids published in issue of Feb. 17.

PEARL HARBOR, T. H.—Until Apr. 8, under Specification No. 6295 bids will be received by Bureau of Yards and Docks, Navy Department, Wash-

ington, D. C., for dredging at the Naval Operating Base, Pearl Harbor. The work includes dredging and disposal of approximately 2,900,000 cubic yards of materials. Plans obtainable from Commandant at the Navy Island Navy Yard and must be accompanied by a check or postal money order for \$20, payable to the Chief of the Bureau of Yards and Docks. Deposit is returnable.

IRRIGATION PROJECTS

LINDEN, San Joaquin Co., Cal.—Fred H. Tibbets, engineer, Alaska Commercial Bldg., San Francisco, in a report to the directors of the Linden Irrigation District offers two proposals to finance the project to bring water into the district for replenishment of the underground supply and surface irrigation problem. The two proposals contemplate an expenditure of \$127,000.

In outlining two separate bond proposals, Engineer Tibbets recommended an issue of \$93,000 for the installation of a pumping plant at Bellota to divert waters into the old Calaveras channel, running through the district, and an expenditure of \$44,000 to purchase the Salt Spring Valley reservoir, an old mining storage basin, five miles east of Milton, owned by the California Company of Pittsburg.

Under the first proposal, one dam would be constructed in the old Calaveras river bed at Bellota, and four below that town, from which water could be pumped into the district and an adequate supply also backed up into a series of ponds for percolation through the underground strata. The second issue would provide for the purchase of the Salt Spring reservoir at a price of \$30,000, and the repairing of a canal between five and six miles long for diversion of water into a gulch which ends at the Calaveras river about seven miles above Bellota.

STREET LIGHTING SYSTEMS

CULVER CITY, Los Angeles Co., Cal.—Until 8 P. M., March 16, bids will be received by city council to construct ornamental lighting system in portions of Sepulveda Blvd. and Washington Blvd., about one mile, involving 91 No. 12, 500 Marquette standards; A. & I. No. 15. Geo. E. Lee,

SAN FRANCISCO.—Until March 18, 2:30 P. M., bids will be received by S. J. Hester, secretary, Board of Public Works, to install ornamental street lighting system in Bay Shore Blvd. Bids are wanted for:

(a) furnish and install ornamental street lighting system;
(b) furnish and install additional street lighting standards.

A bond of \$5,000 will be required of the successful bidder. Certified check 10%, payable to the Clerk of the Board of Supervisors required with bid. Plans obtainable from the Bureau of Engineering, 3rd floor, City Hall.

EUREKA, Humboldt Co., Cal.—Until March 3, 8 P. M. (previously reported March 4) new bids will be received by Walter A. Kildale, city clerk to install electric lights with underground system in Fourth St. from Broadway to J St., involving cast iron standards. Previous bids rejected, these being City Imp. Co., San Francisco, \$14,750; Eureka Electric Co., \$15,000; Globe Electric Co., San Francisco, \$15,000. Engineer's estimate, \$13,000. Certified check 10% payable to city required with bid. Plans ob-

tainable from E. D. Gardner, city engineer.

BURBANK, Los Angeles Co., Cal.—Until 7 P. M., March 3, bids will be received by the City Manager of Burbank, W. S. Patterson, for furnishing 52 porcelain body suspension type, series 6.6 amperes street lighting fixtures; 46 of these will be equipped with Hophophone 8-inch symmetrical bowl refractors and 8 will be equipped with Hophophone Asymmetric two-way bowl refractors.

MACHINERY AND EQUIPMENT

RENO, Nev.—Until March 24, 10 A. M., bids will be received by Washoe County Commissioners to furnish and deliver:

- (a) Two 3-ton motor trucks;
- (a) one 1½-ton motor dump truck;
- (c) one pick-up truck with commercial body;
- (d) one 5-passenger sedan;
- (e) one leaning-wheel grader with 8-ft. blade.

Specifications and further information obtainable from county clerk at Reno.

OAKLAND, Cal.—Until March 4, 5:30 P. M., bids will be received by J. H. Kimball, secretary, East Bay Municipal Utility District, to furnish one Dodge Bros. truck chassis. Specifications obtainable from above.

SACRAMENTO, Cal.—Link-Belt Co., 400 Paul Ave., San Francisco, at \$1,292 submitted low bid to city council to furnish elevating and screening equipment for the Municipal Filtration Plant. Complete list of bids follows, all being taken under advisement until February 26:

Link-Belt Co., San Francisco	\$1,392
Stockton Iron Works, Stockton	1,540
alt. bid	1,725
Edw. R. Bacon Co., San Francisco	1,655

Bids referred to Fred Klaus, city engineer, for report.

CORONA, Riverside Co., Cal.—Until 7 P. M., March 10, bids will be received by the Corona city council for furnishing a 1½-ton truck, one W28 2-yard Wood garbage body, one F1 3-ton lift 60-degree angle Wood hydraulic hoist; also Laher overhead springs. A. M. Hinckley, city clerk.

SAN JOSE, Santa Clara Co., Cal.—City council plans to use surplus bond funds to finance the purchase of the following equipment:

- \$2000 for tractor for fire department truck;
- \$2000 for combination ambulance and police patrol truck;
- \$400 for power lawn mower for city parks;
- \$150 for truck for park department.

John J. Lynch is city clerk. Wm. Popp is city engineer.

FIRE EQUIPMENT

NEWPORT BEACH, Orange Co., Cal.—Until 7:30 P. M., March 2, bids will be received by city council for furnishing fire apparatus, as follows:

- (1) One 500-G P. M. pumper;
- (2) One 750-G P. M. pumper.

Specifications may be obtained from the city engineer, R. L. Patterson.

LIVERMORE, Alameda Co., Cal.—City Council, in recommendation of Fire Chief L. E. Wright, contemplates the purchase of a chemical and hose truck for the fire department. Estimated cost \$1600.

PASO ROBLES, San Luis Obispo Co., Cal.—Booth Bros., Paso Robles, at \$869.60 awarded contract by city trustees to furnish one 4-cylinder Dodge truck chassis for fire department. Paso Robles garage at \$235.45 awarded contract to furnish one Chevrolet 6-cylinder, 50-hp. chassis.

RESERVOIRS AND DAMS

HAYWARD, Alameda Co., Cal.—Jones and King, Hayward, at \$106,550 awarded contract by city council to construct reinforced concrete reservoir of 1,000,000 gals. capacity, in Upper D St., involving:

- (1) 20 10 M.B.M. lumber;
- (2) 12,070 sq. ft. 4-ply tar and gravel roofing;
- (3) 1,860 cu. yds. excavation;
- (4) 103 7 cu. yds. concrete in walls;
- (5) 283 cu. yds. concrete in floor, footings and columns;
- (6) 48,400 lbs. reinf. steel;
- (7) 1,270 lbs. asphalt sealing compound;
- (8) 201 lin. ft. 8-in. vit. clay B & S pipe;
- (9) 590 sq. ft. ¼-in. wire screening;
- (10) 920 lin. ft. 12-in. C. I. supply main (to be laid only);
- (11) 2 concrete valve boxes;
- (12) 1 12-in. C. I. inlet pipe installed;
- (13) 1 8-in. C. I. overflow pipe;
- (14) 1 8-in. washout C. I. pipe;
- (15) 1 wooden indicator.

NOTE: All C. I. pipe, specials and valves furnished by the city.

Complete list of bids follows:

Jones & King, Hayward	\$106,550
A. F. Hanson, Hayward	11,000
L. J. Immel, Oakland	11,295
Thermofite Const. Co., San Jose	11,396
George Ulrich Const. Co., Modesto	11,642
J. H. Fitzmaurice, Oakland	11,651
J. W. Hooper, Sacramento	12,195
Gonzales & Holyroake, Hayward	12,689
Dudley & Velasco, S. P.	12,700
Collins & Martin, San Jose	12,910

W. H. Hansen, Oakland	13,400
J. A. Casson, Hayward	13,650
C. L. Jordan, Belmont	13,945
Fredrickson & Watson, Oakland	14,110
Eaton & Smith, San Francisco	14,500
Frank Bryant, San Francisco	14,615
Geo. Hudson, Oakland	16,261

GLENDALE, Los Angeles Co., Cal.—P. Dederick, city water superintendent, preparing plans for a permanent concrete top for the Chevy Chase Reservoir. The estimated cost is \$100,000.

PIPE LINES, WELLS, ETC.

TIRLOCK, Stanislaus Co., Calif.—Olson Bros. (Turlock Plumbing Co.), Turlock, awarded contract by city council to drill well in connection with water system; drill and case to depth of 85 ft.; \$176.30 and \$175 for each additional foot of drilling and \$2.20 for each additional foot of casing with \$25 per day for developing well.

LOS ANGELES, Cal.—The Southern Fuel Co., Garland Bldg., Los Angeles, will take bids in about 60 days for the trenching, laying and backfilling of a 210 mile natural gas pipe line from Long Beach to the Kettleman Hills District. The exact sizes of the pipe to be used have not been determined. All pipe will be purchased by the company. The Southern Fuel Co. which was organized jointly by the Southern California Gas Co. and the Southern California Edison Co., is now securing necessary franchises from the cities and counties along the route.

CORCORAN, Kings Co., Cal.—Henry Ced-ruski, Corcoran, awarded contract by city trustee to drill well in connection with municipal water system.

SAN FRANCISCO.—Following bids taken under advisement by Board of Public Works to drill four wells in 42nd Ave. bet. Kirkham and Santiago Sts. and a test well in 46th Ave. bet. Noriega and Ortega Sts.

(a) price per foot if well is on paved street.

(b) price per foot if well is on unpaved street.

A. Paulsen, (a) \$12.50 ft.; (b) \$10.75 ft.

J. E. Rogers, (a) \$13.50 ft.; (b) \$10.95.

SEWERS AND SEWAGE DISPOSAL PLANTS

SANTA MONICA, Los Angeles Co., Cal.—Howard B. Carter, city engineer, is preparing plans for a sewer to be built in Colorado Ave., between 2nd St. and 26th St., about 1.5 miles. The pipe will be of vitrified clay and include both 15-in. and 18-in. diameter pipe. Work under 1911 Act.

REDWOOD CITY, San Mateo Co., Cal.—Until March 16, 10 a. m., bids will be received by county supervisors to construct sewer system in the Lomita Park Sanitary District, involving:

Vitrified Clay Sewer

(1) 2700 lin. ft. 4-in.;

(2) 100 lin. ft. 6-in.;

(3) 5000 lin. ft. 8-in.;

(4) 6900 lin. ft. 10-in.;

(5) 9200 lin. ft. 12-in.;

(6) 1400 lin. ft. 15-in.;

(7) 8400 lin. ft. 18-in.;

(8) 3150 lin. ft. 21-in.;

Cast Iron Sewer

(9) 66 lin. ft. 8-in.;

(10) 3420 lin. ft. 10-in.;

(11) 144 lin. ft. 12-in.;

(12) 4272 lin. ft. 14-in.;

(13) 120 lin. ft. 18-in.;

Vit. Clay Wires

(14) 60 4x5-in. wires;

(15) 120 4x10-in. do.;

(16) 140 4x12-in. do.;

(17) 60 4x15-in. do.;

(18) 130 manholes;

(19) 23 M. bd. ft. trestles;

(20) 2 sumps;

(21) 2 pump houses;

(22) 4 air and vacuum valves;

(23) 4 pressure air valves;

(24) 2 400 GPM pumps;

(25) 2 1200 GPM pumps.

Plans obtainable from R. A. Khasen, engineer, Redwood City, and on file in office of county clerk.

SAN JOSE, Santa Clara Co., Cal.—City Engineer Wm. Popp is preparing plans for a sanitary sewer in portions of Willow St., Prevost St., and Delmas Ave.

SAN FRANCISCO.—Bureau of Engineering, Department of Public Works, 3rd Floor, City Hall, is completing plans for additions to the Baker Street and Pierce Street Outfall sewers in the Marina district. Funds to finance will be available from the General Fund, 1930-31 Budget.

MISCELLANEOUS CONSTRUCTION

SAN MATEO COUNTY, Cal.—Ten grade separations in San Mateo county at an estimated total cost of \$2,445,900 are suggested in the primary program contained in the report of the committee on technical data of the Peninsula Grade Crossing Conference. In the secondary program separation of 12 more grade crossings in San Mateo county is urged at an estimated expense of \$2,245,000. Elimination of 22 crossings in the primary program and of 11 more in the secondary program is also urged. There are at

present 52 grade crossings on the Southern Pacific main line throughout the county. The suggested program for first construction in Redwood City calls for the expenditure of \$760,000 for underpass at Hopkins St., Broadway and Main St. Construction of an underpass at Spruce St. for \$192,000 is recommended as part of the secondary program.

WATER WORKS

SAN FRANCISCO.—Petroleum Equipment Co., 17th and Connecticut Sts., awarded contract by City Purchasing Agent, under Proposal No. 682, to furnish and deliver steel pipe for San Francisco Water Department. Standard weight galvanized wrought steel pipe, (made in the U. S. A.), in random lengths, threaded and coupled, as follows:

(1) 35,000 ft. 3-in., \$6.03 per 100-ft.

(2) 3,000 ft. 1-in. \$8.59 per 100-ft.

For mill shipment, f.o.b. 639 Bryan St., San Francisco.

WALNUT CREEK, Contra Costa Co., Calif.—Water Works Supply Co., 501 Howard St., San Francisco, at \$277 submitted lowest bid to city trustees to install pumping plant, involving centrifugal pump with capacity of 280-gals. per minute with a 7½-hp. motor. Following is a complete list of the bids:

Water Works Sup. Co., S. F. \$277

Fairbanks-Morse Co., S. F. \$355

United Iron Works, Oakland. \$440

De Laval Co., S. F. 345

Kimball Krogh Co., S. F. 349

Worthington Co., S. F. 352

W. E. Mauzy & Son, Walnut Creek. 401

Pacific Pump Works, S. F. 420

Neil & Walker, Walnut Creek. 499

Bids held under advisement.

WALNUT CREEK, Contra Costa Co., Cal.—Water Works Supply Co., 501 Howard St., San Francisco, at \$277 awarded contract by city trustees to install pumping plant, involving centrifugal pump with capacity of 280 gals. per minute with a 7½-hp. motor.

WALNUT CREEK, Contra Costa Co., Cal.—City Engineer E. L. O'Hara in report to city trustees estimates cost of first unit of proposed water distributing system at \$1600, itemized as follows: Dipping 3500 feet of 3-inch pipe, \$285; Pringle Ave., laying 2000 feet of 3-inch pipe at 25¢ per ft., \$500; Frederick Ave., laying 400 ft. of 3-inch pipe, \$100; Oakland Blvd., from Buena Vista Ave. to Lafayette highway, laying 1700 feet of 8-inch pipe at \$1.50 per ft. and installing pumping plant, purchase of lot, etc., \$2100; laying of 1100 feet of 3-inch pipe to high tank, \$275; gate valves, fire hydrants, fittings, engineering, etc., \$900

DENVER, Colo.—Bids for furnishing pumps and motors for the Boulder City water system, specifications No. 504-D opened by the U. S. Bureau of Reclamation Feb. 13, follow:

The Aldrich Pump Co., \$1602.

Allis-Chalmers Mfg. Co., \$1740.

Bryon Jackson Co., Berkeley, \$1954; Alt., \$1967.

Crane-O'Fallon Co., Denver, \$1193.

M. T. Davidson Co., Brooklyn, N. Y., \$2370.

Dayton-Dowd Co., Quincy, Ill., \$1266; Alt., \$1279.

DeLaval Steam Turbine Co., Trenton, New Jersey, \$2490.

DeLaval Steam Turbine Co., Los Angeles, \$1629.

Frederick Iron & Steel Co., Frederick, Maryland, \$1356; Alt., \$1593.

Hendrie & Bolthoff Mfg. & Supply Co., Denver, \$1297.

Ingersoll-Rand Co. of Colorado, Denver, \$1590.

Kingsford Foundry & Machine Wks Oswego, N. Y., \$1362.

McCourtney Co., Newark, N. J., \$1470.

McCay & Kintland, Inc., Md., \$1740.

Mine & Smelter Supply Co., Denver, \$1476.

Morris Machine Works, New York, \$1869; Alt., \$1689.

Pennsylvania Pump & Compressor Co., Philadelphia, Pa., \$1866.

The Stearns-Roger Mfg. Co., Denver, \$1174.

United Iron Works, Oakland, \$1395.

The Warner Co., Inc., Denver, \$1,365; Alt., \$1350.

Warren Steam Pump Co., Warren, Mass., \$1515.

Well Pump Co., Chicago, Ill., \$1415.

Worthington Pump & Machinery Corp., New York, N. Y., \$1485; Alt., \$2346.

Yeomans Bros. Co., Chicago, \$1710.

PORTLAND, Ore.—Until March 6, 2 P. M., bids will be received by Frank Coffinberry, city purchasing agent, 208 City Hall, to furnish pump, turbine and appurtenances for Bureau of Water Works. Certified check 10% payable to city required with bid. Specifications obtainable from above.

ABERDEEN, Wash.—Bids for the construction of about four miles of 28-in. pipe line for a water supply system will be called about March 1 by the City Water Department, City Hall, Aberdeen. Bids will be taken on wood-stave pipe, steel pipe, and on concrete pipe. S. C. Watkins, city hall, water superintendent.

SEATTLE, Wash.—Hans Pedersen, 1105 Second Ave., Seattle, at \$169,335 awarded contract by Board of Public Works to construct pipe line in North and East Eighteenth Street.

SAN FRANCISCO.—Until March 4, 10 A. M., under Circular No. 928-31-215, bids will be received by Quartermaster Supply Officer, General Depot, Fort Mason, to furnish and deliver 800 malleable iron pipe fittings, threaded, 150 lbs. S. W. P., galvanized.

VALLEJO, Solano Co., Calif.—Until March 5, 11 A. M., bids will be received by Alf. E. Edgecombe, city clerk to furnish and deliver 4,416 ft. of 24-in. bell and spigot cast iron water pipe, together with fittings and double spigot pipe. Certified check 10% payable to City of Vallejo required with bid. Specifications obtainable from T. D. Kilkenny, city engineer.

SAN FRANCISCO—Until March 4, 10 A. M., under Circular No. 928-31-215, bids will be received by Quartermaster Supply Officer, General Depot, Fort Mason, to furnish and deliver 1,750 ft. wrought iron, butt welded, galvanized pipe, as follows:
750 ft. ½-inch.
1,000 ft. ¾-inch.

VANCOUVER, B. C.—Greater Vancouver Water District, E. A. Cleveland, chief commissioner, reports test borings have been completed for the proposed pressure tunnel to carry water across the First Narrows and bids will be asked for in May. It will run from a point on the Indian reserve near the mouth of the Capilano to Stanley Park, where it will emerge just east of the new Ravine bridge. Having a length of 3,100 feet, it will bore through solid rock at a depth of 100 feet below tide water. In diameter the tunnel will be seven feet six inches. Approximately \$1,000,000 will be spent on this project and the laying of steel pipe from the end of the tunnel across Stanley park. The tunnel which should be completed about 1932 will add an additional 25,000,000 to 30,000,000 gallons to the daily water supply. Eventually this work will be connected up with the Little Mountain reservoir, the whole undertaking to cost about \$2,250,000.

BURBANK, Los Angeles Co., Calif.—Until March 3, 7 P. M., bids will be received by W. S. Paterson, city manager, to furnish and install deep well centrifugal turbine pump in 20-in. well at Maple and Jeffries Sts. Specifications obtainable from above.

SANTA MARIA, Santa Barbara Co., Calif.—Until March 2, 7:30 P. M., bids will be received by Mrs. Flora A. Rivers, city clerk, to furnish one complete horizontal electric driven trustee connected centrifugal pumping unit. Specifications obtainable from clerk.

PLAYGROUNDS & PARKS

MARTINEZ, Contra Costa Co., Calif.—Until March 5, 7 P. M., bids will be received by F. D. Butcher, clerk, Alhambra Union High School District, to furnish plants and materials for planting and improvement of the high school grounds. Certified check 10% payable to clerk of district required with bid. Specifications obtainable from clerk.

STREETS AND HIGHWAYS

SAN ANSELMO, Marin Co., Calif.—Louis Lambrecht, Mill Valley, at \$1050 awarded contract by town trustees to improve Essex street involving grading, hyd. cem. concrete curbs, gutters and headwall hyd. cement concrete pave, vit. pipe sewers with wye branches and laterals, vit. pipe lamp-holes.

STOCKTON, San Joaquin Co., Calif.—Until March 16, 10 A. M., bids will be received by Eugene D. Graham, county clerk, to improve Meyer Road in Supervisor District No. 3. Plans obtainable from County Surveyor Julius Manthey.

PLUMAS COUNTY, Calif.—Following bids received February 25, by State Highway Commission to grade 0.7 mi between Paxton and Keddie:
Morrison & Knudsen, Cont. Nat.
Bank Bldg., Boise, Idaho.....\$48,731

Chigris & Surtos, S. P.....\$2,968
Fennell Co., Sacramento.....\$3,522
Larsen Bros., Galt.....\$5,200
Granfield, Farrar & Carlin, S. P.....\$1,810
Young & Sons Co., Ltd., Berkeley.....\$4,129
C. H. Bitterden, Napa.....\$7,753
H. H. Chomter, San Francisco.....\$9,967
Bids held under advisement.

SUTTER COUNTY, Calif.—Until March 9, 2 P. M., bids will be received by C. H. Whitmore, district engineer, State Highway Commission, 592 State Office Bldg., Sacramento, to grade and pave with Portland cement concrete, 0.3 mile near county hospital in Sutter County.

SAN FRANCISCO—E. J. Treacy, Call Bldg., at \$391.25 awarded contract by Board of Public Works to improve Victoria Ave. bet. Randolph and Stanley Sts., involving: (a) 150 lin. ft. armored concrete curb, \$55; (b) 75 lin. ft. 6-in. V.C.P. side sewer, \$95; (c) 2100 sq. ft. 6-in. class E concrete pavement, \$275.

SAN FRANCISCO—E. J. Treacy, Call Bldg., at \$850.85 awarded contract by Board of Public Works to improve Poisson St. bet. Crescent and Ogden Aves., involving: (a) 142 lin. ft. concrete curbs to be reset, \$30; (b) 75 lin. ft. 6-in. V.C.P. side sewer, \$1; (c) 2095 sq. ft. 6-in. class E concrete pave., \$35.

SAN FRANCISCO—Municipal Construction Co., Call Bldg., at \$1,750 awarded contract by Board of Public Works to improve Quesada Ave. bet. Hayes and Griffith Aves., involving: (a) 125 lin. ft. armored concrete curb, \$150; (b) 125 lin. ft. 6-in. V.C.P. side sewer, \$125; (c) 3125 sq. ft. asphalt concrete pave, 2-in. asphalt conc. surface on 6-in. class F conc. base, \$45.

SAN FRANCISCO—C. B. Eaton, 715 Ocean Ave., at \$1,803.55 awarded contract by Board of Public Works to improve crossing of Bancroft, Quint and Thornton Aves., involving: (a) 166 lin. ft. armored concrete curbs, \$75; (b) 70 lin. ft. 10-in. V.C.P. culvert, \$150; (c) 775 sq. ft. 1-course concrete sidewalks, \$13; (d) 3 brick catchbasins, \$70; (e) 5340 sq. ft. asphalt conc. pave, 2-in. asphalt conc. surface on 6-in. class F concrete base, \$245.

SAN JOSE, Santa Clara Co., Calif.—Proceedings will be started by the city council to improve San Fernando St. bet. 19th and 24th Sts., involving grading, paving, curbs, etc. Wm. Popp, city engineer.

COLUSA COUNTY, Calif.—Harms Bros., Calif., at \$9,715 awarded contract by State Highway Commission to surface with pit run gravel, 1.5 miles bet. Maxwell and the north boundary.

SAN FRANCISCO—Until March 18, 2:30 P. M., new bids will be received by S. J. Hester, secretary, Board of Public Works, to improve Del Long St. bet. Head and San Diego Aves., involving:

(a) 208 lin. ft. armored concrete curb;
(b) 48 lin. ft. 6-in. V.C.P. side sewer;
(c) 3921 sq. ft. asphalt conc. pavement, 2-in. asphalt conc. surface on 6-in. class F concrete base.

Bids received for this work on Feb. 18 and published in our issue of Feb. 19, rejected. Certified check 10% payable to Clerk of the Board of Supervisors required with bid. Plans obtainable from Bureau of Engineering, 3rd floor, City Hall.

SAN FRANCISCO—Until March 18, 2:30 P. M., new bids will be received by S. J. Hester, secretary, Board of Public Works, to improve Barneveld St. bet. Galvin and Sweeney Streets, involving:

(a) 75 lin. ft. armored concrete curb;
(b) 60 lin. ft. 6-in. V.C.P. side sewers;
(c) 2250 sq. ft. asphalt conc. pavement, 2-in. asphalt conc. surface on 6-in. class F concrete base.

Municipal Const. Co., at \$1,642.50 submitted only bid for this work on Feb. 18. Bid was rejected. Certified check 10% payable to Clerk of the Board of Supervisors required with bid. Plans obtainable from Bureau of Engineering, 3rd floor, City Hall.

SAN FRANCISCO—Until March 18, 2:30 P. M., new bids will be received by S. J. Hester, secretary, Board of Public Works to improve Victoria Ave. bet. Shields and Sargent Aves., involving:

(a) 75 lin. ft. armored concrete curb;
(b) 15 lin. ft. 6-in. V.C.P. side sewer;
(c) 1125 sq. ft. 6-in. class E concrete pavement.

Bids received for this work on Feb. 18 and published in our issue of Feb. 19, rejected. Certified check 10% payable to Clerk of the Board of Supervisors required with bid. Plans obtainable from Bureau of Engineering, 3rd floor, City Hall.

SACRAMENTO, Calif.—Until March 5, 5 P. M. (to be opened 8 P. M.) bids will be received by H. G. Denton, city clerk (2306), to improve alley between Y St. and Burnett Way, from 24th St. to Point 279 ft. westerly, involving c. i. drains with vitrified sewer connections, construct unified sewer, 1-inch water main connections, grading, hydraulic concrete pavement, 1911 Act, Bond Act 1915. Certified check 10% payable to city required with bid. Plans obtainable from city clerk. F. J. Klaus, city engineer.

SAN FRANCISCO—Until March 18, 2:30 P. M., new bids will be received by S. J. Hester, secretary, Board of Public Works, to improve University Ave. bet. Silver and Silliman Aves., involving:

- (a) 90 lin. ft. armored concrete curb;
- (b) 1925 sq. ft. asph. conc. pavement;
- (c) 2-in. asph. conc. surface on 6-in. class F concrete base.

Bid received Feb. 18 rejected. Municipal Const. Co. only bidder at \$75,583. Certified check 10% payable to Clerk of the Board of Supervisors required with bid. Plans obtainable from Bureau of Engineering, 3rd floor, City Hall.

SALINAS, Monterey Co., Cal.—City council declares intention (93) to improve portions of Lincoln Ave., involving grading, hyd. cem. concrete curbs, sidewalks, 5-in. hyd. cement concrete pavement. 1911 Act. Bond Act 1915. Hearing March 16. M. E. Keef, city clerk. Howard Cozzens, city manager.

ALAMEDA, Alameda Co., Calif.—Hutchinson Co., 1150 Harrison St., Oakland, at \$8,233.75 awarded contract by city council (96) to improve Third St. bet. Pacific Ave. and Maple St., involving grading; conc. curbs, gutters, walks; corrugated iron culverts; 6-in. oil macadam pavement. Other bids: L. J. Immel, \$8,668; Healey-Moore Co., \$8,852; L. L. Page, \$9,709.

OAKLAND, Cal.—J. H. Fitzmaurice, 254 Hobart St., Oakland, at \$660.12 submitted low bid to the city council to construct sidewalks in portions of 92nd Ave. bet. A and G Sts. Following is a complete list of the bids:

J. H. Fitzmaurice, Oakland	\$660.12
Triber & Massaro, Oakland	1,650
A. Suda, Oakland	1,775

All bids held under advisement.

SAN MATEO, San Mateo Co., Cal.—Until March 2, 8 P. M., bids will be received by E. W. Foster, city clerk, to improve Poplar St. from Delaware to Humboldt St. and along south side of San Mateo High School grounds; estimated cost \$50,000. Project involves:

- (a) 2,000 cu. yds. grading;
- (b) 150 lin. ft. 4-in. vit. pipe sewers;
- (c) 130 lin. ft. 6-in. do.
- (d) 1,400 lin. ft. concrete curb;
- (e) 14,500 sq. ft. cement sidewalks;
- (f) 1,402 lin. ft. 2x5-ft. reinf. concrete box culvert;
- (g) 7 catchbasins;
- (h) 50,000 sq. ft. 6-in., 8-in. concrete pavement;
- (i) 50 ft. 15-in. conc. pipe sewer;
- (j) 90 ft. 12-in. do.
- (k) 1 special catchbasin.

Acq. and Imp. Act 1915. Certified check 10% payable to city required with bid. Plans on file in office of clerk. E. P. Wilsey, city manager.

MENDOCINO COUNTY, Cal.—Until March 18, 2 P. M., bids will be received by State Highway Commission to improve 13.5 miles of highway between Pepperwood and Little Dunn Creek, about 5.5 miles to be graded and about 13.5 miles to be surfaced with bituminous treated crushed gravel or stone surfacing, road mixed.

See call for bids under official proposal section in this issue.

SANTA CRUZ, Santa Cruz Co., Cal.—City council declares intention (461-C) to improve Vine St. bet. Church and Locust Sts., involving cement concrete paving, curbs, walks, driveway approaches, vit. clay pipe main sanitary sewer with wyes, manholes, vit. clay pipe laterals, w. l. water service connections and concrete meter boxes. 1911 Act. Hearing March 9. S. A. Evans, city clerk. Roy Fowler, city engineer.

SANTA CLARA, Santa Clara Co., Calif.—Hanrahan Co., Standard Oil Building, San Francisco, at \$10,597 awarded contract by city trustees to improve Campbell Ave. and Belomy St., involving:

- 75,000 sq. ft. 2-in. asph. surf., \$3,647;
- 75,000 sq. ft. 4-in. do. \$3,685;
- 150 sq. ft. concrete gutters, \$26;
- 100 lin. ft. concrete curbs, \$35;
- 6,000 sq. ft. cement walks, \$15;

Complete list of unit bids received on this project published in issue of Feb. 4.

OAKLAND, Cal.—Until February 26, 12 noon, bids will be received by F. C. Merritt, city clerk, to improve portions of Fruitvale Ave. near the Tidal Canal, forming northern approach to Fruitvale Ave. bridge, involving:

- (1) 99 lin. ft. concrete curb;
- (2) 99 lin. ft. concrete gutters;
- (3) 1,946 sq. ft. 6-in. asph. conc. pave with 1½-in. asph. binder and 1½-in. asph. surface;
- (4) 797 sq. ft. existing pavement and gutters to be resurfaced with asphalt concrete;
- (5) 1 manhole;
- (6) 1 storm water inlet;
- (7) 43 lin. ft. 10-in. concrete pipe conduit.

Certified check 10% payable to city required with bid. Plans on file in office of clerk. Walter N. Frickstad, city engineer.

SALINAS, Monterey Co., Cal.—Jas L. Connor, Seaside and Del Monte, Monterey, at \$15,879.50 awarded contract by county for grading a portion of the Soledad-King City Road from a point 5 miles south of Soledad to a point 2 miles north of Coburn, in Supervisor District No. 3, involving 35,000 cu. yds. Following is a complete list of the bids:

James L. Connor	\$15,879
Karstedt & Karstedt, Watsonville	18,138
San Jose Excavation Co., S. J.	18,277
Lilly, Willard and Bassotti, Stockton	22,016

Granite Const. Co., Watsonville	24,949
Charles Kelly, Salinas	25,151
W. A. Dantonville, Salinas	25,328
Delta Dredging Co.	26,933
O. A. Lindberg	28,055
R. L. Oakley, Salinas	28,658
L. W. Hoffe	30,120
W. K. McMillan	30,955

CLARK COUNTY, Nevada—Pat Cline, Inc., Las Vegas, Nev., at \$55,266.76 submitted low bid to State Highway Commission for grading, structures and gravel surfacing on 10.8 miles from Las Vegas to 10 miles southeast. Quantities of materials involved published in issue of Feb. 3.

Complete list of bids follows:

Pat Cline, Inc., Las Vegas	\$55,266
A. D. Drumm Jr., Fallon, Nev.	62,695
G. H. Oswald, Los Angeles	65,066
Dodge Bros., Fallon, Nev.	74,795
Triangle Rock & Gravel Co., San Bernardino	76,436
F. W. Nighbert, Bakersfield	85,382
Engineer's estimate	89,382

SAN LUIS OBISPO, San Luis Obispo Co., Cal.—As previously reported, city council declares intention (346) to improve Pacific street from Santa Rosa St. to Higuera St. Project involves:

- (1) 156,000 sq. ft. 6-in. to 8-in. concrete pavement;
- (2) 29,300 sq. ft. walk;
- (3) 3598 sq. curb.

Est. cost \$40,000. 1911 Act. Bond Act 1915. Hearing March 2. Callie M. John, city clerk. Leon Moore, city engineer.

PALO ALTO, Santa Clara Co., Cal.—As previously reported, city council declares intention (962) to improve Palo Alto Ave., Hale, Pope and Dana Sts., Forest Court, Addison and Harker Aves., Webster St., Embarcadero Road, Lane "E" East, Santa Rita Ave., Sherman Ave., Princeton, Oberlin and Harvard Sts. Project involves:

- (1) 356,743 sq. ft. grading;
 - (2) 308,520 sq. ft. 6" concrete pavement;
 - (3) 14,356 lin. ft. concrete curbing;
 - (4) 33,137 sq. ft. 4" cement sidewalk
 - (5) 615 lin. ft. 6" sewer;
 - (6) 690 lin. ft. 6" C. I. water main;
 - (7) 750 lin. ft. 2" W. I. gas main;
 - (8) 1 fire hydrant;
 - (9) 3 manholes;
 - (10) 83 4" sewer connections;
 - (11) 83 3/4" water connections;
 - (12) 18 3/4" gas connections.
- Estimated cost, \$73,300. 1911 Act. Hearing Feb. 25, 7:30 P. M., E. L. Beach, city clerk. J. F. Byxbee Jr., city engineer.

SAN JOSE, Santa Clara Co., Cal.—Until March 2, 8 P. M., bids will be received by John J. Lynch, city clerk, (5288) to improve Emory St. bet. Dana Ave. and Park Ave. and a portion of Park Ave., involving grading, 1½-in. asphaltic concrete surface pavement on 2½-in. asphaltic concrete base with 3-in. gravel cushion, cement concrete curbs and walks, 4-in. vitrified sewer laterals, cement concrete storm water inlets, etc. 1911 Act. Certified check 10% payable to city required with bid. Plans on file in office of clerk. Wm. Popp, city engineer.

MARIN COUNTY, Cal.—Until March 10, 2 P. M., bids will be received by H. W. Rhodes, superintendent of lighthouses, 424 Customhouse, San Francisco, for constructing 2.5 miles of road in Marin County, extending from Drake's Bay into the Point Reyes Lighthouse Reservation; road to have surface of decomposed granite approximately 18 feet wide. Plans obtainable from above office on deposit of \$10, returnable.

SAN FRANCISCO—Until March 4, 2:30 P. M., new bids will be received by S. J. Hester, secretary, Board of Public Works, to improve Bradford St. bet. Cortland Ave. and Powhattan St., involving:

- (1) 167 lin. ft. concrete curb;
- (2) 25 lin. ft. 6-in. V.C.P. side sewers;
- (3) 2004 sq. ft. 6-in. class E concrete pavement.

Low bidder under previous call, was H. Armstrong, 1950 Folsom St., at \$773.16. Certified check 10% payable to Clerk of the Board of Supervisors required with bid. Plans obtainable from Bureau of Engineering, 3rd floor City Hall.

SAN FRANCISCO—Board of Public Works rejects bids received January 21 to improve Campbell Avenue bet. Alpha and Rutland Sts., M. Bertolino, 23 Shotwell St. being low bidder at \$3,927.60. Federal Construction Co., \$4,803.95 only other bidder. Unit bids published in issue of Jan. 23.

SANTA BARBARA, Cal.—Until 10 A. M., March 5, bids will be received by the Santa Barbara county supervisors for grading and draining a portion of the county highway, known as Sections 2A and 2B, San Julian Road Project, located in the San Julian Rancho, in the 4th Road District. O. H. Neill, county engineer. Certified check or bond, 10%. Plans may be obtained on deposit of \$10.

SANTA MARIA, Santa Barbara Co., Cal.—City declares intention to improve Cook St. bet. Suzy Ave. and Lincoln Ave., and Cypress St. from Broadway to Lincoln Ave., including grading, 4-in. asph. concrete pavement, gutters and curbs. York Peterson, city engineer. Mrs. Flora Rivers, city clerk.

SONORA, Tuolumne Co., Cal.—W. C. Colley, 35 North Hampton Street, Berkeley, at \$6,885 awarded contract by county supervisors to extend the Big Hill-Longeway road, east of Columbus, a distance of 13,367 ft. Road will be 20-ft. wide with maximum grade of 6%. Project involves: 17,500 cu. yds. excavation, including clearing right of way and retaining walls;

768 ft. 12-in. culvert pipe;
294 ft. 15-in. do;
28 ft. 30-in. do;
36 ft. 36-in. do;

Complete list of bids follows:

W. C. Colley, Berkeley \$ 6,985
D. R. Hanify, Sonora 6,988
Pacific Const. Co., Oakland 11,393
Larson Bros., Galt 12,232
Chas. W. Chittenden, Napa 12,387

SAN FRANCISCO—Bureau of Engineering, Department of Public Works 3rd floor, City Hall, completes specifications to improve crossing of Quintara and 33rd Ave., and Quintara St. bet. 33rd and 34th Aves.; estimated cost \$4,000. Project involves:

(1) 600 cu. yds. excavation;
(2) 94 lin. ft. armored concrete curb; (3) 200 cu. yds. cut-back asphalt;
(4) 105 lin. ft. 10-in. V.C.P. culvert;
(5) 345 lin. ft. 21-in. V.C.P. sewers;
(6) 16 Y or T branches on 21-inch sewer;

(7) 49 lin. ft. 8-in. V.C.P. sewer;
(8) 36 cu. yds. 2-manholes;
(9) 660 sq. ft. 1-course concrete sidewalks;
(10) 4893 sq. ft. asph. conc. pavement, 2-in. asph. conc. surface on 6-in. class F concrete base.

MENDOCINO COUNTY, Cal.—As previously reported, bids will be received March 18, by State Highway Commission to improve 13.5 miles of highway between Pepperwood and Little Dunn Creek, about 5.5 miles to be graded and about 13.5 miles to be surfaced with bituminous treated crushed gravel or stone surfacing, road mixed. Project involves:

(1) 56 acres clearing and grubbing right-of-way;
(2) 682,650 cu. yds. roadway excavation without class;
(3) 2,130,000 sta. yds. overhaul;
(4) 9500 cu. yds. structure excavation
(5) 2150 cu. yds. class A Portland cement concrete (structures);
(6) 214,400 lbs. bar reinf. steel (structures);
(7) 19,450 cu. yds. creek run gravel (base and shoulders);
(8) 23,860 cu. yds. untreated crushed gravel or stone surfacing;
(9) 1750 M. gallons water applied to surfacing;
(10) 960 tons cut-back asphalt, grade 2;

(11) 13 miles mixing cut-back asphalt and crushed gravel or stone surfacing;
(12) 555 cu. yds. rubble masonry (retaining walls and ditch lining);
(13) 4050 reinf. Portland concrete units (slope paving);
(14) 2830 lin. ft. 18-in. corr. metal pipe;
(15) 180 lin. ft. 36-in. corr. metal pipe;
(16) 110 lin. ft. 42-in. corr. metal pipe;
(17) 564 lin. ft. 48-in. corr. metal pipe;
(18) 150 lin. ft. 18-in. part circle corr. metal pipe;
(19) 6545 lin. ft. 8-in. perforated metal pipe underdrains;
(20) 150 lin. ft. corr. metal pipe, clean and relay;

(22) I only, concrete bridge deck removed and disposed of;
(23) 600 each, timber guide posts and culvert markers;
(24) 177 each, monuments complete in place;

(25) 712 sta. finishing roadway.

The state will furnish corrugated metal pipe, part circle pipe, steel trams and covers for drop inlets, and timber guide posts and culvert markers.

OAKLAND, Cal.—Lee J. Immel, 1651 Evelyn St., Berkeley, at \$30,735 awarded contract by city council to improve portions of Eighth St., Fallon St. and the extension of Tenth St., involving:

(1) 7,548 cu. yds. fill, \$35;
(2) 1,336 cu. yds. excavation, \$35;
(3) 100 cu. yds. material in excavation below subgrade to be removed and replaced with filling material, \$2;

(4) 322 lin. ft. wood curb, \$30;
(5) 4,779 lin. ft. concrete curb, \$40;
(6) 4,781 sq. ft. concrete gutter, \$23;
(7) 9,225 sq. ft. asphaltic concrete pavement (asphaltic concrete surface, 2-inch thick, laid upon a Portland cement concrete foundation, 6-in. thick), \$23;

(8) 127,088 sq. ft. penetration macadam pavement, \$11;

(9) 2,411 sq. ft. existing pave. to be resurfaced with asph. conc., \$14;
(10) 21,662 sq. ft. c.m. sidewalk, \$14;
(11) 235 lin. ft. 6-in. by 22-in. wooden culvert, \$80;

(12) 2 manholes with inlet tops (34-in. opening, \$65.
Complete list of unit bids on this project published in issues of Feb. 13 and 24.

SALINAS, Monterey Co., Calif.—S. Ruthven, Railroad Ave., Monterey, at \$2610 awarded contract by county for grading a portion of the Monterey-Castroville Road, 1 mile north of Seaside in Supervisor District No. 5, involving 11,000 cu. yds. Following is a complete list of the bids:
S. Ruthven, Monterey \$2,610
Jas. L. Connor, Monterey 2,900
Granite Const. Co., Watsonville 3,480

HAYWARD, Alameda Co., Cal.—City Engineer Jesse B. Holly preparing estimates of cost to widen Castro street, between A and B Sts., and A street between Castro and Main streets.

spans with concrete deck on steel pile bents.

Proposal forms will be issued only to those Contractors who have furnished a verified statement of experience and financial condition in accordance with the provisions of Chapter 611, Statutes of 1929, and whose statements so furnished are satisfactory to the Department of Public Works. Bids will be accepted from a Contractor to whom a proposal form has not been issued by the Department of Public Works.

Plans may be seen, and forms of proposal, bonds, contract and specifications may be obtained at the said office and they may be seen at the offices of the District Engineers at Los Angeles and San Francisco, and at the office of the District Engineer of the district in which the work is situated. The District Engineers' offices are located at Eureka, Redding, Sacramento, San Francisco, San Luis Obispo, Fresno, Los Angeles, San Bernardino and Bishop.

A representative from the district office will be available to accompany prospective bidders for an inspection of the work herein contemplated, and Contractors are urged to investigate the location, character and quantity of work to be done, with a representative of the Division of Highways. It is requested that arrangements for joint field inspection be made as far in advance as possible. Detailed information concerning the proposed work may be obtained from the district office.

No bid will be received unless it is made on a blank form furnished by the State Highway Engineer. The special attention of prospective bidders is called to the "Proposal Requirements and Conditions" annexed to the blank form of proposal, for full directions as to bidding, etc.

The Department of Public Works reserves the right to reject any or all bids or to accept the bid deemed for the best interest of the state.

DEPARTMENT OF PUBLIC WORKS,
DIVISION OF HIGHWAYS.

C. H. PURCELL,
State Highway Engineer
Dated February 18, 1931.

QUALITY WELDING VIA HEAVY ELECTRODE

The General Electric Company announces a new heavily coated electrode, designated type R, for quality welding. This particular type of electrode is composed of .13 to .18 carbon steel covered with a heavy coating of cotton braid impregnated with an arc stabilizing flux, and will be available in diameters from $\frac{1}{8}$ to $\frac{3}{8}$ by 18" length.

Metal deposits of this electrode will have high tensile strength and will produce a homogeneous structure resulting in a ductile weld. This is caused by the fact that, during the arc transference period, the metal is in a protective atmosphere because the electrode itself burns away quicker than the coating and excludes those elements always prevalent in atmosphere which cause some undesirable results when the use of an uncoated rod is used.

Extreme are stability and high arc voltages permissible from this type of electrode produce an unusual high speed of welding for certain applications.

The new electrode is expected to be of particular value in the field of pipe line welding where speed and ductility are essential requirements.

OFFICIAL PROPOSALS

STATE OF CALIFORNIA

DEPARTMENT OF PUBLIC WORKS

DIVISION OF HIGHWAYS

NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received at the office of the State Highway Engineer, Public Works Building, Sacramento, California, until 2 o'clock P. M. on March 18, 1931, at which time they will be publicly opened and read, for construction in accordance with the specifications, hereof, of which special reference is made, of portions of State Highway, as follows:

Mendocino County, between Pepperwood School and Little Dunn Creek (1-Men-I-H & D), about thirteen and five-tenths (13.5) miles in length; about five and five-tenths (5.5) miles to be graded and about thirteen and five-tenths (13.5) miles to be surfaced with bituminous treated crushed gravel or stone surfacing, road mixed.

San Bernardino County, a bridge across Lytle Creek about 2 miles west of San Bernardino (VIII-SFD-9-C), consisting of five 35-foot steel stringer

Speaking before the annual meeting of the West Coast Lumbermen's Association at Tacoma, Wash., W. F. Shaw, Trade Extension Manager of the National Lumber Manufacturers Association, remarked that despite the long period of stress and strife resulting in a 45 per cent drop in residential construction during the past 20 months and a 23 per cent decline in all building construction, lumber had more than held its own.

Mr. Shaw expressed the belief that the building situation will improve during the last half of 1931 and that buying will eventually come back with a rush. When the much desired revival comes the lumber industry, Mr. Shaw said, would be found to have the following assets:

- (1) A more equal sharing of the burden of reduced production.
- (2) More attention given to proper uses.
- (3) Increased attention to merchandising and identified products.
- (4) More intense general interest in promotion activities.

F. C. and H. L. Gerken will operate from 409 Eddy Street under the firm name of Eddy Radio Electric Company.

A "Pittsburg" Automatic Water Heater installed in the Home indicates high quality throughout.

Recommended and specified by all the leading architects, plumbers and builders.

Consider the high merit of the Pittsburg coupled with "Pittsburg Perfect Service."

"Hot water quick as a wink."

Pittsburg Water Heater Co.

Makers of "Pittsburg Automatic"—"Bungalow Automatic"

HOME BUILDING LAGS IN SEATTLE

During the last decade the sum of \$196,580 has been expended for the 330 new homes built in Seattle. To that amount should properly be added \$7,860 for the 193 new residences it under construction there since the first of the present year. But the fact remains that Seattle is lagging in home construction now. Last year only 1176 new homes were built in the northwest city. That is the smallest number in the ten-year period referred to above. The values are a trifle higher, however, than in 1920 (the next lowest year). In 1925 there were 3615 homes, costing \$11,490 constructed in Seattle. The next year in home building was 1926 when 3341 residences costing \$165,020 were built. The up-and-downs of apartment house construction has had little apparent effect on the building figures indicate the fact that the city's boom in home construction occurred in 1924, 1925, 1926 and 1927 and have steadily declined since despite greater population would indicate that home building will have to increase in volume or a scarcity of modern residences will be noted.

The number and value of new homes built in Seattle each year for the last 10 years are listed herewith:

	Value	Number
1920	\$ 3,895,685	1,176
1921	5,971,710	1,703
1922	8,082,900	2,332
1923	9,464,525	2,756
1924	11,165,020	3,241
1925	11,750,960	3,615
1926	9,140,555	2,865
1927	6,322,405	2,086
1928	5,599,730	1,903
1929	4,319,930	1,775
1930	3,450,160	1,431
Totals for 10 yrs.	\$79,196,580	24,980

FEBRUARY BUILDING PERMITS \$1,712,571

Building operations undertaken in San Francisco during the month of February involved an expenditure of \$2,571 as compared with \$1,144,062 for the corresponding period in 1930. The figures are based on building permits issued by the Department of Public Works.

Building operations involved an expenditure of \$1,831,083 as compared with \$1,431,893 last year.

Following is a segregated report of February, 1931, activities as compiled by the Bureau of Building Inspection, Dept. of Public Works:

	No. of Permits	Estimated Cost
Alterations	1	\$115,640
Buildings	2	26,700
Concrete	12	232,475
Foundations	179	\$46,562
Roofs	315	\$131,794
Structures	1	250,000
Total	501	\$1,712,571

LOCAL LABOR AT LOCAL PAY ON ALL FEDERAL PROJECTS

Representative Welch of California, who became chairman of the labor committee late in the present session of congress scored his first victory last Saturday when the House finally agreed to the bill requiring contractors on public buildings to observe the local wage scale when employing men to erect federal buildings.

A considerable percentage of the public building contracts is said to have been awarded to itinerant contractors who have moved about the country, hired a lot of cheap labor in the south, and been able to move that labor to any city in which they get a contract, and to disregard the local scale of wages.

Some of these contractors, employing almost exclusively Negro labor from the south, have developed a system of establishing labor camps in towns where they get contracts by reason of low bids; of shipping in their Negro laborers by the carload, establishing cheap camps where the laborers may obtain cheap lodging and cheap meals furnished by the contractor, and have then refused to recognize the local wage scale or to employ local labor.

In this way they have been able to underbid local contractors, and to break down existing wage scales, and to distort the public building from a scheme to create unemployment into a scheme to enrich themselves through the exploitation of cheap labor that is willing to pay back to the contractor a large part of its wages for lodging and meals.

In putting through the house a bill which requires contractors on public works to recognize local wage scales, and so far as possible to employ local labor, Representative Welch believes he has gone far towards making the public building program what it has been advertised to be, a plan to aid unemployment.

Incidentally, this is the first bill which Welch has had to present to the house since he became chairman of the labor committee.

GENERAL PAINT ELECTS OFFICERS

E. A. Bradley, former president of the General Paint Corporation, was elected to the office of chairman of the board of directors at the recent meeting of that body. C. H. Jones, formerly vice-president in charge of the Spokane division, was elected to the office of president.

Prior to the inclusion of Jones & Dillingham of Spokane in the General Paint merger two and one-half years ago, Jones was president of that company and has had wide experience in the paint business, having organized the Jones & Dillingham firm more than forty years ago.

3-CITY LICENSE IS CONTEMPLATED

Monterey peninsula contractors are seeking some means of protection from competition from outside builders and plan to submit to the Monterey city council an ordinance licensing contractors and sub-contractors.

At a recent session of the council an ordinance was suggested by D. L. Dawson, secretary of the Monterey County Builders' Exchange. While City Attorney Argyll Campbell was of the opinion such procedure would be unconstitutional, it was indicated that some method could likely be adopted. The proposed ordinance will get further attention at the next meeting of the builders' exchange.

It has been suggested that general contractors pay a license of \$500 and \$50 a year thereafter and that sub-contractors pay an initial license of \$100 and \$25 annually. Others favor a lower license fee.

Contractors point out that many other cities provide protection for local contractors, notably Salinas and Santa Cruz.

Builders are hopeful of making arrangements with councils of Monterey, Pacific Grove and Carmel whereby a contractor paying a license in any one city would be exempt from paying a license in any of the other two communities.

Under this arrangement, a contractor or sub-contractor paying a license in Monterey would be able to operate in Pacific Grove and Carmel without an additional payment.

MERCHANT PLUMBERS ORGANIZE CONFERENCE

Alce Coleman has been named president of the Northern California Federation of Merchant Plumbers, recently organized, to operate along lines which have not been successful in the southern section of the state.

The Federation will hold monthly meetings which will feature open forum discussions in which manufacturers and wholesalers will be invited to take part.

Adoption of the construction and by-laws of the Southern California Federation as a basis for organization and administration of the Northern group was voted at the organization meeting.

Harry G. Newman of Oakland is vice-president of the Federation and J. B. Hawley of Sacramento, treasurer. Frank Mauzy of Walnut Creek is secretary.

Robert Duncan of Oakland, John Young of San Francisco, and Chas. Merritt of San Jose are members of the Board of Directors.

The Fillmore Lumber Company is the new name for Hull Bros. Lumber Co. of Fillmore, it is announced by H. R. Crozier, who is now actively interested in the business.

BASIC PRINCIPLES OF CONCRETE MAKING COORDINATED

By Joseph A. Kitts
(Consulting Concrete Technologist, San Francisco, Calif.)

3. NEW LAWS OF MIXTURES COORDINATED WITH THE KNOWN FUNDAMENTALS.

The modern demand for knowledge of exact basic principles of concrete making is that of the commercial concrete factory. This new manufacturing industry has increased in the United States from 25 major plants in 1925 to 235 or more at the end of 1929, and introduces a demand never before required in concrete production, i.e., exact methods and results.

The varieties of concrete mixtures demanded of these factories are innumerable. Any one of about ten maximum sizes of aggregate, any slump or flow, any possible strength, and any specified proportions or basis of proportions, are demanded by the buyer. Compressive strength is the usual criterion of quality, but density, impermeability, resistance to fire, chemicals, ice, sea water, and other conditions, are required.

The necessities of expediency and accuracy in fulfilling these demands require that aggregates and cement be measured by weight. Thus, specified proportions by loose-moist, loose-dry and dry-rodded bulk volume, and by absolute volume, must be calculated by weight. The weight proportions of any specified concrete must be calculated often in fifteen or even ten minutes; the first batch must be correct in all respects for the specified strength must be within 1% of the specified slump, and within one-half of one percent of the correct volume; and all of these conditions must be fulfilled to the satisfaction of the buyer when the mixer truck arrives on the job, possibly ten miles away. Trial, or cut and try methods, are, therefore, out of the question.

Required Laws of Mixtures

In order to meet this present day requirement of a concrete technology, it has been necessary to establish complete laws for empirical equations, etc., of mixtures, for given conditions of aggregate, cement, and consistency of mix, meeting following specifications:

Specification (1) Law of the cement content for any strength, maximum size of aggregate, and slump of concrete;

Specification (2) Law of the corresponding yield of concrete;

Specification (3) Law of the corresponding aggregate content; also,

(a) Size modulus of aggregate grading; and

(b) Grading equation of aggregate; and

Specification (4) Law of the corresponding yield of combinations of ingredients (including admixtures).

It should be appreciated that the accomplishment of these requirements has been the result of many men groping assiduously, for more than a generation, for these laws, not abstractly conceived by the many variables involved and by that ancient measure of ingredients, bulk volume (See Part I). A resume of this development, with requirements for the years 1925-1931 in mind, will serve to present the recent discoveries and their coordination with the fundamentals of the various theories of proportioning and, at the same time, show the abstract character of the research.

Resume of Mixture Research

ARBITRARY MIXTURES 1:2, 1:1½, 1:3, 1:3½, 1:6, etc., by bulk volume, have been studied since ancient times. The research data, compris-

ing millions of tests, have been more confusing than definite, due largely to the inherent indefiniteness of the bulk volume measure and because the water content of the mix has generally been disregarded. The general indications, however, have been that strength increases with the cement content, with the maximum size of the aggregate, and for change from sloppy to plastic mixtures. Equations of strength were derived by Thacher and Henby from such arbitrary proportions.

THE THACHER FORMULA was discovered about 1900 and is

$$K_s = a - bS/C$$

in which K_s is the concrete strength at a given age, a and b are constants, and S and C are the volumes of sand and cement, respectively. Thacher did not observe that the constants a and b were changed by the maximum size of the aggregate and also by the consistency of the mix, and, as set values of a and b did not prove correct for all conditions, the equation was not advanced as a law of mixtures. It is, however, an important law of mixtures when its controlling conditions are understood.

Henby (see Proceedings of Association of Engineering Societies, September, 1900) obtained the same formula excepting that he used the aggregate to cement ratio.

These equations are incomplete as a basis of proportioning, but they held promise of the required cement content law, Specification (1).

VOID THEORIES of proportioning have been studied considerably since 1900 and, excepting that they show efficiency of void filling ratios, indicate no definite formula of strength. It is obvious, however, that the filler to voids ratios must be considered.

YIELD OF COMBINATION was stated by Feret, prior to 1905, to be the sum of the absolute volumes of aggregates, cement, water and air voids. Excepting that a portion of the cement goes into solution with the water, this theory is correct and provides a basis of our required law, Specification (4). This use of the absolute volume as the basis of measurement of ingredients is, no doubt, the most important principle of concrete mixtures.

Feret also advocated comprehensive preliminary concrete tests, for every new set of materials, and graphical analysis of the results. This, of course, is axiomatic in concrete technology.

THE FULLER METHOD OF GRADING (see Transactions Am. Soc. C. E., 1907) was an important development in the use of several sizes of aggregate and of a rational grading curve. It requires modifications, however, to fit into the essential processes of today. It does not provide a basis of cement and water contents for a given maximum size of aggregate, strength and slump. The process of determination of the proportions of the aggregate, by this method, is a cut and try graphical one and is tedious, slow and inaccurate. An expedient and accurate algebraic process is essential. Its use of weight as the basis of measure of ingredients has been shown (in Part I) to be fundamentally incorrect because of variation of the absolute volumes with

the varying specific gravities of the ingredients.

The Fuller grading is sometimes called the MAXIMUM DENSITY CURVE. It is more properly called an approximation of the optimum density. Maximum density mixtures of given cement content and slump are not practicable because they are of coarse grading, lacking cohesion and, therefore, are difficult to handle at work because of separation. However, the principle of use of three or more size separations of aggregate and of proportioning the mix to the actual grading of the aggregate instead of requiring the aggregate producer to supply a grading of aggregate to fit a predetermined arbitrary mix, is a rational procedure; this is correct.

THE ABRAMS METHOD of control of concrete production, employing its water-cement-ratio-strength fineness modulus principle of aggregate combination, dry-rodded bulk volume as the basis of measure of aggregates, and contemplating rigid and ordinary control of proportioning, was sponsored by the Portland Cement Association from 1912-1929. Successful employment of this method requires rigid laboratory control under the supervision of a skilled concrete physicist, a revolutionary idea which architects, engineers and contractors were not prepared to accept, and the Association abandoned the method, in 1929, for approximate water-cement ratio control and methods, as more simple. (See "Design & Control of Concrete Mixtures," Third Edition, January 1929, by Portland Cement Association and Structural Materials Research Laboratory, Lewis Institute).

The Abrams water-cement ratio is the first law of mixtures to be established and is highly important as an expression of that relation which the most general influence upon the strength of the concrete. It is not an absolute law, however, as the empirical constants for given conditions vary with varying conditions such as skill of control, quality of aggregate and cement, maximum size and grading of aggregate, and proportion of cement paste. For example, with a W/C ratio of 1.0, the variation found to be from 1000 to 3000, because of these varying conditions. As an example, Mr. Abrams finds expressions: $K_s = 14,000/7x$ for rigid control, and $K_s = 14,000/9x$ for ordinary control, in which $N = W/C$, the water-cement ratio.

The practical expression of them is

$$W = CF(G - \log K_s)$$

in which W is the water content of the mix, C is the cement content, K_s is the compressive strength of the concrete at 28 days and F and G are constants for a given set of conditions. This law is incomplete itself but furnishes the required law, Specification (2), since discovery of Specification (1) has been accomplished by the writer.

THE FINESTNESS MODULUS is one of the most important and useful physical measures of aggregates. It is closely proportional to the average diameter of particles and to the surface area of particles and therefore determines the amount of water required for a given plasticity index for a given cement content. This is the advantage that it is readily determined from the otherwise

New directors are: George R. Daley, E. L. Kier, V. R. Dennis, E. P. Watson, Jr., and M. H. Golden. M. A. Mathias is manager of the Chapter.

THE OBSERVER

What He Hears and Sees on His Rounds

According to word from Olympia, Wash., the proposed licensing of contractors under the terms of House Bill No. 90 has been indefinitely postponed which is generally taken to mean that the measure is "dead" in so far as this session of the state legislature is concerned. When considered on February 3 the bill was referred to the committee on labor and labor statistics before which body it still remains. There is but remote chance of its passing with an even more doubtful possibility of the governor signing it, according to reports.

A program of paid advertising in St. Louis newspapers is being sponsored by the Industrial Club of St. Louis to advocate new building and thorough-going maintenance work as a means of providing employment.

The point is made in one of the advertisements that: "New building and the extension and repair of existing buildings, create jobs quicker and in a bigger way than anything else. Such activity—when the manufacture and transportation of materials as well as their erection is considered—is about 80 per cent labor. It is no better to spend money to create such useful jobs than to spend it for 'doles,' or charity, or the support of an army of idle workers."

A study by the U. S. Department of Labor of the trend of real wages from 1913 to 1929 shows that average hourly wage rates were 133 per cent higher in the latter year, but when allowance is made for the decreased purchasing power of money it is estimated that the increase in real hourly wage-rates over this period was only 36.4 per cent.

The growing tendency to exclude older workers from industry, either through the establishment of definite age limits for hiring, or by the unannounced but still effective practice of hiring only the younger applicants is shown by two recent reports from the States of California and Maryland. In both States the practice seems to be sufficiently common to affect a considerable portion of the workers.

North Central Gas Co. of Casper, Wyo., will shortly let a contract for the construction of 378 miles of natural gas pipe line, from Muskrat Field, 75 miles west of Casper into Western Nebraska. The line will consist of 227 miles of 14-inch pipe, 10 miles of 12-inch, 78 miles of 10-inch and 63 miles of 8-inch pipe. The cost is estimated at \$6,000,000 including two booster stations.

A special election to vote between \$9,000,000 and \$12,000,000 for school construction will be called by the Los Angeles Board of Education for March 27. The election will be held coincidental with the election session by County Superintendent of Schools Upjohn on the question of forming a junior college district.

Representative Welch of California, who became chairman of the labor committee late in the present session of Congress scored his first victory last Saturday when the House finally agreed to the bill requiring contractors on public buildings to observe the local wage scale when employing men to erect federal buildings.

Plans for providing the aged of San Jose with a home and companionship with a minimum of worry are announced by Dr. C. A. Boyd, retired physician, of 638 South Eighth St., that city.

Dr. Boyd's plans call for construction of an "associated home apartment" house in which apartment homes could be provided aged persons at a cost of \$2000 each.

The apartment house would be financed by issuance of stock to the residents. Cooking would be done in a community kitchen in hotel style. Purchase of food and other supplies would be done on a wholesale scale, cutting down expense.

Dr. Boyd proposed a two acre site near the edge of the city for the place, saying that such a location would give the aged residents of the apartment house room in which to walk without having to cross dangerous main streets.

Harry Lesser, Oakland paving contractor convicted in the Oakland paving graft expose, will be granted a parole on April 27, members of the State Prison Board announce. Lesser entered San Quentin June 28, 1926, to serve a two-year sentence. He was granted a half-time parole, with several months subtracted for good behavior, so that his term will be approximately 10 months. Lesser, convicted of bribery and conspiracy, also assessed a \$5000 fine.

The Southern Counties Gas Company, Los Angeles, will shortly let a contract to furnish approximately 210 miles of 26-in. steel pipe to be used in the construction of the natural gas pipe line between Long Beach and the Kettleman Hills which the Southern Fuel Co. owned jointly by the Southern Counties Gas Co. and the Southern California Edison Co., will build. The pipe order will amount to approximately \$3,500,000.

Lakeview, Ore., a town of 2600 inhabitants will soon be heated by natural hot water, it is believed. Drilling in a hot water well brought forth a good supply of water 200 degrees hot at 536 feet. Two houses and a hotel are already being heated by water from the well.

The Hammond and Little River Redwood Lumber Company, organized under the laws of Delaware, with an authorized capital of \$12,000,000 and doing business in Humboldt and Del Norte counties, has filed articles of incorporation with Secretary of State Frank C. Jordan. S. L. Raem of San Francisco, is named as California agent.

Frank Hassey, president of the Hollywood Plumbers' Club, in addressing the February meeting of the Master Plumbers' Association of Los Angeles, "cited actual figures proving that with journeymen's wages at \$9.00 per day, it is impossible to do work at a profit at less than \$2.00 or \$2.25 per hour."

Maurice Powers, city building inspector of San Mateo, reports the issuance of 55 building permits during the month of February for improvements involving an expenditure of \$188,920.

ALONG THE LINE

Hydrauger Corp., Ltd., of San Francisco, has appointed W. A. Kohlhaas sales engineer. Mr. Kohlhaas was formerly with the gas engineering department of the Pacific Gas & Electric Co.

Lieut. General Edgar Jadin was former chief of engineers of the Army, died unexpectedly of a heart hemorrhage in the Morgue Hospital at Panama City, last Monday. General Jadin went to Panama on February 25 in connection with meeting to determine whether a new canal shall be built to connect interoceanic commerce or whether the Panama Canal shall be fitted out with a new set of locks. General Jadin was born August 7, 1865, at Honolulu. He was graduated from the Point in 1890 and immediately into the Engineering Corps. He came a lieutenant general upon retirement in 1929.

Frank B. Durkee of Sacramento has been right-of-way agent for the California State Division of Highways under Col. Walter E. Garrison, director of public works. Durkee, formerly was editor of the California Highway Bulletin and was attached to the legal staff of highway division.

Wm. Harris, general painting contractor, 305 Ribble Ave., Richmond, has been admitted to membership in the Builders' Exchange of Costa County, it is announced. A. Brown, secretary of the exchange.

Wallace B. Boggs, civil and consulting engineer, who recently resigned as principal assistant in the office of George A. Posey, county surveyor, Alameda county, has opened office 1448 Webster St., Oakland, and is engaged in private practice. He specializes in subdivision, development and city planning, street, sanitary and municipal engineering, industrial reports and appraisals. Boggs is an associate member of the American Society of Civil Engineers and a graduate of the University of California with the class of 1912. During the war he served as an officer in the Engineer Corps in France and Germany.

Joseph M. Evans, a member of the general contracting firm of M. Evans & Son of Chicago, died here last March 2 after a prolonged illness. Evans has 65 years old and was a native of Pike County, Ill. He located in Chicago in 1903 since which time he engaged in general contracting.

The Senate last Tuesday ordered an investigation by the Federal Commission of Government contracts for public buildings. The resolution, introduced by Senator Shipstead, Farmer-Labor, Minn., directed inquiry into the existence of price-fixing agreements in the manufacture of building materials and possible collusion between bidders and Treasury Department officials.

Emeryville, Calif., reports the issuance of permits for seven new buildings during the month of February, 1932, these costing \$24,000 and 22 alteration permits with a value of \$14,044, bringing the total expenditures for the month to \$38,044.

HERE—THERE EVERYWHERE

selection of executive officers by the Indo-Marchall Corp. is announced. H. Blakely, President, Elbert Ibbes is elected Vice-President in charge of Production, Charles M. Se, Vice-President in Charge of Sales, and E. J. Patterson, Vice-President and Treasurer. All three have been with McClinic-Marshall in the former management, serving similar capacities.

ster Painters' Association of San will be guests of the Pittsburgh Glass and Paint Co. at a banquet in the new Hotel De Anza at Los Angeles on March 11. A moving picture featuring the manufacture of glass will be a part of the program.

C. Miller of Seattle was elected president of the Western Reamermen's Association and R. own of Spokane, was re-elected secretary, at the annual meeting of the body held in Tacoma last week.

ordinance of the city of El Monte requiring contractors to pay a fee of \$50 a year will be re-elected. It is stated by Mayor Mackay at the city. Only one construction operating in El Monte has paid the fee and the mayor does not believe that should be penalized when other contractors refuse to comply with the ordinance.

ing to important matters to come at this session of the Legislature, the date for the semi-annual convention of the California State Builders' Exchange has been set forward to March 20 and 21 at Fresno, it is announced by Harry Cayford, executive secretary of the state organization. The meeting was originally scheduled for Friday, March 20, but will be postponed to March 21, will be spent in committee work and general business sessions will be held all day long, March 21. Headquarters are maintained at the Hotel

ing San Diego as for the 1932 convention, delegates of the California Council of Carpenters closed their annual convocation at Sacramento. All incumbent officers were re-elected. They were J. F. Camacho of San Mateo, president; R. W. Brown of Los Angeles, vice president; and Ward San Jose, secretary. A new executive board comprised of J. Benton, Long Beach; George W. Hart, Fresno, and Fred Fewell, San Francisco.

bers of Logan, Utah, meeting with members of the city commission, indicated their approval of nominations proposed for plumbers and electricians who operate in the city. Members of the trade will not be asked to work in the city unless they have an examination, as provided by the city ordinance.

Zorzie, representing the Frasier trading line of appliances, has the store section of the Contra Costa County Builders' Exchange at 246 Fourteenth St., Richmond, is announced by W. A. Zorzie, exchange secretary. Zorzie is trying a complete stock of Frasier trading products enabling him to supply all orders in the Richmond area which is now served with assistance.

TRADE NOTES

Pacific Electric Mfg. Co., of San Francisco, has appointed Roy Wilkins vice-president in charge of engineering. Mr. Wilkins was associated for 15 years with the Pacific Gas & Electric Co., and at the time of his resignation was assistant engineer in the division of hydro-electric and transmission engineering.

J. H. Roper and E. J. Badabie of Santa Cruz have formed a partnership and will own a lumber yard at 576-578 Second Ave., in that city.

Kennedy Valve Mfg. Co. has appointed John J. Fox as its southern California representative, with headquarters at Los Angeles.

Dominion Bridge Co., Montreal, Canada, has entered into an agreement with the Steel Pipe & Line Company (Hume's), Ltd., of Australia, to form the complete line of welding equipment manufactured by the Westinghouse Electric & Mfg. Co., Pittsburgh, Pa.

Woodbury & Wheeler Co., Portland, Ore., has been appointed distributor of the complete line of welding equipment manufactured by the Westinghouse Electric & Mfg. Co., Pittsburgh, Pa.

L. W. Corbett was elected president of the Peoples Lumber Company of Ventura, succeeding J. M. Sharp of Santa Paula, who had retired after 40 years' service as president and director. Watson A. Bonestell of Ventura, who has also been in active service with the company for 40 years, was re-elected vice-president.

BETTER BUSINESS SEEN BY PACIFIC COAST AGGREGATES

Pacific Coast Aggregates, Inc., reports a gross profit from 1930 operations amounting to \$708,472. Total sales for all products for the year were \$3,174,588, and rock, sand and gravel sales were in excess of 2,500,000 tons.

In connection with the tonnage sold, the annual report of the company calls attention to the fact that building permits in the territory served were the lowest last year of any year since 1920, being approximately 35 per cent less than 1929 and 45 per cent below 1928.

Consolidated earnings reports indicated that interest on the company's bonds was earned 1.85 times, and debt service interest requirements were covered 2.11 times.

The balance sheet as of December 31 showed a healthy financial condition, current assets totaling \$1,074,650 against current liabilities of \$323,656, giving a current ratio of 3.13 to 1. Plant properties, structures and equipment, less depreciation and depletion reserves, were shown at \$18,361,354.

Funded debt of the corporation was reduced \$48,000 during the year. President Charles M. Cadman reported, through retirement of first mortgage bonds and debentures.

During the year thirteen plants were operated, either steadily or intermittently, and tonnage on the books for future shipment, as of Jan. 1, amounted to approximately 320,000 tons.

Better business conditions are looked for by the officers in the summer and fall of this year.

TRADE LITERATURE

Industrial locomotives powered with McCormick & Co. bearing units, including engine, clutch and transmission, in sizes ranging from 1 to 12 tons are described in a 12-page illustrated booklet of the Brookville Locomotive Co., Brookville, Pa.

Building contractors—and particularly speculative builders—will be interested in the new hardware catalog just issued by the P. and F. Corbin Co., New Britain, Conn. The catalog features a greatly enlarged assortment of a type of hardware which is appropriate for the greater number of homes being built today. A copy will be sent upon request.

One of the basic reasons for the formation of the National Engineering Inspection Association has been the establishment of Methods of Procedure regarding specific items of engineering inspection. It is announced by E. H. Witherspoon, secretary-treasurer of the association with headquarters in Pittsburgh, Pa. The first of these Methods, which have been set up as tentative in order to invite suggestions which will lead to the adoption of permanent Methods of Procedure, have been published and are now being distributed.

SAN ANSELMO BUILDING PERMITS

Charles H. Cartwright, building inspector of San Anselmo, reports the issuance of eight building permits in February, 1931, for improvements aggregating an expenditure of \$19,750, as follows:

Mrs. Pike, Garage, Lot 24 and portion Lot 23, Kohn Tract. Laurel Ave. Est. cost, \$200.

C. Hansen, Alterations and repairs. Portion Lot 17, Davidson Tract. Olive Ave. Est. cost, \$200.

P. Tierney, Dwelling. Portion Lots 28 and 29 Yolanda Court. Yolanda Drive. Est. cost, \$9500.

F. G. Glossford, Dwelling, Lot 14 Bldg. 2, Morningside Court. Est. cost, \$3500.

F. Frates, Garage, Portion Lot 10 Ross Valley Tract. Est. cost, \$200.

Mrs. Steiner, Alteration, Lot 49, Linda Vista Tract. Cedar St. Est. cost, \$150.

E. Rhoads, Dwelling, Lot 10 Blk 7, Morningside Court. No. 1 Morningside Drive. Est. cost, \$3000.

E. Rhoads, Dwelling, Lot 8 Blk. 7, Morningside Court. No. 1 Morningside Drive. Est. cost, \$3000.

AUTOMATIC STEEL DOOR INCORPORATES

The Automatic Steel Door Corporation of Sacramento, has filed articles of incorporation with Frank C. Jordan, secretary of state.

The officers of the company, as revealed by the articles, are: William Alderson, E. R. Wynn, Regina Alderson, William Luard, Orin Badigrew, and Vera Wynn.

The purpose of the company is to manufacture and sell fire doors and other steel doors for warehouses, garages, hangars and other purposes.

The capital stock of the company is 250,000 shares with a par value of \$1 each.

CHEMICALLY TREATED LUMBER RECOMMENDED

The building code recently prepared by the Better Home Construction Bureau of Oklahoma City recommends the use of chemically treated lumber in the floor joists and sub-floors of house and building construction to prevent damage by insects and decay, according to advice just received by the National Committee on Wood Utilization of the Department of Commerce.

Under the heading "Termite Prevention" the code reads:

"Due to the fact that subterranean termites (white ants) are known to be present in Oklahoma City, a warning against these destructive pests is in order. Every precaution should be observed to prevent their entrance into buildings and the resultant damage of their attack. We endorse the use of treated lumber for floor joists, and sub-floors, wherever practical, which for the purpose of protection, may be well worth the additional expense to the owner. We insist that requirements for clearance of joists, cleanliness and ample ventilation be strictly adhered to, in order to remove conditions most favorable to both termite attack and also deterioration from decay-producing fungi."

The Better Home Construction Bureau is maintained by the loan companies of Oklahoma City to promote better-built homes and furnish information for use in regulating loans. The Bureau relied upon information concerning treated lumber contained in publications on termite prevention written by Dr. Thomas E. Snyder, Senior Entomologist, Bureau of Entomology, Department of Agriculture, and the bulletin "Treated Lumber, Its Uses and Economics," published by the National Committee on Wood Utilization.

ROAD CONTRACTORS TO DECLARE WAGES

Contractors bidding on state highway construction in Arizona will be required to declare the minimum wage scale which they intend to pay before they are permitted to qualify to submit proposals on any project.

This is the policy of the Arizona State Highway Commission, announced following the receipt of a telegram from Thomas H. MacDonald, chief of the Bureau of Public Roads, stating the Federal administration is opposed to any reduction in wages and recommending that contracts for Federal-aid work should be made on the basis of the wages prevailing in different communities where the projects are located.

The prevailing wage scale for common labor on highway work in Arizona is \$4 per day, according to the commission, and this will be the minimum. Highway contractors in Arizona will also be required to furnish the commission with a personnel record of all employees. Preference must be given to Arizona labor.

According to an Associated Press dispatch this country is surfaced with laws. There are so many statutes that it is utterly impossible for the average citizen to be conversant with them, even superficially. This superfluity of statutory law tends to lower general respect for law. It should be the purpose of all legislative bodies to keep down to the minimum the number of legislative enactments. Fewer laws, and laws of better quality, is the supreme need of the hour throughout the Nation, says the Pasadena Star-News

THERMIC SYPHON IN STEAM LOCOMOTIVES

The thermic syphon, one of the recent innovations in steam locomotive design, is a supplementary water-leg or circulating chamber applied in the firebox of the locomotive. Its purpose is to stimulate the circulation of the boiler water and to increase the transfer of heat from the fire to the steam. First available in 1918, there have been installed since then about 12,000 syphons in the locomotives on American and Canadian railways.

Although in its twelve years of use the syphon has been subjected to numerous tests on the road, the report of the tests presented in Bulletin No. 220 of the Engineering Experiment Station of the University of Illinois is the first published record of tests made in a locomotive testing plant where the conditions of operation can be rigidly controlled. The bulletin gives the results of 24 tests of a Mikado-type freight locomotive which was operated first without the syphons and again after they were installed. The experiments were made by the Railway Engineering Department of the University of Illinois in cooperation with the Illinois Central Railroad and the Locomotive Firebox Company.

Tests were made at four rates of evaporation covering the ordinary range of operation in daily service and at speeds of from 14 to 32 miles per hour. The cut-off varied from 25 to 45 per cent. Twenty thousand pounds of coal were burned in each test.

The report shows that at the four rates of evaporation the increase in boiler efficiency effected by the syphon was 11.6, 8.4, 7.3 and 6.6 per cent. Respectively, the general average increase for all four rates being 8.5 per cent; that is, under identical conditions of operation the weight of steam generated per pound of coal would be on the average 8.5 per cent greater with the syphon than without them. Other factors of boiler performance such as steam pressure and the degree of superheat in the steam were substantially alike with and without the syphons.

Copies of Bulletin No. 220 may be obtained without charge by addressing the Engineering Experiment Station, Urbana, Illinois.

CONSTRUCTION FOR PROTECTION AGAINST TERMITES

Even timber set in concrete is not safe from damage if the concrete is porous, for termites or white ants may still find their way through crevices to the wood and riddle the timber, entomologists of the U. S. Department of Agriculture warn.

Termites have been found guilty of riddling wooden foundations of buildings, the under surfaces of floors, bureau drawers, furniture in general, stored paper, old shoes and cotton fabrics and yarns. They often do considerable damage on hidden surfaces before it becomes evident. Termites also damage living fruit and timber trees, crops and general vegetation.

Dr. T. E. Snyder, entomologist of the U. S. Department of Agriculture, author of a recently revised bulletin dealing with the termite problem, points out that termite damage can be prevented by proper construction of buildings, disconnecting wood from the ground or replacing it with concrete or metal, by chemical treatments of wood and by clean culture or use of insecticides in the crops.

Copies of Farmers' Bulletin 1472-F, Preventing Damage by Termites or White Ants, can be obtained free by writing to the U. S. Department of Agriculture, Washington, D. C.

RESIDENTIAL COST \$4.79 PER SQ. FOOT

The construction of dwellings and other residential structures now is going forward throughout the U. S. at a unit cost to the owners of 47.9 cents a square foot of floor area, according to the Seattle Journal of Commerce.

This is an average unit construction cost computed from the total volume of this class of new buildings for the last several months.

The cost of residential and other forms of construction is no lower than at any time in several years. This is due to the low value of prices of building materials and of all other commodities. Wages of building labor, at the union scale, show no decline.

The average construction cost per square foot of floor area for the principal types of building are shown in the following table:

Class of Building	Cost per Square Foot
Buildings, residential	47.9
Schools	48.5
Commercial buildings	49.0
Public buildings	49.5
Hospitals	50.0
Churches	50.5
Factories	51.0

Residential construction is now at a low ebb due to unemployment; also, it is believed, to a surplus of living quarters.

Construction of public buildings is increasing as a result of the effort to provide employment through the new appropriations for work of this class.

HIGHWAY AND BRIDGE BIDS ASKED

Bids have been ordered received by the State Highway Commission, opened on March 25, for one bid and three highway projects in Monterey County, bids are wanted to construct a reinforced concrete bridge over the Garrapata Creek 10 miles south of Monterey, consisting of one 150-ft. arch span and five 40 girder spans on concrete abutments and bents.

Bids are wanted to grade and with concrete, 11.1 miles between miles north of Salinas and the boundary in Monterey County and 8.8 miles of concrete paving in Angeles County between La Jolla Creek and Campo Road Junction, to grade and oil 7.5 miles between Bailey's Ranch and the Neenah School in Los Angeles County.

The Railroad Commission has issued an order suspending, pending investigation, a freight tariff filed by the Atchafon, Tepeka & Santa Fe Railway Company, to be effective April 28, 1931, which provides for a change of switchboard charges of Sierra Railway Company, not to exceed 15 cents per car, on shipments of rock, and gravel from the industry track of Atlas Rock Company to the interchange tracks of Sierra Railway Company when destined to all points on the Santa Fe and points on the Southern Pacific lines competitive with the Santa Fe. Objections have been made to the commission that the proposed tariff will result in a prejudicial and discriminatory charges against certain shippers, and unauthorized departures from the long and short provisions of the Public Utilities Act. The matter has been set for hearing before Commissioner Fred G. Syme in the Court Room of the commission at San Francisco, on March 10, 1931, at 10 A. M.

Home Building Is Active In Palo Alto

Evidence is furnished that prospective home builders in Palo Alto are inclined to take advantage of the reduced prices current on building materials.

Building permits released in Palo to last month represented a value materially higher than that for the corresponding month of 1929, and out double the total of January, 31, indicating an improvement in building activity there.

The aggregate value for the past month was \$90,200, which compares with \$66,675 for February, 1929.

Operations were largely confined to w homes, \$74,350 of the permit total for dwellings.

The record for February shows the following:

	No of Permits	Am't.
Dwellings	16	\$74,350
Dwelling alterations	6	4,800
Garages	14	3,500
Business alterations	2	6,350
Miscellaneous	3	1,200
Total	40	\$90,200

BUILDING PERMITS GAIN IN SACRAMENTO

J. R. Shields, city building inspector of Sacramento, reports the issuance of 96 building permits during the month of February for construction involving an expenditure of \$608,411 as compared with 104 permits for the corresponding period last year when the valuation was estimated at \$3,519.

During the past two months, Shields reports, 183 permits have been issued. Improvements cost \$829,733 as compared with 223 permits for January and February of last year when a total registered \$555,046.

The following is a segregated list of the February, 1931, operations:

1-1 fam. dwlg.	16	\$ 45,900
2-2 "	6	42,100
3-1 theatre	1	450,000
4-1 public garage	1	16,500
5-1 service station	1	1,500
6-1 private garages	13	5,381
7-1 edg., etc.	1	500
8-1 electric signs	5	850
9-1 libboards	4	1,500
10-1 external bldg., repair	1	550
11-1 pool repair	1	250
12-1 is. add and repairs	23	30,425
13-1 vig. add and repairs	29	8,711
Total	96	\$608,781

A survey just completed by the Universal Atlas Cement Company shows what material dealers think of 13 construction as compared to 1930. As regards "commercial construction," 26 dealers say less construction is year, 44 say "the same" as in 1930 and 13 say "more."

Residential construction, 14 say less, the same and 47 more. Farm construction, 27 say less, 38 y the same and 13 more. Highway paving, 17 say less, 32 the same and 37 more.

Street and alley paving, 29 say less, the same and 20 more. Public Building Construction, 23 say s, 34 the same and 29 more.

Public Utility Construction, 17 say s, 35 the same and 25 more.

The total of all classes in the California area is 183 "less," 275 "same" id 213 "more."

In the grand total for all states, the figures are: 5601 "less," 7871 "same" id 2873 "more."

WACKERBARTH, L. A. ARCHITECT, PASSES

August Wackerbarth, pioneer architect, who practiced in Los Angeles for more than forty years, died in that city February 21, at the age of 71 years. Death was due to a heart attack.

Mr. Wackerbarth was born at Hesse, Germany, and was educated at technical schools in that country, receiving a diploma in architecture from the Polytechnic Institute at Langensalz, Saxony. At 19 he came to America, going from New York to Independent, Ia., and thence to Chicago. He arrived in Los Angeles from the latter city Nov. 22, 1889, and began the practice of his profession.

Mr. Wackerbarth was one of the founders of Southern California Chapter, American Institute of Architects, and served for many years as treasurer of the organization. He retired from active practice 14 years ago and since had devoted much of his time to the Los Angeles County Pioneer Society, of which he was a life-long secretary.

SPEEDY ELEVATORS IN N. Y. STRUCTURE

A schedule which calls for a total day's run of 171 miles at a top speed of 1000 ft. a minute has been adopted for automatic control elevators in the 42-story office building under construction at 22 East 40th St., New York City, by the Houston Properties Corp., according to Engineering News-Record.

The elevator schedule has been based upon an estimate that 15,000 persons will ride up or down each day. It is expected that by April 1, when the building is to be completed, the present city regulation limiting elevator speeds to 700 ft. a minute will be modified.

The architect, Kenneth Franzheim, reports that the maximum distance from offices to elevators is 50 ft. on the lower floors of the building, and 6 ft. on the tower floors. With normal traffic conditions, it will take only 50 seconds for a tenant on the 42nd floor to reach the street entrance of the building, according to Mr. Franzheim.

Revision of the Joint Highway District Act to permit state participation in such projects is recommended to the California Legislature by a joint committee created at the 1929 session, says Southwest Builder and Contractor. The direct appropriation from the general fund for the purpose is suggested in the report which was filed at the preliminary session. It is recommended that the appropriation be a recurrent one or "that a definite policy be adopted of making a biennial appropriation so that the construction and maintenance of public highways under the methods provided for in the Joint Highway District Act may progress in an orderly and systematic manner." It is further suggested in the report that instead of such districts being organized in two stages that it be accomplished immediately and that counties be permitted to contribute to the projects undertaken by them in a less restricted manner. Option of the bond or assessment method of paying for improvements is urged. It also recommended that a resolution of public necessity adopted by the director of a district be made conclusive evidence in any condemnation suit brought by them.

ENGINEERING SOCIETIES EMPLOYMENT SERVICE

Further information regarding positions listed in this column is obtainable from Newton D. Cook, Room 715, 27 Post Street, San Francisco. (Phone Sutter 1684).

R-3500-S JUNIOR ENGINEER, college graduate, for mechanical service work leading to sales. Must be handy with tool and have sales personality. Salary to start, \$350 per month. Location, San Francisco.

R-3497-S STRUCTURAL ENGINEER, C. E. graduate, with 5 to 6 years' structural and architectural experience, preferably on tall buildings, for designing and estimating in consulting engineer's office. About 4 months' work. Salary depends on experience. Location, San Francisco.

R-3496-S STRUCTURAL DRAFTSMAN, experienced on architectural work, noted and accurate, for layout and detail drawings. Temporary. \$200-250 per month. Location, San Francisco.

R-3495-S WELDING ENGINEER, young man with some technical education and skilled with oxy-acetylene for service work, for layout and detail drawings. Temporary. \$200-250 per month. Location, San Francisco.

W-2192-C-S SPECIALISTS on oil well drills, drilling machinery and equipment. One designer, technical graduate, experienced; one machine shop production man; one tool man for machining operation; one foreman; one heat treater. Salaries open, will be based upon earnings in the United States, subject to Russian income tax, about ten per cent. Part payment in rubles for living expenses, balance in United States money to American bank, especially if there are dependents in the United States. Contract for one or two years, renewable. Applications may be letter showing education and details of experience, to be forwarded to Moscow for decision. Location, Russia.

R-3491-S METALLURGIST, technical graduate, not over 35, for research department of company whose operations require the use of ferrous and non-ferrous metals. Prefer graduate metallurgist with at least 2 years' engineering experience in study of special steel alloys, or mechanical engineer with post-graduate work in metallurgy. Good personality and executive ability desirable. Salary depends on experience. Apply by letter with references and photo, and salary expected. Location, San Francisco.

STANDARDIZE TO CUT HOUSING COSTS

In connection with its studies on housing the Regional Plan of New York and Its Environs has published a report by Grosvenor Atterbury, architect and city planner, on "The Economic Production of Workingmen's Homes." Mr. Atterbury argues for standardization and factory mass production, which, he says, would eventually cut the cost of building the simplest types of housing by 50 per cent. He bases his figures partly on actual experimental results achieved at Forest Hills Gardens, Queens County, where nearly 40 houses were built from standardized factory-made sections.

SAN DIEGO, Cal.—Until March 27,
11 A. M., under Specification No. 6382,
bids will be received by Public Works
Department, Eleventh Naval District,
San Diego, for six confinement cells
for Building No. 1 at the Naval Op-
erating Base, (Destroyer Base), San
Diego. The work consists of manu-
facturing and installing six steel cells
in one block approximately 17 feet
long by 14 feet wide by 7 feet high,
to be constructed of steel plates,
angles, round and flat bars, with a
locking device suitable for locking
and unlocking cells individually or
collectively in groups of three. Plans
obtainable from above office on de-
posit of \$10, checks for same payable
to Chief of the Bureau of Yards and
Docks.

PRESCOTT, Ariz.—Joseph W. Alexa,
senior vice commander of Fort Whipple
Barracks, reports that the U. S.
Veterans' Bureau will spend approx-
imately \$114,500 for repairs, improve-
ments and alterations at the govern-
ment hospital here, the money to be
available between July 1, 1931, and
June 30, 1932. According to the pres-
ent plans, \$30,000 will be used to meet
the expenses of minor repairs, altera-

tions and improvements at the hos-
pital and \$1060 for landscape devel-
opments. The remaining \$84,500 will
be distributed for the following work:
installing radio outlets in the ward,
\$700; overhauling steam lines, \$50;
electrical refrigeration system, \$100;
change in office space and medical
warehouse, \$5000; reflooring ward
buildings and lineum, \$25,000;
placing piping, \$22,500.

ADDITION \$115,000 Appropriated

SAN FRANCISCO. Letterman General Hospital.

Three-story reinforced concrete addition to Ward No. 11 and two-story reinforced concrete ward building (No. 10).

Owner—U. S. Government.

Architect—Constructing Quartermaster Fort Mason, San Francisco.

Rubber floors, terrazzo floors, the waxes, radio system, electric fixtures, nurses' call system; all modern hardware, sterilization system, electric passenger elevator, modern hospital plumbing and considerable marble work.

PALO ALTO, Santa Clara Co., Cal.—Stanford University, Palo Alto, will purchase equipment including X-ray, surgery and laundry apparatus for the new Palo Alto Hospital. Estimated cost, \$42,500.

By the arrangement the university will purchase the equipment with its own money, and the city—if the lease is approved—will lease the equipment by the year, with an option to renew the agreement until the debt is finally discharged. Annual payments would be included in the hospital budget.

LOS ANGELES, Cal.—Architect Edwin Bergstrom, Citizens' National Bank Bldg., Los Angeles, has recommended to the Los Angeles county supervisors that contracts for the high pressure refrigeration and the low pressure refrigeration for the new Acute Unit of the General Hospital

be awarded by the board as follows:
High Pressure Refrigeration—G. J. Engineering Co., 2650 Santa Fe Ave. \$45,274, the price being based upon the bid of \$54,280, but omitting cold water cooling and circulating system which makes a deduction of \$8574.

Low Pressure Refrigeration—Parke Ice Machine Co., 2600 Santa Fe Ave. Vernon, at \$75,524, based on the bid of \$71,160, but using Ward individual refrigerating units, which adds \$2044.

These recommendations were submitted to board of supervisors Feb. 24 but upon motion of Supervisor Quinn action was postponed until Mar. 27 in order that the architect might be present.

LOS ANGELES, Cal.—P. Grassi & Co., 1045 San Bruno Ave., San Francisco, at \$428,710 awarded contract by Los Angeles County Supervisors for travertine work for the new Acute Unit of the Los Angeles General Hospital.

FRESNO, Fresno Co., Cal.—Centra California Ice Co., Fresno, at \$281 awarded contract by county supervisors for remodeling the present Yorl Refrigeration system and the installation of a new refrigerated refrigerator in the County General Hospital. Complete list of bids received published in issue of March 2.

Bids Opened.
QUARTERS Cost, \$—

SPADARA, Los Angeles Co., Cal. Pacific Colony Grounds.

Two-story employees' quarters and 1-story concrete garage.

Owner—State of California.

Architect—State Department of Public Works, Division of Architecture, Geo. B. McDougall, State Architect, State Office Bldg., Sacramento.

The Employees' Quarters building is two stories with concrete walls and wood frame interior construction and tile roof. The total floor area is approximately 8600 square feet.

The Garage is a building of 30 single car compartments with concrete wall and floor and brick composition roof. The area is approximately 6000 sq. ft.

Following are three lowest bidder on all portions of the work:

VAN NUYS, Los Angeles Co., Cal. —Chas. H. Randall, Los Angeles city councilman, announces that funds will be available next month for the preparation of plans for the new Los Angeles branch city hall to be erected on Sylvan St., Van Nuys. Cost of the proposed structure is estimated at \$275,000. Plans will be drawn by the Los Angeles City Construction Department, Chas. A. Brittain, superintendent. No appropriation has been made for the actual construction of the building.

FRESNO, Fresno Co., Cal.—County supervisors reject bids for painting county courthouse and new bids will be asked. A complete tabulation of the bids received was published in the issue of March 2, B. L. Zumkeller of Fresno, being low at (a) \$3,747; and (b) \$2,457.

SAN DIEGO, Cal.—See "Government Work and Supplies," this issue. Bids wanted for six confinement cells for Building No. 1 at the Naval Operating Base, San Diego.

Plans To Be Prepared.

FIREHOUSE. Cost, \$—

STOCKTON, San Joaquin Co., Calif.

Hunter Street.

Reconstruction of firehouse.

Owner—City of Stockton.

Architect—To Be Selected.

City Manager Walter B. Hogan has recommended to the city council that an architect be commissioned to prepare plans for this work involving interior and exterior reconstruction. Funds for the work are available from the bond issue of 1924.

Construction Recommended.

JAIL. Cost, \$—

MODESTO, Stanislaus Co., Cal.

City Jail building.

Owner—City of Modesto.

Architect—To Be Selected.

The 1920 County Grand Jury in its annual report to the county commissioners recommends that county and Modesto city prisoners, now housed in one building, be separated and that the city "be required" to provide her own jail facilities.

Plans To Be Prepared.

HALL. Cost, \$25,000

MARCELLA, Monterey Co., Cal.

Municipal "Hall of Records" (Mission type of architecture).

Owner—City of Monterey (gift of the late Mr. Martha M. Few, pioneer Monterey resident).

Architect—Not Yet Selected.

The Will of Mr. Few was filed for probate on March 25. W. G. Hudson and T. A. Work were named as trustees of the estate in order to the will, submitting for Fred A. Treat and M. M. Grant, both of whom were originally named as trustees, but are now deceased.

Plans Being Figured—Bids Close Mar. 23rd, 1:30 P. M.

ADDITION. Cost, \$25,000

MADERA, Madera Co., Cal.

Class C brick addition to high school.

Architect—Davis-Barco Co., Grant & Wooley Sts., Stockton.

Bids will be opened in the cafeteria building at the high school at Madera.

Plans provide for modernizing the clock and electric lighting system in the old structure and the remodeling of some of the classrooms in the top floor into a study hall.

Prospective Bidders.

JAIL. Cost, \$110,000

SALINAS, Monterey Co., Cal.

Two-story reinforced concrete jail.

Owner—County of Monterey.

Architect—Reed and Corlett, Oakland.

Bank of Savings Bldg., Oakland.

Following contractors have secured plans up to date:

R. W. Littlefield, 357 17th St., Oakland.

H. H. Larsen, 64 South Park, San Francisco.

Jas. L. McLaughlin, 251 Kearny St., San Francisco.

E. C. Stollie, 3145 Laguna St., Oakland.

Carl N. Swenson, San Jose.

George Maurer, 50 York Drive, Oakland.

Insulating fabric to be all cotton braid.

Certified check, 10%. G. E. Chapman, city clerk.

CHICO, Butte Co., Cal.—Until March 15, 3 P. M., bids will be received by Geo. H. More, Secretary, Biscell Park and Playground Commission, to furnish 20,000 gallons of road oil. Certified check 10% required with bids. Specifications obtainable from secretary.

BUSINESS OPPORTUNITIES

Names and addresses of persons or firms concerned in the following opportunities will be furnished on request to Business Opportunity Department, Daily Pacific Building, 217 Mission St., San Francisco or Phone Garfield 8744:

20875—Representation. Cincinnati, Ohio. Party making regular trips to Japan, Manchuria, Hong Kong, Philippines, Singapore and Java, is seeking additional accounts.

20876—Bamboo. Long Beach, Calif. Party inquires for list of local importers of bamboo.

20878—Wiping Rags.—Augusta, Ga. Firm inquires for list of importers and assortments of foreign wiping rags.

20883—Representation. San Francisco. Party who will be taking up permanent residence in El Salvador is anxious to represent manufacturers in the building line, such as lumber, cement, corrugated roofing, etc., there.

20888—Representation. San Francisco. Party, highly qualified, is desirous of representing San Francisco manufacturers in Mexico and Central America.

Edward L. G. Angert, The Ohio Pattern Works & Foundry Co., Cincinnati, Ohio. Manufacturers of brass valves are interested in securing representation in this city and surrounding territory for their product.

A. C. Behrend, American Sales Factors, Jersey City, N. J., wishes to contact local firm seeking an outlet in New York Metropolitan Area and surrounding territory.

W. W. Cook, Sanivac Pacific, Ltd., 155 North La Brea Ave., Los Angeles, Calif., is seeking distributor for a new style vacuum cleaner in this area.

J. C. Speck, The Permanent Manufacturing Corp., Ninth-Vincent Bldg., Cleveland, Ohio, manufacturer of original, electrical novelty wishes to contact some firm or individual looking toward establishing representation here.

A wooden hangar successfully weathered a series of seven fire tests made by a special "Fact-Finding Committee" organized by the Aeronautics Branch of the United States Department of Commerce, to determine the effectiveness of automatic application of water in controlling airplane hangar fires, according to the report of the committee, which covers the circumstances and gives the results and conclusions of the tests which were conducted in Washington last spring with obsolete airplanes in a regulation-size lumber hangar. It is amply illustrated with photographs and drawings and gives comprehensive details for the information of aeronautical engineers and other interested persons. The report, which is available from the Public Printer at Washington, at a nominal charge of 15 cents per copy, covers each test in detail.

San Jose Hardware Co., of San Jose has added a complete line of electric washing machines and vacuum cleaners to its present home appliances stock. The new lines will be handled by Helen Walker and Louis Epping, both of whom have had a wide experience in the sales and service of electric appliances.

Vallejo, Calif., building permits in February, registered \$22,135, the best record for that month for the last five years. The next best February total was in 1925 when the construction expenditure totaled \$21,000.

Reports of new orders for fabricated steel for the week ending January 31, 1931, were received from 104 establishments, whose capacity represented 47.9 per cent of the total capacity of all plants in the United States. The loadings reported by these establishments amounted to 47,514 tons, representing 29.6 per cent of the total capacity of the reporting establishments. Reports of shipments of fabricated structural steel for the same week were received from 98 establishments, whose capacity represented 45.7 per cent of the total capacity of all plants in the United States. The shipments reported by these establishments amounted to 22,208 tons, representing 52.9 per cent of the total capacity of the reporting establishments.

A. S. Holmes, city building inspector of Oakland, reports the issuance of 253 building permits in February for improvements involving an expenditure of \$1,009,037. Home building is the most active construction in Oakland, according to Holmes, who cites thirty-seven permits granted during February for one-story dwellings costing \$127,775.

In line with its policy of having all facts at hand before contracts are awarded and to keep the pledge that the proposed \$25,000,000 Golden Gate bridge will come within the money available from the bond issue, directors of the Golden Gate Bridge and Highway District on March 11 will probably authorize additional borings for the south side pier site. It is expected that the additional borings will reveal rock formations which will reduce the preliminary estimates of cost at the pier site.

Protection of legitimate local contractors from unfair competition by outsiders and irresponsible local operators was demanded by the Builders Exchange and General Contractors Association of Monterey at the last meeting of the Monterey City Council. E. L. Dawson, secretary of the former group, and John Trauffer, head of the latter, appeared in person in support of the demand.

After a lengthy debate on legal aspects of the situation, City Attorney Argell Campbell pointed out the possibility of openly discriminating against any firm or individual, on any basis, Campbell promised to evolve some practical method of affording the protection asked without violating any state or federal constitutional limitations.

Norman W. Kelch, secretary-manager of the Clay Products Institute of California with headquarters in Los Angeles, addressed members of the Brick Masons' Association and members of the clay products industry in San Francisco last Wednesday. Kelch spoke on conditions in the industry and offered suggestions to promote the sale of clay products in the building field.

Engineering News Section

BRIDGES

LOS ANGELES, Cal.—An appropriation of \$250,000 for the First St. and Glendale Blvd. Separation Structures was authorized by the city council Feb. 2. Plans, which are being completed by the bridge department under the supervision of Merrill Butler, Chief Engineer, show a structure of all steel construction with a main span of 200 ft. It is described as a steel arch structure, part through and part of the deck type used in Continental Europe. The total length is 550 ft. The viaduct will pass over the Pacific Electric tracks and the tracks of the Los Angeles Railway.

NAPA, Napa Co., Cal.—Until March 17, 11 A. M., bids will be received by the Board of Supervisors, Joint Highway District No. 7, in the Napa Country Courthouse, to construct a steel and concrete bridge on the Healdsburg-Calistoga Highway, 10 miles east of Healdsburg. Project involves: (1) 402 cu yds. class E concrete; (2) 12 cu yds. class E concrete; (3) 84,700 lbs. reinforcing steel; (4) 300 cu yds. structure excav.; (5) 7,000 cu yds. roadway excav.; (6) remove old bridge. Plans obtainable from E. A. Peugh, engineer for the district, Courthouse, Santa Rosa.

OAKLAND, Cal.—County Surveyor Geo. A. Posey preparing plans for bridge in Park street, San Leandro.

SAN DIEGO, Cal.—The State Supreme Court at San Francisco on Feb. 25 upheld the city of San Diego in its right to build a highway bridge across Mission bay, north of the city, at an estimated cost of \$725,000. Property owners in the assessment district had protested construction of the bridge and appealed a lower court decision in which the validity of the plan was upheld. The supreme court decision upheld the lower court.

MONTEREY COUNTY, Cal.—Until March 25, 2 P. M., bids will be received by State Highway Commission to construct a reinforced concrete bridge across Garrapata Creek about 16 miles south of Monterey, consisting of one 150-ft. arch span and five 25-ft. girder spans on concrete abutments and bents and about .28 mile of roadway to be graded.

See call for bids and official proposal section in this issue.

MERCED, Merced Co., Cal.—County Surveyor W. E. Iedesen authorized to proceed under an emergency order with the construction of a timber bridge on the Cottonwood. School House Road over Sturgeon Canal in Road District No. 4 and a reinforced concrete bridge over M. I. D. Canal in Road District No. 3.

PERSHING COUNTY, Nev.—A. D. Brumm, Jr., Fallon, has let \$32,652 awarded contract by State Highway Commission to construct concrete and steel grade separation structure including approaches over the Southern Pacific Railway near Woolsey in Pershing County. Quantity of materials involved in this project published in issue of Feb. 19. Following is a complete list of bids received:

A. D. Brumm, Fallon.....	\$32,652
J. N. Telford, Fallon.....	23,547
Nevada Rock & Sand Co., Reno.....	35,185
Goodrich & Fox, Fallon.....	36,750
J. S. Jensen, Reno.....	38,184
Anderson & Meshee, Winnemucca.....	38,484
O. G. Ritchie, San Jose.....	39,411
Orin Bandy, Ogden, Utah.....	41,496
Ball Const. Co., Carson City.....	41,538
Crushed rock or crushed gravel for surfacing roadway furnished by the state in stockpile opposite Station "L" 432.	

SAN LUIS OBISPO COUNTY, Cal.—Until March 12, 2 P. M., bids will be received by District Engineer, State Highway Commission, Bank of Italy Bldg., San Luis Obispo, to repair bridge across the Estrella River about 12 miles east of Paso Robles, consisting of one 121-foot through steel truss span. Plans obtainable from district engineer.

SAN FRANCISCO.—Golden Gate Bridge and Highway District, Alexander Bldg., at its meeting on March 11 will probably order additional borings at the south pier site of the proposed Golden Gate bridge. Sixteen borings have already been made at the pier and anchorage sites.

OAKLAND, Cal.—Lee J. Immel, 1031 Evelyn St., Oakland, at \$3,195 awarded contract by county to construct reinforced concrete multiple box culvert at Station 529+00, known as the Alameda-Centerville Road in Washington Road District. Following is a complete list of the bids:

Lee J. Immel, Oakland.....	\$ 8,105
Dudley De Vellis, S. F.....	8,500
Peter McHugh, S. F.....	8,553
George Maurer, Oakland.....	8,824
Hud-on & Brangh, Oakland.....	8,840
Holyoke & Gonzales, Oakland.....	8,747
J. B. Petersen, Oakland.....	9,107
J. H. Fitzmaurice, Oakland.....	9,603
C. A. Bruce & Son, Pleasanton.....	10,250
Frederickson & Watson, Oak.....	10,265
E. T. Leasure, Oakland.....	10,658

SAN FRANCISCO.—Board of Public Works has requested the Board of Supervisors to adopt an ordinance authorizing the calling of bids for the construction of the Sunset Boulevard-Shatt Blvd. Viaduct; estimated cost, \$175,000. The project involves the construction of an ornamental reinforced concrete viaduct 240-ft. long and 155-ft. wide with a minimum clearance of 65-ft., involving 4,000 cubic yards of concrete and 400 tons of reinforcing steel. Plans for this project are being completed by the Bureau of Engineering, Department of Public Works, 2nd floor, City Hall.

SANTA BARBARA COUNTY, Cal.—Following bids received March 4 by the State Highway Commission to construct a reinforced concrete arch bridge across Yaviota Creek, consisting of one 100-ft. span.

Paul M. White, Santa Monica.....	\$26,287
Oberg Bros., Los Angeles.....	43,276
Gist & Felt, Arcadia.....	47,827
Byert & Dunn, Los Angeles.....	53,053
Merritt, Chapman & Scott, San Pedro.....	54,483

Bids held under advisement.

SAN MATEO - SANTA CLARA COUNTIES, Cal.—Following bids received March 4 by the State Highway Commission to construct a reinforced

concrete girder bridge across San Francisco Creek at Palo Alto, consisting of three 27-ft. spans on concrete pile bents.....	
Barrett & Hilt, 915 Harrison St., San Francisco.....	\$17,218
MacDonald & Kahn, S. F.....	19,999
Geo. J. Ulrich, Modesto.....	20,220
R. D. McGowan, San Francisco.....	20,675
J. W. Hoopes, Sacramento.....	20,758
Paul M. White, Santa Monica.....	21,879
A. W. Kitchen, San Francisco.....	21,529
Ralph Hunter, Sacramento.....	21,839
Frederickson & Watson Const. Co., Oakland.....	22,094
A. J. Rutsch, San Jose.....	22,440
Clinton-Stephenson Const. Co., San Francisco.....	22,986
A. T. Howe, Santa Rosa.....	24,954
Healy-Thibault Const. Co., S. F.....	24,395
Merritt, Chapman & Scott, San Pedro.....	25,462
Peter McHugh, San Francisco.....	26,337

Bids held under advisement.

MERCED, Merced Co., Cal.—County Surveyor W. E. Iedesen preparing plans for bridge over Dry Creek on Amsterdam to Lyster road in Road District No. 1. Bids will be asked shortly.

DREDGING, HARBOR WORKS & EXCAVATIONS

SAN DIEGO, Cal.—W. E. Kier Construction Co., 815 First National Bank Bldg., San Diego, awarded contract by Public Works officer, 11th Naval District, San Diego, at \$72,919 to construct quay wall at the Naval Operating Base (Destroyer Base), San Diego. Specifications No. 640. The work consists of a quay wall approximately 764 feet long and includes reinforced concrete precast sheet piles; reinforced concrete cap; untreated timber bearing piles and timber platform; crosswalks, wales, etc.; cast steel lulls and miscellaneous steel and iron work.

SAN FRANCISCO.—Following bids received by City Purchasing Agent under Proposal No. 687 to furnish and deliver 4 miles 3/4 round copper alloy trolley wire for Municipal Railway: General Cable Corp., \$20.88; allowance for reels, \$15. General Electric Supply Co., \$20.83; allowance for reels, \$20.

KETCHIKAN, Alaska.—Puget Sound Bridge and Dredging Co., of Seattle, Wash., at \$197,050 awarded contract by U. S. Engineer office, Seattle, under Proposal No. 167, for dredging and constructing rubble mound breakwater at Ketchikan. Complete list of bids follows:

Item 1, per cu. yd. excavation; 2, core rock; 3, armor rock;	
Puget Sound Bridge and Dredging Co., Seattle, Wash., item 1, 57c; 2, \$2.35; 3, \$3.28; total, \$197,050, awarded at Ketchikan Construction Co., Aberdeen, Wash., item 1, 56c; 2, \$3.50; 3, \$4.50; total \$211,560.	
Kobish & Miller Engineering Corp., Seattle, Wash., item 1, 63c; 2, \$3.20; 3, \$4; total, \$214,300.	

OAKLAND, Cal.—Longview Dredging Co., Rio Vista, at \$62 cu. yd., awarded contract by City Port Commission for placing 600,000 cu. yds. dredging material north of the Rite Route Mole.

OAKLAND, Cal.—City Port Commission, Bank of Savings Bldg., authorized by the Federal Government to fill in 1720 acres north of the Key Route Mole, involving 2,160,000 cubic yards of material of this amount, 700,000 cubic yards will come from the dredging of the entrance to the inner harbor. The remainder will come from port commission dredging projects in the estuary. Plans announced by the port commission call for the development of a huge harbor along the north Oakland waterfront. The docks will have a capacity of 80 vessels.

MACHINERY AND EQUIPMENT

LODI, San Joaquin Co., Cal.—Until March 10, 2:30 P. M., bids will be received by W. E. Shipman, clerk, Lodi Union High School District, to furnish and deliver school bus chassis or bus body or both under one contract. Body to accommodate 42 to 48 passengers with average weight per person of 120 pounds. Further information obtainable from above.

OROVILLE, Butte Co., Cal.—County Surveyor J. A. Bumgarner authorized by county supervisors to purchase an oil distributing truck, a drill press, tools and an electric welding outfit. Funds to finance are in the budget.

MESA, Ariz.—Until 5 P. M., March 10, bids will be received by the Mesa city council for furnishing one crawler type tractor in accordance with specifications which may be obtained from the city engineer or from the city clerk, J. Edwin Miller.

FIRE EQUIPMENT

SAN MATEO, San Mateo Co., Cal.—City council will place proposal on April 7 ballot to vote bonds of \$30,000 to finance erection of a fire station in Beresford Park and the purchase of additional fire fighting equipment and to remodel a sub-station in Bellevue Avenue.

RESERVOIRS AND DAMS

RENO, Nevada.—A bill authorizing an expenditure of \$750,000 for construction of a reservoir in the Truckee river above Reno, and for other dams and improvements to impound waters of the Webster, Independence and Donner lakes has passed the United States senate and is ready for consideration by the house of representatives, according to the Associated Press. The bill, introduced by Senator Tasker L. Odde of Nevada, was amended to provide that no funds be expended until contracts satisfactory to the secretary of the interior have been executed by the irrigation district or similar agencies to provide for repayment by the water users of money expended.

KENNETT, Shasta Co., Cal.—Army engineers have recommended that the Federal government contribute \$6,000,000 toward the construction of a dam on the Sacramento River at Kennett, by the state of California. The dam is to provide for continuous discharge of water sufficient to maintain a flow of 6000 cubic feet per second between Chico and Sacramento.

DENVER, Colo.—For three low bidders in connection with the Hoover-Boulder Dam, power house and appurtenant work, see article on page one of this issue. A complete tabulation of the bids received on this project will be published in these columns shortly.

HEALDSBURG, Sonoma Co., Cal.—City trustees met June 1st of W. H. Chaney at \$50 to enlarge capacity of second reservoir in connection with municipal water system, engineer's fee, \$2,100. Work will be done by city engineers under the direction of Alvin B. Stuart, city engineer.

HAWTHORNE, New—Until March 25, noon, 2 P. M., bids will be received by the Bureau of Yards and Docks, Navy Department, Washington, D. C., to construct Cal Creek Dam at Hawthorne in connection with the second Ammunition Depot now in course of construction.

The work consists of constructing a constant angle type concrete dam, approximately 120 feet in height, requiring rock excavation; concrete work; drilling about 1000 feet; pressure grouting; pipe and fittings for grouting; drainage system; and intake pipe and screens.

Plans obtained from District Public Works Office, Room 315, 100 Harrison Street, San Francisco, on deposit of a check or postal money order for \$10, payable to the Chief of the Bureau of Yards and Docks.

ORANGE, Orange Co., Cal.—R. G. Le Tournieu, 122 Moss Ave., Stockton, awarded contract by Serrano Irrigation District and the Camanche Irrigation District to construct earth rolled fill type dam in Santiago Canyon. The directors of the district have not determined the basis upon which the contract will be awarded. Le Tournieu was bid on the alternative proposition, which provided for securing concrete aggregate from Santiago Canyon or from other sources. The low bid on the former was \$507,721.50 and on the latter \$502,251.50. The proposed dam will be approximately 125 feet in height, 125 ft. in length with a 60-ft. thickness at the base, tapering to 10 ft. at the top. The reservoir thus formed will impound 25,000 acre feet.

PIPE LINES, WELLS, ETC.

SANTA BARBARA, Cal.—Until 2 P. M., March 5, bids will be received by City council to construct complete, not more than four test wells of not less than 8-in. diameter and 200 ft. more or less in depth, on city land. Specifications, forms, etc., may be obtained from the Superintendent of the Water Department, Victor Trace, upon deposit of \$5. Geo. D. Geib, city clerk.

OAKLAND, Cal.—Until March 11, 8 P. M., bids will be received by John H. Kimball, secretary, East Bay Municipal Utility District, 512 16th St., to construct and furnish 6,000 lb. ft. 3-in. thick, 30-inch diameter electric welded sheet steel pipe for the distribution system. Specifications obtainable from above.

FRESNO COUNTY, Cal.—Until Mar. 5, 10:30 A. M., bids will be received by H. S. Foster, city clerk, to furnish: 3,000 ft. 4-in. C. L. B. and S. type Class 150 pipe in 16-ft. lengths; 700 ft. 8-in. C. L. E. and S. type Class 250 pipe in 12-ft. lengths; pipe to be painted on exterior with asphaltum or coal tar paint and to be provided with cement lining to conform to specifications of American Society for Testing Materials adopted Aug. 1925. 400 ft. 2-in. C. L. B. and S. pipe pre-cast, suitable for 150 lbs. working pressure in 5 or 6 ft. lengths; 100 ft. 2-in. C. L. pipe, suitable for 150 lbs. working pressure, threaded at both ends, in 5 or 6 ft. lengths.

Alternate bids will be received on the following classes of pipe: McWane Horizontal Sand Cast, Class 150; Mono

Cast Centrifugal class 150; DeLaval Centrifugal, Class 150.

All bids will be taken on new pipe only. Each State time of delivery. Certified check or 10% equivalent payable to City, Plant and further information obtainable from above.

FAIRFIELD, Solano Co., Cal.—Until March 13, 8 P. M., bids will be received by Lewis Merrill, city clerk, to construct one test bore to minimum depth of 700 ft. and maximum depth of 1000 ft.; minimum diameter of bore to be 10 1/2-in. and maximum 12 1/2-in. Rotary hydraulic drilling equipment to be used, of a size and capacity suitable to complete the above work and further run the test bore to a diameter of 22 inches to 30 inches, at the option of the Superintendent of the Water Department. After analysis of the test bore has been determined as to whether the test bore is to be abandoned altogether or only a portion thereof, or if all of the total depth of bore will be completed as a well.

Certified check or bond, 10% payable to Mayor required with bid. Specifications obtainable from city clerk.

SAN FRANCISCO.—J. B. Rogers, 110 Sutter St., \$7,100 awarded contract by Board of Public Works to drill two wells in 42nd Ave. as parts 1 and 2 of contract and one test well.

SEWERS AND SEWAGE DISPOSAL PLANTS

SAN MATEO, San Mateo Co., Cal.—City Clerk E. W. Foster will ask bids at once, to be opened about April 7, to construct concrete storm drain to replace wooden culvert in 25th Ave.

SAN FRANCISCO.—Until March 18, 2:30 P. M., bids will be received by J. Hester, secretary, Board of Public Works, to construct a reinforced concrete sewer at crossing of Sunset Blvd. and Lincoln Way; estimated cost, \$50,000. The project will involve: (a) 84 in. ft. 5-ft. 3-in. by 9-ft. reinforced concrete sewer; (b) 28 in. ft. 5-ft. 6-in. circular do; (c) 108 in. ft. 18-in. V.C.P. sewer; (d) 4 brick or concrete manholes; (e) 1 taper connection from 5-ft. 6-in. sewer to 2-ft. 6-in. by 8-ft. sewer; (f) 1 taper connection from 15-ft. 3-in. sewer to 6-ft. 6-in. sewer; (g) 1 taper connection from 5-ft. 6-in. sewer to 6-ft. 6-in. sewer.

Certified check 10% payable to the Clerk of the Board of Supervisors required with bid. Plans obtainable from the Bureau of Engineering, 3rd floor, City Hall.

WATER WORKS

LOS ANGELES, Cal.—Chas. Henrietta, 2100 Blanche St., Pasadena, at \$4,500 for San Gabriel Dam No. 3 and at \$5,200 for San Gabriel Dam No. 2, awarded contract by county supervisors to drive exploration tunnels.

EXETER, Tulare Co., Cal.—Bonds of \$24,000 were voted to finance improvements to municipal water system, involving 500,000 gallon storage tank, well drilling, installation of a deep well and lower pump and extensions to mains. I. H. Althouse, engineer, Porterville.

LAGUNA BEACH, Orange Co., Cal.—Until 7:30 P. M., March 10, bids will be received by Laguna Beach County Water District to furnish and install two motor driven pumping units. Specifications may be obtained at the office of the Laguna Beach County Water District, L. C. Weisberger, secretary. Certified check or bond, 10%.

HEALDSBURG, Sonoma Co., Cal.—Wallace and Tiernan, San Francisco at \$22 awarded contract by city trustees to furnish and install chlorinator in connection with municipal water system.

MILLBRAE, San Mateo Co., Cal.—Until March 12, 7:30 P. M. (date advanced from February 26), bids will be received by A. W. Richardson, clerk, Millbrae Public Utility District, to construct distributing system, involving:

- (1) 2450 ft. 6-in. cast iron pipe;
- (2) 1150 ft. 4-in. cast iron pipe;
- (3) 2275 ft. 2-in. galvanized wrought iron pipe;
- (4) 4 6-in. gate valves;
- (5) 15 4-in. do;
- (6) 25 2-in. do;
- (7) 1 reinf. conc. meter manhole;
- (8) 45 valve boxes;
- (9) installing fire hydrants furnished by the district

Certified check 10% payable to district required with bid. Plans obtainable from George A. Kneese, engineer, Stafford Bldg., Redwood City.

PITTSBURGH, Contra Costa Co., Cal.—City Manager George T. Oliver has submitted a report to the city council providing for the purchase of a water softener in connection with the water system. The cost is placed at \$20,000. Construction of a large reservoir for the storage of river water is also considered.

SAN LUIS OBISPO, Calif.—Until March 25, 10 A. M., bids will be received by the U. S. Property and Disbursing Office for California, 125 State Capitol, Sacramento, for installation of cast iron water distributing system to replace existing distributing system at the National Guard Training Camp at San Luis Obispo. Plans obtainable from above office.

BURLINGAME, San Mateo Co., Cal.—Engineer C. C. Kennedy, Call Bldg., San Francisco, has submitted a report to the city council for a unified water system for the cities of Burlingame and Hillsborough. The cost is estimated at \$255,565. The report sets with changes and improvements in the distributing and conveyance lines to meet requirements of the district and also indicates the necessary amount of reservoir storage capacity to meet the fluctuating demands for domestic purposes and fire protection. It suggests the elevation and location of reservoirs in addition to those in existence and outlines a method of securing a dependable supply from Crystal Springs Lake.

The report was laid over for further consideration.

LOMPOC, Santa Barbara Co., Cal.—Until 7:30 P. M., March 17, bids will be received by the Lompoc city council for furnishing one 500 G. P. M. deep well turbine pump with direct connected motor.

GRIDLEY, Butte Co., Cal.—Until March 23, bids will be received by J. L. Lewis, city clerk, to furnish one carload of water pipe for extensions to municipal water system. Specifications obtainable from clerk.

REDWOOD CITY, San Mateo Co., Cal.—Until March 16, 3 P. M., bids will be received by B. E. Myers, city clerk, to furnish and install pumping units in connection with water system extensions to wells in the Canine Tract. E. A. Rollison is city manager and C. L. Dimmitt, city engineer. Specifications on file in office of clerk.

PLAYGROUNDS & PARKS

SAN DIEGO, Calif.—An election will be held March 10 to vote on a \$435,000 bond issue for the purchase of sites

for public pleasure grounds and parks within San Diego County. The bonds shall be 435 in number and bear interest at 5½%.

SAN FRANCISCO—Board of Supervisors rejects all bids submitted in connection with the construction of a garbage incinerator and has referred two dumping-at-sea bids to the Health Committee for report.

BERKELEY, Alameda Co., Calif.—Board of Education has authorized the preparation of plans to surface the playground at the Jefferson school; estimated cost, \$11,000.

STREETS AND HIGHWAYS

CLARK COUNTY, Nev.—Pat Cline, Inc., Las Vegas, Nev., at \$55,260.76 awarded contract by State Highway Commission for grading, structures and gravel surfacing on 10.18 miles from Las Vegas to 10 miles southeast. Quantities of materials involved published in issue of February 3.

BERKELEY, Alameda Co., Calif.—Board of Education has authorized the preparation of plans to surface the playground at the Jefferson school; estimated cost, \$11,000.

SALINAS, Monterey Co., Cal.—Until March 13, 10 A. M., bids will be received by C. F. Joy, county clerk, to construct portion of the Sacramento road between Engineers Station 0 plus 00 and 157 plus 20, being in Monterey Division of the Santa Barbara National Forest and Supervisor District No. 4. Deposit of \$10 required for plans obtainable from County Surveyor Howard Cozens.

FRESNO, Fresno Co., Calif.—Ed. Johnson & Son, 4133 S. Normandie Ave., Los Angeles, awarded contract by county supervisors at \$3500 to pave county highway near Riverdale, approximately 4060 lin. ft. The bid was \$10.40 per ton for approx. 750 tons of Permanite, with reconstruction of shoulders, \$500. Thompson Brothers, Fresno, bid \$10.50 per ton on Jen-enite and \$12.50 per ton on Permanite, with reconstruction of shoulders \$550, or a total of \$8425 (based on Permanite).

REDWOOD CITY, San Mateo Co., Cal.—City Engineer C. L. Dimmitt estimates cost of placing red-rock shoulders on the Woodside Road at \$1,500. Taken under advisement.

SAN JOSE, Santa Clara Co., Cal.—City council declares intention (5314) to improve San Fernando St. between 19th and 24th Sts., involving grading, pave with 1½-in. asph. conc. surface with 3-in. asph. conc. base, cement concrete curbs, walks and gutters. 1911 Act. Hearing March 16. John J. Lynch, city clerk. Wm. Popp, city engineer.

NAPA, Napa Co., Cal.—City council declares intention (536) to construct concrete curbs in 8th St. bet. River St. and Soscol Ave. 1911 Act. Hearing March 23. H. H. Thompson, city clerk. H. A. Harold, city engineer.

CHICO, Butte Co., Cal.—Until March 18, 5 P. M., bids will be received by Geo. F. More, Secretary, Bidwell Park and Playground Commission, to furnish 20,000 gallons of red oil. Certified check 10% required with bids. Specifications obtainable from secretary.

SAN BERNARDINO COUNTY, Cal.—Following bids received March 4 by the State Highway Commission to grade and surface with oil treated crushed gravel or stone, 12.6 miles between Cronise Valley and 6 miles west of Baker:

McCray Co., 4482 E. Worth St., Los Angeles	\$247,706
H. W. Rohl Co., Los Angeles	248,796
Geo. Herz Co., San Bernardino	255,450
F. W. Nighbert, Bakersfield	259,310
O. A. Lindberg, Stockton	266,235
A. Teichert & Son, Sacramento	268,293
Chas. Heiser, Glendale	268,510
Morrison & Andersen, Boise, Idaho	274,410
Robinson Roberts Co., L. A.	279,727

Bids held under advisement.

DWELLING and garage, \$4000; No. 617 Cambridge St., Fresno; owner and contractor, A. F. Lambert, 1576 Poplar St., Fresno.

COMPLETION NOTICES

FRESNO COUNTY

Recorded Feb. 24, 1931—LOTS 15 AND 16 BLK 8, N. Park Terrace, Fresno. A F Lambert to whom it may concern. Feb. 24, 1931

STATE OF CALIFORNIA

DEPARTMENT OF PUBLIC WORKS

DIVISION OF HIGHWAYS

NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received at the office of the State Highway Engineer, Public Works Building, Sacramento, California, until 2 o'clock P. M. on March 25, 1931, at which time they will be publicly opened and read, for construction in accordance with the specifications therefor, to which special reference is made, of portions of State Highway, as follows:

Monterey County, between two miles north of Salinas and the northerly boundary (V-Mon-2-J), about eleven and one-tenth (11.1) miles in length, to be graded and paved with Portland cement concrete.

Monterey County, (V-Mon-56-G), a reinforced concrete bridge across Garapata Creek about 16 miles south of Monterey, consisting of one 150 foot arch span and five 25 foot girder spans on concrete abutments and bents and about .25 of a mile of roadway to be graded.

Los Angeles County, between N Bailey's Ranch and Neenach School (VII-LA-59-A), about seven and five-tenths (7.5) miles in length, to be graded and oiled.

San Diego County, between La Posta Creek and Campo Road Junction (VII-S D-12-F), about eight and eight-tenths (8.8) miles in length, to be paved with Portland cement concrete.

Proposal forms will be issued only

to those Contractors who have furnished a verified statement of experience and financial condition in accordance with the provisions of Chapter 644, Statutes of 1929, and whose statements so furnished are satisfactory to the Department of Public Works. Bids will not be accepted from a Contractor to whom a proposal form has not been issued by the Department of Public Works.

Plans may be seen, and forms of proposal, bonds, contract and specifications may be obtained at the said office, and they may be seen at the offices of the District Engineers at Los Angeles and San Francisco, and at the office of the District Engineer of the district in which the work is situated. The District Engineers' offices are located at Eureka, Redding, Sacramento, San Francisco, San Luis Obispo, Fresno, Los Angeles, San Bernardino and Bishop.

A representative from the district office will be available to accompany prospective bidders for an inspection of the work herein contemplated, and Contractors are urged to investigate the location, character and quantity of work to be done, with a representative of the Division of Highways. It is requested that arrangements for joint field inspection be made as far in advance as possible. Detailed information concerning the proposed work may be obtained from the district office.

No bid will be received unless it is made on a blank form furnished by the State Highway Engineer. The special attention of prospective bidders is called to the "Proposal Requirements and Conditions" annexed to the blank form of proposal, for full directions as to bidding, etc.

The Department of Public Works reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.

DEPARTMENT OF PUBLIC WORKS

DIVISION OF HIGHWAYS,

C. H. PURCELL,

State Highway Engineer.

Dated February 25, 1931.

A "Pittsburg" Automatic Water Heater installed in the Home indicates high quality throughout.

Recommended and specified by all the leading architects, plumbers and builders.

Consider the high merit of the Pittsburg coupled with "Pittsburg Perfect Service."

BILL REGULATING WAGES ON FEDERAL BUILDING PROJECTS

The bill (S. 5904) relating to the rate of wages for laborers and mechanics employed on public buildings of the United States and the District of Columbia to be paid by contractors and sub-contractors, as passed by the Senate and the House, and approved by the President March 3, reads as follows:

"Be it enacted, etc., That every contract in excess of \$5,000 in amount, to which the United States or the District of Columbia is a party, which requires or involves the employment of laborers or mechanics in the construction, alteration, and/or repair of any public buildings of the United States or the District of Columbia within the geographical limits of the states of the Union or the District of Columbia, shall contain a provision to the effect that the rate of wage for all laborers and mechanics employed by the contractor or any sub-contractor in the public buildings covered by the contract shall be not less than the prevailing rate of wages for work of a similar nature in the city, town, village, or other civic division of the state in which the public buildings are located, or in the District of Columbia if the public buildings are located there, and a further provision that in case any dispute arises as to what are the prevailing rates of wages for work of a similar nature applicable to the contract which can not be adjusted by the contracting officer, the matter shall be referred to the Secretary of Labor for determination, and his decision thereon shall be conclusive on all parties to the contract; provided, that in case of national emergency the President is authorized to suspend the provisions of this act.

"Sec. 2. This act shall take effect 60 days after its passage, but shall not affect any contract that may have been entered into pursuant to invitations for bids that are outstanding at the time of the passage of this act."

TO STANDARDIZE RED CEDAR SHINGLE

At the request of the Red Cedar Shingle Bureau, there will be a general conference of producers, distributors and users of red cedar shingles at the Olympic Hotel, Seattle, March 7, to consider the adoption of a commercial standard for the product. It is announced by Harry H. Steidle, of the U. S. Department of Commerce, Division of Trade Standards.

All those interested in the manufacture, sale and use of wood shingles are invited to be present in order that the standard as finally adopted may be acceptable to all directly concerned.

ARCHITECTURAL FEE DENIED OAKLAND MAN

J. W. Oliver, Eureka Mill and Lumber Company employee, lost his suit in Judge Wise's court in Oakland for a \$500 architectural fee in connection with plans for a \$60,000 reinforced concrete apartment and store building in East Oakland when a non-suit was granted based on Oliver's failure to comply with the Architectural act. The action, which was brought by the American Credit Service, was contended by the State Board of Architectural Examiners.

Oliver was cited before Assistant District Attorney Perkins and warned to discontinue offering architectural service. The courts have repeatedly held that claims for architectural services can not be collected when filed by uncertificated persons.

INJUNCTION IS REMOVED AGAINST STEEL ERECTORS

An injunction obtained by the International Association of Bridge, Structural & Ornamental Iron Workers restraining the Structural Steel Board of Trade, New York, from employing other than union labor was reversed Feb. 27 by the Appellate Division of the New York Supreme Court.

The injunction had been granted Jan. 3, 1931, by Justice Black, of the supreme court, pending action on a suit argued Dec. 11, 1930, in which the union ask \$2,500,000 from the board, alleging violation of a contract dated May 12, 1930.

In reversing the injunction the Appellate Division contends that no contract exists. The contract in question provides that the eighteen contracting firms, members of the Structural Steel Board, use union labor only, after 25 years of open-shop work.

YUBA-SUTTER EXCHANGE FORMED

E. A. Hunn has been elected president of the newly formed Yuba-Sutter Builders' Exchange, comprising the general and sub-contractors and material dealers operating in Yuba and Sutter counties.

Other officers are: Vice-president, Claude Grigsby; secretary, J. W. Robinson; treasurer, Ernest Zwanzig; directors, Frank M. Booth (chairman); I. C. Evans, Ernest Ball, W. C. Burroughs, C. Foster and Carl Sversten.

The directors will work out plans for the protection of the interests of the contractors and for the promotion of the building industry and will have a report to make at a general meeting that has been set for March 17.

PLANS ADVANCING ON TUNNEL ROAD

The Alameda county supervisors are ready to start acquiring the property adjoining the proposed new Tunnel Road through Chabot Canyon, according to Redmond C. Staats, county supervisor. When the City of Oakland passes a necessary resolution enabling the purchase of certain Oakland properties, the supervisors will proceed, he says.

"Funds for the purchase of lands and construction work are all to be supplied without additional taxation on property holders if present plans are carried through," says Staats. "For several months past, the county has been creating a sinking fund made available from savings effected on contracts that have been fulfilled at great savings due to low market prices on materials and labor."

"Aside from this source of income the county has also added to the fund from income derived from the State gas tax funds allowed the county. Actual construction will be financed, according to present plans, by bonds issued that are to be paid off by income derived from the State gas tax fund. In addition to these funds a sum of \$300,000 has been voted by the State Highway Commission to be matched by the county."

At no point on the new Tunnel Road will the grade exceed 5.15 per cent and the road bed will be 100 feet wide. There will be 17 roads leading to and from the main highway into Berkeley and Oakland.

Ventilation for the new tunnel is being studied by the Federal Government.

SENATE APPROVES BAY BRIDGE BILLS

Two bills materially affecting the San Francisco-Oakland Bay bridge project were favorably voted out last Tuesday by the Senate Roads and Highways Committee.

One provides for an appropriation of \$650,000 for immediate engineering operations, staffing of plans and specifications and similar preparatory work. This money is to be returned to the State at 4 per cent interest from the first funds obtained from the sale of toll revenue bonds issued by the California Toll Bridge Authority.

The second bill provides that the State may pay for maintenance of the bridge out of gasoline tax funds, thus placing it on completion into the State highway system.

The committee also favorably passed out a bill which provides a sinking fund for Golden Gate bridge and highway district, for interest payments and strengthens the bond issue conditions in accordance with the recommendations of bond purchase firms.

ECONOMICS OF BITUMINOUS ROAD CONSTRUCTION CITED

(By Bernard E. Gray, Highway Engineer, The Asphalt Institute.)

The primary object of a transportation system is the prompt and easy movement of persons and goods from one place to another. The degree to which this movement is open to all persons, and within their ability to pay, is the measure of utility of such a system. The development of transportation facilities is the development of civilization, and all further progress depends upon the increasing availability of dependable means of transport. Centuries passed before man had improved his methods from foot to horse and then from horse to steam engine, when, abruptly, the invention of the gasoline motor and the subsequent development of a vehicle which did not require fixed tracks for mobility, brought about more changes in forty years than in all previous history combined.

Now while this latter day vehicle does not require tracks, it does require (for the present at least) a travel path on which to run, and obviously the greater the mileage of such paths, the greater the usefulness of the vehicle. The extension of these travel paths, their upkeep and repair, is the largest single item of public officials in the United States today. It must be self evident that insufficient progress is being made in carrying out this duty, otherwise there would not be so much discussion and argument on the subject.

Principal Materials

Several principal materials enter into modern road construction, and the commercial phases have all too frequently had a biased effect, when choice of surface was under consideration. In the few remarks which the writer has to make, he is talking primarily as an engineer and with twenty years' of construction experience in highway building in mind. It is his firm belief that the public does not care a hoot from what a road is built, so long as it is smooth, dustless, mudless and non-skid, and in that condition the whole year around. Black, white, red or green, it is all the same to him so long as he can go the way he wants to go—quickly and comfortably, and at minimum cost. There are several angles to the economics of bituminous construction, but it is the low cost and stage development phase emphasizing salvage, and utilizing natural conditions with which this paper will deal.

Reference has been made to the steam engine and for purposes of comparison, it may be well to examine into the attitude of those charged with the design, construction and maintenance of the two kinds of travel paths which form our present day arteries of traffic, the railroads and highways. In the first group we have had over a hundred years of practical experience, during which time every conceivable type of road-bed has been tried. It is not the purpose of this short paper to develop changes in that period. Suffice it to say that present day practice in this group calls for the flexible type of road-bed, designed for the reasonably near future only, and kept in condition thru constant maintenance. It is pertinent to observe that railroad construction and maintenance are ever adjusted to the stern necessity of keeping expenditures at less than the earnings.

Character of Roadbed

In the second group, that of highways—there is not apparent the same unanimity of opinion as to the char-

(Paper presented at the Convention of The Crushed Stone Association, St. Louis, Mo., January 10, 1931.)

acter of the roadbed desired. This confusion obtains for two reasons: one, the lack of continuity in highway administration, and the other, because of the separation of operation from maintenance of way. There is a growing conviction, however, that expenditures are not producing the degree of highway transportation facilities which should be the case, and it is evidencing itself in the best increase in mileage of the so-called low cost surfaces which has taken place during the past three years.

There are, of course, many factors which bear upon the situation, but certain fundamentals are well established. They may be listed as follows:

1. A highway system which does not serve all of an area, and everywhere in the area, all the year around, is not functioning completely and the neglected areas and persons are justified in making a loud and mighty protest.

2. That while ten years ago, the building of a new improved surface usually was followed by marked increased traffic, such is not always the case today. In fact there is frequently a temporary decrease, because with the construction of parallel routes, there follows a greater dispersion of traffic. The rate of increase in population and motor vehicles will be markedly less in the next twenty years than in the past twenty years, and ample opportunity will be afforded the highway builder so to plan his development to keep abreast of changing conditions.

3. Certain trunk highways on which traffic flow is already well defined, should be surfaced to take care of such traffic, with reasonable provision against future increase, but all other roads should be improved only in accordance with present day traffic, and with a view to stage development as the future may require.

4. The adoption of a single type of surface arbitrarily over an entire area, regardless of local conditions and materials, is wrong and such a policy will defeat the end sought.

5. The first great outpouring of public funds in the way of bond issues is reaching its peak, and that easy, painless gasoline tax is also reaching such limits as to bring protest, all of which points to the necessity for so planning further developments as to come within current revenues.

6. The improvement in the motor vehicle, notably the pneumatic tire, has had a marked effect on the design requirements for highway surfaces, and the data obtained from tests made several years ago with hard and solid tires is of comparatively little value today.

7. Highway design should primarily emphasize drainage, width, alignment, grade, and surfacing in the order named. Drainage cannot be over estimated, for in spite of all that has been said and written, this important item is continually overlooked and roads have failed unnecessarily because of lack of attention in this respect. Width is placed second because width, properly proportioned to traffic, eliminates concentration of loadings and allows sufficient lateral dispersion so that thinner surfacing will be effective

than would be the case if all vehicles ran in the same track. Alignment is more important than grade, and by rolling the grade within proper vertical curve limits as to visibility, more economical earth work can be accomplished, also easier drainage. It is believed that in many instances, too much money has been spent in obtaining one per cent to four per cent grades, when short sections of steeper grades would be equally effective. Present day high powered machines are not adversely affected by such design. If all the foregoing requirements are properly met, the last item, that of surfacing, becomes much simpler and cheaper.

8. Single lane pavements are to be avoided as dangerous. Taking into consideration the fundamentals outlined, it is believed that more than 80 per cent of the total mileage of highways in the United States can be improved most economically and satisfactorily with bituminous surfaces. It is further believed that this mileage can be improved largely with the low cost types, and that while certain high types of construction will of necessity continue on a considerable mileage, the one outstanding field of endeavor will be found in providing surfaces to cost around \$5,000 per mile. The bituminous types are the only ones which lend themselves satisfactorily to this price range and, at the same time, provide wide and safe travel ways.

Surface Design

For years the design of surfaces was made with a view to obtaining a thickness which would take care of the worst condition, and then arbitrarily to carry it through the entire length of the project, without regard to the varying subgrade conditions. It is advanced that the correct method of design is to grade and drain a proper roadway width, and then to stabilize the surface through cumulative additions of crushed stone or gravel, to such depths as are required. This may be eight inches at one point and two inches at another, thereby utilizing to the fullest extent the inherent subgrade values. Such practice produces uniformity of surface capacity, a characteristic of the greatest importance, because all subsequent stage development of the surface then can be estimated accurately and coordinated with the growth of traffic.

The mileage of highways which have natural subgrades capable of supporting light to medium traffic during eight to ten months of the year is surprisingly large. The few months of frost and rainy weather make them sometimes impassable, with the result that the material is condemned as bad and the condition is endured until funds are available to lay a heavy pavement. In many cases the situation could be taken care of by the placement of a relatively thin crust of stone, worked into the subgrade by a grader, and followed with a bituminous treatment to waterproof the surface and reduce abrasion. Such treatment has proved itself many times, but one example in the speaker's own experience will illustrate the point. U. S. Route 51 crosses the Shenandoah Mountains from Virginia into West Virginia. In the latter state the road was graded and drained, but funds were not available for paving. During eight months of the year the red clay shale was

good but dusty and during the winter and spring it rutted and broke up badly. To relieve the dust it was given an asphalt treatment of 15 gallons per square yard, covered with 25 pounds of crushed stone chips, and costing \$1,200 per mile. The following winter the break-up was less in area and of one month's duration only. The following spring the surface was lightly scarified, the stone worked into the subgrade, and a new treatment given. The end of the third year of such treatments found a surface good for all the twelve months, a total expenditure of \$4,000 a mile, all obtained from current revenues, and the road carrying a traffic of 800 vehicles daily, including many trucks and the buses of one bus line. The county roads leading to the state highway were rutted six to ten inches deep and they had a traffic count of less than a hundred vehicles per day. Standing at the junction and watching a car approach at fifty miles an hour on the state road, show the difference in the country road, change gears, and grind away at ten miles an hour through the ruts, it was hard to believe that the only difference between the two surfaces is a thin crust of stone and bitumen less than 1/2 inch thick. Such treatments are but one of many types and kinds. They are not offered as panaceas for all road ills but they will answer the need in many situations.

Salvaged Surfaces

We all have seen thousands of miles of good stone and gravel roads ripped up, thrown away, and a new pavement constructed at a cost of \$20,000 to \$30,000 per mile, when the old surface could have been salvaged with bituminous types, and thereafter maintained, all at a total cost of less than the fixed charges on the new construction. Someone challenges and asserts that the traffic may exceed the carrying capacity of the bituminous treatment, but the answer is that the traffic in a majority of cases is less than 1,000 vehicles a day, and is increasing very slowly. A study of traffic census records quickly will prove to any one's satisfaction that, outside of urban areas, the majority of roads carry less in this amount and the such will be the case for an indefinite period in the future. As long as other roads are without any improvement, no light or medium traffic artery is entitled to the expenditure of such sums.

There is needed a different attitude in mind on the part of some road builders, who look upon low cost surfaces as merely temporary expedients. The method which will produce good service at the lowest cost per vehicle per year is the one to use. If one road surface cost \$20,000 a mile and \$200 a year maintenance with a traffic of 500 vehicles daily, the cost per vehicle is \$3.60 per year. If a low cost surface required \$5,000 a mile with \$500 maintenance, the cost per vehicle is \$1.80 per year and, in addition, the surface is becoming continually better. Let anyone think that \$500 per year is an inadequate maintenance figure for the low cost types, let it be said that surface treatments seven years old frequently are found, and that a three to five years' interval is common with traffic running over 1,000 vehicles per mile a day. A low cost surface is just as much a fixed and permanent part of a properly developed highway transportation system as the most costly type that has ever been devised.

Of course there has been a reason for our failure to develop low cost types earlier on a large scale and there is our lack of knowledge. There is still much to be learned. The United States Bureau of Public Roads, the state highway departments and associations like our own, through close co-operative effort in carrying

on said studies and other research, are the agencies contributing to better understanding and knowledge. Some of the earlier bituminous treatments were not satisfactory because of lack of skill in building, or insufficient knowledge of material behavior. The speaker recalls difficulties in surface treatments on coarse, irregular gravels due to pot-holing, with resulting roughness and much marring. The dragged surface treatment, or the thin mixer-in-place wearing course however, eliminated the difficulty.

Data Available

The need today is for a simple, accurate presentation of the extensive data already available and its dissemination to road building authorities with all the articles which have appeared on the subject, it would seem that this had already been done, but it is a fact that, over large areas of the country and particularly in the political sub-division of this country, insufficient knowledge of correct procedure prevails at the present time. The existence of a rough and uneven bituminous surface on any road is an indication of such lack of knowledge, because, with present technique, there is no excuse for such a condition. You as stone producers may ask, "But where do we come in when pavement thickness is reduced?" Is it better to build six miles of surface, with further additions in thickness through stage development, or is it better to build one mile? Is it better to have a steady, continual growth, or is it better to have peak loads one year and nothing the next?

With the greater use of low cost bituminous surfaces, there is coming a more rapid development of mechanical equipment for handling the operations. Within the near future it will be possible to place surfaces with promixed-stone and bitumen, or surface treatments of various kinds, upon stabilized subgrades of one kind or another, both new and old, at rates of one, two and three miles per day of finished road surface, built under traffic, and at costs which will be within the reach of every pocketbook. At such rates of operation it will be possible to let to contract single projects of from twenty to one hundred miles in length, thus affording a more attractive field to contractors, utilizing modern equipment, scheduling shipments, handling aggregates by conveyor, with machine spreading and finishing on the road surface, and with almost overnight transformation of dusty or muddy roads, into smooth, non-skid highways. Does it sound like a fairy story? Perhaps. But the cold, hard arithmetic of the situation makes such construction the only way, if there is to be obtained a real highway transportation system in this country, before the youngest school boy now in the first grade becomes a graybeard of ninety.

FRESNO ENGINEERS NOMINATE OFFICERS

Candidates for various offices of the organization were nominated by the Fresno Engineer's Club at a luncheon meeting in the Hotel Fresno last Wednesday. The election will be held March 11, according to J. Allan Hall, president of the club.

F. E. Twining, Mark Webster, C. F. Gilcrest and A. Segel were nominated for president; Lee Duncan, Roy Hall and H. H. Wheaton for vice-president; J. P. McElroy for secretary-treasurer, and William Tucker, R. D. Likely, H. G. Minor, Charles Anger, E. G. Stahl, Al White, Harold Chutter and Jean L. Vincenz for members of the board of directors of which there are five.

PRIVATE ARCHITECTS PLAN STATE WORK

To speed construction of public buildings as a means to bettering business and relieve unemployment, Governor James Rolph, has appointed architects in private practice throughout the state to prepare plans and specifications for a number of projects included in the institutional building program.

The appropriation bill providing funds for the work was passed by the Legislature at the request of Governor Rolph before the regular legislative recess. The employment of private architects will make plans available for contract many months in advance of the time that would be required had all these plans been prepared by the Division of Architecture.

Architects who have thus far been appointed and the buildings for which they are preparing plans follow:

Erleik H. Meyer, San Francisco, hospital, Veterans' Home, Yountville; appropriation, \$500,000.

Fred L. Swartz and C. J. Ryland, Fresno; library, Fresno State Teachers' College; appropriation, \$125,000.

Charles P. E. Booth, Oakland; primary unit and dining room, California School for Deaf, Berkeley; appropriation, \$242,000.

Ralph Wyckoff, San Jose; training school, San Jose State Teachers' College; appropriation, \$302,000.

Franklin T. Geoghegan, Eureka; training school, Humboldt College, Arcata; appropriation, \$170,000.

Chester Cole, Chico, library and class room, Chico State Teachers' College; appropriation, \$127,000.

S. Heiman, San Francisco; additional class room, State Teachers' College, San Francisco; appropriation, \$100,000.

Martin Sheldon, San Francisco; ward building, Mendocino State Hospital; appropriation, \$50,000.

Chas. E. Perry, Vallejo; laundry building, Mendocino State Hospital; appropriation, \$60,000.

Guy Koepf, Salinas; armory, Salinas; appropriation, \$35,000.

Wm. E. Edwards, Santa Barbara; training school, Santa Barbara College, Santa Barbara; appropriation, \$70,000.

Peter L. Sala, Stockton; remodel kitchen, etc., Stockton State Hospital; appropriation, \$55,000.

Russell G. Quinn, La Grange, Oakland; dairy unit, Preston School; appropriation, \$40,000.

Chas. F. Dean, Sacramento; California National Guard, Yuba City Armory; appropriation, \$25,000.

Wm. H. Wheeler, San Diego; gymnasium and pool, San Diego State Teachers' College; appropriation, \$155,000.

Frederick H. Eley, Santa Ana; superintendent's cottage and ward bldg., Sarcotic State Hospital, Spadra; appropriation, \$55,000.

G. Stanley Wilson, Riverside; dairy unit, Patton State Hospital; appropriation, \$25,000.

Gilbert Stanley Underwood Company Ltd., Los Angeles; ward building at the farm, Norwalk State Hospital; appropriation, \$75,000.

Walker and Eison, Los Angeles; dairy unit and patients farm cottage, Pacific Colony, Spadra; appropriation, \$75,000.

Bennett and Haskell, Pasadena; National Guard Armory, Pasadena; appropriation, \$50,000.

The Bureau of Supplies and Accounts, United States Navy, Washington, D. C., has issued a January, 1931, edition of the "Index to Specifications Issued by the Navy Department for Naval Stores and Material." This index covers specifications for all types of supplies used by the Navy.

THE OBSERVER

What He Hears and Sees on His Rounds

The supervisors of Kern county, by a vote of three to two, rejected a proposal to issue bonds of \$2,500,000 to finance road construction throughout the country. The measure was proposed with a view to providing work for the unemployed.

Determined opposition to calling a \$2,750,000 bond election to finance construction of a municipal electric system in Tulare, Calif., developed at a mass meeting attended by nearly 2000 voters, last Monday night.

Passage of a bill by the legislature to set up a uniform plumbing bill is favored by H. B. Foote, sanitary engineer for the Montana State Board of Health. Foote said that a law is needed which will be applicable to the entire state. The large communities are not affected so much by bad plumbing and most of the trouble that has come to the attention of the board of health has been due to inadequate plumbing in smaller localities.

Oakland is getting new prices for paving, according to Walter N. Frick-stadt, city engineer. Bids were recently opened to improve a portion of Masonic Avenue, the engineer's estimate being \$29,935. The low bid was \$26,170, or \$3,800 under the estimate. Outside contractors are bidding on Oakland street work, the engineer says, which indicates that the "hanging ring" in Oakland no longer exists.

H. W. Webber, president of the Webber Construction Company of Crescent City, "has gone into bankruptcy in order to protect his creditors," according to newspaper reports from the Del Norte section. Webber, it is reported, attributes his failure to the business depression and the lack of contract work in the northern section of the state.

The Los Angeles County Board of Supervisors has adopted an order requiring that all bonds accompanying bids for improvement work shall be surety company bonds, it is announced by Miss Mame E. Beatty, clerk of the board.

Palo Alto is considering adoption of the Uniform Building Code, prepared by the Pacific Coast Building Officials' Conference. The code has already received the endorsement of the Board of Public Works, the municipal committee on public works and is now before the city council. L. Harold Anderson, building inspector, advocated its adoption.

The Utah Plumbing and Heating Contractors' Association is making an effort to introduce in that state what is known as the Hoover Code, under which the State Board of Health will be authorized to establish rules governing the practice of plumbing. Another bill it is proposed to have introduced to the state legislature, now in session, would require railroad companies to provide better sanitary facilities at their depots. It aims, in particular, at the poor accommodations often found in the country districts.

A bill has been introduced in the Illinois Legislature to prohibit employers from engaging the services of any one not a citizen of that state. Drastic penalties are attached for the

failure to strictly comply with its provisions. Employers generally are opposed to the bill.

Accidents at highway grade crossings, according to reports to the Interstate Commerce Commission, totaled 4,390 for the first eleven-month period of 1930, a reduction of 983 compared with those for the same period in 1929. Fatalities resulting from such accidents totaled 1,848, a reduction of 400 compared with those for the same period in 1929, while persons injured totaled 4,932, a reduction of 1,133. For the month of November there were 519 accidents at highway grade crossings, a reduction of 143 under those for November, 1929, while 193 fatalities were reported as caused by those accidents. This was a reduction of 73 compared with the number reported for November, 1929. Persons injured in highway grade crossing accidents in November 1930, totaled 612, compared with 751 in the same month of the preceding year.

The Plumbers' Association of San Diego has requested the San Diego city council to amend the ordinance requiring posting of a license bond with the city. Plumbers now are required to post a \$2500 bond to operate. This affects master plumbers only. Recently the council took out the bonds from the building contracting and electrical contracting men. The wholesale bond removal followed the city's difficulties in trying to collect on bonds posted in connection with subdivision water main installation and street improvements.

The Eastern Manufacturers' Group of the Structural Clay Tile Association has just published "Recommended Minimum Requirements for Structural Clay Hollow Tile Construction." The specifications included in the book are the result of exhaustive research carried on by the Bureau of Standards and by the Research Department of the Structural Clay Tile Association. The book is divided into three main sections: One section on definitions, one giving the recommended minimum requirements, and one devoted to reprints of the latest standard specifications governing manufacture and tests for clay hollow tile issued by the American Society for Testing Materials.

Commercial Standard CS22-30, dealing with various types of non-temple builders' hardware, is the subject of a 68-page pamphlet issued by the U. S. Bureau of Standards which can be obtained from the Government Printing Office at Washington, D. C., at 10c per copy.

The report of the committee on crib construction, prepared by H. M. Cochran of the Union Lumber Company, and entitled "Redwood Crib Construction—Its Advantages, Application and Erection," will be printed for distribution to architects, building inspectors and fire chiefs. The report was read by Mason E. Kline of the Union Lumber Company at the recent meeting of the lumber committee of the California Retail Lumbermen's Association and the Redwood Relationship Committee.

TRADE LITERATURE

United Conveyor Corp., Old Colony Building, Chicago, has published a 16-page illustrated bulletin on the subject of vitrified glazed tile ash-storage tanks.

Non-clogging pumps of the inclose/shaft type are the subject of a 28-page bulletin issued by the Chicago Pump Co., 2336 Wolfram St., Chicago, Ill. Single and duplex units are shown and improvements and advances in design are treated in detail. The book let also reproduces drawings of many different pump installations, specifications, tables of capacity, heads and horsepower and miscellaneous installation and maintenance data. Another publication of the company is a 2-page leaflet describing the new N type small, compact, direct-connect centrifugal pump for industrial use with capacities of from 3 to 60 gpm per minute.

Recent publications of the Westinghouse Electric & Mfg. Co., East Pittsburgh, Pa., include descriptive leaflets on condenser pumps, steam turbine-generator units and industrial electric heating equipment, as well as a 40-page illustrated bulletin, "Engineering Achievements of the Westinghouse Electric & Mfg. Co. During 1930." Many articles in the latter publication are of particular interest to civil engineers, especially those dealing with hydro-electric and steam power development, lightning arresters, Welland Canal equipment, or electric locomotive design and other.

A detailed discussion of the methods used in the electroplating of aluminum, supplemented by many illustrations, is given in a 36-page booklet published by the Aluminum Company of America, Pittsburgh, Pa.

Warren-Knight Co., 1650 North 121 St., Philadelphia, Pa., has issued 52 pages of instruction booklet, how to use the Sterling convertible wire level.

A description of the properties aluminum paint is contained in Research Bulletin Number 10, published by the Producers' Council, Incorporated, 19 West 44th Street, New York. The Bulletin refers to specification on this subject prepared by the Aluminum Company of America. Specifications of the National Lead Company for painting iron and steel with red lead are reproduced in another document from the same source.

The American Standard Safety Code for Mechanical Refrigeration is just off the press, it is announced by the American Standards Association, 233rd Street, New York City. The code has already been adopted in its entirety by several cities and others are considering its adoption. It represents one of the most important standards of the American Standards Association and under the leadership of the American Society of Refrigerating Engineers. It was approved by the ASA in October, 1930.

ALONG THE LINE

William F. Patton, 64, retired building contractor of Berkeley, died in that city last Tuesday, following a long illness. Previous to locating in Berkeley, Patton was for eighteen years operated as a contractor in Santa Rosa.

Edward K. Hussey of Oakland has been appointed city engineer of Lodi. Hussey succeeds the late L. F. Barcellotti.

Charles S. Caughell, 75, county surveyor of Lassen county, died in Susanville last Saturday after an illness of several months. Caughell had been a resident of Lassen County twenty years. Going there from Duluth, Minn., he engaged in his occupation of timber cruiser, was elected as county surveyor twelve years ago and had served continuously since.

M. E. Coulter, branch manager for the Henry Cowell Lime and Cement company at Sacramento, has been elected president of the Aviation Club of Sacramento.

A. L. Banks, former city clerk of Stockton, has been appointed an assistant to James I. Herz, deputy director of the State Department of Public Works. Previous to holding the office of the city clerk at Stockton, Banks was engaged in the newspaper business in the San Joaquin valley.

James E. Cashman, nationally prominent general contractor, died of heart ailment February 24 at Burlington, Vt., following a minor operation for a taphylococcus infection on the back of his neck. Mr. Cashman was a former member of the Associated General Contractors, serving as vice-president at large in 1930. He had been chairman of the membership committee of that organization since 1926.

Patrick Cahill, 85, founder of the Cahill and Hall Elevator Co., retiring after the fire of 1906, died at his home in Oakland, Feb. 25, after a year's illness. His widow, three sons and a daughter survive.

INFILLED STEEL ORDERS DECREASE

Unfilled orders of the United States steel Corporation decreased 167,157 tons in February to a total of 3,365,474 tons on February 28. In January a increase of 183,755 tons was reported.

The backlog as of January 31 was 1,321,351 tons. On December 31 unfilled orders aggregated 3,943,596 tons. Over the 30 the total unfilled tonnage was 3,639,636, and February 28, 3,320, unfilled orders amounted to 4,739,748 tons.

A decrease was expected in financial circles because of the rise in quotations during February and the smaller number of business days in that month for buying.

It was pointed out that consumers apparently were awaiting definite indications of the spring trend before placing orders.

The decrease was the first shown in the Steel Corporation's backlog since last September, when the unfilled tonnage dropped 155,866 tons.

HERE—THERE EVERYWHERE

Seventeen mills in Washington and Oregon, representing the entire production of Douglas fir plywood in the United States, announce a three-year nation-wide program of advertising, sales promotion and engineering research. A. R. Wiest of Hoquiam, Wash., chairman of the industry's executive committee, said he believed the campaign would materially increase the sales of fir plywood, which he said have doubled in the last five years. The tabulated material is used in automobile bodies, radios, trucks and other products.

Carlos W. Huntington, director of the State Department of Professional and Vocational Standards, will be a speaker at the meeting of the California State Builders' Exchange, scheduled at the Hotel Fresno, Fresno, March 21, it is announced by Harry Cayford, secretary of the state organization.

The journeymen painters of Chicago recently petitioned their employers to concrete them the right of working only three days a week. It is their intention, they say, to give all their members a chance to get in a few days every week.

Dublin, Ireland, is facing a serious strike of the building trades because the employers are insisting upon a cut in wages to stimulate construction work. Ten thousand men will be affected. The Master Builders of Dublin say there must be a readjustment of wages to stimulate work. They pay an average of 44 cents per hour and London, England, pays 28 cents.

Elastic Analysis Of Continuous Frames

The object of Bulletin No. 215 of the Engineering Experiment Station of the University of Illinois was to present some theorems dealing with the elastic analysis of continuous frames.

In this bulletin it is shown that bending moments in arches, haunched beams, and framed tents may be computed by a procedure analogous to the computation of fiber stresses in short columns subject to bending, and that slopes and deflections in these structures may be computed as shears and bending moments, respectively, on longitudinal sections through such columns.

The theorems make available for the analysis of plane elastic structures the literature of beam analysis, dealing with the kern, the circle of inertia, the ellipse of inertia, graphical computations of moments and products of inertia, and conjugate axes of inertia.

Certain terms are defined in such a way that the method is extended to include the effect of deformations due to longitudinal stress and to shear in ribbed members and to include trussed members.

The conceptions used in arch analysis by these methods make possible a general statement of the relations of joint displacements to joint forces, of which the equation of slope-deflection is a special case, and hence make possible the convenient extension of the method of slope-deflection, or of the theorem of three moments, to include curved members and members of varying amounts of inertia. Copies of Bulletin No. 215 may be obtained without charge by addressing the Engineering Experiment Station, Urbana, Illinois.

TRADE NOTES

Madsen Supply Co., wholesaling a complete line of plumbing and sheet metal supplies, will commence operation at 1600 Harrison St., Oakland, on April 1. The personnel of the company consists entirely of members of the former firm of Holbrook, Merrill and Sletson. Martin Madsen is owner and general manager.

United Building Co., Ltd., of San Francisco, capitalized for \$10,000, has been incorporated. Directors are Albert, Annie and Benjamin Stone.

Caspar Lumber Company of San Francisco, capitalized for \$400,000, has been incorporated. Directors are: C. J. Wood, C. E. McCamp, Abbie E. Martin, L. B. Slosson, F. W. Stickney, G. A. Freudenberg and H. H. Worden.

Refrigeration Maintenance Corp., Ltd., has commenced the manufacture of refrigeration cooling units for all refrigerants, and the servicing of all makes of mechanical refrigerators. The offices and factory are located at 104-106 Olive Street, San Francisco, under the direction of E. D. Flynn. This company is also manufacturers' agent of cooling units for Bush Manufacturing Co. of Hartford, Conn.

L. A. ART BODY RULES ON MARQUEES

Any marquee hereafter placed on a building in Los Angeles must be designed to conform to the architecture of the building to which it is attached. This ruling was recently made by the Municipal Art Commission, which under the city charter must approve the plan for any structure which extends over public property and it rarely happens that a marquee on any private building does not overhang the sidewalk.

The commission also went on record as opposed to advertising banners and signs attached to a marquee and plans a drastic campaign to remove such advertising which, in its opinion, causes an unsightly appearance of city streets and impairs the value of property.

These new rulings were proposed by Carleton M. Winslow, architect, recently appointed to the commission.

PLANNERS CANNOT REGULATE BILLBOARDS

Regulation of billboards is not within the jurisdiction of the City Planning Commission, Assistant City Attorney Walter A. Todd of San Francisco told the commission.

Todd ruled, however, that the Board of Supervisors can enact an ordinance placing such regulation in the hands of the commission. Members of the commission indicated they will propose such a measure.

The request for an opinion followed protests filed with the commission in regard to billboards erected on residential property fronting on West Portal Avenue and Portola Drive, facing St. Francis Wood.

It was contended that erection of billboards constitutes a commercial use of the property.

Worthington Pump & Machinery Corp., 2 Park Ave., New York City, has published two bulletins on vertical triplex power pumps and deep well pumps.

FIRE HOSE TEST MADE AT U. OF C.

To determine the correct sizes of hose to use for fire fighting purposes, a series of tests has just been completed in the laboratories of the University of California Agricultural Engineering laboratories at the Branch of the College of Agriculture at Davis. The results of the tests, made by Prof. Roy Brainer and K. R. Frost, are briefly summarized as follows:

One-inch hose can be used satisfactorily with one-eighth-inch nozzles for distances up to 100 feet and quarter-inch nozzles up to 500 feet, while one and one-half-inch hose may be used with three-eighths-inch nozzles for distances up to 1000 feet; friction varies in fire hoses very nearly as the square of the velocity; the difference in pressure obtained when the hose is laid in various positions are not of material importance.

In comparing the two sizes of hose, using maximum discharges, it was found that the loss for 100 feet of one-inch hose discharging 30 gallons per minute was 30 pounds per square inch; the one and one-half-inch hose showed only a loss of 13 pounds per square inch for 60 gallons per minute.

"It would be impossible," says Professor Eamer and Frost, "to maintain a pressure necessary for extinguishing fires at distances much greater than 500 feet from the pump with discharges of more than 20 gallons per minute with one-inch hose. Practical operation could be secured with the inch and a half-hose with discharges under 40 gallons per minute at a distance of 1000 feet from the pump.

"If the discharge can be decreased to very low figures, the length can be materially increased for both sizes of hose. If the hose is used for transporting water along, or to, a fire line and not discharging under pressure, the loss due to friction is not so important. In this case the size of the hose that carries a capacity equal to the amount of desired will be satisfactory."

JEAN L. VINCENZ SEEKS PUBLIC OFFICE

Jean L. Vincenz, civil engineer of Fresno, will be a candidate for the office of commissioner of public works of Fresno, at the municipal election April 13.

Vincenz has had 15 years' experience as a registered civil engineer and for eight years was a member of the firm of Chamberlain and Vincenz of Fresno, engaged in the practice of engineering. He served as city engineer, as a member of the firm at Fowler and Farlier, Calif., and during the past year served as a deputy engineer in the office of Chris P. Jensen, Fresno county surveyor.

The American Institute of Architects has accepted the invitation tendered by the American Standards Association to become a member of the sectional committee in charge of the project, Safety Code for Grandstands (Z20). Letroy E. Kern, technical secretary of the Institute, has been appointed to act as representative of the Institute on the committee.

H. I. Dygert, city building inspector of Albany, Alameda County, reports the issuance of 2 building permits in February for projects involving an expenditure of \$49,755. Twelve permits covered alterations costing \$1,405 and 17 permits for stores and dwellings costing \$48,350. For the first two months of the current year the building total registers \$87,850 as compared with \$63,465 for the corresponding period last year.

PACIFIC COAST BUILDING IN FEBRUARY TOTALS \$14,254,988

Building permits issued in the Pacific Coast states during the month of February, 1931, totaled 6,792, involving an expenditure of \$14,254,988 as compared with \$19,256,727 for the corresponding period in 1930. The following is a complete report of the February, 1931, activities together with the month of February, 1930, as reported by municipal building department executives in the cities listed:

CALIFORNIA

City	February, 1931		February 1930

VOCATIONAL TRAINING URGED TO RELIEVE UNEMPLOYMENT CAUSED BY INTRODUCTION OF NEW MACHINERY

That vocational training as carried on under the national vocational education program can be utilized to relieve unemployment caused by the introduction of new machinery, operations, and processes in industry, is the opinion of Dr. J. C. Wright, director of the Federal Board for Vocational Education.

In expressing this opinion, Dr. Wright stresses the necessity of anticipating these industrial changes far enough in advance that men who are destined to be displaced by them may be retrained for other types of work. To this end, he urges that employers and workers cooperate in keeping vocational schools informed of new jobs for which workers should be trained. Only in this way, Dr. Wright emphasizes, will the schools be able most effectively to play their part in relieving technological unemployment.

"In advocating a plan of vocational training for workers displaced by industrial changes, I am not following a theory," Dr. Wright explains. "I can point to specific instances which demonstrate the feasibility of such a plan. I wish it to be understood, also, that I am not advocating following any set program in carrying out the plan. It is possible, for instance, for those who have been displaced through technological changes in industry to be vocationally trained for other jobs through their labor unions, in courses set up by employers or by State or local educational services, in intensive courses operated by public schools, and in special or "opportunity" courses. The effectiveness of the training and not the particular training agency is what counts.

Workers Help Themselves

"Not long ago the business agent of the local union of truck drivers in New York City was informed by the president of a large coal company that within six months the company proposed to change from horse-driven to motor-driven trucks. With this information in hand the business agent presented the problem to the members of the union at their next meeting. Confronted with the possibility of losing their jobs, the members of the union purchased a three-ton Mack truck and employed a competent instructor to teach them how to drive motor trucks and how to make emergency road repairs. This instruction

was given to the men during their leisure time in the evenings, and before the six months had elapsed every one of these drivers had been able to secure his driver's license.

"Six months later, when the president of the company expressed regret that it would be necessary to let off the drivers of horse-driven trucks and employ licensed operators of motor-driven trucks, the business agent informed him that every one of the men now in his employ was a competent and licensed motor truck driver. He also called the president's attention to the fact that these men knew the company's business and the company's customers, and that they had been found through many years of experience to be loyal to the company's interests—assets which new men could not possibly possess. This information was all that was necessary to enable these men to retain their jobs.

Employers Get on Job

"A few weeks ago I visited a rubber company in New England. I found that the company had organized its own training department and that this department was responsible not only for the training of new employees, but also for the retraining of those employees whose jobs were discontinued by reason of the introduction of new machines, processes, or methods. The training department was kept advised of proposed changes and therefore was in a position to transfer the employees affected by these changes to other departments, and to train them in the new skills, operations, and technical information required by these jobs. On the occasion of my visit to this plant I was accompanied by two representatives of the State Board for Vocational Education, who had been requested to assist the training department in the training of teachers.

State Takes a Hand

"One of the most striking examples of the retraining for new jobs of workers whose jobs were threatened by industrial change is reported from New Jersey.

"When a large railroad company decided to electrify its tracks in that State it faced the problem of finding competent engineers for its electric locomotives. Instead of turning out its steam locomotive engineers, the company, with the assistance of the State Board for Vocational Educa-

tion, which furnished a competent instructor, trained its locomotive engineers and firemen to be experienced electric locomotive operators, while the electrification of its tracks was in process. Latest reports are that this program has been carried through satisfactorily.

Public Schools Help

"I am informed by the State Supervisor of Trade and Industrial Education for the State of Michigan that when countless numbers of public school operators were released and turned out of employment by the manufacturers of automobiles, during the depression of 1929-30, thousands of these unemployed came to the evening schools, and to some extent to the day schools, for vocational training. The majority of these workers had been taken into the automobile plants with little or no previous training and under the direction of an instructor-foreman, had been engaged in only one or two very simple operations in the manufacture and assembly of automobiles. When it became necessary to reduce the force under the market conditions, the men and women who possessed little or no skill were the first to be let out. As this fact dawned upon many of these workers, they realized that as insurance against unemployment it would be worth their while to go to school and equip themselves for doing more than one simple operation.

"During all this period of depression I am informed that there has been a great scarcity of tool and die makers in Ohio, Michigan, and other industrial States, and that there is also a great need for competent machinists. It requires several years, however, to become a highly skilled worker in the machinist trade, and the public schools in Detroit and other cities found it very difficult to adjust their programs to meet emergency demands in such overwhelming numbers. Had the need for machinists been anticipated, it would have been possible for the schools to have developed training courses and to have put those into operation in time to meet the demand for such workers.

"Opportunity Schools"

"A number of cities now maintain what may be called "opportunity schools." The oldest and perhaps best organized is that located in Denver, Colo., which has grown up under the leadership of Miss Emily Griffith. Some 7,000 or 8,000 students attend this school each year and few indeed have come to its doors with a specific need for training to help them get a job. In fact, many of the students are job, who have not met with a ready response on the part of the school. A man or woman out of employment in the City of Denver can go to this school and be given short intensive instruction under a competent instructor for practically any new occupation.

All Must Cooperate

"I can not emphasize too strongly the need for cooperation between the vocational school authorities, and employers and workers. The province of the vocational school in relieving technological unemployment is to provide for new jobs those who have been thrown out of employment. The employer can give the school authorities information on employment opportunities for which the school can train workers, and can frequently be of great aid in setting up this training which the school does not possess. The worker on the other hand knows the requirements of specific occupations, information which is invaluable to the school in setting up vocational courses. For the information and assistance it needs in setting up courses, therefore, the school must look to the employer and the employee groups."

HOME BUILDING IN LOS ANGELES

A tabulation of single-family residences erected in Los Angeles during the first six months of 1929, compiled by J. J. Backus, superintendent of building, for comparison with similar data for the same period in St. Louis and Washington, D. C., discloses that of the 2532 built in Los Angeles, 2364 cost less than \$5000 each, while of 732 built in St. Louis 557 cost less than \$5000 each, and of 885 in Washington only 165 cost less than \$5000.

In Los Angeles the largest number cost between \$2000 and \$3000 each, in St. Louis the largest number cost between \$3000 and \$4000, and in Washington the greater number cost from \$5000 to \$6000.

In Los Angeles 175 houses were built costing more than \$10,000, as compared with 14 in St. Louis and 169 in Washington.

In Los Angeles 51 houses costing from \$20,000 to \$175,000 each were erected, while in St. Louis there were only 3 costing from \$20,000 to \$15,000 each and in Washington 27 costing from \$20,000 up to \$75,000.

SANTA CRUZ SEEKS BUILDING PUBLICITY

In future Santa Cruz proposes to receive credit for its building activities. The city council plans to change the method of reporting building permits.

This was definitely decided upon by the council, not because the city has been losing a few dollars in the way of fees, but because it has been losing a great amount of desirable publicity in the matter of indicating how much building is going on within the city.

For instance: When the building permits for the three new public school buildings were given out, the total amount specified in the applications for the permits was \$198,366.75, leaving the impression that that amount represented the cost of the buildings, when as a matter of fact the actual cost was \$310,632.75, not including a few extra that brought the sum up to a larger point.

There was a loss of \$121,266 in the way of publicity showing volume of building. Many buildings have been reported in this manner and the council intends hereafter in jobs of this sort to insist that the real cost of the completed building be specified in the building application.

No reflection is cast on Building Inspector John H. Patterson. This official merely takes the data the builder gives him. He will now act with the council in the way of getting for the city all it is entitled to in the way of statistics showing the actual amount of building done.

Evidence that welding as a method of building construction has arrived at a point where it is cheaper than riveting in many cases, is found at Nela Park, Cleveland, where the General Electric Company is to start work immediately on the construction of an industrial building. The building, to be devoted to the manufacture of wire for the incandescent lamp department of the company, will be erected under contract by the Austin Company of Cleveland, and 1000 tons of steel will be used. Competitive bids were submitted for both welding and riveting in fabricating the steel, and by using welding it was found that \$2100 will be saved, or \$210 per ton, over the riveting method. It is expected that the building will be completed sometime during the present year.

HOME PRODUCTS GIVEN PREFERENCE

Prospective bidders on Federal construction are informed that the last Army Bill, carrying appropriations for the fiscal year 1932, and approved by the President February 23, 1931, carried the following provision: "That in the expenditure of appropriations in the Act, the Secretary of War shall, unless in his discretion the interest of the Government will not permit, purchase or contract for, within the limits of the United States, only articles of the growth, production, or manufacture of the United States, notwithstanding that such articles of the growth, production, or manufacture of the United States may cost more, if such excess of cost be not unreasonable."

The above information is conveyed to all prospective bidders in order that they may take cognizance of it in submitting bids, as such a clause will be incorporated in contracts when awards are made, and made a part of same. The above Act of Congress will apply to all bids opened from March 10, 1931, on.

OAKLAND ADOPTS NEW ZONING LAW

As a result of conferences with real estate men, business men, financial experts, city planners architects, contractors and representatives of many other interests which will be affected by the new zoning law, a new ordinance which was said to eliminate all the weak points, or points of criticism in the old ordinance, was passed to print by the city council last Monday.

The new ordinance raises the height limit of apartment houses, makes some changes in zones, closes the setback lines practically as they were throughout the city, and makes more specific definitions of the zones and the types of structures which will be allowed thereon.

Bidders declared that the old ordinance was an obstacle to building operations in the city and had delayed building operations and therefore employment. City officials and all other representatives said they were satisfied with the new form of ordinance.

The new ordinance, as before, defines five types of zones, A, B, C, D and E, each permitting certain species of structures to be erected thereon. There is the strict residential zone, the residential and apartment zones, the business zone, the industrial zone, and the "heavy industrial" zone, where acids and other more dangerous species of products may be manufactured.

The ordinance will be given final passage and will become effective in eight days.

STOCKTON EXCHANGE RE-ELECTS PELETZ

Re-election of L. S. Peletz as president of the Stockton Builders' Exchange featured the annual meeting of that organization in the new headquarters at 242 East Miner Avenue last Tuesday night.

Other officers elected were: John Pengelly, vice-president; Earl Lewis, secretary; A. Sandberg, treasurer; and W. T. Gibson, J. A. Allen, J. F. Ecker, E. L. Seiler, Rollie Goold and James McIntosh, directors.

Following the election of officers, Howard G. Bissell, architect and secretary of the Stockton City Planning Commission, explained details of the tentative major street plan, recently completed for Stockton.

ENGINEERING SOCIETIES EMPLOYMENT SERVICE

Further information regarding positions listed in this column is obtainable from Newton D. Cook, Room 715, 57 Post Street, San Francisco. (Phone SUtter 1684).

R-345-S WELDING ENGINEER young man with some technical education and skilled with welding torch, for service work for manufacturer of non-ferrous welds. Salary open. Location, California.

R-350-S SALES ENGINEER, experienced, to sell outdoor sprinkler installations for large lawns, gardens, nurseries, etc. Must have Commission only. One man wanted for San Francisco territory and for Northwest. Headquarters, San Francisco and Portland.

R-350-S SALES REPRESENTATIVES or agents wanted for a perfected automatic coal stoker for domestic heating. Name of company furnished on request to qualified applicants in Western States.

R-347-S MECHANICAL ENGINEER preferably over 35 years old, with several years experience as mechanical engineer in the employment of a company manufacturing farm machinery. Only this experience considered. Man will be given full charge of small shop and offer demonstration of ability to produce results. Must be willing to accept small salary to start. Apply by letter with full details of experience, etc. Location, San Francisco.

R-348-S CHEMIST, technical graduate, preferably 30-35 years of work in food practice, is willing to follow instructions, for inorganic analytical work. Salary \$150-\$200 month depending on experience. Apply by letter for interview. Location, near San Francisco.

Water Treatment For Ice Manufacture

The investigation reported in Bulletin No. 219 of the Engineering Experiment Station of the University of Illinois has as its scope a general survey of raw water sources available throughout the United States for the production of manufactured ice, and the development of methods of water treatment whereby each of these water supplies may become available for the production of the highest quality ice in completely electrified plants.

As a result of the investigation, distinct methods were developed whereby any characteristic sodium bicarbonate water source may be used in the production of marketable manufactured ice. The first is based upon definite modification in present manufacturing practice, places particular stress upon obtaining greater efficiency of air agitation during the freezing process by means of a new type of ice can, and makes no attempt to reduce the concentration of salts dissolved in the water prior to the freezing operation. The second introduces a new method of chemical water treatment prior to the freezing operation, whereby the total salt concentration of the water may be reduced to such an extent that standard operating conditions and equipment may be utilized. The two methods are described in detail in the bulletin.

Copies of Bulletin No. 219 may be obtained without charge by addressing the Engineering Experiment Station, Urbana, Illinois.

APARTMENTS

Plans Being Prepared.

APARTMENTS Cost, \$400,000
LONG BEACH, Los Angeles Co., Cal.
 Ocean Avenue
 Eighteen-story steel frame and concrete Class A apartment hotel (60x80 feet).
 Owner—Withheld.
 Architect—Jos. H. Roberts, 501 Termino Ave., Long Beach.

Sub-Figures Being Taken.

APARTMENTS Cost, \$84,000
SAN FRANCISCO, SE Pacific Ave. and Gough St.
 Five-story and basement steel frame and concrete class C apts. (29 apts.)
 Owner and Builder—Peter Midtust, 529 Pierce Street.
 Architect—H. C. Baumann, 251 Kearny Street.
 Composition roofing, oil burning system, one automatic electric elevator, steam heat.

PALO ALTO, Santa Clara Co., Cal.—See "Banks, Stores and Offices," this issue.

Plans Being Prepared.

APARTMENTS Cost, \$200,000
BAYWOOD, San Mateo Co., Calif.
 Apartment building.
 Owner and Builder—L. Dioguardi, 30 W. Poplar St., San Mateo.
 Architect—William Toepke, 71 N. e w Montgomery St., San Francisco.
 More information will be given shortly.

Completing Plans.

APARTMENTS Cost, \$125,000
FRESNO, Fresno Co., Cal. Fulton and Sacramento Streets.
 Fireproof apartments.
 Owner—I. Teilmann, Kearney and Teilmann Sts., Fresno.
 Architect—W. D. Coates Jr., Rowell Bldg., Fresno.
 Bids will be taken about March 15.

Plans Being Figured.

APARTMENTS Cost, \$250,000
SAN MATEO, San Mateo Co., Calif.
 Third and Dartmouth Sts.
 Six-story and basement class C steel frame, brick and concrete apartments (21 2-3 4-5-6-7- and 8-room apts.)
 Owner—Irma Downing, 212 S. El Camino, San Mateo.
 Architect—Willis Lowe, 354 Hobart St., Oakland.
 Bids are being taken for a general contract with separate bids for plumbing, heating and ventilating, painting and steel work.

Contract Awarded.

APARTMENTS Cost, \$17,800
SAN FRANCISCO, E Divisadero St. N Jefferson.
 Three-story and basement frame and stucco apartments (6 apts.)
 Owner—G. and M. Teglia, 3023 Franklin Street.
 Plans by B. K. Dobkowitz, 425 Montecrey Blvd.
 Contractor—G. Harder, 1233 41st Ave.

Sub-Contracts Awarded.

ALTERATIONS Cost, \$—
SAN FRANCISCO, 499 Buena Vista Avenue.
 Alter residence for apartments.
 Owner—Mrs. J. A. Wilcox, premises.
 Architect—H. H. Gutterson, 526 Powell Street.

Contractor—Clinton-Stephenson Const. Co., Menadnock Bldg.

Electric Work—Atlas Electric Co., 343 4th Street.

Lumber—Loop Lumber Co., Central Bldg.

Concrete—Golden Gate Atlas Materials Co., 16th and Harrison Sts.
Electric Fans—Gunn, Carle & Co., 444 Market St.

Underpinning—D. J. Sullivan, 1942 Folsom Street.

Mill Work—Portman's Planing Mill, 1618 Mission St.

Contract Awarded.

APARTMENTS Cost, \$45,000
OAKLAND, Alameda Co., Cal. 2451 Seminary Ave.

Three-story and basement frame and stucco apartments (66 rooms).

Owner—Mrs. Ethel D. Magoon, 1967 Courtland Ave., Oakland.

Architect—Not Given.

Contractor—E. B. Magoon, 1967 Courtland Ave., Oakland.

Construction Postponed For 30 Days.

APARTMENTS Cost, \$7000
OAKLAND, Alameda Co., Cal. NE Glenview and Woodruff Streets.
 One-story frame and stucco duplex (2 4-room apartments).

Owner and Builder—O. E. Jensen, % Harry K. Jensen, 354 Hobart St., Oakland.

Plans by Harry K. Jensen, 354 Hobart St., Oakland.

Bids To Be Taken Within Few Days.

APARTMENTS Cost, \$—
SAN MATEO, San Mateo Co., Cal. Fourth Ave and San Mateo Dr.
 Three-story and basement wood frame and stucco apartments (27 2, 3 and 4-room apts)
 Owner—Withheld.
 Architect—Oscar Thayer, 110 Sutter St., San Francisco.
 Steam heating, oil burning system, two garages with turn tables in each.

Plans Being Prepared.
SHEED Cost, \$—
TUOLUMNE, Stanislaus Co., Calif.
 One-story frame freight shed.
 Owner—Tidewater Southern R. Co., Mills Bldg., San Francisco.
 Plans by Eng. Dept. of Owner (Mr. Smitten), Mills Bldg., San Francisco.

Bids will be taken in about 30 days.

Completing Plans.
PLANT Cost, \$100,000
SAN JOSE, Santa Clara Co., Cal.
 Three- or four-story concrete or brick manufacturing and refining plant.
 Owner—Liquid Sugar Corp., 637 Battery St., San Francisco.
 Plans by Eng. Dept. of Owner.
 Bids will be taken in about 3 weeks.

Sub-Contracts Awarded.
ASSEMBLY PLANT Cost, \$3,200,000
SEATTLE, Wash. Duwamish Waterway.

Motor car assembly plant.
 Owner—Ford Motor Company.
 Architect—Albert Kahn, Inc., Detroit.
 Contractor—Clinton Const. Co., 222 Folsom St., San Francisco.
 Lumber—Stimson Mill & Lumber Co., Seattle.

Plans of Reinforcing Steel—Larson Co., Seattle.

Sub-bids on other units of this project, as listed in issue of February 26 are still being taken.

Contracts Awarded.
BAKERY Cost, \$15,000
SAN JOSE, Santa Clara Co., Cal. 238 Market St.

Two-story steel frame and brick bakery.

Owner—P. Andreuccetti, 580 S 6th St., San Jose.

Architect—Charles McKenzie, Twohy Bldg., San Jose.

Carpentry—Wm. Caldwell, 1241 Hedding St., San Jose.

Brickwork—S. F. Frouty, 917 Michigan St., San Jose.

Other awards will be made at a later date.

As previously reported, Steel contract awarded to California Steel Co. 2nd and Harrison Sts., Oakland.

Plans Being Prepared—Contract Awarded.

CREAMERY Cost, \$100,000
BERKELEY, Alameda Co., Cal. Sar Pablo Ave. near Delaware St.
 One-story creamery and store.
 Owner—G. R. Heath, 2330 Garber St., Berkeley.

Plans by Contractor.
 Contractor—E. H. Wendt, 2116 Allston Way, Berkeley.

Contract Awarded.
PACKING HOUSE Cost, \$10,000
GILROY, Santa Clara Co., Cal.
 One-story wood packing house (55x200 ft.; gravel roof).
 Owner—Alielo Bros., North San Pedro St., San Jose.

Architect—Charles McKenzie, Twory Bldg., San Jose.
Contractor—A. Giacalone, 240 Race St., San Jose.
Sub-bids are in and will be awarded shortly.

Preparing Preliminary Plans.
BAKERY Cost, \$—
SAN FRANCISCO Location Withheld.
One-story brick bakery.
Owner—Withheld.
Architect—E. Neumarkel, 544 Market St., San Francisco.

Plans Being Completed.
HANGAR, ETC. Cost, \$65,000
SACRAMENTO, Sacramento Co., Cal.
Municipal Airport
Steel frame and wood hangar and air terminal station.
Owner—City of Sacramento, H. G. Denton, city clerk.
Architect—Starks & Planders, Forum Bldg., Sacramento.
Bids will be advertised for shortly.

GARAGES AND SERVICE STATIONS

Contract Awarded.
SERVICE STATION Cost, \$10,000
SAN FRANCISCO. Eighth Ave. and Fulton Street.
One-story super service station.
Owner—Shell Oil Company.
Plans by Eng. Dept. of Owner.
Contractor—Barrett & Hilt, 918 Harrison Street.

Sub-Contracts Awarded.
AUTO SALES BLDG. Cost, price, \$53,915
SAN FRANCISCO. Mission Street nr. Ney Street.
One- and two-story steel frame and reinforced concrete auto sales and service building.
Owner—W. E. Street, 251 Magellan Avenue.
Architect—Irvine & Ebbets, Call Bldg.
Contractor—William Spivock, Hobart Building.
Excavation—Piombo Bros., 124 Parker Street.
Concrete—Golden Gate Atlas Materials Co., 16th and Harrison Sts.
Other awards will be made shortly.

Sub-Contracts Awarded.
SERVICE STATION Cost, \$10,000
SAN FRANCISCO. Eighth Ave. and Fulton Street.
One-story super service station.
Owner—Shell Oil Company.
Plans by Eng. Dept. of Owner.
Contractor—Barrett & Hilt, 918 Harrison Street.
Plumbing—Fisher & Wolfe, 205 Tehama Street.
Steel Sash—Michel & Pfeffer Iron Works, Harrison and 10th Sts.
Other awards will be made shortly.

Now Bidding.
SERVICE STATION Cost, \$11,500
SAN FRANCISCO. Nineteenth Ave. and Lincoln Way.
One-story brick super service station.
Owner—Associated Oil Co., 79 New Montgomery St., San Francisco.
Architect—Masten & Hurd, Shreve Bldg., San Francisco.
Now Bidding—Reavey & Spivock, Shell Oil Bldg., San Francisco.

GOVERNMENT WORK AND SUPPLIES

SAN FRANCISCO—Until March 19, P. M., bids will be received by U. S. Forest Service, Ferry Bldg., to furnish and deliver 59 trucks ranging in capacity from one-half to ten tons. Specifications obtainable from above office.

 bonds of \$480,000 to finance construc-
 tion of a new sedimentation basin in
 connection with the municipal water
 system. Fred J. Klaus is city engi-
 neer.

Contract Awarded.
MORTUARY Cost, Price, \$12.21
MOUNTAIN VIEW, Santa Clara Co.
 Cal. NE Yosemite and Castle Sts
 Two-story and basement frame and
 stucco mortuary (50x50 ft.)
 Owner—George Beardslee.
 Plans by E. Reichel, 303 University
 Ave., Palo Alto.

Contractor—The Minton Co., 24
Hamilton Ave., Palo Alto.

LOS ANGELES, Cal.—No bids were
 received by the city engineer supervisors
 for furnishing 10,000 tons of rock rip-rap
 for the flood control depart. levees.

SANTA ANA, Orange Co., Cal.—
 Santa Ana city council has accepted
 an offer of historical museum for
 city of Santa Ana under provisions of
 a trust fund amounting to more than
 \$100,000 left by the late Mrs. Ada E.
 Bowers. In addition to the \$100,000
 fund, Mrs. Bowers left a lot at Main
 and 20th Sts., Santa Ana, as a site for
 the museum and created another trust
 fund of \$2500 for the erection of a
 fountain. Building will be built on
 site named, details of construction
 probably to be handled by the city
 council subject to the approval of the
 First National Bank of Santa Ana,
 trustee.

SAN JOSE, Santa Clara Co., Cal.—
 Until March 9, 8 P. M., bids will be
 received by C. B. Goodwin, city man
 ager, for washing and segregating ap-
 proximately 2000 yards of sand and
 4000 yards of gravel at Cherry Flat
 4 miles east of Alvin Rock. Certified
 check 10% required with bid. Specifi-
 cations and further information ob-
 tainable from Wm. Popp, city engi-
 neer.

 superintendent of construction, Los
 Angeles Playground and Recreation
 Department, has completed prelimi-
 nary plans for two swimming pools
 and a grandstand to be erected at Ex-
 position Park for the Olympic Games
 to be held in 1932. The swimming
 pools will be 18 meters wide and 50
 meters long. concrete construction
 with tile lines, etc. The grandstand
 will accommodate 5000 people and will
 contain two floors for dressing rooms,
 boiler room, filtration system, game
 rooms and playrooms. It will be of
 reinforced concrete construction.
 Temporary bleachers will be erected
 facing the second pool just before
 the games. The city will appropriate
 from \$75,000 to \$85,000 and the Olympic
 Games committee \$35,000 for the
 work.

Preparing Preliminary Plans.
MORTUARY Cost, \$55,000
MODESTO, Stanislaus Co., Calif.
 Two-story brick and concrete mortu-
 ary building.

Owner—C. Shannon, Modesto.
 Architect—Russell Guerne De Lappe,
 1710 Franklin St., Oakland.

SAN JOSE, Santa Clara Co., Cal.—
 Bright Gravel Co., Senter Road, San
 Jose, awarded contract by city coun-
 cil for segregation and washing of
 gravel and to place in stock piles at

BRIDGES

SAN BERNARDINO COUNTY, Cal.

—Following bids received March 11 by State Highway Commission to construct a reinforced concrete girder bridge over the tracks of the Atchison, Topeka and Santa Fe Railway, about two miles east of Essex, consisting of one 45-ft. and four 34-ft. spans on concrete piers:

H. W. Rohl Co., 727 W 7th St., Los Angeles \$20,885
Evert & Dunne, Los Angeles..... 24,593
R. E. McKee, Los Angeles 25,971
Johnson Const. Co., Los Angeles 28,892
Bids held under advisement.

PLACER COUNTY, Cal.—Following

bids received March 11 by State Highway Commission to construct under-grade crossing under the tracks of the Southern Pacific R. R. at New England Mills, consisting of two concrete abutments with wing walls and grading and surfacing approximately 1,000 lin. ft. of roadway with bituminous treated crushed gravel or stone surfacing:

W. H. Hauser, 3129 E 7th St., Oakland \$32,521
C. W. Wood, Stockton 36,115
P. F. Bender, North Sacto. 36,264
Lindgren & Swinerton, Inc., Sacramento 37,104
Frederickson & Watson and Frederickson Bros. Oakland 38,768
Bodenhamer Const. Co. Oakland 39,086
C. Emil Force, Piedmont 40,644
J. W. Hoops, Sacramento 44,130
Bids held under advisement.

SAN FRANCISCO.—Until April 29,

2:30 P. M. (date extended from Mar. 25), bids will be received by S. J. Hester, secretary, Board of Public Works, to construct bascule bridge over the Islais Creek channel in 3rd Street. Estimated cost, \$400,000. The structure will be a single leaf bascule bridge, 140 ft. span, 30 ft. overall width; 103 ft. between fenders with 6 ft. sidewalks. Provision will be made for two street railway tracks and the Belt Line Railroad in addition to vehicular traffic.

Bids are wanted for:

(1) Furnishing and erecting a bascule bridge superstructure and approaches, including the dismantling of the existing bridge anchors and appurtenances, and the construction of all necessary foundations, piers, abutments and appurtenances, all in conformity with the plans and specifications.

(2) Furnishing and erecting a bascule bridge superstructure, including counterweight, machinery and appurtenances, all in conformity with the plans and specifications.

Certified check 10% payable to the Clerk of the Board of Supervisors required with bid. Plans obtainable from the Bureau of Engineering, 3rd floor, City Hall.

EUREKA, Humboldt Co., Cal.—Bids will be asked at once by county supervisor, Fred M. Kay, county clerk, to construct bridge over the Klamath River at Martin's Ferry, involving the placing of a steel span between two towers now in place. Span will be 411-ft. long and 180-ft. above the river near Martin's Ferry. Bids will be opened about April 14. Plans are obtainable from County Surveyor Frank Kelly.

SAN MATEO-SANTA CLARA COS. Cal.—Barrett & Hulp, 918 Harrison St., San Francisco, at \$17,218 awarded contract by State Highway Commission to construct a reinforced concrete girder bridge across San Francisco Creek at Palo Alto, consisting of three 27-ft. spans on concrete pile bents.

SANTA BARBARA COUNTY, Cal.—Paul M. White, Santa Monica, at \$26,287 awarded contract by State Highway Commission to construct reinforced concrete arch bridge across Gaviota Creek, consisting of one 190-ft. span.

LOS ANGELES, Cal.—The Los Angeles Board of Public Works has ordered amended plans and specifications for the \$1,000,000 Sixth St. Viaduct to permit separate contract, if so desired, for fabrication of steel, erection of steel and construction of other portions of the bridge, making three contracts. Merrill Butler is chief bridge engineer for the city.

MERCED, Merced Co., Cal.—Until April 14, bids will be received by county supervisors to construct timber bridge over Dry Creek on the Amsterdam-River road. Plans obtainable from County Surveyor W. E. Bedesen.

SANTA BARBARA, Cal.—Cook and Clark, Santa Barbara, at \$3,265 awarded contract by county supervisors to construct bridge over Alamo Continado Creek.

MERCED, Merced Co., Cal.—Until April 14, bids will be received by county supervisors to construct floor of bridge over the Merced River on the Cox Ferry road. Plans obtainable from County Surveyor W. E. Bedesen.

MERCED, Merced Co., Cal.—Until April 14, bids will be received by the county supervisors to construct concrete bridge over irrigation canal in Palm Ave., between Shaffer road and Winton road. Plans obtainable from County Surveyor W. E. Bedesen.

NAPA, Napa Co., Cal.—County supervisors have passed resolution appropriating \$25,000 to aid the city of Napa to construct the new Third St. bridge over the Napa River, plans for which are being completed by H. A. Harold, city engineer. The structure will be of concrete construction and will cost approximately \$77,000.

SANTA CLARA COUNTY, Cal.—Until April 1, 2 P. M., bids will be received by State Highway Commission to construct a reinforced concrete girder bridge across Carnadero Creek, about 1.7 miles south of Gilroy, consisting of four 35 ft. spans on concrete pile bents and concrete abutments, and approximately 0.35 mile of roadway approaches to be graded and paved with Portland cement concrete.

See call for bids under official proposal section in this issue.

OAKLAND, Calif.—County Surveyor George A. Peck, preparing plans for Park Street Bridge in San Leandro. Will be either steel or reinforced concrete construction. Estimated cost, \$15,000.

MODESTO, Stanislaus Co., Calif.—Until March 23, 11 A. M., bids will be

received by C. C. Eastin, county clerk, to construct bridge over the Stanislaus River, north of Oakdale. Will be reinforced concrete construction 290 feet long, 21 feet wide, with a 20 foot roadway. Est. cost, \$22,000. Certified check 10% required with bid. Plans on file in office of clerk and obtainable from George Macomber, county surveyor.

PLACER COUNTY, Cal.—Until April 1, 2 P. M., bids will be received by State Highway Commission to construct bridge across Auburn Ravine about one-half mile west of Auburn, consisting of six 15 ft. timber spans and one 40 ft. steel beam span on timber bents with concrete footings.

MERCED COUNTY, Cal.—Until April 1, 2 P. M., bids will be received by State Highway Commission to construct a steel stringer overhead crossing over the tracks of the Atchison, Topeka & Santa Fe Railway about 2½ miles east of Merced, consisting of thirty-one 40-ft. spans and seven 20-ft. spans with reinforced concrete deck on steel pile bents and steel frame bents on concrete footings with timber pile foundations and approaches. Deck to be graded and paved with Portland cement concrete.

DREDGING, HARBOR WORKS & EXCAVATIONS

PEARL HARBOR, T. H.—Until Apr. 8, under Specifications No. 6128, bids will be received by Bureau of Yards and Docks, Navy Department, Washington, D. C., for dredging 41,000 cu. yds. of material at Naval Operating Base, Pearl Harbor. Specifications obtainable from above on deposit of \$10, checks for same to be made payable to Chief of the Bureau of Yards and Docks.

EUREKA, Humboldt County, Cal.—County supervisors have appropriated \$1,575 to wards construction of a breakwater and dredging the old channel of Little River, for the purpose of diverting the river from its present channel back to the old bed. The work is to be undertaken by the Hammond and Little River Redwood Co., the cost to be borne equally by the lumber firms, the county and the state government.

IRRIGATION PROJECTS

CALIFORNIA.—Following applications filed during the month of February, 1931, with the State Department of Public Works, Division of Water Resources, for permits to appropriate water:

Application 6883 (Mono County) O. P. Dyer, 325 South Los Robles, Pasadena, for 150 gals. per day from unnamed stream tributary to Little George and Owens river, for domestic purposes. Est. cost, \$50.

App. 6884 (Contra Costa Co.) Associated Oil Co., care Humphrey, Searls, Doyle and McMillan, ATYCS, Standard Oil Bldg., San Francisco, for 20,000 gals. per minute from Hastings Slough tributary to Suisun Bay, for industrial purposes. Est. cost, \$30,000.

App. 6885 (Siskiyou Co.) W. A. Sargent, Dorris, 2-0 cu. ft. per sec. from Cottonwood Creek tributary to Lower

Klamath Lake, for irrigation purposes on 160 acres. Est. cost \$50.

App. 6886 (Siskiyou Co.) W. S. Hart & L. J. Herrington, John Tiedemann and C. D. Jones, care W. S. Hart, 529 K. St., Sacramento, 800 gals. per day from unnamed spring tributary to Kelsey, thence Scott, thence Klamath River, for domestic purposes.

App. 6887 (Butte Co.) S. E. Lee, Biggs, 3.6 cu. ft. per sec. from Lateral "A", Reclamation District 833 tributary to Butte Creek and Sacramento River, for irrigation purposes on 160 acres.

App. 6888 (Humboldt Co.) C. H. Barkdull, 3646 26th Ave. South, Seattle, Wash., for 25 cu. ft. per sec. from 6 or 7 small streams, tributary to South Fork of the Trinity River, for mining and domestic purposes.

App. 6889 (Trinity Co.) D. K. Can and Joseph O'Donnell, care D. K. Can, Burnt Ranch, 1 cu. ft. per sec. from Gray Creek tributary to Trinity River, for mining purposes. Est. cost, \$500.

App. 6890 (Lassen Co.) Western Pacific Railroad Co., Mills Bldg., San Francisco, for 0.4 cu. ft. per sec. from Horse Creek, for industrial and domestic purposes. Est. cost, \$16,700.

App. 6891 (Eldorado Co.) L. E. Apollino, Camino, 0.044 cu. ft. per sec. from Rush Creek, for irrigation and domestic purposes on 5 acres. Est. cost, \$400.

App. 6892 (Sutter Co.) A. C. H. Schmidt, care Lawrence Schilling, attorney, Yuba City, for 1.1 cu. ft. per sec. from Feather River tributary to Sacramento River, for irrigation purposes on \$1.65 acres. Est. cost \$1500.

App. 6893 (San Diego Co.) Harry E. Causey, Azusa, 5 gals. per minute from unnamed spring tributary to Temecula Creek, thence Santa Margarita River, for irrigation and domestic purposes on 2 acres. Est. cost \$300.

App. 6894 (Stanislaus Co.) E. B. Henry, Rt. 2, Box 947, Modesto, for 0.7 cu. ft. per sec. from Tuolumne River tributary to San Joaquin River, for irrigation and domestic purposes on 58 acres. Est. cost, \$1000.

App. 6895 (Tuolumne Co.) W. C. LeBlanc, P. O. Box 94, Modesto, 280 cu. ft. per sec. from Stanislaus River, tributary to San Joaquin River, for irrigation purposes on 100,000 acres.

App. 6896 (Inyo Co.) Leo Kikut, Olancha, 2 cu. ft. per sec. from small spring to be developed, tributary to Owens Lake watershed, for irrigation and domestic purposes on 80 acres.

App. 6897 (San Bernardino Co.) Mrs. Effel Rudy, Fenner, for 0.2 cu. ft. per sec. from Fenner Spring, for domestic purposes.

App. 6898 (El Dorado Co.) United States El Dorado National Forest, Placerville, for 800 gals. per day from unnamed stream, tributary to Lake Tahoe, for domestic and fire protection purposes. Est. cost, \$100.

App. 6899 (El Dorado Co.) United States El Dorado National Forest, Placerville, for 800 gals. per day from Doane Springs, tributary to Lower Echo Lake, for domestic purposes. Est. cost \$150.

App. 6900 (El Dorado Co.) United States El Dorado National Forest, Placerville, for 3200 gals. per day from Bryant Creek, tributary to South Fork of American River, for domestic and fire protection purposes. Est. cost, \$500.

App. 6901 (Kern Co.) S. D. Gunderson, Brown, Calif., 4 cu. ft. per sec. from Grapevine Canyon and 7 springs or seepages, tributary to Grapevine Canyon, for irrigation, domestic and stock watering purposes.

CALIFORNIA.—Following permits were granted during the month of February, 1931, by the State Department of Public Works, Division of Water Resources, to appropriate water:

Permit 3553, Application 6797 (El-

dorado County) issued to G. E. White, Woodland, for 200 gallons per day from Forni Creek, for domestic purposes. Est. cost, \$50.

Per. 3554, App. 6670 (Sutter Co.) H. S. Fasig and W. H. Saylor, Knights Landing, for 3.46 cu. ft. per second from Sacramento River, for irrigation on 27.81 acres. Est. cost \$4,000.

Per. 3555, App. 6508 (Inyo Co.) W. B. Gray, Beatty, Nev., for 5 cu. ft. per second from Jail Spring, Birch Spring and Tuber Spring, for mining and domestic purposes.

Per. 3556, App. 6800 (Plumas Co.) S. E. Colburn and A. E. Banks, Crescent Mills, for 1 cu. ft. per sec. from unnamed stream, for power and domestic purposes. Est. cost, \$2000.

Per. 3557, App. 6845 (San Diego Co.) Division of Highways, Department of Public Works, Sacramento, for 0.012 cu. ft. per sec. from La Posta Spring for recreational purposes.

Per. 3558, App. 6847 (Colusa Co.) Mary E. Porter Gleason, Grimes, for 1 cu. ft. per sec. from Sacramento River, for irrigation on 153.58 acres. Est. cost \$2515.

Per. 3559, App. 6742 (Mono Co.) Sarita Mining & Power Co., Bridgeport, for 1 cu. ft. per sec. from Masonic Creek and 13 springs, for mining and domestic purposes. Est. cost, \$750.

Per. 3560, App. 6759 (Mono Co.) Alley Age Products Co., Ltd., Whittier, for 3 cu. ft. per sec. from Laurel Lakes for power purposes. Est. cost \$1000.

Per. 3561, App. 6141 (Del Norte Co.) C. D. Dumboldt, Holland, Ore., for 12 cu. ft. per sec. from West Fork Althouse Creek, for mining purposes. Est. cost \$1000.

STREET LIGHTING SYSTEMS

EUREKA, Humboldt Co., Cal.—Eureka Electric Co., 206 6th St., Eureka, at \$14,321 awarded contract by city council to install electrolites with underground system in Fourth St. from Broadway to J Sts., involving cast iron standards. Previous bids were rejected, those lowest: City Imp. Co., San Francisco, \$14,750; Eureka Electric Co., \$14,850; Globe Electric Co., San Francisco, \$15,000. Complete list of recent bids follows:

Eureka Electric Co.,	\$14,321
City Imp. Co., Oakland,	14,568
Globe Elec. Co., San Francisco,	14,544

SAN LEANDRO, Alameda Co., Cal.—City council plans installation of electrolite system in Dutton Avenue between East 14th Street and Kenilworth Avenue, involving 29 standards. Estimated cost, \$7,000. W. A. Richmond, city engineer.

LIVERMORE, Alameda Co., Cal.—City trustees declare intention (340) to install electrolites together with underground system in portions of West First St., East First St., and South Livermore Ave., involving 45 Westinghouse Hollowspan Granite electrolites, Belmont Design 15, Style No. 338225 with type "U" fitter, together with transformers, light units, etc. 1911 Act. Hearing March 18. Elmer G. Still, city clerk.

SAN FRANCISCO.—Until March 25, 10 A. M., bids will be received by S. J. Hester, secretary, Board of Public Works, to install ornamental street lighting system in Bernal Ave., involving:

- (1) 39 ornamental iron standards, erect, paint and assemble.
- (2) 39 luminaries and lamps, furnish and install.
- (3) 30 concrete foundations with conduit beds.
- (4) 11,800 5,000-volt single conductor R and L C wire.
- (5) 2 series transformers, furnished and installed.

Bond of \$1,800 required of the successful bidder. Certified check 10% payable to Clerk of the Board of Supervisors required with bid. Plans obtainable from Bureau of Engineering, 3rd floor, City Hall.

SANTA CRUZ, Santa Cruz Co., Cal.—city council contemplates proceeding to install electrolite system in Vine St., between Locust and Church Sts. Roy Fowler, city engineer.

MACHINERY AND EQUIPMENT

SACRAMENTO, Cal.—Link-Belt Co., 400 Paul Ave., San Francisco, at \$1,392 awarded contract by city council to furnish elevating and screening equipment for the Municipal Filtration Plant. Complete list of bids published in issue of February 21.

SAN FRANCISCO.—Until March 30, 3 P. M., under Proposal No. 704, bids will be received by Leonard S. Leavy, city purchasing agent, 270 City Hall, to furnish one twin-screw patrol boat for San Francisco Police Department. Specifications obtainable from above office on deposit of \$50, returnable.

SAN FRANCISCO.—Until March 19, 2 P. M., bids will be received by U. S. Forest Service, Ferry Bldg., to furnish and deliver 59 trucks ranging in capacity from one-half to ten tons. Specifications obtainable from above office.

OCEANSIDE, San Diego Co., Cal.—Until 7:30 P. M., March 25, bids will be received by the Oceanside city council for furnishing the city one 1½-ton motor truck with enclosed cab and extras body. Certified check, 10%. John H. Landes, city clerk.

GRIDLEY, Butte Co., Calif.—Fairbanks-Morse Co., Spear and Harrison Sts., San Francisco, at \$17,290 submitted only bid to city to furnish and install one Diesel engine generating unit with auxiliary pumps, motors, equipment and materials.

The above equipment is for the purpose of replacing the present inadequate steam plant standby service.

Bids held under advisement until March 16.

HAWTHORNE, Nev.—Until March 24, 10 A. M., bids will be received by the Bureau of Supplies and Accounts, Navy Department, Washington, D. C., to furnish motor ambulance for Naval Ammunition Depot at Hawthorne. Specifications obtainable from Navy Purchasing Office, 100 Harrison St., San Francisco.

OAKLAND, Cal.—Until March 30, 4:30 P. M., bids will be received by City Port Commission, 424 Oakland Ferry Bldg., to furnish and install 10-ton cargo hoist for use at the Inland Waterways Terminal; estimated cost \$12,000. Specifications obtainable from above office.

RAILROADS

LOS ANGELES, Cal.—Until March 25, 10 A. M., bids will be received by City Harbor Department, to furnish girder rail, frogs, switches and miscellaneous rail materials for terminal at Berths 14 to 16. Certified check for 10%. Specifications obtainable from above.

FIRE EQUIPMENT

GILROY, Santa Clara Co., Cal.—Rural Fire Department, meeting in Gilroy firehouse, votes to purchase 200 ft. of new one-inch hose; estimated cost \$150.

LOS ANGELES, Cal.—Until 11:00 A. M., March 18, bids will be received by the Los Angeles city purchasing agent, Thomas Oughton, for furnishing cotton rubber lined fire hose under Specifications No. 2339. The items are:

- (1) 30,000 feet 2½-inch hose.
- (2) 20,000 feet 1½-inch hose.

RESERVOIRS AND DAMS

BOULDER CITY, Nev.—Six Companies, Inc., Phelan Bldg., San Francisco, at \$48,890,995 awarded contract by U. S. Bureau of Reclamation to construct the Hoover Dam, power plant and appurtenant works. The Six Companies, Inc., 526 Phelan Bldg., San Francisco, is organized from the Utah Const. Co., Phelan Bldg., San Francisco and Ogden, Utah; Henry J. Kaiser, Latham Square Bldg., Oakland and W. A. Bechtel Co., 155 Sansome St., San Francisco; Macdonald & Kahn Cos., Ltd., Financial Center Bldg., San Francisco; Morrison-Knudsen Co., Continental National Bank Bldg., Boise, Idaho; J. P. Shea Co., Henry Bldg., Portland, Oregon and Pacific Bridge Co., foot of East Salmon St., Portland, Oregon. The officers of Six Companies, Inc., are: W. H. Wattis, president; W. A. Bechtel, first vice-president; E. O. Wattis, second vice-president; Felix Kahn, treasurer; Chas. A. Shea, secretary. Complete list of the unit bids received on this project published in issue of Mar. 10th.

HAWTHORNE, Nevada.—Following is a partial list of prospective bidders to construct Cat Creek Dam at Hawthorne, in connection with the Naval Ammunition Plant, bids for which will be opened by the Bureau of Yards and Docks, Navy Department, Washington, D. C., on March 25, under Specification No. 6165:

W. H. Burr, 320 Market Street, San Francisco.

Macco Const. Co., Los Angeles.

J. G. Donovan, 4031 Goodwin, Los Angeles.

C. Dudley DeVelbiss, 360 Pine St., San Francisco.

Miltry Bros., Detweiler Bldg., Los Angeles.

MacDonald & Kahn, Financial Center Bldg., San Francisco.

Utah Const. Co., Phelan Bldg., San Francisco.

Harrison Wright, Charlotte, North Carolina.

Healy-Tibbitts Const. Co., 64 Pine St., San Francisco.

Seims-Helmer, Inc., 206 Sansome St., San Francisco.

A. D. Wilder, San Francisco.

Arundel Corp., Baltimore, Md.

W. S. Lee Eng. Corp., Power Bldg., Charlotte, North Carolina.

Hallbauer-Le Bahn, Inc., 844 Rush St., Chicago.

D. A. Foley Const. Co., 716 Grant Bldg., Los Angeles.

The work consists of constructing a constant angle type concrete dam, approximately 120 ft. in height requiring rock excavation, concrete work, drilling grout holes, pressure grouting, pipe and fittings for grouting and drainage systems, and intake pipe and screens. Plans obtainable from District Public Works Officer, Room 513, 100 Harrison St., San Francisco, on deposit of a check or postal money order for \$10, payable to the Chief of the Bureau of Yards and Docks.

PIPE LINES, WELLS, ETC.

SAN MATEO COUNTY, Calif.—Pacific Gas and Electric Co., 245 Market St., San Francisco, will award \$156,300 in installing 1500 new gas service connections in various sections of the city.

SAN JOSE, Santa Clara Co., Cal.—Pacific Gas and Electric Co., 245 Mar-

ket St., San Francisco, will expend \$200,000 in installing 1852 new gas services in various sections of the city.

KENNEWICK, Wash.—Until 2 P. M., March 30, bids will be received by the U. S. Bureau of Reclamation, Denver, Colo., for constructing a 34-in. diameter continuous wood stave pipe for low lift discharge line, Kennewick-Hubbards pumping plant, Kennewick, Pasco, Yakima project, Washington. The work is located about 3½ miles west of Kennewick, Wash., which town is on the North-Pacific Ry. Specifications No. 512-D. The work involves the furnishing and erecting of about 665 lin. ft. of 34-in. continuous wood stave pipe complete. Excavation of trench and piers for supporting the pipe will be furnished by the government. Proposal guaranty, 10% R. F. Walter, Denver, chief engineer.

CALIFORNIA.—See "Power Plants" this issue. Construction contemplated by Pacific Gas and Electric Co. in connection with power plants and gas main extensions in Shasta Division, Coast Valley Division, Humboldt Division, and San Joaquin Division.

LOS ANGELES, Cal.—Bids for furnishing seamless or lap welded pipe under specifications No. 2391 were opened by the city purchasing agent, Thomas Oughton, March 9. The items were:

- (1) approximately 500 ft. 12-in. pipe;
- (2) approximately 500 ft. 16-in. pipe;
- (3) approximately 500 ft. 18-in. pipe;
- (4) approximately 500 ft. 20-in. pipe;
- (5) approximately 500 ft. 24-in. pipe.

The bids were:

Fitzpatrick & Lock Co.—(1) \$1,567; (2) \$2,117; (3) \$2,953; (4) \$2,844; (5) \$4,531; terms 2% 30 days.

Champion & Barber Inc.—(1) \$2,147; (2) \$2,732; (3) \$3,974; (4) \$3,416; (5) \$2,900; terms 2% 30 days.

Alternate bid for combined award:

- (1) \$1,630; (2) \$2,112; (3) \$2,109; (4) \$2,677; (5) \$3.06.

Ducommun Corp.—(1) \$142.80 per 100 ft.; (2) \$169.64 per 100 ft., items 3, 4 and 5 no bid.

Republic Sales Corp.—(1) \$1,492; (2) \$2,174; (3) \$2,624; (4) \$2,963; (5) no bid. Cash discount \$74.82, 30 days after delivery.

Midway Pipe & Supply Co.—(1) \$1,567; (2) \$2,117; (3) \$2,953; (4) \$2,844; (5) \$4,531; terms 2% 30 days.

Grinnell Company—(1) \$1,425; (2) \$2,082; (3) \$2,524; (4) \$2,844; (5) \$3,784; terms 2% 30 days.

California Hardware Co.—(1) \$1,492; (2) \$2,174; (3) \$2,634; (4) \$2,826; (5) no bid, terms 2% 30 days.

Santa Fe Pipe & Supply Co.—(1) \$1,49; (2) \$2,36; (3) \$2,52; (4) \$2,77; (5) \$3.50; terms 2% 30 days.

Crane Company—(1) \$1,425; (2) \$2,082; (3) \$2,524; (4) \$2,844; (5) \$3,784; terms 2% 30 days.

SEWERS AND SEWAGE DISPOSAL PLANTS

STOCKTON, San Joaquin Co., Cal.—Until March 23, 11 A. M., bids will be received by Eugene D. Graham, county clerk, to remove existing sewer and construct new sewer with connections along line of an existing sewer at the San Joaquin County Fair Grounds at Wilson Way and Charter Way in Stockton. Certified check 10% payable to Chairman of the Board of Supervisors required with bid. Plans obtainable from County Surveyor Julius Manthey.

OAKLAND, Cal.—City council declares intention to sewer portions of Hampton Road SW of Estates Drive, a certain path and sewer reserve in "Montclair Acres" Tract, involving:

- (1) 213 lin. ft. 8-in. pipe sewer;
- (2) 16 manholes;
- (3) 3 8-in. lampholes;
- (4) 7 12-in. lampholes;
- (5) 43 Y branches.

1911 Act. Hearing March 26. F. C. Merrill, city clerk. Walter H. Frickstad, city engineer.

OAKLAND, Cal.—City council contemplates bond issue of \$2,000,000 to relieve unemployed. Of this amount \$1,200,000 sewer bond issue for construction. Walter X. Frickstad is city engineer.

LOS ANGELES, Cal.—The Los Angeles city council has ordered the \$5,000,000 sewer bond issue placed on the May primary ballot.

PHOENIX, Ariz.—Plans for the proposed sewer improvements under the \$315,000 sewer bond issue are being checked by C. C. Kennedy, consulting engineer, Cal Bldg., San Francisco. The work will include a new disposal plant, laying of new sewer mains, etc.

SAN FRANCISCO.—Until March 25, 2:30 P. M., bids will be received by J. J. Heister, Secretary, Board of Public Works, to construct Section B of the Fifteenth Street Sewer, involving:

- (1) 622 lin. ft. 7-ft. circular reinforced concrete sewer;
- (2) 2756 lin. ft. 5-ft. 6-in. circular reinforced concrete sewer;
- (3) 631 lin. ft. 4-ft. 6-in. circular reinforced concrete sewer;
- (4) 145 lin. ft. 3-ft. x 4 ft. 6-in. sewer;
- (5) 68 lin. ft. 18-in. V.C.P. sewer;
- (6) 16 in. ft. 15-in. V.C.P. sewer;
- (7) 1 taper connection from 5-ft. 6-in. sewer to 7-ft. sewer;
- (8) 1 taper connection from 5-ft. 6-in. sewer to 6-ft. sewer;
- (9) 1 taper connection from 4-ft. 6-in. sewer to 5-ft. 6-in. sewer;
- (10) 1 taper connection from 3-ft. x 4 ft. 6-in. to 3-ft.x5-ft. sewer;
- (11) 1 diversion structure of reinforced concrete;
- (12) 21 manholes on reinforced concrete sewer;
- (13) 1 drop manhole on reinforced concrete sewer;
- (14) 1 manhole on V.C.P. sewer;
- (15) 2319 lin. ft. 6-in. V.C.P. under-drain covered with concrete or imbedded in broken rock;
- (16) 1660 lin. ft. 8-in. V.C.P. under-drain covered with concrete or imbedded in broken rock;
- (17) 550 lin. ft. 10-in. V.C.P. under-drain covered with concrete or imbedded in broken rock;
- (18) 270 lin. ft. 12-in. V.C.P. under-drain covered with concrete or imbedded in broken rock

Estimated cost, \$125,000. The sewer will extend from Fifteenth and Howard streets along 15th to Dolores and along Dolores to 14th street and along 14th St. to Market and Church Sts. Certified check 10% payable to Clerk of the Board of Supervisors required with bid. Plans obtainable from the Bureau of Engineering, 3rd Floor, City Hall, on deposit of \$10, returnable.

REDWOOD CITY, San Mateo Co., Cal.—Board of Supervisors has withdrawn the call for bids scheduled for opening March 16th to construct sewer system in Lomita Park, San Bruno, Capuchino and a portion of South San Francisco. The action was taken due to opposition of property owners who protested the Mattoon Act proceedings under which the project was to be financed. Details of this job were reported in issue of February 21.

MISCELLANEOUS CONSTRUCTION

SANTA ANA, Orange Co., Cal.—Oberg Bros., 3470 Hollenbeck Ave., Los Angeles, submitted low bid at \$197,900 to city council to construct grade separation structure under tracks of the Southern Pacific and Santa Fe railways at Fourth St.

ALAMEDA, Alameda Co., Cal.—City council has called a public meeting for March 20 to map action in support of its demand for a second traffic tube under the estuary in the event that the Goat Island bay bridge site is approved by the U. S. War Department.

WATER WORKS

FRESNO, Fresno Co., Cal.—Until March 20, 2 P. M., bids will be received by D. M. Barnwell, county clerk, to furnish and install pumps, pressure tanks and miscellaneous items for Fresno County Water Works District No. 1. Certified check 10% payable to "Fresno County for use and benefit of Fresno County Water Works District No. 1," required with bid. Specifications obtainable from Perry F. Brown, engineer, 512 Griffith-McKenzie Bldg., Fresno.

BURBANK, Los Angeles Co., Cal.—Until March 17, 7 P. M., bids will be received by city manager to furnish one horizontal high pressure centrifugal pump complete and one direct connected flexible type coupling, 440-volt, 36-cycle, 3-phase motor with starting compensator and overload and no voltage release relays. Bidders shall state (1) the cost of pump complete; (2) the cost of motor complete with starting compensator and relays. Specifications on file in office of city clerk.

OCEANSIDE, San Diego Co., Cal.—Until 7:30 P. M., March 25, bids will be received by the Oceanside city council for one 16-in. recording, mainline, or current water meter installed in a 16-in. riveted steel pump discharge pipe line. Certified check, 10%. John H. Landes, city clerk.

SACRAMENTO, Calif.—City votes bonds of \$480,000 to finance construction of a new sedimentation basin in connection with the municipal water system. Fred J. Klaus is city engineer.

Donovan & Son, 4031 Goodwin Ave., Santa Barbara, at \$41,800 submitted low bid to the county supervisors to grade and install culverts in Sections 2A and 2B, San Julian Road Project, Involving 100,000 cu. yds. excavation; 321 cu. yds. relief concrete; 882 ft. 8-in., 526 ft. 24-in., 104 ft. 38-in., 154 ft. 36-in., 386 ft. 48-in. and 46 ft. 42-in. corr. iron culverts. Complete list of bids follows:

- J. G. Donovan \$41,800
 - Vaught Bros. 43,622
 - Owl Truck Co. 43,932
 - Crook & Clark 43,996
 - Wm. H. West 46,992
 - G. C. Bailey 48,020
 - Finnell Co. 49,848
 - Dan Munro 49,983
 - Henry C. Dalassi 50,163
 - Steele Finley 51,518
 - Rudock-Griffiths Co. 51,733
 - Robinson-Roberts Co. 52,053
 - Lilly, Willard & Blasotti 53,066
 - Santa Maria Const. Co. 53,483
 - Cornwall Const. Co. 56,300
 - Gist & Bell 57,105
 - Sam Hunter 61,989
 - Western Motor Transfer Co. 62,032
 - R. L. Oakley 62,807
 - Macco Const. Co. 67,447
- Bids referred to Owen H. O'Neill, county surveyor, for report.

REDWOOD CITY, San Mateo Co., Cal.—County supervisors authorize survey of proposed extension of 19th Ave., San Mateo, as a link between the Bayshore Highway and a "quicker route" to the San Mateo-Hayward bridge and the Eastbay cities for southern San Mateo County. The project calls for the reconstruction of the concrete bridge across Seal Creek and for a road across Ewer's Island, which would bring southern county traffic to the bay bridge without using Third Ave., San Mateo.

- Proposition is for difference in types of plumbing:
- 1. E. Toothache, 1131 S. Sutter St., Stockton, \$1498; (1) \$1554.
 - H. E. Vickroy, Stockton, \$1515
 - (1) \$1347.
 - George R. Blatt, Stockton, \$1520
 - (1) \$1410.
 - John Hackman, Stockton, \$1570
 - (1) \$1390.
 - B. F. Parsons, Stockton, \$1636
 - (1) \$1421.

Bids held under advisement for one week.

MISCELLANEOUS SUPPLIES AND MATERIALS

SAN FRANCISCO—Until March 16, 2 P. M., under Proposal No. 701, bids will be received by Leonard S. Leavy, city purchasing agent, to furnish and deliver 12,000 feet of rubber water hose for the Park Commissioners. Specifications obtainable from above office.

OAKLAND, Cal. — Until March 18, 5:30 P. M., bids will be received by J. H. Kimball, Secretary, East Bay Municipal Utility District, 512 16th St., to furnish and deliver approximately 50,000 ft. 3-inch seamless copper tubing. Specifications obtainable from above.

SAN FRANCISCO—General Electric Supply Corp., at \$20.88 per 100 lbs. (allowance of \$20 each for reels), awarded contract by City Purchasing Agent, under Proposal No. 687, to furnish and deliver f. o. b. ear barn, 2600 Geary street, 4 miles of 3/8 round high strength copper alloy trolley wire, (approx. weight per mile, 2675 lbs.).

CHICO, Butte Co., Cal. — Until March 20, 8 P. M., bids will be received by H. H. Hume, city clerk, to furnish and deliver 50,000 gallons road oil. Certified check 10% required with bid. Specifications obtainable from clerk.

BERKELEY, Alameda Co., Calif.—Union Oil Co. awarded contract by city council to furnish and deliver approximately 158,000 gallons of gasoline during next fiscal year. Bid is 16c per gallon.

Unless there is definite assurance that the city of San Jose and the county of Santa Clara can retain control of the types of structures which may be added from time to time to a civic center, no civic center should be attempted, is the opinion of Ernest N. Curtis, San Jose architect, who has prepared a comprehensive scheme for such a project.

OFFICIAL PROPOSALS

STATE OF CALIFORNIA

DEPARTMENT OF PUBLIC WORKS
DIVISION OF HIGHWAYS

NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received at the office of the State Highway Engineer, Public Works Building, Sacramento, California, until 2 o'clock P. M. on April 1, 1931, at which time they will be publicly opened and read, for construction in accordance with the specifications therefor, to which special reference is made, of portions of State Highway, as follows:

Placer County, a bridge across Auburn Ravine about one-half mile west of Auburn (III-Pla-17-B), consisting of six 19'0" timber spans and one 40' 0" steel beam span on timber frame bents with concrete footings.

Santa Clara County, a reinforced concrete girder bridge across Carnadero Creek, about 1.7 miles south of Gilroy (IV-SCL-2-C), consisting of four 35-foot spans on concrete pile bents and concrete abutments, and approximately 0.35 mile of roadway approaches to be graded and paved with Portland cement concrete.

Santa Cruz County, between Watman Switch-back and Saratoga Gap (IV-CSS-42-A), a total of about six and five-tenths (6.5) miles in length, three and five-tenths (3.5) miles to be graded and surfaced with crusher run base and the entire length to be paved with bituminous macadam.

Santa Barbara County, between Wigmore and Los Alamos (V-S.B-2-C), about three and seven-tenths (3.7) miles in length, to be graded and paved with Portland cement concrete.

Merced County, a steel stringer overhead crossing over the tracks of The Atchison, Topeka and Santa Fe Railway about 2 1/2 miles east of Merced (VI-Mer-18-A), consisting of thirty-one 40'-0" spans with reinforced concrete deck on steel pile bents and steel frame bents on concrete footings with timber pile foundations and approaches to be graded and paved with Portland cement concrete.

San Diego County, at Bostonia (VII-S.D-12-C), about one and five-tenths (1.5) miles in length to be graded and paved with Portland cement concrete.

Proposals forms will be issued only to those Contractors who have furnished a verified statement of experience and financial condition in accordance with the provisions of Chapter 644, Statutes of 1929, and whose statements so furnished are satisfactory to the Department of Public Works. Bids will not be accepted from a Contractor to whom a proposal form has not been issued by the Department of Public Works.

Plans may be seen, and forms of proposal, bonds, contract and specifications may be obtained at the said office and they may be seen at the offices of the District Engineers at Los Angeles and San Francisco, and at the office of the District Engineer of the district in which the work is situated. The District Engineers' offices are located at Eureka, Redding, Sacramento, San Francisco, San Luis Obispo, Fresno, Los Angeles, San Bernardino and Bishop.

A representative from the district office will be available to accompany prospective bidders for an inspection of the work herein contemplated, and Contractors are urged to investigate the location, character and quantity of work to be done, with a representative of the Division of Highways. It is requested that arrangements for joint field inspection be made as far in advance as possible. Detailed information concerning the proposed work may be obtained from the district office.

No bid will be received unless it is made on a blank form furnished by the State Highway Engineer. The special attention of prospective bidders is called to the "Proposal Requirements and Conditions" annexed to the blank form of proposal, for full directions as to bidding, etc. The Department of Public Works reserves the right to reject any or all bids or to accept the bid deemed to be the best interests of the State.

DEPARTMENT OF PUBLIC WORKS
DIVISION OF HIGHWAYS.
C. H. PURCELL,
State Highway Engineer
Dated March 4, 1931.

ALAMEDA CITY MANAGER TO QUIT

Following closely on the heels of the election of Otto Leydecker and William F. Murray as members of the Alameda city council, Clifton E. Hickok, for ten years city manager in that city, announced yesterday he would tender his resignation next Tuesday.

Hickok has been opposed, it was said, by the minority members of the city council, William H. Henning and Emil M. Brodersen, the new members giving them majority control.

The resignation, Hickok said, will be effective April 1. He was appointed in 1921 following the resignation of Charles E. Hughes.

A "Pittsburg" Automatic Water Heater installed in the Home indicates high quality throughout.

Recommended and specified by all the leading architects, plumbers and builders.

Consider the high merit of the Pittsburg coupled with "Pittsburg Perfect Service."

"Hot water quick as a wink."

Pittsburg Water Heater Co.

Makers of "Pittsburg Automatic"—"Bungalow Automatic" Storage Systems and "Lyon" Tank Water Heaters.

Building and Engineering News will be sent to subscribers until ordered stopped and all orders to discontinue must be sent in writing to this office.

LIEN LAW CHANGE ENDORSED BY A.G.C.

Assembly Bill 1104, amending the California Mechanics' Lien Law, was officially endorsed at the regular monthly meeting of the Alameda County Chapter, Associated General Contractors of America, last week, following a report on the measure submitted by the Legislative Committee of the Chapter of which Thos. Furlong is chairman.

Some doubts as to passage of the bill were expressed as it is feared the building and loan companies, mortgage companies, banks, etc., are almost certain to oppose it owing to the provision that liens would come ahead of any mortgage unless a bond is filed.

The proposed amendments to the Contractors' License Law were all unanimously approved particularly AB 1867, which is now being pushed thru the State Legislature as rapidly as possible. It particularly covers the new fee of \$10 and provides for proper qualification of applicants before a license is issued. If this bill is passed promptly it will take effect before the time for issuing of the new licenses. The A. G. C. legislative representative, F. O. Booe, in Sacramento, reports the bill has now passed its second reading.

SB 26, providing for the highest prevailing scale of wages on all state and public work was reported as a wage standardizing measure much needed. The Labor and Industrial Relations Committee, through its chairman, H. J. Christensen, recommended its passage with certain changes in the wording along the lines originally proposed by the A. G. C. for the Davis-Bacon Bill, recently passed by Congress at Washington. The National bill also covered the question of wages on U. S. construction.

W. G. Thornally, chairman of the Credit Stabilization Committee, reported all but two of the East Bay material dealers had replied favorably on the proposition of not selling jobs with two mortgages. A favorable answer is expected from the other two. A definite credit setup with a proper clearing bureau is the aim of the committee. "Stop the losses and the profits will take care of themselves," is the slogan of the committee.

In closing the meeting President W. E. Lyons urged all the members to be prepared to take a fast trip to Sacramento on behalf of bills favorable to adverse measures.

The consumption of scrap iron and steel in the United States during 1929 was 36,263,591 tons, costing approximately half a billion dollars, it is announced by the census of manufacturers of the Department of Commerce today, in a special report prepared at the request of the Institute of Scrap Iron and Steel. The steel industry and other manufacturers used, in addition to this tonnage of scrap, in making steel products, 41,145,553 tons of pig iron costing approximately \$672,000,000.

CALAMITY HOWLER VISITS SACRAMENTO

Jens C. Petersen, Sacramento architect and engineer, acknowledges a burning sensation brought about by the constant visits to his office of individuals who aim to further the interests of the firm of Business D. Pression.

"Who burns me up?" asks Mr. Petersen. "The fellow who comes into my office just before lunch and says:"

"How's business. Well I'm glad to hear you say that because you're the only architect I've heard say that he had anything on the boards or ready for bids; I just came from Morgan's office and he hasn't got a thing to do, neither has Stacey or Higgins and they told me they intended to lay off some of their best draftsmen who have been with them for years. I just came in from Coddington and Spruceburg and there isn't anything doing in those two towns; I did have a chance to sell Mr. Promotor a car load of rat proofing for the Pabst Blue Ribbon building but I heard he took the job at cost just to keep his organization intact and I was afraid my house wouldn't take the order, he has always paid his accounts right on the dot, but during these times you never can tell what these optimistic fellows might do next so I didn't go near him. I understand none of the architects are even making any sketches or—"

"But just then," says Mr. Petersen, "my phone rang and I tried to answer it with a smile while Mr. Salesman looks at me in a dubious way as I said, 'Yes I'll be in at one o'clock.' And he says: 'You not interested in any of our line are you,' and I cheer up long enough to say 'no, not now' and go back to my drafting table to find there is no lead in my pencil."

Record Bond Premium On Hoover Dam Project

The largest surety bond premium in the history of the world—\$825,000—has been paid to twenty-two American companies by the Six Companies, Inc., San Francisco syndicate, which will build Hoover Dam.

The premium was paid for a \$5,000,000 "performance bond," posted by the Six Companies to guarantee completion of its contract.

The bond guarantees that the contract will be finished within a 6½-year period, under penalty of \$3,000 a day for delay; guarantees payment of all labor and material bills, and insures the Government against paying more than the \$48,899,000, which was the syndicate's bid.

Heading the list of the surety companies which wrote the \$5,000,000 bond are the National Surety Company and the Fidelity & Deposit Company.

HIGHWAY BRIDGE DESIGN COMPETITION CLOSES ON APRIL 1

Several hundred students of engineering and architecture in colleges throughout the United States and Canada are participating in a competition sponsored by the American Institute of Steel Construction for the aesthetic design of a highway bridge. The institute announces that the preliminary judging will be held on April 2, the jury consisting of a group of nationally known engineers and architects. On this jury are:

Dr. Ralph Modjeski, consulting engineer; Dr. Shortridge Hardesty, consulting engineer; H. H. Murdock, architect, of the firm of Jardine, Hill & Murdock; Clinton Mackenzie, architect, an officer of the Beaux-Arts Institute of design; F. E. Schmitt, editor of Engineering News-Record.

At the preliminary judgment on April 2 the ten best designs by engineering students and the ten best designs by architectural students will be selected. These will be asked to make a finished rendering of their design to be submitted in the final judgment on May 1. At that time the same jury will select the first, second and third best among the engineering and the same among the architectural students. The prizes are first, \$500; second, \$250; and third, \$100.

Preliminary designs can be submitted at any time up to April 1, addressing the American Institute of Steel Construction, 200 Madison Ave., New York.

MONEY AVAILABLE FOR CONSTRUCTION

Ziegler Investment Corporation, Ltd., of Los Angeles, announces that it now has available \$1,000,000 monthly as loans on new construction, including homes, duplexes, flats, apartments, stores, markets and other buildings. The following statement has been issued by the company:

"So satisfied are we and our sources of funds that materials have reached bottom that we have been able to obtain an interest reduction to 6 per cent from our sources of funds for second mortgage construction money.

"It is hard to conceive that owners of vacant property or of property which has outgrown its usefulness by reason of antiquated improvements will idly stand by instead of taking advantage of first, the present low interest rates. Secondly, the low construction costs, which in themselves should show a substantial increase in resources if it be nothing more than the natural increase in reproduction costs which are bound to come. And last, but not least, the fact that every new construction job means work for from one to one hundred men and women and with more of our populace employed, the return of normal conditions will be speeded up by just that much."

OREGON STATE PASSES PREQUALIFICATION MEASURE

Governor Meier of Oregon has signed the bill providing for prequalification of bidders on public works construction. The bill is similar to that in effect in California. The full text of the measure is published herewith:

For an act providing for the prequalification of bidders on public work, defining certain terms used therein, prescribing right and mode of appeal, providing for limiting public improvements to be awarded to a single bidder.

Be it enacted by the people of the State of Oregon:

Section 1. The word "person" as used in this act shall mean and include any and every individual, partnership, association, corporation or joint stock company, and any and every lessee, trustee or receiver appointed by any court whatsoever.

The word "public officer" shall include any and every public officer, commission, board, committee, department or other public representative of the State of Oregon or of any county, city, town, district or other public body charged by law with the duty of either receiving bids for or awarding contracts for the construction of any public improvements.

The term "public improvement" as used in this act shall mean an improvement upon any real estate belonging to or in any wise to be used by the state of Oregon or any county, city, town, district or other municipal subdivision of the state of Oregon.

The term "public contract" as used in this act means any contract for public improvements, proposals for the construction of which are required to be advertised for by law.

The term "form for bid proposals" as used in this act shall mean that printed, typewritten or written form which is officially sanctioned by the public officer for the submission of bids for a public improvement under public contract.

The term "prospective bidder" as used in this act shall mean any and every person who makes an application for any plans for any public improvements for the purpose of bidding on such work.

Wherever in this act the singular of any word, term or expression is used it shall be construed also to include equally where applicable to the plural thereof.

Section 2. For all contracts for public improvement, estimated at a total cost of \$10,000 or over, by the state or by any county, city, town, district, board or other public body, every public officer charged with the duty of receiving bids for and of awarding any public contract shall, before delivering any form for bid proposals pertaining thereto to any person, require such person to submit a full and complete statement sworn to before an officer authorized by law to administer oaths, of financial ability, equipment, experience in construction of public improvements, and of such other matters as such public officer may require for determination for the benefit of the public in the performance of any such contemplated public improvement; and such statement, with any subsequent amendments thereof, shall be in writing on a standard form of questionnaire as adopted for use by the public officer, to be furnished by such

public officer and shall be filed with such public officer not later than 10 days prior to the time set for opening bids, which statement shall not be disclosed except upon written order of such person or person furnishing the same, or an appropriate order of a court of competent jurisdiction. No bid shall be received from any person who has not submitted the sworn statement as above required; "provided, that any prospective bidder who has once qualified to the satisfaction of the public officer and who wishes to become a bidder on subsequent public improvements under the jurisdiction of the public officer to whose satisfaction the prospective bidder has qualified under the provisions of this act, need not separately qualify for each public contract for public improvement unless required so to do by the public officer."

Section 3. The public officer in charge of letting any public contract for any public improvement shall, at least eight days prior to the time set for opening bids, examine all said statements so submitted and shall make such investigation by personal interview with the prospective bidders or in such other manner as in the discretion of such public officer appears necessary, and shall at that time notify each such person submitting such statement, by registered mail at the address within this state designated by such person in such statement, whether or not such person is qualified for the public improvement required and whether or not a bid will be received from such person. Any disqualified prospective bidder may, within 24 hours after delivery of such notice at such address, notify such public officer in writing or by telegraph that such person desires to appeal from the findings of such public officer with respect to his disqualification. Immediately on receipt of such notice it shall be the duty of such public officer to notify the board of appeals hereby constituted and which shall consist of the state treasurer, secretary of state and state labor commissioner if the public work contemplated be state work; but of the public work be by a county, city, town, district or other municipality the appeal board shall consist of a circuit judge of the district, the county treasurer and the county sheriff of the county in which the public work is to be done. In cities with a population of over 100,000 an appeal from the decision of the public officer in connection with qualifications for bidding on improvements to be made by such city shall be referred to an appeal board not consisting of the city attorney, city auditor, and the city treasurer. It is hereby made the duty of the officials constituting such appeal boards to forthwith discharge the duties hereby imposed upon them.

The absence of any member of such appeal board shall not disqualify the other two members from passing upon the matters submitted to them. Such board of appeals shall forthwith, and at least three days prior to the day set for opening bids for such public improvement, hold a hearing on such appeal. Such appeal shall place at issue before such board anew the responsibility and qualifications of all persons who have filed such statements. At such hearing any prospective bidder who has filed a statement

shall be entitled to be heard and submit any additional information to such board upon the matters and subjects covered by such sworn statement. Thereafter such board shall review the matter of the responsibility of all disqualified prospective bidders who have filed statements, considering both the statements and the additional information given at such hearing, and shall prepare and certify to such public officer a list of those of the disqualified prospective bidders who are found qualified to perform the work by such board or a majority thereof, which determination shall be final.

Such board of appeals shall immediately notify all disqualified prospective bidders of the action of such board, by registered mail as aforesaid. Bids shall be received only from such persons as have been qualified by the public officer or by the appeal board; provided, that the provisions of this section shall not apply to prospective bidders who previously have qualified to the satisfaction of the public officer, under the provisions of this act; provided further, that should a prospective bidder apply for a bid proposal within five days prior to the time set for opening bids, such prospective bidder may be being furnished with a bid proposal blank, is required to qualify under the provisions of this act, to the satisfaction of the public officer, and in such case the decision of the public officer with respect to the qualifications of such prospective bidder shall be final.

Section 4. When any person shall be low bidder on two or more public contracts for the construction of any public improvements, none of which public contracts has been awarded, and such person, in the opinion of the public officer charged with the duty of awarding such contracts, is not qualified to undertake and to perform fully in a satisfactory manner the public improvements contemplated under all such public contracts bid upon by such person, such public officer may award to such person one or more of such contracts and may reject such persons bid or bids for the other public improvements for which such person was low bidder.

Section 5. The provisions of this act shall not apply to any work which may be deemed by the public officer as an emergency.

GENERAL PAINT REPORTS DEFICIT

General Paint Corporation's consolidated income statement, including subsidiaries, shows a loss of \$17,416 for the eleven months ended on November 30, 1920, President C. H. Jones reports.

Net sales aggregated \$4,969,909, a decline of 25.3 per cent, and loss from operations amounted to \$131,438 before charging depreciation and maintenance.

Net current assets were equal to \$19.33 per share for all "A" stock outstanding and total net assets amounted to \$46.55 per share for the "A" stock.

Total assets as of November 20, 1920, were \$4,534,991, of which \$2,269,835 were current, against \$753,477 per current liabilities, a current position of 3 to 1.

THE OBSERVER

What He Hears and Sees on His Rounds

Every stock holder in a banking or business enterprise, every man conducting a business, and every superintendent, foreman, and worker, in an industrial plant will find much of value to him personally in the Westinghouse Salute to Machinery Builders, to be broadcast Sunday, April 26, at 9:45 P. M. Central Standard Time (10:45 P. M. Eastern Standard Time) over a group of 25 radio stations associated with the National Broadcasting Company.

The theme of this program, which is sponsored by the Westinghouse Electric & Manufacturing Company, will be based on one of the fundamentals of American industrial supremacy—the great steps which have been made, and are being made, in the use of machinery.

The great speaker, Carl A. Johnson, President of the National Association of Tool Builders, will have a message of interest to all connected with industry. Mr. Johnson and the voice of Westinghouse will tell what machinery has contributed to the age in which we live, and how efficient and constantly-improved machinery is necessary to create and maintain American prosperity.

The Westinghouse Ensemble under the direction of Zuel Parenteau, will interpret the progress of the machine age in appropriate musical selections.

A county-wide move against further use of the Mattoon improvement act of 1925 was initiated at the last meeting of the San Mateo County Board of Supervisors when the matter of calling bids for construction of the \$126,000 South San Francisco-San Bruno-Lomita Park sewer system under the act, came up. Calling of bids was delayed until April 6 on the request of City Attorney Rudolph A. Rapsy of San Bruno, one of the attorneys of the district, who explained that a more complete report was being prepared to submit to bankers for consideration. Bankers of San Bruno and South San Francisco has stated that they would not loan money on property burdened with Mattoon act bonds.

After the school board of Dallas, Texas, rejected all thirteen bids on the new Robert E. Lee school because the contractors included estimating the fees of \$1,650 in their proposals, the Eckert-Burton Construction Co. on the second call for bids resubmitted its original low bid less the amount of the fee and was awarded the contract. The original low bid was \$107,732, the re-submitted figure was \$106,682 and the contract price was \$105,742, on an alternate \$340 less than base bid price. Of the original thirteen bidders, but three firms submitted proposals the second time. The second set of bids contained the specific clause that the bidder had entered into no estimating fee agreement.

The average skilled wage rate in construction is \$1.36 1/2 per hour, compared with \$1.37 1/2 for February and \$1.38 in March, 1930, according to Engineering News-Record. The average rate for common laborers is \$3.71c., compared with \$4.28c. in February and 56.1c. in March, 1930. Manufacturing skilled rate is 65.7c. and that of the unskilled 48.6c. per hour.

It is far from true that U. S. Steel's unfilled orders of nearly four million tons is a very small backlog, as some observers are inclined to believe, says the Wall Street Journal. Only in one month since February, 1926, has unfilled tonnage exceeded 4,500,000 tons, and that was in March of last year, when it reached 4,570,000 tons. Throughout 1925 and 1929, when new highs in production were being attained, unfilled tonnage ranged around 4,000,000.

City Council of Seattle will consider an ordinance to license contractors and sub-contractors at its March 23 meeting. It is provided in the proposed measure to require payment of a \$15 annual license fee to the city by contractors and sub-contractors who must give location of business and names of firm members. Proponents state the purpose of the bill is to protect building owners against "fly-by-night" contractors. Licenses may be revoked for infringement of regulations.

Senator Getchell's bill authorizing investigation of the financial standing of contractors taking over public works contracts made by the state engineer and making other changes in the law regulating such matters, has been passed by the Nevada State Assembly. Among its provisions is a section allowing the state engineer to make partial payment of contracts on the strength of preliminary progress reports at the end of each month.

Under the heading of "Progress" we report that the Monterey County Builders' Exchange seeks to promote good will in the construction industry and at the same time stimulate construction with a one full page advertisement each week in the Monterey Peninsula Herald.

The page features the usual business advertisements of exchange members and is centered with an editorial discussing reasons why one should "build," remodel or repair, NOW." Around the editorial are news items describing buildings in course of construction together with other items of interest to prospective builders.

That such advertising brings results, one may judge from the steady trend of the building business on the Monterey Peninsula. This applies particularly to homes, both of the modest and more expensive type.

A decree has been signed by President Vargas prohibiting, for three years, the importation of machinery for manufacturing purposes according to Associated Press dispatches from Rio De Janeiro, Brazil. The action was taken because of conditions of over production believed by the government to exist in textile and allied industries. The decree demanded that an inventory of all machinery in Brazil be completed within sixty days.

House painters of Brooklyn, N. Y., are much perturbed over a new employment extension plan.

Painters propose to use brushes 3 inches wide, instead of 6. The Boss Painters Association of Long Island protests declaring that the change would double the number of painters needed and asks the Supreme Court to enjoin the union from calling

strikes when boss painters refuse to permit it.

Union officials say the small bribe is incidental to the controversy at that the boss painters are not aided by a wage scale adopted some time ago.

The city council of Los Angeles last Thursday voted against skyscrapers. Fourteen to one it denied a request of the Central Labor Council to submit to voters at the May 6 municipal election an amendment to the ordinance which now restricts building to 150 feet in height.

Preliminary to the adoption of new building code, the city council of Stockton has passed to print an ordinance creating fire zones in that city. City Manager Walter B. Hogan, who recommended the action, said the National Board of Underwriters had declared the present building code antiquated and inadequate. Hogan stated the measure would affect new buildings primarily, but also repair. A proposed ordinance to regulate the installation of gas pipes and fixtures was referred to City Attorney J. LeRoy Johnson for legal check.

Basalt Rock Company of Napa has been authorized by the Sonoma County supervisors to locate a gravel plant on the Russian River near Healdsburg. The company will install a conveyor tramway to connect with the Northwestern Pacific Railroad. Construction and equipment will involve an expenditure of \$120,000, it is said.

The Calaveras Cement Company for the year ended December 31, 1930, reported profit from operations after full deductions for depreciation and depletion, of \$295,525. Interest and miscellaneous income of \$29,400 produced a gross profit for the year of \$325,140. Net profit, after all expenses, including provision for Federal income tax, amounted to \$31,200 equivalent to \$4.04 a share of preferred stock.

Santa Clara County's "Manual Procedure for the Subdivision of Land," prepared by the county planning commission is now ready for distribution. The manual was prepared by Hugh Pomeroy, assisted by Michael A. Antonacel, city planning commission engineer. It was based on theoretically ideal set of rules prepared for the commission last year by Antonacel. The booklet contains outline of procedure, time schedule for subdividers, copy of the subdivision ordinance, the state map act, checking forms and sample maps.

The California Engineers' Registration Association, formed several years ago to secure enactment of a registration law, has elected the following officers: President, Porter H. Albright; vice-president, F. E. Trask; secretary, William Hogeboom, all of Los Angeles. The association is giving its attention just now to legislative matters and is sending out letters to 5,000 registered civil engineers in the state informing them concerning pending amendments to the registrable law contained in Assembly bills 61 and 616. The latter has been reported favorably by the assembly judicial committee. Headquarters of the association are at 544 I. W. Helma Bldg., Los Angeles.

The Stockton Builders' Exchange is not sponsoring the Builders' and Betters Homes Show to be held in the city April 17 to the 21. It is announced by L. S. Pelcz, president of the exchange. The show, however, has received the endorsement of the Builders' Exchange.

TRADE LITERATURE

HERE—THERE
EVERYWHERE

TRADE NOTES

American Bitumuls Co., 200 Bush St., San Francisco, Calif., has issued a third of a series of bulletins on the use of its products in highway construction and reconstruction, entitled "Retread and Road-Mix with Bitumuls HRAI." Titles of the two bulletins previously issued are "Pavement Construction with Bitumuls H" and "Maintenance with Bitumuls H."

Bulletin 3012 of the General Excavator Co., Marion, Ohio, devotes twenty pages to explaining the characteristics of design features of the General Co. of power excavators.

In accordance with its annual census in the Ric-Wil Co., Union Trust Bldg., Cleveland, Ohio, has issued a rather tabulating steam and hot water metering rates in various cities of the United States for the season 1930-31.

Illustrated catalogs have been issued by the Bucyrus-Erie Co., South Milwaukee, Wis., on the model 43-B 13 cu. yd. shovel-dragline clamshell-lifting crane and the model 75-B 13 cu. yd. quarry, mining and general purpose shovel-dragline.

Brushing strengths, sizes and weights of cast-iron culvert pipe and instructions for designing installations are given in a 28-page illustrated booklet, "Highway Culverts," issued by the United States Pipe & Foundry Co., Burlington, N. J.

"Truscon," a graphic monthly devoted to construction, maintenance, and steel products which is sponsored by the Truscon Steel Co., Youngstown, Ohio, has made its first appearance in the form of a 16-page rotating picture devoted largely to a serial presentation of the company's products and the ways in which they are manufactured and used. Included are many items described are chain plates and Insulmesh, two of the company's more recent developments.

The Aluminum Company of America, Pittsburgh, Pa., has prepared a motion picture showing the blasting into place of the obelisk at the Chute-aux hydro-electric project in Canada. The film is of the standard 35 mm. size and requires from twelve to fifteen minutes to show. It will be loaned upon request.

Methods of using Flintkote asphalt emulsion in the construction of floors, roofs are discussed in considerable detail in recent publications issued by the Flintkote Co., Boston, Massachusetts.

Several major changes and a number of minor improvements and refinements in Wiley Whirlleys are described in a new catalog of the Dayton Whirley Co., Dayton, Ohio.

Design details of the new Case industrial tractors are described and illustrated in considerable detail in a large bulletin of the J. I. Case Co., Elmhurst, Wis.

The Troy Engine & Machine Co., Troy, N. Y., has published bulletins 602 and 603 covering, respectively, Engberg generators and steam engines.

Design data and details of construction of various types of roller bearings produced by the Orange Roller Bearing Co., Orange, N. J., are given in a revised catalog of that company.

Stating that never before in the history of the school district has the need for school improvements been more acute, the Board of Education of Los Angeles has issued an appeal to voters to approve the proposed \$12,720,000 in elementary and high school bonds at the polls on March 27.

A \$10,000,000 appropriation by the state of California to be used for the immediate relief of unemployment is demanded in a resolution presented at the 31st annual convention of the State Building Trades Council in Oakland.

Col. W. C. Bleckford has been re-elected president of the Seattle Construction Council. H. L. Nelson was elected vice-president and C. J. O'Shea, secretary, and W. C. Dennis, treasurer.

Despite active competition from 4 Eastern manufacturers, A. Leitz Co. of San Francisco has been awarded two contracts for engineers' transits and engineers' levels amounting to \$11,000. Chief of engineers ordered 29 transits at cost of \$4859, and Bureau of Roads ordered 29 levels at cost of

Carmel, Monterey County is considering the adoption of a building ordinance. It is proposed to adopt the Santa Barbara code, revising certain sections to meet local conditions.

The Pine Bluff, Arkansas, Carpenters' Union has voted to take a reduction in wages from \$1.00 to 80 cents per hour.

The Ventilating Contractors are trying to induce architects and others to stop the practice of letting ventilating contracts through the steam-heating contractors, says the bulletin of the National Ass'n of Building Trades Employers. They are willing to be subs of the general contractor but not of any other sub trade.

Pittsburgh employers have adopted the "Stagger Plan." Mechanics will work on alternate weeks, preference being given to the former employees.

Painters in Chicago have requested a three-day week on the rotation plan, in order to give each man a share of the work. At the end of every third day a new crew is to report for duty, according to the plan.

Electrical Workers Union No. 555, Oakland, have adopted measures for extending aid to their unemployed members through an assessment levied on the working membership which will provide one day's pay each week to all unemployed members.

The request of bridge and structural ironworkers in Utah for the 5-day week and wage increase of \$1 per day, to \$10 a day, has been denied by organized contractors.

Bricklayers in Kansas City have requested an increase of \$1.33 per day, to \$12.33, and a five-day week. The increase is sought at the expiration of the present contract with the Builders' Association.

Details of construction and operation of the new type B pulverizer are described in detail and illustrated in bulletin 5-80 of the Fuller Lehigh Co., Fullerton, Pa.

Lloyd Hisecock has opened quarters in the Masonic Block at Nevada City, Calif., and will carry a complete line of General Electric supplies. He will also engage in the electrical contracting business.

Weber Showcase and Fixture Company, Inc., has acquired the American Woodworking Corp. of San Francisco, and Rogers Cabinet Manufacturing Company of Seattle. Present managements in both cities will be retained and facilities expanded. From Los Angeles headquarters word came the Seattle plant would be called Weber-Rogers Company and the San Francisco plant the Weber American Co.

M. Friedman and Co., paint manufacturers and distributors, have moved the Sacramento quarters from 1227 J Street to 1222 J Street, with Leo L. Metzner as manager. The company also maintains stores in Oakland, Alameda, Berkeley and Fruitvale. The plant is located in Oakland.

East Bay Lacquer Chemical Co. is operating at 7804 East 14th St., Oakland, manufacturing high grade lacquers, lacquer thinners, paint removers and brush cleaners. A. L. and Dan Burkholder are the owners.

Melbourne C. Rountt of Fresno and Merle Bishop, recently in the lumber business in Watsonville and formerly of Fresno, have taken over the interests of the Rountt family in the Rountt Lumber Co. and the Standard Planing Mill at 2011 Tyler Street, Fresno. Rountt and Bishop, who was assistant manager of the firm for two years, announce they have put additional capital and assets into the company and will continue to operate the business which was established in Fresno nearly 20 years ago.

Frank Frane and Son, lumber dealers at Reedley, have sold their business to the Western Lumber Company and the Reedley Lumber Company. The sale included real estate holdings.

Raymond Concrete Pipe Co. plans to establish a branch office at Portland, Oregon. George H. Tulley, Pacific Northwest district manager for the company, was a recent visitor to Portland in connection with the matter. Tulley maintains offices at Seattle.

MacArthur Concrete Pipe Corp., New York City, has advanced Richard E. Talmadge, formerly secretary and general manager, to the post of vice-president and general manager. Irvin G. Morris has been elected treasurer. William M. Chadbourne and Morgan W. Jopling have been re-elected chairman of the board and president, respectively.

Two recent bulletins of the W. A. Riddell Co., Bucyrus, Ohio, illustrate and describe Warco wheel scoops and a new line of rear-control power graders for use with McCormick-Deering, Fordson, Case or Allis-Chalmers industrial tractors.

Southwest Gas Corp., Ltd., with headquarters in Los Angeles, capitalized for \$1,000,000, has been incorporated. Directors are Louis R. Lackey, Chas. F. and William V. Stearns, M. A. Thompson and M. O. Jackson.

ALONG THE LINE

J. I. Stannard, 61, chief engineer of the Utilities Department of the city of Tacoma, Washington, since 1922, and former assistant city engineer of Seattle, died in Glendale, Calif., last week.

Mr. Stannard was prominent in engineering circles and supervised the construction of Tacoma's \$3,000,000 hydro-electric plant at Lake Cushman and the new steam plant now being completed in that city. In 1907, Mr. Stannard was assistant city engineer of Seattle and in 1910 was consulting engineer for the City of Portland.

Alfred J. Cleary, consulting engineer, formerly connected with the city engineer's office and more recently engaged in private practice as an engineer, has been appointed executive secretary to Mayor Angelo Rossi. Cleary is a member of the American Society of Civil Engineers.

G. A. Graham, general contractor, president of the Lakeside Builders' Exchange, has been elected a member of the Lakeside Rotary Club.

Nielson Fruhauf, 72, retired contractor of Sacramento, died in Fresno last Monday at the home of his daughter, Mrs. Clara Evans. Fruhauf was a resident of the capital city more than thirty years.

SAN DIEGO TO ADOPT UNIFORM BUILDING CODE

The city council of San Diego has received the report of a special committee recommending adoption of the 1930 edition of the Uniform Building Code of the Pacific Coast Building Officials Conference, with some modifications. These provide that all architects, structural engineers and contractors operating in the city shall file their license numbers, dates, classifications and addresses with the building inspector, and no plans shall be received or permits issued to anyone who has not complied with the state license laws. A "registered inspector" shall also be employed by the owner on all reinforced concrete, steel frame or mull construction buildings, trusses over 25 ft. span, beams over 25 ft. span or towers more than 30 ft. high. Such inspection by an architect or structural engineer "who has served on building design or construction for at least five years and who has passed the examination of the Board of Examiners and Appeals." A state license shall not be accepted in lieu of this examination.

H. L. WAY HEADS COUNTY ENGINEERS

Howard L. Way of San Bernardino county was elected president of the California Association of County Engineers and Surveyors at the annual three-day convention of that body in Sacramento last week. The meeting was held in conjunction with the convention of the County Supervisors' Association.

Rodney Messner of Marin county was elected vice-president and Lloyd Bowman of Santa Cruz was elected secretary.

Discussion of technical engineering problems constituted the major business of the convention.

The next convention will be held in San Bernardino.

ENGINEERING SOCIETIES EMPLOYMENT SERVICE

Further information regarding positions listed in this column is obtainable from Newton D. Cook, Room 715, 37 Post Street, San Francisco. (Phone SUTTER 1684).

R-551-S. STRUCTURAL ENGINEER

Familiar with the building industry in Southern California and qualified to write and talk forcibly and intelligently on problems of building construction. Salary open. Apply by letter with references. Headquarters, San Francisco.

R-552-S. MECHANICAL ENGINEER

About 2 years out of college, preferably with some steam boiler experience. Work will be in connection with sales, manufacture and erection of steam boilers. Salary depends upon experience. Location, San Francisco.

R-553-S. WELDING ENGINEER

Must be thoroughly experienced welder with some technical education, to demonstrate welding methods and devise applications for manufacture of welding rods, etc. Salary open. Location, California.

R-554-S. SALES ENGINEER

Experienced, to sell outdoor sprinkler installations for large lawns, gardens, nurseries, etc. Must have car. Commission only. One man wanted for San Francisco territory and one for Northwest. Headquarters, San Francisco and Portland.

R-555-S. ENGINEER

Preferably mechanical or chemical graduate, with 5 to 10 years' experience, including considerable application of thermodynamics to solution of heat exchange problems as found in oil refinery equipment. Must have executive ability. Apply by letter with details of experience, references and photo. Salary \$200-250 per month to start. Location, Northern California.

W-197-C-S. MECHANICAL ENGINEER

Technical graduate, to design steam railway locomotives or railway cars. Experience of at least 5 years essential. One or two year contract, renewable. Salary open, but in paper ruled for living expenses, balance in United States money to American bank. Total salary subject to Russian income tax of about ten per cent. Applications only by letter which will be forwarded to Moscow for decision. Location, Russia.

W-218-M. MECHANICAL DESIGNER

Specialist on hot oil pumps for oil cracking plants. Must be technical graduate, familiar with both design and manufacture. Contract for 2 years, renewable. Other conditions similar to W-197-C-S above. Location, Russia.

McCLINTIC-MARSHALL APPOINTEES ANNOUNCED

Announcement of additional new appointees in McClintic-Marshall Corporation (subsidiary of Bethlehem Steel Corporation) is made from the offices at Bethlehem as follows:

H. R. Walters, Assistant President; John N. Marshall, Assistant to Vice President in charge of Operations; Jonathan Jones, Chief Engineer; C. H. Mercer, Consulting Engineer; and C. A. Johnson, Manager of Sales for Marshall and Sons.

Under the capacities which they hold with McClintic-Marshall under the previous regime.

Mr. Walters was formerly Manager of Fabrication and Erection Department of Bethlehem Steel. Mr. Mercer was Chief Engineer in that department, and Mr. Johnson was Manager of Sales of Fabricated Material.

BERKELEY PLANS TAX FOR SCHOOL

Berkeley citizens will be given opportunity to vote upon the "pass-you-go" plan of financing school improvements at the municipal election on May 5 as the result of action taken by the Board of Education, by a vote of four to one, the board voted to place the direct tax plan upon the voters, the specific proposition being to raise the district tax levy maximum from 30 to 60 cents per \$1 of assessed valuation. Dr. A. H. Howe, president of the board, called the dissenting vote.

Should the proposition be given favorable vote by the people, approximately \$220,000 additional would be available for the schools—based on the present assessed county valuation—which approximately \$17,000 might be used for new buildings. The fact that a slightly less amount than the total which would be raised by the new tax would be available for new buildings is because of the 40 per cent limit for capital outlays which governs the district levy.

OAKLAND PROPOSES GASOLINE TAX TO WIDEN CITY STREET

Whether the city council will endorse the plan of adding one cent to the gasoline tax for opening a widening city streets will depend on recommendation of Walter N. Erickson, city engineer, members of the city council decide.

The Lake Merritt Boosters' Club recommends that the cost of street openings be placed on motorists instead of on real estate by adding one cent on the gasoline tax for city streets.

Chas. Newman, president of the club says:

"It is estimated that Oakland needs \$27,000,000 for street openings and widening. Property must be used in widening and opening plans. It is fair to assess property owners who autoists are mainly benefitted. Being our estimate on the returns from the gasoline tax of last year, a cent additional tax will provide Oakland with \$515,000 annually."

The Telegraph Improvement Club has filed with the council a resolution requesting the council to place before the voters a proposition for \$1,000,000 bond issue to be used exclusively to acquire property for street openings.

CEMENT PLANTS SAFER THAN EVER

Continuing to set a safety example for American industries during 1935, Portland cement plants set still higher safety records when 43 plants completed the year without a lost-time accident. While total production of the industry was only 5% below that of 1929, the Portland Cement Association reports that accidents of all types decreased 28%. Of the total no-accident plants, 26 for the first time operated a calendar year without an accident.

Full credit for this achievement, given to a consistent safety campaign inaugurated in 1924 and continuing ever since.

E. C. Eaton, chief engineer of the Los Angeles County Flood Control District, has requested the county supervisors to apply to the legislature for aid to complete needed counter-flood control projects in Los Angeles. About \$4,500,000 is needed for this work. The appropriation ask is \$6,000,000.

CITIES OF THE FUTURE—COMMERCIAL BUILDINGS A BLOCK SQUARE—WON'T GO ANY HIGHER—L'S WILL REPLACE THE SUBWAYS

The city of the future will not be lined with towering shafts that touch the clouds nor will its streets be double and triple decked for coming traffic jams, nor will commuting airplanes land on office roofs, says Herbert H. Nelson, Executive Secretary of the National Association of Real Estate Boards.

Members of the real estate organization are engaged in laying out cities, handling present day skyscrapers, and building factories, as well as selling sites, and Mr. Nelson's predictions are based on trends he has noted in all these fields.

He draws a picture of the next century's cities in which commercial buildings are a block long, but not any higher than they are today, and in which noiseless elevated system will transport the crowds via air and sunshine routes instead of in "disagreeable" subways.

Saloon Gone, New The Lamp Post
There will be no lamp post, car tracks, or mail boxes in the city of the future. This city will be spectacular, but it will be clean, far cleaner than cities are today; and it will be quiet as a country town on a Sunday morning.

But the realty association secretary says this city is practical and embodies what his members think cities in the year 2000 will look like.

"The city of the future will not be lined with 75 story buildings as some people picture it," says Mr. Nelson. "One or two buildings of this height in a city are all right, because they do not interfere with all the other buildings, but if you pack blocks with 75 and 100 story buildings, erect them side by side, as some say will be done, nobody would get any air or light. The higher you go, and the more you build up a block with such high structures, the less air and light will be available.

"After all there is the human element that will be considered. For all the stunning pictures of vistas of 100 story buildings, I do not believe that tenants of the '2000's' will put up with dark and airless quarters, no matter how highly illuminating and ventilating systems are developed.

And Pictures Won't Put Them There
"You cannot go on indefinitely crowding people into a certain area of land. Intensity of use cannot be extended beyond a certain point. The farmer knows this. And already there is a tendency away from any increased intensive use of the land in cities.

"The Merchandise Mart in Chicago, planned by its designers for use for many years to come, is only 24 stories high. The General Motors building in Detroit rises only 15 stories; they don't seem very high when one thinks of 75 story structures. But both have had an eye to the future, are a block square.

"I think that big buildings of the future will be like the Chicago Merchandise Mart—a block square—so there will be many windows facing streets so tenants will have air and light on all sides. There probably will be many towers surmounting these buildings, and these towers will be further and further beautified. Thus, such structures will not necessarily be ugly; and I believe that in the time to come they will excite as favorable comment as the graceful skyscraper does today.

They Don't Come To Stay
"Cities of the future will handle their enormous vehicular traffic super-highways rather than by double or

triple decked streets. These through-highways will be built along the outskirts of cities to handle the thousands and thousands of motorists that even today pass through our towns, jam the traffic and drive on. Such people have no real desire to traverse the city, and routing them outside of it would please them because it would speed their trips.

"The double or triple-decked street is not practical for the same reason that numbers of 100 story buildings are not practical. There is a limit to the number of people who can be practically handled in a given area of land, and I cannot believe, and have never believed, that you can put swarms of people or vehicles on a first, second and third level and get them in and out of such a section efficiently.

Can't Hang Around The Corners Either

"A few strategically located double-deckers, but blocks and blocks of them—no. No matter how clever the illumination on the lower decks shopkeepers and others will not permanently want this space at good rentals.

"Grade separations, and longer, much longer, blocks will also help the traffic problems seventy years from now. The long blocks will cut down on street crossings, and will make life easier for the pedestrian, as well as decrease the traffic tangles that inevitably result where there are many corners.

"I believe that residential districts will be laid out in areas a quarter of a mile square. These areas will be surrounded by traffic arteries instead of being cut by such arteries as at present. There will be 'dead-end' streets within these areas leading to the homes and various buildings for pedestrian traffic, or for the delivery of goods to these homes, or for the vehicles of the residents. Such a plan will decrease the traffic that now rushes by every door, and will make the life of home owner quieter and easier.

Simplifying Street Widening

"Streets will be wider in the downtown areas, but such widening, in my opinion will not be accomplished through the present method of tearing down existing buildings. This is too costly—too costly. Future widening will be brought about by extending arcades under commercial and other buildings so that pedestrians will walk on new sidewalks created in this way. Of course, this will mean taking some space away from the first floor front of such buildings, but inasmuch as this will serve the shopping or business public, the downtown buildings will come to it, and will be glad to do it.

"Even though such measures will be undertaken, I do not believe that the traffic will be as much of a problem in the year 2000, as some people think. In proportion, fewer people will drive to the business centers in their private automobiles. The rapid transit facilities, with further economies in the cost of electricity, will be greatly extended. And such an extension and improvement will be in the elevated systems rather than in the subways.

Coming Up For Air

"No matter how successful they are, or how efficiently they handle the city's traveling masses, such systems are uncomfortable, filled with bad air, dark, and unpleasant. And people don't like them. At present they put up with them, but the further development of the 'L' lines will make

the public turn to this mode of transportation. These 'L's' will go underground in the very congested centers, but most of their length will be above ground in the air and light where travel is much more desirable. I believe such lines will be improved so they are noiseless and even improved in pattern and design so they will not be objectionable to the property owners on streets over which they run.

"These automobiles that do come down to the business centers will not be parked in the streets in the city of the future. Commercial buildings and even stores will provide for parking space within their buildings. The newest types of commercial buildings in San Francisco, Cincinnati and other places already show this trend in structures equipped with such garages.

"There is a tendency away from the grouping of public buildings, and the Court House, Post Office and City Hall of the future city no longer will be placed together to represent government, but will be set in the sections which they can best serve. Thus, the post office will be built near railroad terminals to expedite the handling of mails, and all other public structures will be located with thought to their functions.

"Recreational areas adjacent to, and within, the city will continue to increase in size because we are so thoroughly sold on the importance of having such space.

Something To Look Forward To

"In the cities the noise of the river-traffic will not be heard in the land because this nerve racking process will be replaced by methods now being perfected. Surface street cars that cause half of the present city's din will be gone with the horse and buggy. Electric transportation, sliding along on quiet rails, will handle the 1930 crowds.

"Street lights, that seldom add, and often detract from the present city's appearance, will have disappeared. Streets will be lighted by floodlights from various buildings and the effect will be more pleasing than it is today. There will be no telegraph and telephone poles in the outer regions.

"The future development of electrical power and the expansion of territories served by natural gas will make it possible for our cities in the future to be smokeless, and free from dirt and soot. Natural gas is being piped from St. Louis from the Louisiana and Texas fields. I believe that our future cities will use this fuel for factory and heating purposes, and that the consequent elimination of smoke and soot will make cities veritable garden spots, and that their buildings will gladden in far purer air than we have ever known.

There Wouldn't Be Room

"I do not think that even the next fifty years will bring advances in airplanes that will permit the wholesale landing of them on roofs a block long. Even if the planes should be so perfected that such landings and take-offs can be made on office building roofs, there never will be enough space for, say all the tenants of a building, to come down to work in their own airplane. Thus I do not have this at all in mind when I predict the advent of the block landing and take-off building, and as I said before, I look forward to increased beauty in commercial building towers, which can be, and probably will be, very high. All roofs will be used for garden and recreational purposes even in the congested areas.

"I think that when we look into the future we must keep a practical grasp on our imaginations, for although mighty changes take place in the space of fifty years, trends that are

apparent now will have some influence then.

"The city of the future may not seem beautiful to the artist who has conceived glittering skyscrapers hung with graceful airplanes. My city may not seem beautiful by the standards by which we judge civic beauty today. The people in 2000 will think this city is beautiful because it will so perfectly serve the life of the year 2000. Men and women can't live in rows of 100 story buildings to serve either own, or some artists' conception of metropolitan grandeur."

WORLD'S BUILDING PROGRAM 11 BILLIONS

An \$11,000,000,000 world building program is under way this year. It is expected to help overcome hard times and give employment to millions of persons.

The United States program accounts for about two-thirds of the sum being expended by the nations of the world, or about \$7,000,000,000.

These announcements are made by Hector Lazo of the foreign construction division of the Bureau of Foreign and Domestic Commerce.

Lazo admitted his figures are estimated. He says:

"No figures are available regarding the total world expenditures for construction nor the total number of workers that will be put to work as a result of these expenditures. It is reliably estimated, however, that road building alone will entail a world outlay of \$3,000,000,000 for 1931, of which two-thirds will be spent in the United States; building construction programs already approved in the various nations of the world aggregate over \$8,000,000,000, of which again, the United States will account for two-thirds or more."

MODERNIZE HOME— PAY IN 12 MONTHS

In co-operation with the Weatherbest Stained Shingle Co. of North Tonawanda, N. Y., the Great Lakes Commercial Corp. of Buffalo has developed a home modernization deferred payment plan for Weatherbest dealers, according to Business Week.

Under the plan, the dealer receives a check in full payment of the amount of the building contract, covering both materials and labor, as soon as the job is finished. The home owner pays Great Lakes Commercial direct in monthly installments. Financing rates are based on a charge of 9% for complete payment in 12 months with 2% added or deducted for each month over or under 12 in which payments are completed.

No mortgage secures the loan; it is made on a basis of character only. A special form of contract makes other materials dealers and subcontractors furnishing materials or labor co-indorsers with the Weatherbest dealer.

102-STORY BUILDING NEAR VIBRATIONLESS

Elaborate scientific tests, some of them made in the great wind storm of Sunday, March 8, show the 102-story Empire State Building in New York to be almost without vibration.

The tests are being made by Prof. Clayton D. Morris of Ohio State University and David C. Coyle, consulting engineer. Coyle was on the topmost platform of the tower during Sunday's storm. He said:

"In the worst wind we have had in years there was no vibration that was perceptible without instruments."

ONLY LICENSED ARCHITECTS, BUILDERS AND ENGINEERS MAY OBTAIN PERMITS IN LOS ANGELES UNDER NEW CITY ORDINANCE

A new ordinance (No. 68,989) requiring every person, firm or corporation engaged in the practice of architecture, civil engineering, structural engineering, or acting in the capacity of a contractor or subcontractor, to obtain or have a license from the state of California before any permits or license can be issued by the Department of Building and Safety, to any such person, firm or corporation, passed by the Los Angeles city council was approved by the mayor on February 20 and will become effective in 30 days from the date.

Following is the text of the ordinance:

Section 1. Architects' License Required. Whenever it shall come to the attention of the Board of Building and Safety Commission, or any representative thereof, that any person, firm or corporation is engaged in the practice of architecture, or is acting in the capacity of an architect, as such terms are defined in an act of the State of California, entitled, "An act to regulate the practice of architecture," approved March 23, 1901, as amended by Chapter 68 of the Statutes of 1929 of said State, it shall be the duty of said board or said representative to withhold the issuance of any permit or license required by any law enforced by the Department of Building and Safety, to any such person, firm or corporation, unless such person, firm or corporation holds a legal license to practice architecture, when and as required by said act.

Section 2. Engineers' License Required. Whenever it shall come to the attention of the Board of Building and Safety Commission, or any representative thereof, that any person, firm or corporation is engaged in the practice of civil engineering, or is acting in the capacity of civil engineer, as provided in an act of the State of California, entitled, "An act regulating the practice of civil engineering," approved June 14, 1925, Chapter 801 of Statutes of 1929 of said State, or is engaged in the practice of structural engineering, or acting in the capacity of structural engineer, as such terms are defined in an act of the State of California, entitled, "An act to regulate the practice of architecture," approved March 23, 1901, as amended by Chapter 68 of Statutes of 1929 of said State, it shall be the duty of said board or said representative to withhold the issuance of any permit or license, required by any law enforced

by the Department of Building and Safety, to any such person, firm or corporation, unless such person, firm or corporation holds a legal license to practice civil engineering, or structural engineering, when and as required by either or both of said acts.

Section 3. Contractors' License Required. Whenever it shall come to the attention of the Board of Building and Safety Commission, or any representative thereof, that any person, firm, or corporation is engaged in the business of contracting, or is acting in the capacity of a contractor or subcontractor, as such terms are defined in an act of the State of California, entitled, "An act providing for the registration of contractors, and defining the term contractor; et cetera," approved June 13, 1929, Chapter 791 of Statutes of 1929 of said State, it shall be the duty of said board or said representative to withhold the issuance of any permit or license, required by any law enforced by the Department of Buildings and Safety to any such person, firm or corporation, unless such person, firm or corporation holds a legal license to act as a contractor, when and as required by said act.

Section 4. Evidence of License Required. The Board of Building and Safety Commission, or any representative thereof, shall have the right and authority to question and examine any person, firm or corporation applying for any permit or license, required by any law enforced by the Department of Building and Safety, as to whether or not such person, firm or corporation is engaged in the practice of architecture, civil engineering, structural engineering and/or contracting or is acting in the capacity of architect, civil engineer, structural engineer and/or contractor, as provided in sections 1, 2 and 3 of this ordinance and may require satisfactory evidence to be submitted to establish that any person, firm or corporation is not engaged in any such practice and is not acting in any such capacity.

Before the issuance of any permit or license, required by any law enforced by the Department of Building and Safety, to any architect, civil engineer, structural engineer and/or contractor, the said Board or said representative may require such applicant thereof to exhibit the state license required by said state acts, or to furnish such information as may be necessary to establish legal possession of such state license.

STANDARD ELECTRIC STOVE BEING MARKETED BY ENGLISH MANUFACTURERS

A unique standardization project has been completed in England with the design of a standard electric stove which is being manufactured by a number of firms responsible for the production of more than nine-tenths of the electric stoves made in England. This project probably marks one of the most important attempts yet made to stimulate the use of a product by means of standardization.

In this stove, which is called the British Standard Cooker, there is provided, according to the announcement, a simple and reliable appliance of standardized construction to be sold at a relatively low price. An added factor which is expected to help popularize the electric cooking stove is the ease and low cost of replacing parts. The stove was designed by a joint committee representing the Incorporated Municipal Electrical Association and the British Electrical and Allied Manufacturers Association, which design and have agreed to the com-

promise requisite for mass-production of a commercial article.

In commenting on this new development, the Electrical Review of London states:

"Combined action by electrical manufacturers goes none too soon to meet the challenge of recent developments in gas cookers, also a result of the pooling of experience. In fact of the needs of the situation, the commercial advantages of the British Standard Cooker, in our opinion, easily outweigh the omission of technical points which individual manufacturers may, perhaps rightly, regard as superior in their own specialized designs."

Whatever may be thought about structural details, these do not strike us as the most significant aspect of the British Standard Cooker. The main point is that manufacturers of upwards of nine-tenths of the electric cookers made in Great Britain quite obviously differences of opinion on Allied Manufacturers Association.

ing and tile work.

BONDS

LCS BANOS, Merced Co., Cal.—Sec-

ond election will be called in the West

Side Union High School District to

vote bonds of \$175,000 to finance erec-

tion of a new high school plant, pre-

liminary plans for which have been

prepared by Architect W. D. Coates,

Jr., Fresno. An election held several

days ago was defeated by a vote of

419 in favor and 408 against, a two-

thirds majority being required to car-

ry the proposal.

MONTEREY, Monterey Co., Calif.—

City council will call an election

shortly to vote bonds of \$11,000 to fi-

nance construction of a new branch

library in the New Monterey District.

A site for the structure has already

been secured.

OAKLAND, Cal.—City council has

been petitioned by the Board of Li-

brary Directors to place on the Au-

gust ballot a proposal to issue bonds

of \$993,000 to finance the erection of

ten new branch library buildings and

purchase of necessary equipment. The

proposal has been taken under advis-

ement.

ONTARIO, San Bernardino Co., Cal.

—Ontario elementary school district

has been advised that, owing to a

legal technicality, the \$85,000 bond is-

ssue voted on February 24 is invalid

and will probably have to be resub-

mitted to the voters.

BERKELEY, Alameda Co., Calif.—

Board of Education will place on the

May 5 municipal election ballot, a

proposal to levy a direct tax of from

20 to 60 cents per 100 of assessed

valuation, to finance school improve-

ments, consisting of new schools and

additions and alterations to stand-

ing structures. Should the proposal be

considered favorably by the voters ap-

proximately \$250,000 additional would

be available for school construction—

based on the present assessed county

valuation—of which approximately

\$177,000 might be used for new build-

ings.

allowing segregate parts of the
combinations of the following:

1. General Work, embracing all
kinds of the construction other than
a. Plumbing, Heating, Ventilating
and Electrical.
b. Electrical Work.
c. Plumbing Work.
d. Heating and Ventilating Work.
e. Combined Plumbing, Heating
and Ventilating Work.

S. RAMENTO, Cal.—Howard K.
Brown, chairman of the Board of
Directors, announces steps will be
taken at an early meeting of the
board of supervisors to consider the
construction of a new county indigent
home. Nothing definite will be done
until construction, however, until
July 1, the beginning of the new
year. The county has \$20,000
available for the purchase of a site
for the proposed building. Johnson
proposes erection of the structure on the
existing system in order to distribute
the expenditure over a period of
years. The first unit would accommo-
date approximately 250 indigents.

HOTELS

Contract Awarded—Sub-Bids Being
Taken.
HOTEL Cost Approx. \$35,000
MCDEOST, Stanislaus Co., Cal. 9th
Street.

STEVENSON, Wash.—Columbia
River Power Co., Seattle, seeks per-
mit from the Federal
Power Commission to construct a \$20-
000,000 hydro-electric plant on the Co-
lumbia river near Stevenson. Plans
call for from four to six hydro units
of from 30,000 to 40,000 horsepower.

PASADENA, Calif.—Allis-Chalmers
Manufacturing Co., 1117 Rowan Bldg.,
Los Angeles and Milwaukee, submitted
low bid to city directors March 16
for the construction and installation
of steam turbine generator unit at the
power plant of the City of Pasadena.
State of California, at Glenarm St.
and Raymond Ave. Proposals were
taken as follows:

Item 1. One 25,000-kw. 16,500-volt,
3-phase, 50-cycle, steam turbine elec-
tric generator unit and appurtenances
to operate with steam at 400 lbs. per
square inch gauge pressure and 750
deg. F. total temperature at the throttle
and 28-in. Hg. vacuum (referred to
30-in. Hg. barometer) at the ex-
haust.

Item 2. Alternative to Item 1.

Part 1. One 25,000-kw. 11,000-volt,
3-phase, 50-cycle, steam turbine elec-
tric generator unit and appurtenances,
including 3 single phase auto trans-
formers with taps to raise the gener-
ator voltage to the substation high
line voltages of 16,500, 15,750 and 15,000.

Part 2. Alternative to Part 1 of
Item 2. Same as part 1 except one 3-
phase auto transformer is substituted
for the three single phase auto trans-
formers.

Item 3. One complete set of extra
blading for the spindle and for the
case together with the proper pack-
ing tools to be used on the said steam
turbine electric generator unit de-
scribed in Item 1 or Item 2.

In the list of bids which follows (a)
is cash and (b) is deferred payments.
The bids follow:

- ALLIS-CHALMERS CO. (1a) \$400,000;
(1b) \$403,000; (2) part 1, (a) \$423,100;
(b) \$426,250; part 2, (a) \$419,400; (b)
\$422,550; (3) (a) \$70,000; (b) \$50,325.
General Electric Co. (1a) \$403,500;
(1b) \$406,775; (2) part 1, (a) \$424,920;
(b) \$428,170; part 2, (a) \$427,260;
(b) \$429,460; (3) (a) \$73,000; (b) \$73,450.
Westinghouse Electric & Mfg. Co.,
(1a) \$403,750; (1b) \$406,200; (2) part
1, (a) \$427,000; (b) \$430,500; part (2)

(a) \$422,800; (1b) \$426,400; (3) (a) \$72,000; (b) \$72,600.

BUSINESS OPPORTUNITIES

Names and addresses of persons or firms concerned in the following opportunities will be furnished on request to Business Opportunity Department, Daily Pacific Builder, 547 Mission St., San Francisco or Phone Garfield 8741.

20926—Explosives. San Francisco. Association inquires for list of firms interested in importation of explosives for mining purposes.

209266—Bentwood Furniture. San Francisco. Manufacturers of bentwood furniture at Pecky, Czechoslovakia, are looking for a local market.

Jacob Klee, president, American Fluoresite Co., 27 East Water Street, Cincinnati, O., is interested in forming a connection with an individual of firm in this city to handle Duromit—a water-proofing, acid proofing and densifying admixture for concrete. Party should have knowledge of concrete and how to lay floors, and also be able to give estimates on jobs.

L. Schuller, 204 Roberts Bunker Bldg., El Paso, Texas, wishes to secure a few good lines for distribution in Arizona, West Texas and New Mexico.

B. J. McKay, McKay-Bensing Co., Lewiston Hotel, Denver, Colo., desires to get in touch with manufacturers that are desirous of obtaining the services of experienced salesmen to represent them exclusively in the intermediate states.

E. S. McGorvey, 516 Arrott Bldg., Pittsburgh, Pa., is interested in securing a man with a moderate amount of capital and ability to take over the State rights for the distribution of Nu-Life Enamel.

Empire Metal Cap Co., 254 36th St., Bush Terminal Bldg., Brooklyn, New York, wants a representative in this district for line of metal caps for glass containers.

Kline Vacuum Cleaner Co. (attention E. M. Kline), 621 Johnson Ave., Cleveland, Ohio, rebuilders of vacuum cleaners, desires to secure representatives in this district.

ELECTRIC WELDING CHEAPER THAN RIVETS

Following several years of experience in "noiseless" steel construction by electric welding the Austin Company of Cleveland, Ohio, engineers and builders, announce that for the first time in building history their cost of this type of construction is now below that of the older riveted type.

Increasing demand for noiseless building has stimulated research as well as the volume of such building with the result that costs have been brought sharply lower, the company's announcement says. This reduction, it is declared, will establish a further reduction in building costs, already at the lowest level in a decade.

STOCKTON BUILDERS PLAN HOMES EXHIBIT

A Better Homes Show will be held in the Civic Memorial Auditorium at Stockton April 17 to 21, it is announced by Morris Miller and Carl Armstrong of the Stockton Realty Board.

The show, which will be held during the week preceding Better Homes Week, will be an open-air affair and its purpose will be to promote home construction and improvement in Stockton.

There will be space in the auditorium for 120 exhibits. Educational displays will be an added feature and lectures on home building and home economics.

Endorsement was given the show and co-operation was voted by the Realtors, the Architects' Association and Stockton Builders' Exchange.

The committee in charge of arrangements consists of L. S. Peletz, president of the Builders' Exchange, chairman; John M. Pencelly, vice-president, and W. E. O'Keefe, past president of the Builders' Exchange; J. U. Cloudsley, president of the Architects' Association; W. H. Hobin and N. M. Parsons of the Realty Board.

ENGINEERING AWARDS SLACKEN IN FEBRUARY

Awards of engineering construction contracts in February were at the rate of 45 million dollars per week, compared with 47 in January and 49 millions in February, 1930, according to Engineering News-Record. For the first two months of the year, the weekly rate has been as follows: 1931, 46 millions; 1930, 48 millions; and 1929, 55 millions.

Comparison with the January weekly rate shows a gain in building—24 per cent in industrial and 5 per cent in buildings other than industrial. Sectionally, there were substantial gains in the South and throughout the entire West, while New England and the Middle Atlantic states sustained decreases.

As compared with the same month last year, February showed a gain of 7 per cent in public works. Sectionally the same situation existed in the comparison with January. In the chief classifications, advances in percentages were as follows: federal government, 82; streets and roads, 27; public buildings, 20; water-works, 10. Declines were as follows: Bridges, 13; commercial buildings, 10; sewers, 30; industrial buildings, 13; excavating, 8.

Strict regulations to guard gasoline and oil tank trucks from fire are contained in an ordinance proposed to the Board of Supervisors by Frank P. Kelly, San Francisco fire marshal. Operations would be required to secure permits from the marshal. This is the only city without such an ordinance, according to Kelly.

Last month Chicago voted bonds of \$51,600,000, of which \$25,000,000 is to finance the widening of North State Street to permit construction of a sewer, \$30,000,000 for sewers and sewage works; \$12,100,000 for boulevards, a viaduct and shore protection and park improvements, and \$3,000,000 for park extension and development.

Directors of the Santa Cruz Portland Cement Company on last Tuesday declared the regular quarterly dividend of \$1 per share, payable April 1 to stockholders of record March 21.

Engineering News Section

BRIDGES

SANTA BARBARA, Cal.—Until 10 A. M., April 6, bids will be received by the Santa Barbara county supervisors for the construction of a reinforced concrete bridge over the San Antonio Creek, in the Third Road District; estimated cost, \$5200. Plans obtainable from Owner, H. O'Neill, county engineer.

STOCKTON, San Joaquin Co., Cal.—Until March 30, 11 A. M., bids will be received by Eugene D. Graham, county clerk, to construct culvert at Woodbridge Irrigation District's canal and Hartley Lane in Road District No. 2. Certified check 10% payable to Chairman of the Board of Supervisors required with bid. Plans obtainable from Julius Manthey, county surveyor.

SAN FRANCISCO.—Healy-Tibbitts Const. Co., 64 Pine St., at \$52,000 awarded contract by Golden Gate Bridge and Highway District, Alexander Bldg., for additional borings in connection with the \$35,000,000 Golden Gate Bridge on the San Francisco side to determine the location of piers.

BAKERSFIELD, Kern Co., Calif.—Until March 30, 11 A. M., bids will be received by F. E. Smith, county clerk, to construct timber bridge on the Bakersfield-Glennville Highway over Poso Creek, involving:

- (a) 115 cu. yds. excavation;
- (b) 30,756 ft. timber, board measure, including all incidentals.

Certified check 10% payable to the Chairman of the Board of Supervisors required with bid. Plans obtainable from County Surveyor J. R. Thornton.

SAN LUIS OBISPO COUNTY, Cal.—Wm. Lane, San Luis Obispo, at \$1,247 submitted low bid to District Engineer, State Highway Commission, San Luis Obispo, to repair bridge across the Estrella River about 12 miles east of Paso Robles, consisting of one 154-ft. through steel truss span.

ORANGE COUNTY, Cal.—State Highway Commission has filed application with the War Department seeking approval of plans for proposed trestle highway bridge across the northerly arm of Newport Bay, about 700 feet southerly of the existing state highway bridge; the proposed bridge to have a removable steel span affording 40 feet clear width of channel and clear height of 18 feet at mean lower low water and 12.9 feet at mean high water; the over all width of the bridge to be 50 feet.

VENTURA, Ventura Co., Cal.—Until 10 A. M., April 7, bids will be received by the Ventura County Supervisors to construct four timber bridges with necessary earth fill approaches and bank protection work on the Grimes Canyon Road, involving:

- (1) 26 75 M. ft. B. M. structural redwood;
- (2) 26 75 M. ft. B. M. structural Oregon pine;
- (3) 1.7 M. ft. B. M. surfaced Oregon pine;
- (4) 0.5 M. ft. B. M. surfaced redwood;
- (5) 3000 lbs. reinf. steel;
- (6) 15,000 cu. yds. earthwork embankment;
- (7) 55 ft. 18-in. culvert pipe;

- (8) 1700 lin. ft. bank protection;
 - (9) 28.5 cu. yds. paving concrete.
- C. W. Pettit, county surveyor. L. E. Hallows, county clerk

EL CERRITO, Contra Costa Co., Cal.—Until March 30, 8 P. M., bids will be received by city trustees to construct concrete pipe culvert in Liberty St., bet. Schmidt and Pink Lanes. Estimated cost \$468. Plans obtainable from H. D. Chapman, city engineer.

SAN MATEO, San Mateo Co., Cal.—Roy Lind, 54 Stanton St., San Francisco, at \$570 awarded contract by city council to construct concrete pipe culvert including excavation and back fill in Twenty-eighth avenue, approximately 1000 ft. west of El Camino Real. Following is a complete list of bids received:

Roy Lind	\$570
J. T. Lawlor	634
H. E. Connor	673
Sam Soto Jr.	704

OAKLAND, Calif.—County Surveyor Geo. A. Posey preparing plans for a bridge over San Leandro Creek in Park Street, formerly Estudillo Ave., in San Leandro. Estimated cost \$30,000.

REDWOOD CITY, San Mateo Co., Cal.—See "Streets and Highways," in this issue. City contemplates extension of Main Street over Redwood Creek to connect with Bayshore Highway, including construction of bridge.

OAKLAND, Cal.—Until April 7, 10:30 A. M., bids will be received by Geo. E. Gross, county clerk, to construct a reinforced concrete multiple box culvert on the Alvarado-Centerville Rd.; estimated cost \$8,800. Plans on file in office of clerk. Geo. A. Posey, county surveyor.

NAPA, Napa Co., Cal.—J. P. Lawler, 372 7th Ave., San Francisco, at \$15,243, submitted the low bid to the directors of Joint Highway District No. 7, to construct a steel and concrete bridge on the Healdsburg-Calistoga Highway, 10 miles east of Healdsburg. Project involves:

- (1) 463 cu. yds. class A concrete;
- (2) 15 cu. yds. class E concrete;
- (3) 84,700 lbs. reinforcing steel;
- (4) 300 cu. yds. structure excav.
- (5) 7000 cu. yds. roadway excav.
- (6) remove old bridge.

Following is a complete list of the bids received, all being taken under advisement until March 23:

J. P. Lawler, San Francisco	\$15,243
Whited & Whited, Santa Rosa	15,324
A. T. Howe, Santa Rosa	16,924
W. C. Colley, Berkeley	17,383
W. L. Proctor, Santa Rosa	17,177
C. A. Bruce & Son, Pleasanton	18,269
Petaluma Constr. Co.	16,505
W. P. Hauser, Oakland	19,514
R. Press Smith, Santa Rosa	16,328
Harry Thorsen, St. Helena	15,851
J. W. Kristich, Knightsen	18,245
Hudson & Branagh, Oakland	19,884
M. A. Jenkins, Sacramento	16,210
F. J. Main, Fairfax	19,858
T. O'Brien, San Francisco	18,033
Thermotte Constr. Inc.	15,394
Frank Bryant, San Francisco	15,899
Peter McHugh, San Francisco	18,495

SAN BERNARDINO COUNTY, Cal.—Following bids received March 18 by State Highway Commission to construct bridge over Lytle Creek about 2 miles west of San Bernardino, consisting of five 35-ft. steel stringer spans with concrete deck on steel pile bents:

Robinson Roberts Co., L. A.	\$33,313
Byerts & Dunne, L. A.	33,665
Cberg Bros., L. A.	35,509
W. H. McCune, Monrovia	41,463

Bids held under advisement.

DREDGING, HARBOR WORKS & EXCAVATIONS

MONTEREY, Monterey Co., Cal.—City council contemplates bond issue for \$32,000 for breakwater shore connections and necessary rights-of-way.

MARYSVILLE, Yuba Co., Cal.—R. P. Easley, Antioch, at \$1175 cu. yd., submitted low bid under Circular Proposal No. 31-229, Specifications No. 3085, to U. S. Engineer Office, Sacramento, for raising and enlarging of an existing levee along the Sacramento Northern Railway, near the Feather River, approximately 1 mile southerly and downstream from the town of Marysville, involving 11,000 cu. yds. Complete list of bids, all taken under advisement, follows:

R. P. Easley, Antioch	\$1175
Hestreet & Bell, Marysville	12
Miles J. Treaster, Sacramento	14

STOCKTON, San Joaquin Co., Cal.—Until March 27, 3 P. M., under Circular Proposal No. 31-265, Specifications No. 3081, bids will be received by U. S. Engineer Office, California Fruit Bldg., Sacramento, for excavating approximately 216,000 cu. yds. of material and constructing spoil retaining levees on Venice and Mandeville Islands, in the San Joaquin river delta, about 16 miles northwest of Stockton. Specifications obtainable from above office.

SACRAMENTO, Cal.—Until March 27, 3 p. m., under Circular Proposal No. 31-266, Specifications 3025, bids will be received by U. S. Engineer Office, California Fruit Bldg., for raising the existing levee along the easterly side of Yolo By-Pass in Reclamation District No. 785, involving 180,000 cubic yards. Specifications obtainable from above office.

STOCKTON, San Joaquin Co., Cal.—Following awards of contract made by U. S. Engineer Office, Sacramento, in connection with dredging of approximately 4,200,000 cu. yds. of material in the Stockton 26-ft. channel prism, from the mouth of Mormon Channel in the City of Stockton to the mouth of Burns Cut-Off, in the San Joaquin river:

Hydraulic Dredging Co., Central Bank Bldg., Oakland, at 16 cu. yd. for Part 1, involving dredging of the turning basin and of part of the channel, with removal of approximately 2,232,000 cu. yds. of material.

San Francisco Bridge Co., Nevada Bank Bldg., San Francisco, at 16 cu. yd. for Part 2, involving dredging from the western end of Part No. 1 to a point approximately three and a half miles from Stockton. In this approximately 1,768,000 yards of material will be moved.

Complete list of unit bids received

on this work published in issue of February 17.

MONTREY, Monterey Co., Cal.—Bids will be asked in the immediate future by the U. S. Army Engineers to construct the \$500,000 breakwater in Monterey Harbor. A fund of \$200,000 has been appropriated by Congress for the first year's work. This money is now available and will be used to finance that portion of the work for which bids are to be asked.

IRRIGATION PROJECTS

TURLOCK, Stanislaus Co., Calif.—Until April 6, 2:30 P. M., bids will be received by Anna Sorensen, secretary, Turlock Irrigation District, for improvements in District No. 65, involving:

Schedule No. 1

12,300 sq. ft. 2-in. concrete canal lining.

Schedule No. 2

6 concrete structures, involving 8.0 cu. yds. concrete.

Certified check or cashier's check 10% payable to district required with bid. Specifications obtainable from secretary.

TURLOCK, Stanislaus Co., Calif.—Until April 6, 3 P. M., bids will be received by Anna Sorensen, secretary, Turlock Irrigation District, for improvement in District No. 72, involving:

Schedule No. 1

29,400 sq. ft. 2-in. concrete canal lining.

Schedule No. 2

9 concrete structures, involving 10.55 cu. yds. concrete.

This work will be paid for in cash by property owners. Certified or cashier's check 10% payable to district required with bid. Plans on file in office of secretary.

TURLOCK, Stanislaus Co., Calif.—Until April 6, 3:30 p. m., bids will be received by Anna Sorensen, secretary, Turlock Irrigation District, for improvement in District No. 77, involving 705 lin. ft. 30-in. dia. concrete pipe.

Certified check or cashier's check, 10% payable to district required with bid. Plans on file in office of secretary.

TURLOCK, Stanislaus Co., Calif.—Until April 6, 2 P. M., bids will be received by Anna Sorensen, secretary, Turlock Irrigation District, for improvements in District No. 70, involving:

Schedule No. 1

14,490 sq. ft. 2-inch concrete canal lining.

Schedule No. 2

1 concrete structure, involving 1.4 cu. yds. concrete.

Schedule No. 3

5 concrete structures, involving 5.16 cu. yds. concrete.

Cash payment will be made for this work by property owners. Certified check or cashier's check 10% payable to district required with bid. Plans on file in office of secretary.

MACHINERY AND EQUIPMENT

SAN FRANCISCO.—Fred Roeken, superintendent of the Municipal Railway System, has recommended to the Board of Public Works the purchase of the new 26-passenger bus for service on Monterey Blvd. One bus to replace a vehicle now in use and the other to afford better service.

SAN FRANCISCO.—H. C. Thompson, 135 Dolores St., at \$329.40 awarded contract by State Harbor Commis-

sion for repairing Derrick A. Following is a complete list of bids:

H. C. Thompson	\$ 229
Brue & Son	815
Crowley Launch Co.	848
General Eng. Drydock Co.	1,083
		24

MODESTO, Stanislaus Co., Cal.—City Engineer Frank Rossi will seek funds in bridge to finance purchase of a high tower tree spray machine; estimated cost from \$1000 to \$1500.

IMPERIAL, Imperial Co., Cal.—Until 7:30 P. M., April 8, bids will be received by the Imperial City Council for one 12-ton or 2-ton truck, 4 or 6 cylinder, 130 to 160 inch wheelbase, new, with usual factory guarantee. H. A. Conger, city clerk.

HEALDSBURG, Sonoma Co., Cal.—Basalt Rock Co., Napa, authorized by the county supervisors to establish a gravel plant on the Russian river near Healdsburg. Company will construct an aerial tramway over Bailhache avenue, connecting the gravel bar with the Northwestern Pacific R. R., right-of-way. Approximately \$120,000 will be spent in construction and equipment.

SACRAMENTO, Cal.—Until March 23, 10 A. M., under Requisition No. 5574, bids will be received by State Bureau of Purchases, Sacramento, to furnish and deliver Williams, Colusa County, one 14-yard straight Diesel engine driven heavy duty power shovel with a working weight of approximately 30,000 lbs. Specifications and additional bidding data are on file in the office of Daily Pacific Builder and may be inspected by those interested.

SANTA CLARA, Santa Clara Co., Cal.—Until April 6, 8 P. M., bids will be received by A. J. Cronin, city clerk to furnish and deliver a motor driven street sweeper.

RAILROADS

SAN FRANCISCO.—Application has been filed with the Board of Supervisors by the Market Street Railway Co., 58 Sutter St., to extend the Turk Street line into the Richmond district for a distance of about 3 miles at a cost of \$400,000. The line would be extended from Turk and Divisadero Sts. to Balboa St., thence to a point midway between 20th and 31st Aves.

BOULDER CITY, Nev.—Construction of about 27 miles of standard gauge railway as part of the contractor's plant and equipment at the site of the dam will be started at once by Six Companies, Inc., Financial Center Bldg., San Francisco, according to an announcement March 11 by Felix Kahn, treasurer.

FIRE EQUIPMENT

SAN FRANCISCO.—Hercules Equipment & Rubber Co., 11 Mission St., at \$112 per foot submitted lowest bid to city purchasing agent to furnish and deliver 12,000 feet of rubber water hose for the Park Commissioners. Following is a complete list of the bids:

Hercules Equip. & Rubber Co.	\$112
Pacific Goodrich Rubber Co.	115
Pioneer Rubber Mill	123
Dunham, Kerrigan & Hayden	1355
Marshall, Newell Supply Co.	116
U. S. Rubber Co.	123
Goodyear Rubber Co.	115
Quaker City Rubber Co.	115
American Rubber Mfg. Co.	18
A. J. Gleasner	2175

Bids held under advisement.

LOS GATOS, Santa Clara Co., Cal.—Town trustees have authorized the

purchase of 250 ft. of hose for fire department from the Pioneer Rubber Mills, Pittsburg, Calif., at 91 1/2c ft.

COALINGA, Fresno Co., Cal.—Fire Chief Aaron Baker authorized by city council to purchase 100-ft. of 1 1/2-in. fire hose and two auxiliary nozzles.

RESERVOIRS AND DAMS

KENO, Oregon.—California-Oregon Power Co., Portland, will commence construction shortly on a regulating dam on the Klamath River at Keno. The dam will be located about 800 ft. below the highway bridge at Keno and will cost \$100,000; will be about 8-ft. high and 12,000 ft. long, including the earth embankments on each side. Will be needle type, consisting of timber cribs with continuous fill and concrete earth fill.

PLACERVILLE, El Dorado Co., Cal.—Construction halted on Webster Creek Dam project for El Dorado County Irrigation District. See article on page one of this issue.

HAWTHORNE, Nev.—In addition to those previously reported, following are prospective bidders to construct concrete dam in connection with Naval Ammunition Plant at Hawthorne, under Specification No. 6165, bids to be opened by the Bureau of Yards & Docks, Navy Department, Washington, D. C., March 25:

Gist and Bell, Arcadia, Calif.	
Ryberg Bros., 206 Electric Railway Bldg., Salt Lake City, Utah.	
Eates and Rogers Const. Co., 111 W. Washington St., Chicago, Ill.	
Raymond Concrete Pipe Co., Washington, D. C.	

PANAMA CANAL ZONE.—The general purchasing officer, the Panama Canal, Washington, will bid applications for bids about July 1, 1931, for the construction of Madden Dam and auxiliary works, which are located on the Chagres River, in the Canal Zone. A preliminary announcement containing a brief description of the principal features of the work, a tentative schedule of items and five drawings typical of the work contemplated are available for distribution to prospective bidders. The announcement is issued at this time in order to provide ample time for the inspection of the site and investigation of local conditions. The project includes a straight gravity dam, a hydro-electric power plant and a number of earth, gravel and rockfill embankments. The gravity dam will be about 250 feet high, 1,200 feet long and will contain about 531,000 cubic yards of concrete. The spillway is located in the gravity section of the dam and is regulated by four structural steel drum gates, each 100 feet long by 18 feet high. Six sluice openings 5 feet 8 inches wide by 10 feet high are located at river level in the spillway section under the drum gates. The hydro-electric power plant consists of three units. The superstructure and superstructure will be constructed by the contractor, but the generating equipment will be installed by the government forces. Two 84-in. needle valve outlets will be located in the power house. The fourteen embankments are all comparatively low saddle dams or dykes and contain an aggregate volume of 348,000 cu. yds. of earth, gravel and rockfill. Copies of the announcement may be obtained from the general purchasing officer, the Panama Canal, Washington, D. C.

PIPE LINES, WELLS, ETC.

KETTLEMAN HILLS, Fresno Co., Calif.—Western Pipe & Steel Co. of California, 444 Market St., San Francisco, at approx. \$1,500,000 awarded contract by Southern Fuel Co. to furnish steel pipe in connection with na-

tural gas pipe line from Kettleman Hills to Long Beach, a distance of approximately 210 miles. Pipe will be electric welded 26-in. diameter.

ALTURAS, Modoc Co., Cal.—Until March 25, 6 P. M., bids will be received by R. E. Henderson, clerk, Davis Creek Public Cemetery District, to drill and case a 6-inch water well. District has \$800 available for this work. Further information obtainable from clerk of district.

FRESNO, Fresno Co., Calif.—M. C. Cowan, Sanger, at \$866.57 awarded contract by Fresno County Water Works District No. 1, for drilling and casing two wells. Perry F. Brown engineer for district, 512 Griffith-McKenzie Bldg., Fresno.

CAKLAND, Cal.—Until March 25, 8 P. M., bids will be received by John H. Kimball, secretary, East Bay Municipal Utility District, 512 Sixteenth St., to furnish and deliver 22,000 lin. ft. of ¼-inch thickness 30-inch diameter electric welded steel steep pipe for distribution system. Specifications obtainable from Room 35 at 512 16th Street.

LOS ANGELES, Cal.—Bids for the construction of a 26 mile section of 26-in. pipe line from Glendale to Long Beach are being taken by the Southern Fuel Co. Work on this section is planned to start about April 1. Plans and specifications are being completed by B. M. Lauthier, Superintendent of Construction, room 1108, 740 South Broadway. Copies of the plans may be secured within the next few days. This contract will be for trenching, laying, welding and backfilling, the pipe being furnished by the company. Other sections of the line, which is approximately 210 miles terminating at the Kettleman Fields, will be awarded so that work can start May 1, July 1, and Aug. 1, respectively. An order for about 76 miles of steel pipe has been placed with the Western Pipe & Steel Co. and another order with the A. O. Smith Co. of Milwaukee. Welding of the Smith pipe will be done by electric welding, services for which are furnished by the manufacturer.

OAKLAND, Cal.—Steel Tank & Pipe Co., 1100 4th St., Berkeley, at \$2.80 lin. ft. (\$16,800) submitted low bid to East Bay Municipal Utility District to furnish and deliver 6,000 lin. ft. ¼-inch thickness 20-inch diameter electric welded steel pipe for distribution system. Steel, Inc., at \$3.15 lin. ft. (\$18,900) only other bidder. Bids taken under advertisement until Mar. 16.

KETTLEMAN HILLS, Fresno Co., Cal.—Wm. Reinhardt, vice-president of Shell Oil Co., and another member of organization of about fifteen oil companies operating in the Kettleman Hills district, and known as the Kettleman North Dome Association, plans construction of between six and eight miles of pipe lines and three or four 55,000-bbl. capacity steel storage tanks to provide an oil gathering system for the Kettleman Field. Offices of the new company are located in Room 719, Richfield Oil Bldg., Los Angeles.

KETTLEMAN HILLS, Kings Co., Cal.—Southern California Construction Co., 111 Mesenger St., awarded contract by Southern Fuel Co., Garland Bldg., to construct 4½ mile natural gas pipe line from the Superior Refinery to the lines of the Western States Gas Corp., Kettleman Hills. The work will involve trenching, laying, and acetylene welding of the line which will comprise 12½-in., 20-in., and 22-in. steel pipe. Work started March 9 and will be completed in about thirty days. The cost is approximately \$20,000.

SEWERS AND SEWAGE DISPOSAL PLANTS

SOLEDA, Monterey Co., Cal.—C. C. Kennedy, engineer, Call Bldg., San Francisco, completing plans for sewer system and treatment plant, work to be financed under 1911 Improvement Act and 1915 Bond Act. Hearing Mar. 17. Project involves:

- (1) 570 ft. 10-in. vit. sewer;
- (2) 47 ft. 10-in. cast iron pipe under railway and highway;
- (3) 4 6-in. tees on 10-in. pipe;
- (4) 4 6-in. tees on 6-in. pipe;
- (5) 61 4-in. tees on 10-in. pipe;
- (6) 231 4-in. tees on 6-in. pipe;
- (7) 39 manholes;
- (8) 18 lampholes.

The treatment plant involves:

- (1) 600 cu. yds. excavation;
- (2) 2750 cu. ft. concrete;
- (3) 12,700 lbs. reinf. steel;
- (4) 40 cu. yds. sand;
- (5) 10 cu. yds. gravel for sludge bed;
- (6) 150 ft. 10-in. cast iron pipe effluent line;
- (7) 520 ft. 10-in. vit. pipe effluent line;
- (8) 4 8-in. tees on 10-in. vit. pipe;
- (9) 20 ft. 12-in. corr. pipe culverts;
- (10) 205 ft. 6-in. vit. pipe sludge bed drain;

- (11) 94 ft. 4-in. tile sludge bed drain;
- (12) 2855 ft. 6-in. woven wire fence;
- (13) one 12-ft. gate;
- (14) one 25-ft. well;
- (15) control house, bar screens, clarifier with motor, baffles, stop plank, by-pass screen and cast iron pipe to sludge pumps and valves, digester equipment including gas dome, gas meter, gas piping, screenings burner, fresh water pipe, cast iron pipe to and from sludge pump and to sludge drying bed, valves, cast iron overflow pipe, water pump and motor, tank, pipe and valves, electrical equipment.

SAN RAFAEL, Marin Co., Cal.—Engineer J. C. Ozlesby, Freitas Bldg., San Rafael, commissioned by city supervisors to prepare plans for sewer system in the Homestead district. A sanitary district will be organized to finance construction.

BENICIA, Solano Co., Cal.—City trustees order plans for sewer in proposed sewer district in East Fifth street. Details will be published shortly.

HEALDSBURG, Sonoma Co., Cal.—City trustees authorize preparation of plans for connecting sewer in North St. bet. 1st and University Sts., linking two lines already in use.

BOULDER CITY, Nevada.—Burton Lowther, consulting engineer, Denver, Colo., is completing plans for a city sewerage system for Boulder City, the new government townsite at the Hoover Dam. The proposed system, which will cost \$150,000, will involve collection mains with service connections

and a disposal plant about 0.75 mile distance from the city.

MODESTO, Stanislaus Co., Cal.—A proposal initiative ordinance requiring the city council to appropriate \$25,000 annually for construction of main line sewers has been filed in the office of H. E. Gragg, city clerk, by property owners.

SAN JOSE, Santa Clara Co., Cal.—Prentice & Hunt, San Jose, at \$2929.81 awarded contract by city council (\$297) to sewer portions of Willow St., Prevost St. and Delmas Ave., involving vit. pipe san sewers, brick manholes, vit. wye branches, house laterals and flushing inlets. 1911 Act.

SAN FRANCISCO—H. C. Reid and Co., 339 Clementina St., at \$13,462 and \$87.50 each for additional standards, submitted low bid to the Board of Public Works Mar. 18 to install ornamental street lighting system in Bay Shore Blvd.

(a) furnish and install ornamental street lighting system.

(b) furnish and install ornamental street lighting standards.

Following is a complete list of bids: H. C. Reid Co. (a) \$13,462 (b) \$ 87.50
Alta Elec. Co. (a) 13,500 (b) 97.00
Putte Elec. and Mfg. Co. (a) 13,700 (b) 84.00
R. Flatland (a) 14,120 (b) 74.00
A. C. Rice (a) 14,860 (b) 67.00
Severin Elec. Co. (a) 15,499 (b) 91.00
NePage-McKenny Co. (a) 15,597 (b) 90.00
City Imp. Co. (a) 17,500 (b) 90.00
L. J. Cohn (a) 17,700 (b) 150.00
Butte Elec. Equip. Co. (a) 18,137 (b) 108.00
Turner Co. (a) 18,700 (b) 108.00
C. B. Eaton (a) 18,750 (b) 95.00
Enterprise Electric Co. (a) 20,641 (b) 133.00

WATER WORKS

REDWOOD CITY, San Mateo Co., Cal.—Scott Machinery Co., 945 Folsom St., San Francisco, at \$1288 submitted lowest bid to city council to furnish and install two centrifugal booster pumps and motors. Following is a complete list of bids received: Scott Machinery Co. \$1288
Nash Englehart Co. 1300
Simonds Machinery Co. 1311
Woodin & Little 1325
Fairbanks Morse 1331
Water Works Supply Co. 1349
R. S. Danforth 1392
Western Engineering Co. 1400
Bradford Mfg. Co. 1400
De LaVal Steam Turbine Co. 1443
Byron Jackson Pump Co. 1461
Worthington Co. 1577
Wesco Pump Co. 2206
Pelton Water Wheel Co. 2222
Bids held under advertisement.

BEVERLY HILLS, Los Angeles Co., Cal.—Until 8 P. M., April 7, bids will be received by city council to furnish

CONTRACTORS' MACHINE WORKS

SPECIALISTS ON REPAIRING AND REBUILDING OF

Bunkers, Hoppers, Chuting, Conveyors, Rollers, Mixers, Hoists, Shovels, Tractors, Pavers, Crushers, Drag Lines, Elevators, Car Unloaders, and other Road and Building Equipments;

Certified check 5% required with bid. Plans obtainable from engineer on deposit of \$15, of which \$10 is returnable. Plans on file in office of U. S. Bureau of Public Roads, 461 Market St., San Francisco.

PALO ALTO, Santa Clara Co., Cal.—City council is considering estimates of cost to widen and pave six blocks on the state highway in Mayfield, between College Ave. and Page Mill Rd. The State Highway Commission proposed to pave a strip 40 ft. wide through the center of El Camino Real in Mayfield and to pay 75% of the cost of widening the right of way to 100 ft., on condition that the city undertake to pave the balance of the road, rebuild the sidewalk and curb, make all utilities and sewers and bear 25% of the cost of widening. The recommendation is made that the city contribute about \$10,800 and the remainder, \$36,940, including electrolers, be borne by the frontage. The proposed decision is for the frontage to pay the cost of paving a strip 18 ft. wide, leaving sidewalks and curbs, and the city bear the 25 per cent of widening

the right of way, together with the cost of moving sewers and utilities. The total frontage cost per foot is estimated at \$10.74, or \$8.27 per front foot without electrolers. J. F. Byxbee is city engineer.

NAPA, Napa Co., Cal.—City council declares intention (\$37) to construct cement concrete curbs in both sides of Jackson St. bet. Yojome Street and Lawrence St. 1911 Act. Hearing Mar. 30, H. H. Thompson, city clerk.

SAN LUIS OBISPO COUNTY, Cal.—Harriman Co., Standard Oil Bldg., San Francisco, at \$209,700, awarded contract by State Highway Commission to grade and pave with asphalt concrete 3.8 miles between La-miles south of Santa Margarita and Atascadero.

TUOLUMNE COUNTY, Cal.—Until April 7, 2 P. M., bids will be received by C. H. H. Sweitzer, district engineer, U. S. Bureau of Public Roads, 461 Market St., San Francisco, to grade Section B, Long Barn-Stoddard Springs, Sonora Pass National Forest Highway in Stanislaus National Forest, 3,740 miles in length, involving:

- (1) 25 acres clearing;
- (2) 54,700 cu. yds. unclass. excav.
- (3) 1,040 cu. yds. unclass. excav. for structures;
- (4) 48,000 sta. yds. overhaul;
- (5) 2,740 miles finishing earth-graded roads;
- (6) 5,050 c.y. m. hauling selected backfill material;
- (7) 1 cu. yd. class A concrete;
- (8) 77 cu. yds. class B concrete;
- (9) 3,100 lbs. reinforcing steel;
- (10) 2,496 lin. ft. corr. metal pipe, in place;
- (11) 56 right of way monuments;
- (12) 12,250 lin. ft. protection ditch;
- (13) 52 lin. ft. remove and stockpile 12-in. pipe.

Plans obtainable from engineer on deposit of \$10, checks to be made payable to the Federal Reserve Bank of San Francisco.

OAKDALE, Stanislaus Co., Cal.—City council proposes to pave F St. with aid of State Highway Commission, pavement to be 5-inch concrete on slides with 6-inch center. The cost is estimated at \$30,000 of which the state would pay \$10,000.

POSITION WANTED

STENOGRAPHER Bookkeeper, desires position with Architect or Contractor. Experienced in Building Construction, General Contracting and Architectural Work. Phone Fillmore 7211—Miss Madden

LOCAL LABOR ON SCHOOL BUILDING

"All other things being equal, local labor is to be employed provided that the cost of building is not increased thereby." This clause will be inserted in the contract for bids for the \$75,000 addition to the Sunset school in Carmel if the issue is passed by voters of the Carmel School District today.

The school trustees have voted to ask for bids on the segregated contract basis, thus assuring the board to deal directly with all contractors on the project.

Listing \$156,119 in liabilities and assets valued at \$115,944, Umberto Cavallo, Berkeley contractor, has filed his schedule in bankruptcy with the Federal Court in San Francisco. Cavallo filed his original petition and was adjudged a bankrupt on March 3. His assets consist of real estate holding and the liabilities consist principally of mortgages.

Contracts Awarded Liens, Acceptances, Etc.

Advancing the country's construction needs is becoming from month to month a more important problem with so far no satisfactory solution anywhere in sight. President William Schlake, of the Common Brick Manufacturers' Association, in his annual address before the national convention of the organization in Philadelphia last month, offered what appeared to be a plausible and possible answer, although the various divisions of the construction industry would have to be brought to a far keener appreciation of their responsibilities than is now being evinced before it could be successful.

Schlake declared that the big question facing the industry is whether it shall have continuous employment or unemployment; prosperity or hard times. Lower wages and lower material costs, he insisted, was not the answer. The ultimate solution will be found in high wages, better prices and a greater and steady buying power, with a portion of profits and earnings devoted to construction financing. And even present wages and prices will not remain at their present levels if business does not improve.

The lenders of money, the banks, building and loan associations, etc., had tightened up on loans. Not sufficient first mortgage money was available to permit construction to proceed normally. The gap between the funds available and the first mortgage must be bridged, and there is no longer a market for second mortgages. So it became constructions own task to find a way out of the dilemma.

The country is not over-built, Schlake declared. Every year the population increases sufficiently to require construction sufficient to replace a city the size of Los Angeles, residences, churches, public buildings, everything. And today labor, materials, land, all is cheaper than a year ago, yet construction languishes. No funds.

Construction must finance itself, he declared. To the last man, from laborer to material manufacturing company president, every man dependent upon the construction industry should contribute a portion of his earnings or income to a financing fund to enable construction to throw away its crutches and walk.

Just by way of illustration he suggested that the workman who earned \$2500 a year should obligate himself to take \$250 worth of stock in a Construction Investment Trust, payable at the rate of \$5 a week. That would be far easier than finding another job once his present one succumbs to the depression.

Reports of new orders for fabricated structural steel for the week ending February 21, 1931, were received from 105 establishments, whose capacity represented 45.8 per cent of the total capacity of all plants in the United States. The bookings reported by these establishments amounted to 12,455 tons, representing 29.4 per cent of the total capacity of the reporting establishments. Reports of shipments of fabricated structural steel for the same week were received from 101 establishments, whose capacity represented 44.2 per cent of the total capacity

of all plants in the United States. The shipments reported by these establishments amounted to 17,763 tons representing 43.6 per cent of the total capacity of the reporting establishments.

A Committee on Commissions and Fees, which will make a study of real estate commission schedules of 6 real estate boards is announced by President Harry S. Kissell, of the National Association of Real Estate Boards. The Committee is headed by Albert H. Wetten of Chicago, and is determining to what extent variations now exist in commission schedules throughout the country, will work out the best methods of building a schedule of charges, and will consider the practical aspects of a national standard schedule for real estate commissions for building commissions. Schedules may be developed by the Committee, that will be helpful to the Association member boards, even if specific rates are not included, according to Mr. Kissell. The Committee may consider the value to the real profession of adopting "at least more standardized" basis of compensation for realtors, according to Mr. Kissell, who cited the benefits to the architectural profession in the development of their standardized rates. The Sub-Committee on this subject also has been appointed with Mr. Wetten as Chairman to study the preliminary analysis of commission schedules already prepared by the Association. The Committee will report the full Committee at a special meeting to be held in Chicago at some later date.

M. C. Poulsen of Los Angeles, engineer for the Clay Products Institute of California, addressed the San Luis Obispo County Builders Exchange last Friday evening on the advantages a building code to a community, pointing out the necessity of supervising building to assure safety and general welfare to the residents of a community. He also urged the importance of uniformity in building laws.

A "Pittsburg" Automatic Water Heater installed in the Home indicates high quality throughout.

Recommended and specified by all the leading architects, plumbers and builders.

Consider the high merit of the Pittsburg coupled with "Pittsburg Perfect Service."

VALLEJO BUILDERS WILL CAMPAIGN FOR BUSINESS RESUMPTION

General contractors, sub-contractors and material dealers of Vallejo met a meeting last Friday evening mapped a successful campaign to acquaint prospective builders with the anarchy of building during the coming months.

Low building material prices and unlimited competition in the bidding of contractors assuring low cost construction bids, will be one of the evils to be stressed upon.

Prospective builders will be urged to patronize Vallejo dealers and contractors rather than to spend their money with out-of-town contractors.

First steps towards the organization of a Builders' Exchange were taken with the election of Frank Amb as president; George Baranich, vice-president; R. V. Morris, secretary-treasurer, and Fred Barnewitz, agent-at-arms. A committee on by-laws is composed of George Baranich and D. J. Jordan, with Ed Johnson and Sam Weeks named as a committee on building code.

PUBLIC BUILDING LABOR ORDINANCE BEING CONSIDERED

James F. Hoey, district attorney of Contra Costa County, is considering an ordinance presented to the county supervisors by Supervisor James N. Ong, providing that Contra Costa county labor shall be given preference on public building projects. The tentative draft of the ordinance was issued by the supervisors and submitted to Hoey for study and referring to eliminate possible legal objections.

The ordinance as submitted contains the following provisions:

"That in every contract for the performance of labor, eight hours shall constitute a day's work;

"That the contractor and all sub-contractors under him shall pay their employees on said work a salary or wage at least equal to the prevailing salary or wage for the same quality of service rendered to private persons, firms or corporations under a similar employment in Contra Costa county;

"That any person performing labor in the execution of said contract shall be a citizen of said United States or has declared his intentions of becoming such;

"That preference in the performance of labor under such contract or other arrangement shall be given to persons who actually reside in Contra Costa county and shall have so resided for the period of one year next preceding the date of the engagement to perform labor here under."

STANDARDIZED HOMES FORECAST FOR FUTURE

The next quarter of a century will find Americans dwelling in houses of standardized design—houses that will be much cheaper to build—Frank A. Vanderlip, New York banker, declares.

"Reduction of the cost of homes will be a sharp step toward bringing America the permanent prosperity it deserves," Vanderlip says.

A weak system of distribution, coupled with the after effects of the war, caused the present depression, and the country must work out a new and more effective distribution if it is to avoid a repetition of the business slump, he says.

"Distribution is the most costly of all our processes," Vanderlip says. "Whereas the country has accomplished a great advance in production, cost of distribution continues to mount higher and higher."

REDWOOD CITY TO FAVOR LOCAL LABOR

An ordinance which has for its purpose the protection of local labor on public improvements has been presented to the council of Redwood City by the Carpenters' Union of that community. The ordinance, recently adopted by the city of Palo Alto, provides for the payment of the prevailing wage scale for mechanics and laborers and gives preference to local labor.

The ordinance further provides that the contractor performing any public work must file an affidavit with the city authorities, giving the number of skilled and other class of labor employed, the residence of those employed and no settlement shall be made with the contractor until such affidavit has been filed, ten per cent of amount due the contractor being withheld by the city until such affidavit is filed.

A penalty of \$10 a day is provided in the ordinance for each laborer employed in violation of any provision of the ordinance.

BALTIMORE ENGINEERS OPPOSE REGISTRATION

Members of the various engineering societies of Baltimore, at a recent meeting, decided to oppose passage by the Maryland general assembly, now in session, of legislation requiring registration or licensing of engineers and land surveyors. It has been stated that such a bill will be introduced. The meeting was attended by representatives of the Baltimore sections of the American Institute of Electrical Engineers, Civil Engineers, Mechanical Engineers, Baltimore Chapter, Illuminating Engineering Society; and the Maryland sections of the American Chemical Society and the American Institute of Chemical Engineers.

SONOMA COUNTY BUILDERS AIM TO KEEP WORK AT HOME

The Santa Rosa Builders' Exchange has called a mass meeting of citizens and business men to consider ways and means of promoting the building business in Sonoma County.

It is also proposed to work out legislation or other means by which local contractors and local material dealers will secure the major portion of Sonoma county business.

Henceforth, according to members of the exchange, outside firms have been securing a great portion of the local building contracts. This has been due primarily to the fact that the local men have not been properly organized. The Builders' Exchange of Santa Rosa was recently organized with a view to correcting these conditions.

The meeting will be held in the Press-Democrat Social Hall.

FOUR SEEK CITY MANAGER POSITION

Three candidates have officially filed application with the Alameda city council seeking appointment to the position of city manager, which office will be vacated by Clifton E. Hickok on April 21. One candidate, whose name is not disclosed, conferred with the mayor but withheld filing his application pending investigation of the duties of the position.

The first application received was that of Col. S. E. Smiley, U. S. A., retired, who resides in Chicago. Col. Smiley, a former army engineer with a record of service in the Philippines, Cuba, China and France, gave for references the names of Col. David P. Barrows, professor of political science and former president of the University of California; Prof. Samuel C. May, director of the Bureau of public administration of the same institution; Maj.-Gen. Hunter Liggett, U. S. A., and City Manager C. M. Dorton of Monterey, president of the City Managers Association of California.

Ralph Eennett, consulting engineer of the City of Los Angeles, was the second candidate to file an application with Mayor Schaefer. Eennett set forth among his qualifications that he was chief engineer in charge of the building of the town of Torrance, Cal., former chief engineer for the Great Western Power Co., and former chief electrical engineer of Southern California Edison Company.

The third application came from P. F. Hopkins, city manager of Mason City, Iowa.

The annual convention of the American Institute of Architects will be held at San Antonio, Texas, April 14, 15 and 16. Headquarters will be maintained at the Menger Hotel.

QUASI-PUBLIC WORKS GREATEST FIELD FOR CONSTRUCTION ACTIVITY UNTIL CONSUMER BUYER POWER RETURNS

The greatest hope for sustained building activity for the next five to ten years is to be found in those types of construction that serve a community need but are conducted by private business enterprise with the cooperation of public authority, according to Dwight L. Hoopingarner of New York, Executive of the American Construction Council and Vice-President of the Consumer Credit Institute of America, Inc. Until bulk buying power returns to the masses, this type of construction, or what may be termed quasi-public works, offers the greatest potential source of capital funds for ownership and investment purposes with which to prosecute building operations. These conclusions were reached from the results of a joint national survey just completed by these two organizations on the relation of consumer buying power to possible construction outlets.

Simultaneously, it was announced that the American Construction Council through M. Hoopingarner has addressed a communication to 1000 prominent men in the construction industry and other lines of business inviting them to join in a national movement for the revival of private enterprise in stimulating a return to prosperity.

"Only by the leaders of industry taking the bit in their mouth instead of relying upon governmental panaceas can economic recovery be secured," Mr. Hoopingarner declared. "What we need to do is to face the situation according to the facts and with full recognition of sound business methods.

"Ever since the economic debacle of 1929, great emphasis has been placed upon the need for public authorities—local, state and federal—to bring out public works of one kind or another as a pulmotor for resuscitating the water-logged lungs of our fallen hero—prosperity. Closely allied to these undertakings has been an appeal to such stimulus as public utilities of various classes can give through their own construction operations.

"All of these projects, of course, serve a splendid purpose for today, in order to get the giant of construction back on his feet. But in all of this we must compositely but none the less definitely remember that 'Jones pays the freight,' and think of tomorrow. If it is some public works project to be financed, Jones simply digs into his pockets to extract more taxes, in which event he can give voice to his own desires as one of the 'Jones' just millions perhaps. In this he is usually patient and in times of crisis even eager to do his additional bid if it will help the common good.

"Likewise if it is a public utility, Jones still has to pay the bill. But in this case he can at least accord raise his voice by reducing his use of the service or commodity involved.

"In either case, if Jones doesn't have the money to pay, he can't pay, and even though he has some financial reserves and is willing to do all he can, there is a limit to the burden which he can be asked to carry.

"All of this means that without consumer buying power, or money in the pocket-books of the masses, industry as well as government cannot expect to continue to sustain its rev-

"This raises the question as to which is the prosperity hen and which is the prosperity egg. In public works? Industry must pick up before the masses can regain their buying power, but can the state continue to tax its people more and more before they regain their earning power? And can the people regain their earning power without the state continuing to tax them in order to stimulate industry so as to give them work?

"Other types of construction, such as those involved in the building or repair of homes by wage earners present in the main much the same situation from the financial angle. The wage earners of the country as a body cannot be expected to enter the great field of home ownership on a large scale until the payrolls of industry first pick up.

"Although there is a great potential need for the right kind of homes of moderate price for the great mass of American wage earners—a need that was never more than hardly scratched all during the big building boom of the past decade—these representatives of bulk buying power for home ownership do not at the present time have the money to make the necessary cash down payments on homes nor to be able to plan to continue the payments month by month and year by year to prevent their losing these homes, even if they should be able to pay the initiation fee into the great American Home Owners' Club.

"Careful survey shows that tragedy has already stalked upon thousands and thousands of home-owners thru-out this country during the past two years through the loss of their savings because of their inability to keep up the necessary payments on their homes. Something over and above an abundance of mortgage money is necessary for the stimulation and protection of home ownership, and that something is sustained buying power of the masses.

"Modernizing of homes and other existing structures is a worthy and possible source of building operations at the present time, but here again the scope of this type of work is limited to only those families or organizations that have a sufficient capital reserve to undertake them and in many cases these expenditures will of necessity have to be less extensive than they otherwise would be.

"It is possible of course to discount future needs and resources in public works as well as in private construction where the company's or individual's liquid reserves are sufficient to enable doing so. This is helpful provided it is done for constructive purposes.

"It is very essential, however, that we recognize this rejuvenating process for just what it is, and also bear in mind that it tends to restrict the future demand for construction except insofar as our expanding needs will justify in turn an expanding program of construction of these various types. In this connection it is perhaps the part of wisdom to recall that the 'God of Expansion' at whose feet we recently worshipped in awe exploded in our very midst. Any reliance of this situation must be avoided.

"Legitimate economic needs must not be forgotten, and the timeliness of these needs must also be considered. The tempo of construction is just as important as the theme, and this is

just as true for the construction of public and private works as for any other economic or social or political movement. Over-laziness may bring untimely exhaustion and collapse!

"In addition to meeting a real need, construction activities should be conducted according to the proper standards of men, money and materials.

"Here is where the function of quasi-public works as found for example in the relief of our housing menace in congested urban areas thru the rebuilding of obsolete tenement and slum districts. This type of building operations not only fills a great need but can be properly sustained over a period of years through the employment of private capital and investment in well conceived and well executed projects.

"All this is necessary is a proper plan and a willingness on the part of the building investing public with the cooperation of public authorities, to proceed step by step with these projects in the various localities of the country.

"The American Construction Council, representing all elements affecting the construction industry nationally, including the public, has been conducting a general survey of existing conditions, and definite standards of tenement and slum clearance have been developed in cooperation with other authorities. Commendable examples of specific projects already under way or completed in some localities have been analyzed and these findings are being made available to the public as a part of the Council's service as a national clearing house of information and research on the subject.

"Among the essential steps is the recommendation that these obsolete tenement and slum districts should be rebuilt primarily by private business enterprise with financing on a non-speculative basis, and that there must be the necessary local financial agencies and ownership corporations to carry out the specific projects.

"It is also recommended that every community should lay down a definite program embracing all these and related factors including careful regional planning and zoning provisions, looking toward the proper rebuilding of its slum and semi-slum districts.

"Such a program in cooperation with the proper authorities through proper enabling and protective legislation should furnish from fifty billions to one hundred billions of dollars of new construction and employment to many thousands of workers over a ten year period and thereby contribute in a large way to the maintenance of the nation's prosperity."

SOVIET HARDWOOD FOR COAST PORTS

Exportation of Siberian hardwood to Pacific Coast ports is planned by the Soviet government as soon as exploitation of the forests in the Vladivostok district can be arranged. This is the word received in San Francisco from representatives of the Amtorg Trading Company.

Last year, Japanese shippers took 110 loads of hardwood from Vladivostok, re-exporting it to the United States. It is planned to send the lumber in the future direct to California ports.

SENATE BILL 376 SHOULD GET SUPPORT

Two characteristic problems of the present day building industry are:

The irresponsible or visionary speculative builder, owner or contractor. The many unscrupulous money lenders who contrive to drive large portions of building loans from legitimate construction purposes without showing said diversions on record.

"Confidence is thus destroyed in the industry," says a report submitted at the semi-annual convention of the California State Builders' Exchange at Fresno last Saturday, "especially in so far as pertains to junior financing arrangements and these complications are such as to be in our opinion very often beyond the ability of the usual credit departments to investigate."

"The losses effect every class in society involved therein, the reckless borrower who promises thus to repay for what he did not actually receive, stockholders of reckless lenders who expect payment for what they did not loan and material dealers who do not have the inside information and are thus defrauded by false appearances of building credit arrangements permitted under the present state of the recording laws of California."

The committee, in submitting the report, urged that the industry get behind the legislation proposed in Senate Bill No. 376, as amended, providing for compulsory disclosure of the public record of actual building loan arrangements.

WAGE CUTS HURT BUSINESS RECOVERY

A warning against widespread wage cuts as an aid to business recovery is sounded by "Business Observer," house organ of the Foreman-State National Bank, Chicago.

"The movement to reduce wages in the interest of business recovery appears to be unsound," the bulletin states. "By permitting wages to hold, while prices decline, purchasing power will be enhanced and such commodity prices as have already fallen beyond the general trend of prices will tend to be brought back in line, but only if wage costs entering into them are not reduced."

"On the contrary, if wage reductions were to become a widespread policy at the present time, it would undoubtedly intensify the commodity price recession, curtailing buying power still further and prolong the depression."

FATALITIES ON LARGE BUILDINGS

Much progress has been made in recent years in reducing the number of accidents on large building operations, and still further progress in lowering the number of fatalities on construction jobs may be expected, says Fred T. Ley, president of Fred T. Ley & Co.

"A man killed for every story used to be the commonplace in skyscraper construction fifteen or more years ago," said Mr. Ley. "Now safety work has reached the point where, in the erection of the Chrysler Building, there was but one fatal accident in seventy-seven stories of construction. During a three months' contest there were no fatalities, and not even a minor accident compelling a man to quit work for an hour."

"Safety on a construction job is accomplished chiefly by two means, careful planning and careful education of workmen."

Arterial Highways For S. F. Bay Bridge Project Are Outlined

Adding a clause suggested by Walter N. Brinksted, city engineer, the Oakland city council approved the report of engineers of Alameda county municipalities outlining the arterial highways required for access to the eastern terminal of the proposed San Francisco bay bridge.

Engineering News - Record of New York, in the current issue, comments on the San Francisco Bay Bridge and approach roads as follows:

"The influence of important bridges extends far beyond their approaches. Realization of this fact is sometimes tardy and necessary revamping of regional traffic systems too long delayed, resulting in congestion and inefficiency. At present there seems to be a possible danger that something of this sort may befall the San Francisco-Oakland bridge project. Progress on the actual bridge planning has been both rapid and well directed since the favorable report of the Hoover-Young commission six months ago. Requirements of the war and navy departments apparently have been satisfied, although the former has yet to consider the final plans and specifications. An act of Congress is necessary to provide a right-of-way across Goat Island, but with no official objections from either the navy or the war department the Kahn bill granting such right should meet slight opposition. Local opposition has been quieted by increasing the span length and clearance proposed for the east end of the bridge, as requested by the Oakland port authorities to protect their harbor development, and the East Bay region is now solidly behind the project. Meanwhile steps are being taken to test the validity of the state toll-bridge authority act, upon which the sale of \$70,000,000 worth of revenue bonds depends. These developments denote progress, but in the meantime the public seems to be about ready to sit back and watch for the rise of tall piers and the erection of steel. Herein lurks a possible danger that those directing the project should not overlook. The bridge project itself is in able hands, and may be expected to go along well, but municipal officials and the public at each terminus should be made to appreciate the task of equal or greater complexity that confronts them in preparing new transportation routes and facilities. Much needs to be done in the way of study and planning for these far-reaching alterations in the traffic systems of these two metropolitan areas if the maximum advantage of the bridge is to be realized. Unless this work keeps pace with plans of the actual structure, serious and inexcusable complications will result and the full value of the bridge as a traffic artery may not be realized."

Uncle Sam is losing no time in getting construction under way on the Sunnyside Naval Air Base in Santa Clara County.

Bids will be received by the 12th Naval District on April 4 for wood and concrete test piles and core borings in connection with the project.

The Feather River Lumber Company has filed a complaint with the Railroad Commission against The Western Pacific Railroad Company, alleging that defendant carrier collected excessive rates for the transportation of carloads of logs from Gulling to Portola, Plumas County, and asking the Commission to award reparation in the amount that such charges exceeded \$1.25 per 1000 feet.

MILLION DOLLAR BRIDGE BIDS ASKED

Bids will be considered by the Los Angeles Board of Public Works on April 29 to construct the Sixth Street Viaduct over the Los Angeles River. The structure will cost in the neighborhood of \$1,000,000, according to Merrill Butler, chief bridge engineer for the city.

Bids will be considered for (1) entire job complete; (2) fabrication and delivery of the structural steel; (3) erection of structural steel; (4) all remaining work, referring to (2) and (3).

Construction will involve 8,000,000 pounds of reinforcing steel; 47,200 cubic yards of Class F concrete; 500 cubic yards of Class G concrete; 750 15-ft. concrete piles (precast or cast in place); 1200 tons of structural steel and other miscellaneous items.

The bridge will consist of the girder span type with structural steel over spans, a total length of 3500 ft. The bridge proper will be 36 ft. and at the approaches 56 ft wide. East of the river the bridge will be 60 to 80 ft. above the street level.

TWO WAGE CUTS— SEVERAL INCREASES

In spite of continued unemployment in the building trades, there are still some increases reported, says the General Building Contractor.

The more important are those of Rochester, N. Y., where six trades received increases ranging from five cents to seven cents per hour, and that of Pittsburgh, giving steamfitters and plumbers an increase. Part of these increases are offset by decreases in Buffalo, N. Y., and Memphis, Tenn. However, in spite of these reported increases in the official scale it has been noted that tradesmen are working considerably below this scale.

An instance in Memphis, Tenn., where the official scale for the setters was increased from \$1.25 to \$1.37½ per hour; at the same time many tile setters are working for 62½ cents per hour.

Reports from other cities state that current bids indicate many contractors are paying a rate below the local scale.

Salt Lake City, Utah, reports that ironworkers have demanded an increase of one dollar per day and the five-day week; the latter being demanded by carpenters also. Both demands have been rejected by the contractor.

Recent changes in wage scales follow:

Decreases
Buffalo, N. Y., sheet metal workers, from \$1.25 to \$1.20.
Memphis, Tenn., plasterers' tenders, from \$.75 to \$.62½.

Increases
Memphis, Tenn., cement finishers, from \$1.00-\$1.25 to \$1.12½-\$1.25; sheet metal workers, from \$1.25 to \$1.37½; tile setters, from \$1.25 to \$1.37½.
Pittsburgh, Pa., plumbers, from \$1.62½ to \$1.71½; steam fitters, from \$1.62½ to \$1.70.

Rochester, N. Y., carpenters from \$1.20 to \$1.25½; electricians, from \$1.37½ to \$1.44½; plumbers, from 1.43½ to \$1.50; roofers, (composition), from \$1.10 to \$1.15; roofers, (slate and tile), from \$1.10 to \$1.15; sheet metal workers, from \$1.43½ to \$1.50.

Come-to-Grief-Arman—It was trying to make a record. Farmer—Well, you've made it. You be the first man in these parts who climbed down a tree without having to climb up it first.—Passing Show.

THE OBSERVER

What He Hears and Sees on His Rounds

Henry Ford says: "Production without safety is inefficient. Accident prevention is an essential part of the industry program; accidents are absolutely unnecessary."

The city council of Stockton is considering adoption of an ordinance to provide local labor on public projects providing that they are sufficiently skilled to handle the work. The ordinance sets forth that the working and wage scale shall be equal to that prevailing under similar employment in Stockton. The measure has been laid over for 30 days pending a study as to its legality.

The New York State Department of Labor, during the year ending June 30, 1930, made closing awards in 109,848 cases of industrial injuries. The amount of the awards totaled more than \$35,000,000. Number of cases closed was greater by 9,286 than in the previous year, and the amount of compensation awarded increased about \$3,000,000.

The United States Bureau of Mines in testing chemicals which might be used to give an odor to natural gas had some very amusing experiences. Many leaks were found in homes where no leaks had been suspected. The materials used had very unpleasant odors, one man blamed a butcher for having sent spoiled meat, a woman threw all of her husband's old shoes out of the closet, and a negro insisted on her husband taking a bath.

Recent fires in Government buildings have caused the Secretary of Commerce to organize a group known as the Federal Fire Council, which will function in an informative and advisory capacity on matters of fire prevention and protection arising in connection with Government activities. This includes such subjects as exit requirements, protection of records, elimination of fire hazards, and similar matters not already covered.

With a view to modernizing the municipal building code, I. S. Patterson, secretary of the Sacramento Builders' Exchange, has requested members of his organization to make suggestions for improvement of the code or to offer criticism on those sections which are displeasing to the individual. It is hoped that a sufficient number of expressions will be received to make the effort of revising the code a successful one.

The Department of Industrial Relations, State Industrial Accident Commission, announces a meeting will be held in Room 140, State Building, San Francisco, on April 8 at 10 A. M., and in Los Angeles on April 15, to consider and adopt additional boiler safety orders which will be of general application throughout the state, relative to reasonable safety standards and safety devices.

That signs are apparent of a steady though gradual improvement in world trade is the statement of James A. Farrell, president of the United States Steel Corporation and chairman of the National Foreign Trade Council, in issuing a call for the eighteenth national foreign trade convention.

The meetings will be held in New York May 27th, 28th and 29th.

"There are indications," Farrell said, "that the worldwide depression in business, with which we have been dealing for several months, is subsiding and that the upturn is beginning."

A motor highway from the Panama Canal to the Mexican border of the United States will link Central American nations and open Pan-America to United States motorists within five years is forecast by T. H. MacDonald, chief of the United States Bureau of Public Roads.

Speaking at the concluding session of the Inter-American Highway Commission at Panama City, he said the road would cost \$50,000,000 but there was no question the project could be financed. A finance committee was appointed and headquarters for the commission were arranged in Washington, D. C.

Machinery has been set in motion, he said, by which international details of the highway can be adjusted through the co-operative effort of all countries represented.

Inasmuch as the size of a bridge very frequently determines its degree of importance, the American Institute of Steel Construction will this year select the most beautiful from three distinct classes from all those erected of steel during 1930. The bridges judged to be the most beautiful will be decorated with bronze plaques. The award in 1928 went to the Sixth Street Bridge in Pittsburgh. Last year the awards went to the Mount Hope Bridge in Rhode Island and to the Mount Pleasant Bridge in Westchester, New York, these being judged to be the most beautiful long-span bridge and the most beautiful short-span bridge erected in 1929.

Three first awards to the most beautiful bridge in each of three classes will be made this year; one to the bridge costing more than a million dollars, another where the cost lies between one-half and one million dollars, and the other to a bridge costing less than half a million dollars. Selections will be made from bridges opened to traffic during the year 1930.

The jury elected to make the awards consists of Francis Lee Stuart, Consulting Engineer, President of the American Society of Civil Engineers; Robert D. Kohn, Architect, President of the American Institute of Architects; Frederick L. Ackermann, Architect of New York; Dr. William H. Burr, Consulting Engineer; E. F. Betts, Editor of the American Architect.

The jury will meet on June 10 next to make their selections. Entrants may any time prior to that date submit photographs and descriptive data to the American Institute of Steel Construction, Inc., 200 Madison Ave., New York.

The former school of architecture of the University of Southern California is the college of architecture according to announcement of Dr. R. B. von Klein Smid, president of the University. With entrance direct from high school, the college of architecture now provides for five years continuous study, whereas formerly E. C. architectural students were required

to spend two years in the college of letters, arts and sciences before entering the 3-year school of architecture.

While the United States hesitates to take the stern course that the destructive commercial tactics of the Soviet Government of Russia demand, Canada has gone the whole route. On February 27 the Canadian Government, by order in council, shut out all imports of Russian coal, wood pulp, pulpwood, lumber and timber, furs and asbestos. This, says the Canadian Government, is its answer to a government which seeks "to impose its will on the world" through the exploitation of labor. "This is communism, its creed and its fruit," it continues, "which we as a country must refuse to support by interchange of trade."—National Lumber Bulletin.

The cost of street paving in New Orleans, which has not dropped in price of the lowering costs of material and labor, is being studied by New Orleans property holders. The investigation will also cover a study of the laws which regulate the letting of paving contracts; why only two contractors have been successful bidders for the last few years, and what part, if any, politics has played in awarding contracts.

A step toward the elimination of irresponsibility in construction was taken by the Kansas Contractors' Association, a chapter of the Associated General Contractors of America, composed of contractors doing work on highways and public works in Kansas, when it adopted a resolution at its annual meeting that any member of the association found guilty of allowing his bills which are just and due to remain unpaid, thereby forcing his creditors to take court action to recover the same, should be dismissed from membership in the organization.

Unfair competition is engendered by this practice, the resolution points out, and the public gets the impression that the contracting industry is neither honest nor responsible, so that a hardship is worked on the industry as a whole. The convention ordered that a copy of the resolution be sent to the governing bodies controlling the award of contracts for public works with the request that they pass an order disqualifying from bidding on future work any contractor found guilty of the above mentioned practice.

GRADE CROSSING MEASURE TABLED

The senate constitutional amendments committee last Thursday, after a hearing, tabled a constitutional amendment by Senator Roy Fellom, San Francisco, which proposed a bond issue of \$10,000,000 to eliminate grade crossings on county highways.

The bill was opposed by the farm bureau federation and the agricultural legislative committee.

The amendment was an enabling act, and if adopted by the legislature would go before the voters for their approval.

Fellom's plan was to use the bonds for the state to aid counties in dealing in grade crossing matters to the extent of bearing half the cost assessed to the cities or counties.

The amendment did not provide for the elimination of grade crossings on state highways, as was provided in previous measures of this nature.

Details regarding a new 14-S concrete mixer which follows the pattern of larger units manufactured by the Ransome Concrete Machinery Co., Dunellen, N. J., are given in bulletin 127, issued by that company.

TRADE LITERATURE

Detail drawings showing methods of erecting ceilings and non-bearing partitions by the Nallock system, a method by which any material commonly used as a plaster base or any standard form of insulation can be nailed to steel studs, are given in an 18-page illustrated bulletin issued by the Wheeling Corrugated Co., Wheeling, W. Va.

Sam Finlay, Inc., 292 North Ave., N. W., Atlanta, Ga., has issued an illustrated bulletin describing the Flu-Roc surface mixer for the construction of bituminous pavement. Illustrations show the machine at work and typical highways upon which it has been used.

"Recent Developments in Chlorination," a paper by Francis D. West which was read before the last convention of the New England Water Works Association, has been reprinted by the Paradox Co., Arlington, N. J.

Principles and practice of bending wrought-iron pipe are clearly outlined on a 10-page illustrated bulletin 50 issued by the A. M. Byers Co., Clark Bldg., Pittsburgh, Pa.

The MacCreedy fluid level indicator, an electrical system which indicates the level of reservoirs or storage tanks at a remote point, is fully described in a 12-page illustrated bulletin issued by J. H. Bunnell & Co., Inc. 215 Fulton St., New York City.

Revolving car dumpers form the subject of a 12-page illustrated pamphlet issued by the Wellman Engineering Co., Cleveland, Ohio.

"Money Saving Time" is the title of an eight-page booklet issued by the Stormberg Electric Company of Chicago, manufacturers of electrically operated equipment for controlling the time element. Copies of the booklet will be forwarded on request to Ralph E. Peters, district sales manager, 7 Front Street, San Francisco.

Special features of the Mathews modernized fire hydrant are described and illustrated in the folder issued by R. D. Wood & Co., 400 Chestnut St., Philadelphia, Pa.

Improvements made in the Link-Belt Grizzly crawler loader are described in folder 1256 of the Link-Belt Co., 910 South Michigan Avenue, Chicago, Ill.

HOUSE PASSES LICENSE FEE BILL

Assembly Bill 1687, by Mr. Wilber, increasing the contractors' license fee from \$5 to \$10 per year, passed the house and is now in the senate of the California Legislature with prospects that it will become a law very soon, as it carries an emergency clause making it effective as soon as it is signed by the governor.

The Registrar of Contractors is urgently in need of funds for the administration of the license law and the bill will be put through the Legislature as quickly as possible.

Among the provisions of the bill, which amends the present law, are one eliminating the requirement that applications for licenses be verified and another prohibiting the use of more than 5 per cent of the license fees for educational work.

HERE—THERE EVERYWHERE

Herman Paine of the Southern California Box Company, Los Angeles, was elected to serve on the executive committee of the Pacific Coast Division, National Association of Wood-Box Manufacturers for 1931.

Four thousand employees of the United States Aluminum Company, of New Kensington, Pa., operated the plant during an entire month without a lost-time accident. The record approximated 1,000,000 man-hours, and the employees faced the usual array of mechanical hazards.

The Lumbermen's Club of Arizona will hold its annual meeting at Phoenix, Ariz., May 15, 16 and 17.

By a vote of ten to seven the Nevada State Senate defeated the \$5 minimum wage bill, a labor measure introduced in the house by McAuliffe.

The annual convention of the Building Officials' Conference of America will be held at Toronto, Canada, April 21, 22, 23 and 24. Headquarters will be maintained at the King Edward Hotel.

The Los Angeles city council has voted to submit a \$6,000,000 bond issue proposal to voters at the primary election in May for the construction of sanitary sewers. The same issue was on the ballot last November and failed of passage by a small margin.

Suit has been brought in the Superior Court at Sacramento by the Minneapolis Steel and Machinery Company against the Holdener Construction Company of Sacramento and the Pacific Indemnity Company to recover \$1269.92. The amount is declared to be due for materials used on a bridge in Nevada.

Walker R. Young, construction engineer in charge of the Hoover Dam project, announces that Boulder City will be ready for occupancy in the late summer or early fall, probably about October 1. No leases for business locations in Boulder City will be granted before that time.

SUB-BIDDER TO GET A.G.C. AID IN SUIT

J. H. Fitzmaurice, Oakland cement contractor, has filed suit against A. F. Hanson, general contractor on the Hayward Memorial Building in Alameda County, seeking damages of \$3,100. Fitzmaurice charges breach of contract.

Fitzmaurice, in his complaint, asserts that he entered into a written contract with Hanson on March 3 to do the cement work on the Hayward Memorial for \$12,400 and that Hanson agreed to accept his bid if granted the general contract by the county. Hanson was awarded the contract, but later committed default. On Mar. 15 Hanson informed Fitzmaurice that "he had made other arrangements" for the cement work.

In commenting on the case Wm. E. Hague, manager of the Alameda County Chapter of the Associated General Contractors of America, says that Fitzmaurice will have the backing of the Associated General Contractors in prosecuting the suit as the contractors are actively interested in stopping the "shopping" of contracts and consider this in the nature of a test case.

TRADE NOTES

Dee Essley, secretary-manager of the California Retail Lumbermen's Association, is now making his headquarters in the San Francisco Bay district. His present mail address is P. O. Box 163, Burlingame.

Drake Steel Co. of San Francisco, capitalized for \$25,000, has been incorporated. Directors are John H. Trebler, Burnely, L. K. Vernille, C. A. Borden and E. Klinge.

Stockholders of McEverlast Inc., worldwide manufacturers and suppliers of the Hunt process of concrete curing, industrial paints, protective pipe coverings and highway marking machines, have elected the following officers and directors: Geo. W. Anderson, president and general manager; Ed. R. Young, vice president; Fred M. McKee, second vice president; J. B. Shertz, re-elected secretary and treasurer. In addition to the officers named, all of whom are also directors, R. R. Pollock, K. A. Miller and A. M. Shenk were elected members of the board.

Operations of the Routt Lumber Company, including the Standard Planing Mill in Fresno, went into the hands of Sheriff George J. Overholt last Monday when attachment proceedings, instituted by A. Holm, were completed. The attachment action was started on claims amounting to \$24,000. Named in the complaints were the Routt Lumber Company and Virgil, Leonard and M. C. Routt. The properties will be continued in operation.

100-MILE CANAL CONFERENCE IS SET

A conference on an all-American canal, between the Imperial Irrigation District, the Coachella District, and representatives of the U. S. Reclamation Bureau, will be held in Los Angeles within the next ten days.

The plan proposes a 100-mile canal, located wholly in the United States, to furnish Colorado River water to an area embracing both districts and totaling approximately 900,000 acres. Hydro-electric development at natural drops in the elevation is planned to provide revenue from power to pay for all construction and maintenance costs. The estimated cost of the canal is \$38,500,000.

PORTLAND PLANS MUNY POWER PLANT

By a vote of three to two, the city council of Portland, Ore., the mayor and one commissioner dissenting, has adopted an ordinance providing for a contract with Carey & Harlan, consulting engineers, for an investigation of the possibilities of a municipal power system for the city.

The contract calls for investigation of several specific sites on the Columbia and Deschutes rivers and estimates of cost of development, of transmission lines, of substations and of present and prospective distribution systems in the city, and includes a study of the market and possible rates for power.

ALONG THE LINE

Albert H. Siemer, general contractor of San Anselmo, has been appointed a director of the Marin Municipal Water District, filling the vacancy caused by the death of Joseph E. Clark.

Jack Renfrow, general contractor, will be a candidate for the office of city councilman of Watsonville at the coming municipal election.

William Curtis, city building inspector of Stockton, recently addressed the Stockton Realty Association on the benefits of the Uniform Building Code of the Pacific Coast Building Officials' Conference. The city council is considering adoption of the code in the immediate future.

T. M. Robinson, electrical dealer of Fresno, will be a candidate for the office of city commissioner of public works of Fresno at the coming election.

Charles M. Gunn, president of Gunn, Carle & Co., of San Francisco, has been elected vice-president of the American Concrete Reinforcing Steel Institute, according to Associated Press dispatches from Biloxi, Miss., where the institute held its annual convention. C. W. Irwin of Youngstown, Ohio, was elected president.

Samuel H. Hooke, general contractor of Monterey, filed his notice to seek election to the office of city councilman of Monterey at the coming municipal election.

S. J. Hawkins, 66, general contractor of Manteca, Cal., died in that city after a long illness. He was a native of England and came to this country in 1870, locating in California in 1904. He started operations in Manteca in 1920.

Kenneth C. Grant, for the past nine years president of Hamm, Grant and Bruner, Inc., of Los Angeles, has been reelected president of the company, and the firm name has been changed to Grant & Bruner, Ltd. H. A. Hamm severed his connection with the company on January 1. The firm will continue its practice in the design and erection of industrial and commercial buildings, with offices in Los Angeles.

James T. Sayles, assistant engineer in the San Joaquin County highway department, died at the Dameron Hospital, Stockton, last Tuesday. Death followed an operation for appendicitis. Mr. Sayles was connected with the San Joaquin highway department for the past four years and previous to that time was associated with George Jacobs, Stockton bridge contractor.

CONTRACTOR FILES BANKRUPT SCHEDULE

Assets totaling \$19,000 and liabilities amounting to \$34,500 are listed by F. N. Schienger, contractor, of 1189 First Ave., San Jose, in a bankruptcy schedule on file in the federal court.

Assets are comprised of building property at 732 South First Street, San Jose, \$7500; a home, \$4250; other property, \$3500. Accounts past due and stock in trade are both listed at \$100. Debts ranging from small sums to \$14,000 are listed as owing to more than sixty creditors. Schienger was adjudged a bankrupt last January 22. Bankruptcy Referee Milton Wright is settling the matter.

G. G. BRIDGE NOT OUT FOR FIGURES

The time for opening bids for construction in connection with the Golden Gate bridge project has not been definitely set, according to W. W. Felt, Jr., secretary of the Golden Gate Bridge and Highway District.

The recommendation of Joseph E. Strauss, chief engineer on the project, several weeks ago was that bids for construction were to be received on three phases of the work on April 1, April 15 and May 1. Due to some delay Strauss made a second recommendation that the directors invite bids for construction on April 15, May 1 and May 15, which bids would be opened on June 15. These dates, Felt announces, are not definite but are merely recommendations.

It is probable, however, that at the next meeting of the district directors the plans and specifications will be ready for adoption when the official call for bids for construction will be issued.

CREDIT BUREAU FOR YOUNGSTOWN BLDRS.

A credit plan similar to the one now in operation in Cincinnati, Ohio, has been adopted by the Allied Construction Industries of Youngstown, Ohio.

The Cincinnati plan is managed through a credit board composed of representatives of the various divisions of contractors, dealers, manufacturers and producers of the Allied Construction Industries. This board develops standard credit terms for each of the divisions of the organization and collects credit information which is distributed to all those co-operating in supplying it in the form of delinquent lists.

All those subscribing to the plan are bound to adhere to the terms established concerning the observation of cash discount dates and the granting of credit after a member's payments have become past due according to the regulations established by the credit board. The credit board acts as arbiter in the case of disputes arising over past due accounts.

COKE PLANT TO BE ERECTED IN SOUTH

A plant for the manufacture of metallurgical coke will be constructed in Southern California by the Fields Chemical Company, it is announced. The exact location for the plant has not been disclosed.

The Fields Chemical Company, after more than a year of experimentation, has developed a process of making coke from residuum oils, it is stated. By-products of the process include gasoline, ammonium sulphate and calcium acetate. The first of ten units ultimately to be erected will cost about \$100,000 and will have an output of about 20 tons of coke per day.

Coke for many purposes is now brought to Southern California from Europe and the eastern part of the United States, the annual shipments aggregating in value about \$1,000,000. The enterprise is being financed by Southern California capitalists without the public sale of stock, according to the promoters.

Production of lumber, lath and shingles in Canada for the year 1930 is estimated at 3,787,162,000 board feet as compared with 4,233,937,000 board feet for 1929, according to a report received by the U. S. Department of Commerce.

HARDWARE CONCERN FACES DAMAGE SUIT

Charging that his alleged permanent injuries are the result of the negligent and careless acts of the employees of the defendant J. H. Haskins, Modesto surveyor, and former Stanislaus County surveyor filed a \$20,000 damage suit in the superior court against the Turner Hardware & Implement Company of Modesto.

Haskins, in his complaint charges that on August 21, 1930, while transacting some business in the Turner Hardware Company branch at Oakdale, he fell into an opening leading to the basement and received a shoulder bone fracture and injuries to the muscles and tendons of his left arm.

He states he has been under the care of a physician continuously since the day of the accident and has been deprived of the full use of his injured arm.

AUSTRALIA TO "SCRAP" CANBERRA

Australia has grown tired of its \$66,000,000 monument to sectional jealousies, the new capital Canberra, according to an Associated Press dispatch, and political leaders are now advocating that it be scrapped because it is isolated, inconvenient and a heavy drain on the revenues of the commonwealth.

Canberra is a new city built on a site removed from any of the centers of population to appease intersectional rivalry. It was planned to be the model capital of the world. In creating magnificent vistas the planners sprawled the capital out over 900 acres and as a place to live and to attend to business it is impracticable. When parliament is not in session it is deserted. Three of the five hotels built at a cost of more than \$3,000,000 have been closed for two years.

BOULDER AQUEDUCT TO L. A. ADVOCATED

In urging immediate construction of an aqueduct to the site of the Boulder Canyon Dam, the Metropolitan Water District (Los Angeles) announced that Southern California's water supply was being rapidly depleted by the use of 170,000,000 gallons more water daily than is being replaced in the reservoir.

The overdraft of 170,000,000 gallons is being taken from underground water reserves that have accumulated over a period of thousands of years. When this supply is exhausted salt water will flow into the gravel beds cutting off this source.

Of the 9,000,000,000 gallons of water which is daily running into the sea from the Colorado, one ninth will be made available to Southern California cities by the district's aqueduct when the dam at Boulder is completed, the statement said.

Owing to the fact that it will take nine or ten years to construct the aqueduct the Metropolitan Water District is urging immediate commencement of work.

In the meantime Southern California cities were advised by the board of directors to "develop local water sources to their fullest extent."

While complete development of all remaining water in Owens Valley and the Mono Basin, Los Angeles is preparing to provide itself with an adequate supply until Colorado River water can be brought in," the statement concluded.

C.—The second deficiency appropriation passed by the last Congress provides for the following Indian Bureau building construction: Elko, Nev., village site, including dwellings and water and sewer system, cost \$20,000; Sherman Institute, Riverside, Calif., dairy sheds, sidewalks, curbing, etc. cost, \$25,000; Chas. H. Burke School, Ft. Wingate, N. M., heating system and water supply equipment, cost \$30,000; Hopi-Navajo Sanatorium, Winslow, Ariz., sanatorium, etc., cost, \$150,000.

Contract Awarded.

ELEVATOR Cont. Price \$2195
SAN FRANCISCO, Letterman General Hospital (Kitchen No. 9).

Install electric freight elevator.

Owner—U. S. Government.

Architect—Constructing Quartermaster, Fort Mason.

Contractor—Spencer Elevator Co., 166 7th Street.

SUNNIVALE, Santa Clara Co., Cal.—Until April 8, 11 A. M., under Spec. No. 6476, bids will be received by Public Work Officer, Twelfth Naval District, 100 Harrison St., San Francisco, for wood and concrete test piles and core borings at the Naval Air Base, Sunnyside. Specifications obtainable from above office on deposit of \$10, returnable, checks for same to be made payable to Chief of the Bureau of Yards and Docks.

Bids Returned Un-Opened.
SAN FRANCISCO. Presidio, OFFICERS' QUARTERS Cost, \$90,000 Fifteen double sets of non-commissioned officers' quarters (each 2-story and basement, brick construction).

Owner—United States Government.
Plans by Quartermaster General's Office, Washington, D. C.

Bids on this project were scheduled to be opened March 25, but action was deferred upon orders from Washington, D. C., ordering cancellation of the bid call pending passage of the Bacon-Davis Act, which commands payment of the prevailing wage scale in the territory where the project is undertaken. The bill is effective April 3. It is expected that a new date for opening bids will be set at once.

The action was taken on recommendation of the Industrial Association of San Francisco, the Chamber of Commerce and the Building Trades Council.

MARE ISLAND, Cal.—Bids will be asked shortly by the Bureau of Yards and Docks, Navy Department, Washington, D. C., under Specification No. 6460, for floating derricks for the Navy Yard at Mare Island and the Naval Operating Base at San Diego. The work consists of two 25-ton floating steel derricks of the stiff-leg type with bull wheel having steel pontoons, steam engines, and oil burning boilers; one delivered to the Navy Yard, Mare Island and the other to the Naval Base (Destroyer Base), San Diego. Specification No. 6460 and accompanying drawings may be obtained by forwarding a check or postal money order for \$10, payable to the Chief of the Bureau of Yards and Docks, to the Bureau, to the Commandant, Navy Yard, Mare Island, Calif., or to the Commandant, Naval Operating Base, San Diego, Calif. Application and deposit check will be placed on the drawings and specification mailed as soon as they are available.

Attention is further invited to the fact that alternates providing separate bidding items will be called for the following:

- (a) Revolving Cranes in lieu of derrick.
 - (b) Diesel Engines in lieu of oil burning boilers and steam engine drive.
 - (c) Diesel-electric drive in lieu of oil burning boiler and steam engine drive.
- Upon the return of the drawings and specifications deposit check will be returned.

PORTERVILLE, Tulare Co., Cal.— Until April 8, bids will be received by U. S. Treasury Department to furnish Government with site for proposed postoffice. Site is to contain approximately 29,000 sq. ft. with a dimension of approximately 160 ft. on the more important of two street frontages.

SAN DIEGO, Cal.—M. H. Golden, 404 California Bank Bldg., San Diego, submitted the low bid at \$58,982 to the Bureau of Yards and Docks at the Naval Operating Base (Marine Barracks), San Diego. Specifications No. 6407. Robt. E. McKee submitted the second low bid at \$59,678 and Herbert M. Baruch Corporation was third at \$62,893. The building will be a two-story structure, approximately 33x184 feet in area; reinforced concrete frame and floor and roof slabs, hollow tile filler walls and partitions, stucco exterior, clay tile and built-up roofing, concrete piling, brick work, slate toilet partitions, metal windows, rolling steel doors, metal covered doors, linoleum, sprinkler system, heating.

WASHINGTON, D. C.—Bids are being received by Bureau of Supplies & Accounts, Navy Department, Washington, D. C., to furnish and deliver as noted in the following schedules, further information being available from the Navy Purchasing Office, 100 Harrison St., San Francisco:

B. Brandenstein, (a) \$198; (b) \$148; \$158; Fine Arts, \$198. No bid on alternate propositions.

A. G. West, (a) \$153.50; (b) \$150.; (c) \$150.50; Fine Arts, (a) \$153.50. (a) \$150; (b) \$129; (c) \$136. Fine Arts, (a) \$150.

Pacific Manufacturing Co., (a) \$147.; (b) \$120.50; (c) \$120.55; Fine Arts (a) \$147.50. Alt. bid, (a) \$105.50; (b) \$102; (c) \$99; Fine Arts, (a) \$105.

Remington Rand Business Service, \$125.70; (b) \$102.45; (c) \$102; Fine Arts, (a) \$125.70. Alt. (a) \$89.56; (b) \$42; (c) \$84.86; Fine Arts, (a) \$89.

Some Manufacturing Co., (a) \$116.; (b) \$90.25; (c) \$91.55; Fine Arts, (a) \$116.95; Alt. bid, (a) \$81; (b) \$81.; (c) \$76.30; Fine Arts, (a) \$81.

Toy Show Case Co., (a) \$143.78; (b) 2.03; (c) \$105.62; Fine Arts, (a) 3.78; Alt. bid, (a) \$100.78; (b) \$90.; (c) \$85.62; Fine Arts, (a) \$100.78.

Toy Show Case Co., (a) \$154.50; (b) \$141; (c) \$151.50; Fine Arts, \$154.50. No bids on alternate propositions.

ISCELLANEOUS SUPPLIES AND MATERIALS

OAKLAND, Alameda Co., Cal.—Until April 7, 5 P. M., bids will be received by J. H. Miller, city clerk, to furnish and deliver approximately 50,000 ft. 3/4-in. seamless copper tubing. Following complete list of bids received:

W. Marwedel, S. F., \$7000
Merican Brass & Copper Co.,
Oakland \$7449
Oakland Brass & Copper Co., Oak-
land \$7525

Ducommun Corp., San Francisco 7525
Walworth California Co., S. F. 7525
Mueller Co., San Francisco. 7525
Tay-Holbrook Co., San Francisco 7525
Crane Co., San Francisco. 7525
Bids held under advisement.

SAN FRANCISCO.—Until April 6, 3 P. M., under Proposal No. 706, bids will be received by Leonard S. Leavy, city purchasing agent, 270 City Hall, to furnish and deliver 6,000 padlocks, keys, for School Department. Spec. and further information obtainable from above.

SAN FRANCISCO.—United Motors Service, Inc., at \$37.50 per set awarded contract by City Purchasing Agent, under proposal No. 664, to furnish and deliver 35 radio receiving sets, "Delco" brand to the Department of Electricity for installation on Police automobiles.

SAN FRANCISCO.—Until April 6, 3 P. M., under Proposal No. 697, bids will be received by Leonard S. Leavy, city purchasing agent, 270 City Hall, to furnish and deliver lined oil, shellac, turpentine, lead, litharge, mineral brown and putty, as may be ordered during the tri-annual term commencing May 1 and ending August 31, 1931. Specifications obtainable from above.

BUSINESS OPPORTUNITIES

SAN FRANCISCO.—Names and addresses of the individuals or firms concerned in the following opportunities will be furnished on request to the Business Opportunity Department of Daily Pacific Builder, 545-547 Mission Street. Phone Garfield 8744:

20953—Construction Materials. New York City. Exporters of construction materials wish to contact local construction houses in this city which specialize in the purchase of these materials destined for foreign countries. They are desirous of offering their services in supplying technical information and export procedure and requirements for shipment of such products.

20935—Crude Chalk. San Francisco. Firm in Dunkirk, France, wishes to make contacts with importers of crude chalk.

20936—Machinery Belt Fasteners. Bill, Spain. Party is interested in the importation and sale in Spain of machinery belt fasteners of American manufacture.

20940—Inventions. San Francisco. Party inquires for list of firms which buy and sell inventions and patented inventions.

Henry Anderson of the Jungersen Engineering Co., 3165 North 30th St., Milwaukee, Wis., manufacturers of a hydraulic dump body hoisting mechanism for use on trucks wish to contract reliable manufacturers who would be interested in buying hydraulic hoist parts to be assembled and sold under their own firm name.

L. H. Hall of the Portage Tool Co., Akron, Ohio, manufacturers of a line of tools is interested in contracting with firms or individuals to represent them on the Pacific Coast.

Robert K. Hunter of the Luckenbach Steamship Co., 310 Sansome St., San Francisco, represents the manufacturer of adjustable box, who is looking for parties who might be interested in handling same in San Francisco and surrounding territory.
Edward F. Marx, City Sales and Investment Corp., Kirby Bldg., Houston, Texas, is interested in securing a few articles of merit to sell and act as state distributors for that territory.
G. S. Wortley, president of the Imperial Electric Co., Akron, Ohio, man-

ufacturers of motors and generators seeks representation in this territory.

Geo. J. Harburger, 105 Hunson St., New York City, has facilities for representing sound oil in this territory desiring representation in the New York City territory

SIX COMPANIES NAMES OFFICERS

Officers of the Six Companies, Inc., who will build the huge \$165,000,000 Boulder Dam, held their first official meeting in San Francisco last week. It was held at the St. Francis Hospital, where William H. Wattis, president of the Six Companies, is undergoing the Hummer-Coffey cancer treatment.

After the meeting Wattis announced the official list of officers of the Six Companies and the committees which will work with them on this enormous job. The formation of two subsidiary companies was also announced.

The officer list, as announced by Wattis, was as follows: President, William H. Wattis; W. A. Bechtel, first vice president; E. O. Wattis, second vice president; Charles A. Shea, secretary; Felix Kahn, treasurer; K. K. Bechtel, assistant secretary-treasurer.

The construction committee is headed by H. J. Lawler as chairman, and includes Charles A. Shea, H. W. Morrison, W. A. Bechtel, Jr., and E. O. Wattis. The purchasing committee is S. D. Bechtel, chairman, Allan Macdonald, and L. S. Corey.

The first company to be formed is the Boulder Dam Transportation Company, which will handle all freight and passenger traffic to and from the dam.

The second subsidiary is the Boulder City Company, which will have charge of all housing, feeding, commissary, and concessions at the construction site.

OIL BURNER MEN TO PROMOTE SALES

A concentrated oil burner merchandising drive to tie in with Spring building and modernizing activities was launched last week in Washington, D. C., at a mass meeting of dealers, salesmen and accessory distributors. The drive, to last three months or longer, is backed up by a vigorous advertising campaign in the local newspapers and over the radio.

The campaign calls for a co-ordination of activities by oil burner dealers, fuel oil distributors, accessory manufacturers and the electric power company and represents the most ambitious effort of its kind ever staged in Washington. The advertising is conducted in the name of the Oil Heating Institute and the entire campaign has been devised with the advice and assistance of the Institute.

W. T. Johnson, formerly of The American Radiator Company, has taken charge of the administration of the plan under the guidance of a committee appointed for the purpose, and the Kal Advertising Agency of Washington has prepared the copy. Dealer activity is stimulated by special inducements to salesmen, and "pep" meetings will be held from time to time to report the progress of the drive. Architects, builders and home owners will be solicited with educational material.

C. M. Sharpe, Executive Assistant of the Potomac Electric Power Company, will explain the oil burner campaign in detail at the Philadelphia convention of the American Oil Burner Association on April 16. Mr. Sharpe will speak on "Electric Utilities' Cooperation With Oil Burner Industry."

BRIDGES

MADERA COUNTY, Calif.—Until April 15, 2 P. M., bids will be received by State Highway Commission to construct a reinforced concrete girder bridge across Berenda Slough, consisting of eighteen 26-ft. 6-in. spans on concrete pile bents.

CAKLAND, Cal.—As previously reported, bids will be received April 7, 10:30 A. M., by Geo. E. Gross, county clerk, to construct a reinforced concrete multiple low culvert on the Alvarado-Centerville Rd.; estimated cost \$8800. Project involves:

- (1) 286 cu. yds. excavation for struc.
- (2) 286 cu. yds. Portland cement concrete in structure;
- (3) 53,900 lbs. reinforcing steel complete in place;
- (4) removal of existing bridge, clear-site, etc.

Plans obtainable from County Surveyor Geo. A. Posey.

SALINAS, Monterey Co., Cal.—Until April 6, 10 a. m., bids will be received by C. F. Joy, county clerk, to construct bridge over Chalone Creek on the Soledad-King City road near Metz, in Supervisor District No. 3. Plans obtainable from County Surveyor Howard Cozzens on deposit of \$10, returnable.

MADERA COUNTY, Cal.—As previously reported, bids will be received April 15 by State Highway Commission to construct a reinforced concrete girder bridge over Berenda Slough, consisting of eighteen 26-ft. 6-in. spans on concrete pile bents. Project involves:

- (1) 1 only, existing bridge to be removed;
- (2) 1 only, detour bridge;
- (3) 1060 cu. yds. roadway embankment (detour);
- (4) 1800 sq. yds. detour surfacing;
- (5) 175 cu. yds. structure excavation;
- (6) 1750 lin. ft. reinf. concrete piles;
- (7) 780 cu. yds. class A Portland cement concrete;
- (8) 42 cu. yds. class A Portland cement concrete (pavement);
- (9) 150,000 lbs. reinf. steel;
- (10) 1640 lbs. phosphor bronze expansion plates;
- (11) 980 lin. ft. timber railing;
- (12) 1 lot miscellaneous items of work.

MODESTO, Stanislaus Co., Cal.—F. M. Bodenhamer, 354 Hobart St., Oakland, at \$54,000, and 250 cu. yds. excavation, submitted the low bid to the county supervisors to construct bridge over the Stanislaus River north of Oakdale. Will be reinforced concrete construction 390 ft. long, 24 ft. wide, with a 20-ft. roadway. Following is a complete list of the bids, all being taken under advisement:

F. M. Bodenhamer, Oakland, \$54,000 25c.

E. T. Lesure, Oakland, \$56,840, 35c.
Geo. Ulrich Const. Co., Modesto \$58,997, 21c.

J. C. Clark and C. F. Dougherty \$60,568, 25c.

M. B. McGowan, San Francisco, \$60,959, 24c.

Nevin & Hart, \$61,983, 22c.
A. W. Kitchen, San Francisco, \$62,360, 33c.

Merritt-Chapman & Scott, San Pedro, \$62,396, 22½c.

Mission Concrete Co., San Francisco \$65,132, 23c.

Frederickson & Watson and Fred-

erickson Bros., Oakland, \$66,343, 23c.

White & Johns, \$67,980, 22c.

Oberg Bros., \$70,400, 30c.
John Kristich \$72,000, 33c.

R. L. Oakley, \$75,235, 30c.
J. F. Shepherd, Stockton, \$72,257, 27c.

Rocca & Coletti, San Rafael, \$75,681, 38c.

Nelson Bros., Stockton, \$79,680, 24c.
Geo. Follock Co., Sacramento, \$79,900, 28c.

W. J. O'Neil, San Francisco, \$79,994, 40c.

NAPA, Napa Co., Cal.—Until April 4, new bids will be received by the directors of Joint Highway District No. 7 at the Napa County Courthouse to construct a steel and concrete bridge on the Healdsburg - Calistoga Highway, ten miles east of Healdsburg. Previous bids rejected, the lowest being submitted by J. P. Lawler, 372 7th Ave., San Francisco, at \$15,243. Project involves:

- (1) 463 cu. yds. class A concrete;
- (2) 13 cu. yds. class B concrete;
- (3) \$4,700 lbs. reinforcing steel;
- (4) 300 cu. yds. structure excav.
- (5) 7000 cu. yds. roadway excav.
- (6) remove old bridge.

Plans obtainable from engineer for the district, E. A. Peugh, Courthouse, Santa Rosa.

NAPA, Napa Co., Cal.—City council sets May 4 as date to vote bonds of \$52,000 to finance construction of proposed new bridge in Third Street in addition to the \$5,000 for the proposed Brown Street bridge. The Third St. bridge will cost \$77,000 of which the county of Napa will contribute \$25,000. The Brown Street bridge will cost \$11,000 of which amount, \$5,000 is already in the city treasury.

SAN LUIS OBISPO, Cal.—An election will be held April 6 to vote on a \$12,000 bond issue to widen the present bridge on Essex St. near Pismo St. over San Luis Obispo Creek; and for the widening of the present culvert on North Broad St. over Old Garden Creek.

SAN LUIS OBISPO COUNTY, Cal.—Wm. Lane, San Luis Obispo, at \$1247 awarded contract by State Highway Commission to repair bridge across the Estrella River about 12 miles east of Paso Robles, consisting of one 154-ft. through steel truss span.

PLACER COUNTY, Calif.—W. H. Hauser, 3129 E 7th St., Oakland, at \$32,521 awarded contract by State Highway Commission to construct upgrade crossing under the tracks of the Southern Pacific R. R. at New England Mills, consisting of two concrete abutments with wing walls and grading and surfacing approximately 1000 lin. ft. of roadway with bituminous treated crushed gravel or stone surfacing. Project involves:

- 16,150 cu. yds. excav. without class;
- 1550 cu. yds. sta. platform excav.;
- 9 cu. yds. class A Portland cement concrete;
- 890 cu. yds. class P Port. cem. conc.;
- 9500 lbs. reinf. steel;
- 600 tons crushed gravel or stone (detour surfacing);
- 650 tons crushed gravel or stone (detour surfacing);
- 390 tons bituminous treated crushed gravel or stone surfacing;
- 14 barrels light fuel oil;
- 6 lin. ft. 18-in. corrugated metal pipe;
- 124 lin. ft. 24-in. do;
- 50 lin. ft. 30-in. do;
- 136 lin. ft. 36-in. do;
- 65 mile new property fence;
- 9 each, monuments, complete, in place;

1 lot miscellaneous items of work.
The state will furnish corrugated metal pipe.

MONTEREY COUNTY, Calif.—Following bids received Mar. 25 by State Highway Commission to construct a reinforced concrete bridge across the rapids at 16 miles south of Monterey, consisting of one 150-ft. arch span and five 25-ft. girder spans on concrete abutments and bents, about .28 mile of roadway to be graded:

Hanrahan Co., Standard Oil Bldg., San Francisco.....\$33,325
Oberg Bros., Los Angeles.....210
G. J. Ulrich Const. Co., Modesto 410
Paul N. White, Santa Monica.....485
Rocca & Coletti, San Rafael.....405
A. W. Kitchen, San Francisco. 580
M. B. McGowan, San Francisco 523

LOS ANGELES, Cal.—Until 10 A. M. April 19, bids will be received by the Los Angeles board of public works for the construction of the Sixth viaduct, across the Los Angeles river, in accordance with plans prepared by Merrill Butler, chief bridge engineer, room 657 City Hall.

Bids will be taken on four alternative propositions, viz:

- (1) Entire job complete, lump sum;
- (2) Fabrication and delivery of the structural steel;
- (3) Erection of the structural steel;
- (4) All remaining work, referred to (2) and (3).

List of the quantities which will enter into the construction of this bridge and appurtenances follows:
8,000,000 lbs. reinf. steel;
47,300 cu. yds. class F concrete;
500 cu. yds. class G concrete;
370 15-ft. concrete piles (precast or cast in place);

1200 tons more or less structural steel
3000 cu. yds. more or less gravel, including fill;
2900 feet curb;
23,000 sq. ft. concrete gutter and laid depression;
35,500 sq. ft. cement walk;
Sanitary sewer, storm drain, 8-12 3-in. asph. concrete pavement, as per plans;

Ornamental handrails, etc.;
72 concrete centrifugally cast standards with double bronze rivets.

The bid form for the job complete will include the following items:

- (1) reinf. steel complete in place
- (2) 47,300 cu. yds. class F concrete quantity subject to revision;
- (3) 500 cu. yds. class G concrete;
- (4) reinf. concrete piles, complete in place;
- (5) structural steel, complete in place
- (6) grading, complete in place;
- (7) 2900 ft. curb;
- (8) 23,000 sq. ft. concrete gutter and local depressions;
- (9) 35,500 sq. ft. cement walk;
- (10) construct and remodel sanitary sewers;
- (11) construct and remodel storm drains;
- (12) pavements, complete in place;
- (13) ornamental handrails and pylons, complete;
- (14) lighting standards and light units complete.

This bridge will be of the girder span type, with structural steel truss span, a total length of 3600 ft. and bridge proper will be 46 ft. and the approaches 56 ft. wide. East of the river the bridge will be 60 to 7 ft. above the street level.

SAN BERNARDINO COUNTY, Cal.—Robinson-Joberts Co., River-Strong contract by State Highway Commission to construct bridge over Lytle Creek about 2 miles west of San Bernardino, consisting of five 35-ft. steel stringer spans with concrete deck on steel beams.

MODESTO, Stanislaus Co., Cal.—F. M. Bodenhamer, 354 Hobart St., Oakland, at \$54,000 and 25c cu. yd. excavation, awarded contract by county supervisors to construct bridge over the Stanislaus River north of Oakdale. Will be reinforced concrete construction 390 ft. long, 24 ft. wide, with a 20-ft. roadway.

MODESTO, Stanislaus Co., Cal.—County supervisors petitioned by delegations of various county chambers of commerce to take early action in financing a proposed bridge over the San Joaquin river near Patterson. The cost of the span is estimated at \$150,000. Geo. Macomber is county surveyor.

IRRIGATION PROJECTS

TURLOCK, Stanislaus Co., Cal.—Until April 13, 3 P. M., bids will be received by Anna Sorensen, secretary, Turlock Irrigation District, for improvements in Improvement District No. 74, involving under:

Schedule No. 1—26,115 sq. ft. 2-inch concrete canal lining;

Schedule No. 2—Construct 9 concrete structures, involving 10 cu. yds. concrete.

Certified check 5 per cent payable to district required with bid. Plans on file in office of secretary.

TURLOCK, Stanislaus Co., Calif.—Until April 13, 2 P. M., bids will be received by Anna Sorensen, secretary, Turlock Irrigation District, for improvements in Improvement District No. 29, involving:

Schedule No. 1—17,670 sq. ft. 2-inch concrete canal lining;

Schedule No. 2—4 concrete structures, involving 4.74 cu. yds. concrete.

Schedule No. 3—17 concrete structures, involving 17 cu. yds. concrete.

Above work will be paid for in cash by property owners.

Certified check 5% payable to district required with bid. Specifications on file in office of clerk.

TURLOCK, Stanislaus Co., Calif.—Until April 13, 2 P. M., bids will be received by Anna Sorensen, secretary, Turlock Irrigation District, for improvements in Improvement District No. 43, involving:

Schedule No. 1—20,244 sq. ft. 2-inch concrete canal lining;

Schedule No. 2—3 concrete structures, involving 2.5 cu. yds. concrete;

Schedule No. 3—14 concrete structures, involving 15 cu. yds. concrete;

Schedule No. 4—1 wooden bridge.

Schedules Nos. 1 to 3 inclusive will be paid for in cash by property owners.

Certified check 5% payable to district required with bid. Specifications on file in office of clerk.

STREET LIGHTING SYSTEMS

SAN FRANCISCO.—Until April 15, 2:30 P. M., bids will be received by S. J. Hester, secretary, Board of Public Works, to install ornamental street lighting system on Lower Road of Great Highway and on Laguna Honda Blvd. and involving:

(1) erect and assemble 75 ornamental concrete standards;

(2) furnish and install 75 luminaries and lamps complete with compensators.

(3) 9, same as item 2, without compensators.

(4) furnish and install 6.6, to 20-amp. series transformers.

(5) 75 concrete foundations for standards with conduit beds;

(6) furnish and install 3,000 ft. ½-in. black iron pipe conduit;

(7) furnish and install 29,100 ft. 5,000-volt single conductor, solid No. 8 R and L C Wire.

(8) furnish and install 600-volt single conductor, stranded No. 8 RCDB wire.

Bond of \$4,000 required of the successful bidder. Certified check 10% payable to Clerk of the Board of Supervisors required with bid. Plans obtainable from Bureau of Engineering, 3rd floor, City Hall.

LIVERMORE, Alameda Co., Cal.—Until April 6, 8:15 P. M., bids will be received by Elmer G. Still, town clerk (940), to install electrolites together with underground system in portions of West First St., East First St. and South Livermore Ave., involving 45 Westinghouse Hollowspan Granite electrolites, Belmont Design 15, Style No. 338225 with type C¹⁵ filter, together with transformers, light units, etc., 1911 Act. Certified check 10 per cent payable in city required with bid. Specifications on file in office of clerk. L. E. Wright, city engineer.

YREKA, Siskiyou Co., Cal.—City trustees contemplate installation of ornamental lighting standards at street intersections. About 45 standards will be installed.

SAN FRANCISCO.—Butte Electric & Manufacturing Co., 956 Folsom St., at \$4,340 submitted lowest bid to secretary, Board of Public Works, to install ornamental street lighting system in Berna Ave., involving:

39 ornamental iron standards, erect, paint and assemble; 39 luminaries and lamps, furnish and install; 30 concrete foundations with conduit beds; 11,800 5,000-volt single conductor R and L C wire; 2 series transformers, furnished and installed. Following is a complete list of the bids:

Butte Elec. & Mfg. Co. \$4,340

H. C. Reid. 4,439

Butte Elec. & Equip. Co. 4,485

A. C. Rice. 4,574

R. Flatland. 5,350

Bids held under advisement.

MACHINERY AND EQUIPMENT

OAKLAND, Calif.—Following is a partial list of prospective bidders to construct and install marine type cargo hoist and ramp for Inland Waterways Terminal at the foot of Webster Street, bids for which will be opened by the City Port Commission, 424 Oakland Bank Bldg., March 30, 4:30 P. M.: Otis Elevator Co., 1 Beach St., San Francisco.

Joshua Hendy Iron Works, 200 Pine St., San Francisco.

United Iron Works, 580 2nd Street, Oakland.

Independent Iron Works, 1824 Chase St., Oakland.

RIVERFRANK, Stanislaus Co., Cal.—City trustees plan purchase of a road grader. Committee has been appointed to secure data on such equipment.

BOULDER CITY, Nev.—Reports indicate that materials and supplies purchased by the Six Companies, Inc., for use on the Hoover Dam Project will be purchased by competitive bidding. Miscellaneous hardware, pipe, oils, greases, and small tools are to be purchased in the open market. About \$4,500,000 will be expended for such purposes. About \$5,000,000 will

be expended for equipment including eight standard locomotives, 79 dump cars, 30 motor trucks, 15 2-yard electric shovels, six 4-yard concrete mixers, 10 air compressors each with a capacity of 2500 cu. ft. per minute, seven cable ways, a Diesel electric stand-by plant with 2500 H.P. capacity, a complete gravel plant with capacity of 700 tons sand and gravel per hour, derricks, hoists, etc.

ANTIOCH, Contra Costa Co., Cal.—Until April 13, 8 P. M., bids will be received by J. E. McElheney, town clerk, to furnish and deliver one motor-driver truck according to specifications on file in the office of clerk. Certified check 10 per cent payable to town required with bid.

SACRAMENTO, Cal.—Following bids received March 23 under Requisition No. 8574 by State Bureau of Purchases, Sacramento, to furnish and deliver Williams, Colusa County, one 14-yard straight Diesel engine driven heavy duty power shovel with a working weight of approximately 30,000 lbs. Industrial Brownhoist Co., San Francisco, \$15,000.

Northwest Engineering Co., San Francisco, \$15,550 (gas shovel, not in accordance with specifications).

Edward R. Bacon, San Francisco, \$16,115 (gas shovel, not in accordance with specifications).

Osgood Co., Oakland, \$16,235.

Harnischfeger Sales Co., San Francisco, \$16,744, Model 650; \$20,452 Model 700B.

Jenison Machinery Co., San Francisco, \$17,940.

A. L. Young Machinery Co., S. F., \$16,970.

R. A. Bodin Co., Sacramento, \$18,000. Garfield & Co., San Francisco, \$18,465.

Harron, Rickard & McCone Co., San Francisco, \$22,135 (discount of \$522.00 if paid within ten days).

Bucyrus - Erie Co., San Francisco, \$22,510.

FIRE EQUIPMENT

LINDSAY, Tulare Co., Cal.—Election will be called shortly by city trustees to vote bonds of \$5,000 to finance purchase of a motor pumper for the fire department.

LOS ANGELES, Cal.—Pioneer Rubber Mills, 822 E 3rd St., awarded contract by city purchasing agent, Thos. Oughton, to furnish cotton rubber lined fire hose under Specifications No. 2390; 30,000 ft. 2½-in., and 20,000 ft. 1½-in. hose.

RESERVOIRS AND DAMS

LAGUNA BEACH, Orange Co., Cal.—A. J. Stend, chief engineer of the Laguna Beach County Water District, is preparing plans for a storage reservoir upon which bids will be called probably within the next three weeks. The proposed structure will be of reinforced concrete and have a capacity of between 300,000 and 500,000 gallons.

PASADENA, Los Angeles Co., Cal.—Application for a permit to construct a low type dam in San Gabriel Canyon has been made to the state engineer at Sacramento by Samuel B. Morris, Pasadena water superintendent. Plans, prepared by C. E. Pearce, under the supervision of Louis Hill and Fred A. Noetzel, consulting engineers, show a structure 302 ft. high from foundations to spillway, 750 ft. in length at the crest and 217 ft. at the spillway crest. It will be 20 ft. thick at the top and 27.72 ft. in breadth at the bottom. The reservoir will serve to impound 40,000 acre feet of water. The estimated cost is \$5,770,000.

PIPE LINES, WELLS, ETC.

OAKLAND, Cal.—Steel Tank & Pipe Co., 1100 4th St., Berkeley, at \$16,800 awarded contract by East Bay Municipal Utility District, 512 Sixteenth St., Oakland, to furnish and deliver 6000 feet of electric welded sheet steel pipe.

EXETER, Tulare Co., Cal.—Until April 8, 5 P. M. (to be opened 8:15 P. M.), bids will be received by T. E. Aubrey, city clerk, to drill one well 600 feet in depth and cased with double No. 12 gauge, 14-inch casing. Certified check 5 per cent payable to mayor required with bid. Specifications on file in office of clerk.

SAN FRANCISCO—Bids will be asked about April 10, to be opened about May 6, by S. J. Hester, secretary, Board of Public Works, to construct a pipe line across the San Joaquin Valley to serve as an emergency supply line from Hetch Hetchy via the Altamont Pass without waiting for the completion of the Coast Range tunnels. The line would be about 46½ miles in length and will exclusive of the Red Mountain Bar cost between \$7,000,000 and \$7,500,000, siphon, to cost an additional \$250,000.

VALLEJO, Solano Co., Cal.—Until April 4, 11 A. M., bids will be received by A. E. Edgumbe, city clerk, to replace existing timber trestles supporting the 14-inch Green Valley water supply main. Certified check 10 per cent payable to city required with bid. Plans on file in office of clerk. T. D. Kilkenny, city engineer.

OAKLAND, Cal.—Until April 3, 5:30 P. M., bids will be received by John Kimball, secretary, East Bay Municipal Utility District, 512 16th St., to furnish and deliver gate valves for distributing system. Specifications obtainable from above office.

SEWERS AND SEWAGE DISPOSAL PLANTS

FRESNO, Fresno Co., Cal.—City council declares intention (109-D) to construct 6-inch vitrified clay pipe sewer in Coast avenue including one cement concrete manhole; 4-in. on 6-in. wythes. 1911 Act. Hearing April 9, H. S. Foster, city clerk C. C. Valkenburg, city engineer

EL CERRITO, Contra Costa Co., Cal.—City Engineer Harry D. Chapman making surveys for sewers in the Tapeccott Park area to serve as a residential district.

SAN FRANCISCO—C. B. Eaton, 715 Ocean Ave., at \$40,050 awarded contract by Board of Public Works to construct reinforced concrete sewer at crossing of Sunset Blvd. and Lincoln Way, involving:
844 lin. ft. 7-ft. 3-in. by 9-ft. reinf. concrete sewer, \$34.
356 lin. ft. 5-ft. 6-in. circular do. \$21.
108 lin. ft. 18-in. V.C.P. sewer, \$6.
4 brick or concrete manholes, \$60.
1 taper connection from 5-ft. 6-in. sewer to 7-ft. 3-in. by 9-ft. sewer, \$450.
1 taper connection from 7-ft. 3-in. sewer to 6-ft. 6-in. sewer, \$300.
1 taper connection from 5-ft. 6-in. sewer to 6-ft. 6-in. sewer, \$250.

OAKLAND, Calif.—City council has started proceedings to call an election to vote bonds to \$3,550,000, of which \$1,300,000 is to finance construction of sewers. Walter N. Frickstad is city engineer.

REDWOOD CITY, San Mateo Co., Cal.—City Engineer C. L. Dimmitt is making surveys for extension of sewer system in Valota Road.

PHOENIX, Ariz.—C. C. Kennedy, Call Bldg., San Francisco, has been named as sole consulting engineer in connection with the city of new \$137,000 sewer and disposal system. Under the original arrangements, the firm of Holmquist and Madden was to work in conjunction with Kennedy. The project is now in the hands of the city of the actual cost of the project, exclusive of land, rights of way and engineering fees. The proposed project will include a sewage treatment W. J. Jameson, city engineer, with C. C. Kennedy, consulting engineer. The latter will receive a fee of 4 per cent, and disposal system, and new sewer lines within the city.

SEATTLE, Wash.—Bids will be asked shortly by Board of Public Works to construct Lake Washington intercepting sewer system; estimated cost \$190,000. Will involve approximately 20,000 ft. triple strength vitrified clay pipe varying from 8 in. to 24 in., in addition to the construction of three pumping stations.

SAN LUIS OBISPO, Cal.—An election will be held April 6, to vote on an \$18,000 bond issue for the construction of digester equipment, distributing mains, and other additions to the sewage disposal plant and city farm.

LA MESA, San Diego Co., Cal.—Until 5 P. M., April 14, bids will be received by the La Mesa city council for one sewage chlorinator and platform scale, having a capacity of the rate of 100 thousand gallons of flow of sewer per 24 hours, bidder to furnish engineer for supervising installation, city to furnish necessary common labor and material for erecting chlorinating house and chlorinator. Bids are requested on both the chlorinator and dry feed types of standard chlorinators. O. E. Lapum, city clerk.

STOCKTON, San Joaquin Co., Cal.—City Const. Co. at \$3,750 and \$3,700 submitted low bid to county supervisors to construct sewer system at corner of fair grounds. Complete list of bids, all taken under advisement, follows:
City Const. Co. \$3,750; \$3,700
F. E. Goodell 5,146; 4,996
John Hachman 5,400; 5,100
Martin Murphy 5,755; 5,235
Geo. C. DeGolyer 6,300; 5,500

PALO ALTO, Santa Clara Co., Cal. Board of Public Works is considering two plans for sewage disposal, one submitted by the Burns-McDonnell-Smith Engineering Co. of Los Angeles calling for a complete treatment plant at a cost of \$300,000, which plan City Engineer J. F. Byxbee has modified, reducing the cost to \$93,720 for the city of Palo Alto and \$45,650 for the Stanford University. The Stanford engineers plan provides for the construction of a pumping plant approximately 600 feet east of the junction of Arroyo and East Willow roads, the erection of a skimming chamber on the marsh land to the east, and the laying of a 22-inch wood stave pipe outfall sewer which would terminate about 3,500 feet north of Sand Point at the mouth of Mayfield slough and approximately 1,000 off shore in the water of the bay.

WATER WORKS

FRESNO, Fresno Co., Cal.—Thompson Constr. Co., 2150 G St., Fresno, at \$7720 awarded contract by county supervisors to furnish and install

pumps, pressure tanks and miscellaneous items for Fresno County Water District No. 1. Perry F. Brown, engineer, 512 Griffith-McKenzie Bldg. Fresno.

REDWOOD CITY, San Mateo Co., Cal.—Campbell & Budlong, San Jose at \$2100 awarded contract by city council to furnish and install two deep well turbine pumps in open bore wells.

REDWOOD CITY, San Mateo Co., Cal.—Nash, Englehart Co., Shafter Bldg., San Francisco, at \$1300 awarded contract by city council to furnish and install two pumps and motors.

LOS ANGELES, Cal.—Contracts for furnishing welded steel water pipe under Specification No. 2355 were awarded by city purchasing agent, as follows:

Western Pipe & Steel Co.—Proposals (1), items 1 and 2; Proposal (2), item 5, 6, and 7; amount of contract, \$240,772.

Consolidated Steel Corp., Ltd.—Proposals (2), items 2 and 3 amount of contract, \$183,515.

Unit bids submitted in issue of

LAGUNA BEACH, Orange Co., Cal.—Until 7 p. m., April 7, bids will be received by the Laguna Beach County Water District for furnishing a centrifugal pump of 600 G. P. M. operating against a head of 340 ft. Certified check or bond, 10 per cent. A. J. Stead is the chief engineer.

LOS ANGELES, Cal.—Until 11 a. m., April 1, bids will be received by the Los Angeles city purchasing agent Thomas Oughton, for furnishing galvanized wrought steel pipe under Specification No. 2357. P. M. Hewitt Spur, for department of water and power. The items are:

Item (1) one carload galvanized wrought steel pipe to be delivered to Los Angeles, approximately June 1, 1933, comprising the following quantities and kinds of pipe:

- (1) 9000 ft. ¾-in. std. pipe with plain ends;
- (2) 4000 ft. 1-in. std. pipe with plain ends;
- (3) 5000 ft. 1½-in. std. pipe complete with threads and couplings;
- (4) 1000 ft. 1½-in. std. pipe complete with threads and couplings;
- (5) 2500 ft. 2-in. std. pipe complete with threads and couplings;
- (6) 500 ft. 3-in. std. pipe complete with threads and couplings;
- (7) 500 ft. 4-in. std. pipe complete with threads and couplings;
- (8) 10,000 ft. ¾-in. extra heavy pipe with plain ends;
- (9) 5000 ft. 1-in. extra heavy pipe with plain ends;
- (10) 500 ft. 1½-in. extra heavy pipe with plain ends.

Item (2) same as item (1) July 1 delivery.

Item (2) same as item (1) August 1 delivery.

Item (4) same as item (1) September 1 delivery.

Item (5) same as item (1) October 1 delivery.

Item (6) same as item (1) November 1 delivery.

Item (7) same as item (1) December 1 delivery.

KLAMATH FALLS, Oregon—Until 2 P. M., April 8, bids will be received by the U. S. Bureau of Reclamation, 1441 Welton St., Denver, Colo., for furnishing one electric motor-driven vertical pumping unit, having a discharge capacity of 15 cu. ft. per second under a total effective head of 45 ft., for Dry Lake Pumping Plant No. 2, Langell Valley Division, Klamath Project, Oregon.

BOULDER CITY, Nev.—Until 2 P. M., April 1, bids will be received by the U. S. Bureau of Reclamation, 1441 Yelton St., Denver, Colo., for furnishing high pressure pipe line material for Boulder City water supply soulder Canyon Project, in accordance with Specifications No. 514-D.

Bids will be taken on the following schedules and quantities of pipe:

SCHEDULE NO. 1

Seamless Line Pipe, American Petroleum Institute Grade "B," Plain Ends for Dresser Type Couplings:
Item No. 1: 445 ft. 10½-in. O. D., of thicknesses and lengths shown in the specifications;

2842 ft. 12½-in. O. D., of thicknesses and lengths shown in specifications.

Seamless Line Pipe, American Petroleum Institute Grade "B," Plain Ends for Dresser Type Couplings, open Bent to the Radial Shown in specifications:

Item 2: 228 ft. 10½-in. O. D.

1020 ft. 12½-in. O. D.

SCHEDULE NO. 2

Seamless Line Pipe, American Petroleum Institute Grade "B," Plain Ends for Dresser Type Couplings:
Item 3: 21,466 ft. 12½-in. O. D., of thicknesses and lengths shown in the specifications.

Seamless Line Pipe, American Petroleum Institute Grade "B," Plain Ends for Dresser Type Couplings, open Bent to the Radial Specified.

Item No. 4: 449 ft. 12½-in. O. D., of thickness, radius of bends, etc., shown in specifications.

Substitutions will be allowed under schedule 2 as follows:

12½-in. O. D. lap-welded line pipe all thickness 0.300-in.

OR

12½-in. O. D. Republic resistance, old pipe, wall thickness 0.279-in.

SCHEDULE NO. 3

Seamless Line Pipe, American Petroleum Institute Grade "B," Plain Ends for Dresser Type Couplings:

Item No. 4: 8720 ft. 12½-in. O. D., of thickness, length, as shown in the specifications.

Seamless Line Pipe, American Petroleum Institute Grade "B," Plain Ends, Shop Bent to the Radius Specified Below:

Item No. 6: 480 ft. 12½-in. O. D., of thickness, radius, etc., as shown in specifications.

Substitutions will be allowed under schedule No. 3 as follows:

12½-in. O. D. lap-welded line pipe, nominal thickness 0.300-in.

OR

12½-in. O. D. Republic Resistance old pipe, wall thickness 0.279-in.

SCHEDULE NO. 4

(Alternative to Schedule No. 5)

Seamless Line Pipe, American Petroleum Institute Grade "B," Plain Ends for Dresser Type Couplings:

Item No. 7: 12,746 ft. 12½-in. O. D., of thickness; length as shown in the specifications.

Seamless Line Pipe, American Petroleum Institute Grade "B," Plain Ends for Dresser Type Couplings, open Bent to the Radial Shown in specifications:

Item No. 8: 3949 ft. 12½-in. O. D., of thickness, length and radius shown in specifications.

Substitutions will be allowed under schedule No. 4 as follows:

12½-in. O. D. lap-welded line pipe, nominal wall thickness 0.300-in.

OR

12½-in. O. D. Republic Resistance old pipe, wall thickness 0.279-in.

SCHEDULE NO. 5

(Alternative to Schedule No. 4)

Spiral Lock Seam Lap-Welded Copper Manganese-Iron Pipe, No. 10 U. S. gauge with Plain Ends for Dresser Type Couplings:

Item No. 9: 16,695 ft. 12-in. I. D., of thickness, length and radius of bends as shown in specifications.

SCHEDULE NO. 6

Sleeve Type Pipe Couplings, Each

Coupling to Consist of One Middle Ring, Two Follower Rings, Two Rubber Wedge Section Gaskets and Eight Bolts for Water Pipe Line Service, Dresser Style 38 or Equal.

Item No. 10: 150 ¾x7-in. couplings for 10½-in. O. D. pipe, with ¾x½x1½-in. extra heavy gaskets.

Item No. 11: 50 5½x7-in. couplings for 12½-in. O. D. pipe, with 5½x½x1½-in. extra heavy gaskets.

NOTE

Schedule 2 is alternative to Schedules 3 and 4 combined or Schedule 3 and 5 combined, and award of contract will be made as follows:

Schedules 1, 2 and 6, or

Schedules 1, 3, 4 and 6, or

Schedules 1, 3, 5 and 6.

FRESNO, Fresno Co., Cal.—Thompson Construction Co., 2150 G St., Fresno, at \$7720 submitted low bid to the county supervisors to furnish and install pumps, pressure tanks and miscellaneous items for Fresno County Water District No. 1. Perry F. Brown, engineer, 512 Griffith-McKenzie Bldg., Fresno. Complete list of bids follows:

Thompson Const. Co., \$7720

E. W. Redman, Fresno, \$350

Geo. G. Wood, Fresno, \$694

Taken under advisement until Mar.

March 19.

LOMPOC, Santa Barbara Co., Cal.—Pomona Pumping Co., 322 E. 3rd St., Los Angeles, awarded contract by city at \$1629 to furnish one deep well turbine pump.

MILLBRAE, San Mateo Co., Cal.—George DeGolyer, Federal Telegraph Bldg., at \$7898.25 awarded contract by the Millbrae Public Utility District to construct water distributing system. Project involves 3450 ft. 6-in. cast iron pipe, 150 4-in. do, 3275 ft. 2-in. galvanized wrought iron pipe, 4 6-inch gate valves, 15 4-in. do, 25 2-in. do, 1 reinf. cone meterf manhole, 45 valve boxes, install fire hydrants furnished by the district.

A complete list of bids on this project was published in our issue of Mar. 14.

MARTINEZ, Contra Costa Co., Cal.—Until April 6, 11 A. M., bids will be received by county supervisors to furnish and install one deep well turbine pump for Contra Costa County Water Works District No. 1. Specifications on file in office of the county clerk.

GRANTS PASS, Oregon.—Following contracts awarded by city council in connection with municipal water system:

General Construction & Filter Plant to Hargreaves and Lindsay, Eugene, Ore., \$33,707. (Oliver S. Almire of O'Brien, Ore., was low at \$32,912 but desired longer time for completion.)

Filter Plant to California Filter Co., \$14,148.

Pump Installation and Wiring to Helt and O'Donnell, Portland, at \$3083.

Barr and Cunningham, engineers, Portland, Ore.

CALIFORNIA—Recommendations of the legislative water committee, setting forth projects costing approximately \$188,000,000 for the maximum conservation and utilization of water in California have been announced. The units proposed, with estimated costs are as follows:

Kenneth reservoir, after bay and power plant, \$84,000,000.

Contra Costa conduit, \$2,500,000.

Delta Cross channel, \$4,000,000.

San Joaquin pumping system, \$15,500,000.

Aqueducts from Friant reservoir, \$29,900,000.

Right-of-way, water rights and general expense, \$3,000,000.

Santa Ana river flood control and conservation project, \$30,000,000.

Total, \$188,000,000.

GLENDORA, Los Angeles Co., Cal.—Until 8 P. M., March 31, bids will be received by city council to furnish Class B pipe as follows:

(1) 1100 ft. 12-in. c. i. pipe;

(2) 2400 ft. 8-in. c. i. pipe;

(3) 2000 ft. 6-in. c. i. pipe;

(4) 4000 ft. 4-in. black stand screw pipe.

Certified check, 10%. Fred Long, city clerk.

SONOMA, Sonoma Co., Cal.—Westco Chippewa Pump Sales Co., 551 Polowin St., San Francisco, at \$395 submitted low bid to the city trustees to furnish and install pumping system in the city plaza. Complete list of the bids follows:

Westco Co., San Francisco, \$395.00

Mercy & Peterson, Sonoma, \$403.50

(alternate), \$453.50

Garry's Garage, Sonoma, \$408.29

Cline Electric Works, \$450.00

Scott Machinery Co., \$512.00

Jacuzzi Bros., \$654.50

Byron-Jackson Co., \$690.00

Bids were received:

PUMP: Equipped with roller or ball bearing; bronze rotor; c. i. case and cover plate; pump with capacity of 100-gals. per minute when pumping into pneumatic tank against a pressure of 40-lbs. Pump to be mounted on cast iron base. Each raised edges to catch drip; pump to be direct connected to electric motor by means of flexible coupling.

MOTOR: Of standard make, 220-volts, 3-phase, 60-cycle.

PRESSURE REGULATOR: Of Industrial Control, two-pole type.

TANK: California Code Tank of 550 gallons capacity, complete with water gauge and pressure gauge and openings for pump connections and drain.

All bids taken under advisement.

MISCELLANEOUS CONSTRUCTION

PALO ALTO, Santa Clara Co., Cal.—City Engineer J. F. Blythe is preparing plans for a 4-lane subway at the Embarcadero Road crossing of the Southern Pacific Railroad.

The City Planning Commission having selected that site. In addition to the four 10-foot traffic lanes, the subway would embody two wide sidewalks and a bridge over Alma Street. Condensation of the entire block bounded by Lincoln Avenue, Embarcadero Road, High Street and Alma Street, is favored as a part of the project to insure safety and convenience near the subway. A rough estimate of the city's share of the cost places it at \$85,000, exclusive of purchasing the block containing seven blocks with an estimated value of \$40,000. The Southern Pacific has expressed a willingness to pay half on the construction of a two-lane subway, estimated to cost \$124,000.

PLAYGROUNDS & PARKS

OKLAND, Calif.—City council has started proceedings to call an election to vote bonds of \$3,550,000, of which \$300,000 is to finance increase in park and recreation facilities. Another proposition will provide \$500,000 for bringing clean salt water into Lake Merritt, with the establishment of a bathing beach and other recreational centers. Walter N. Erickstad is city engineer.

POSITION WANTED

STENOGRAPHER Bookkeeper, desires position with Architect or Contractor. Experienced in Building Construction. General Contracting and Architectural Work. Phone Fillmore 7211—Miss Madden

SANTA ROSA, Sonoma Co., Cal.—Until April 7, 5 P. M., bids will be received by Ney L. Donovan, city clerk, to construct a cascade and lily pool in Fremont Park. Certified check 10% payable to city manager required with bid. Plans obtainable from office of city manager.

LOS ANGELES, Cal.—Architect Lloyd Wright, 383 N. Doheny Dr., West Hollywood, completed working plans for work to be done in Barnsdall Park for the Los Angeles Playground Dept. Work will consist of colored stone terraces, open air children's theatre, reinforced concrete wading pool, altering present Barnsdall building into a gymnasium and swimming pool. Estimated cost of work is \$60,000. The park department will handle the work.

ALAMEDA, Alameda Co., Cal.—Until April 7, 3 P. M., bids will be received by W. E. Varcoe, city clerk, to resurface south tennis court at Lincoln Park. Certified check 10 per cent payable to city required with bid. Plans on file in office of clerk.

SACRAMENTO, Cal.—A. Teichert & Son, 1846 37th St., Sacramento, at \$1095 awarded contract by city council to construct tennis court at Southside Park.

STREETS AND HIGHWAYS

ORANGE COUNTY, Cal.—Griffith Co., L. A. Railway Bldg., Los Angeles, at \$25,807 awarded contract by State Highway Commission to grade and pave with Portland cement concrete, 0.9 mile at Galivan Overhead Crossing.

HUMBOLDT COUNTY, Nevada—Until April 8, 3 P. M., bids will be received by S. C. Durkee, state highway engineer, Carson City, for grading, constructing street areas and placing surfacing material between Winnemucca and 6 miles west of Stonehouse. Certified check 5% required with bid. Plans obtainable from engineer on deposit of \$15, of which \$10 is returnable. Plans on file in office of U. S. Bureau of Public Roads, 461 Market St., San Francisco.

SALINAS, Monterey Co., Cal.—Union Paving Co., Call Bldg., San Francisco, submitted lone bid to the Board of Public Works to improve Head St. bet. Shields and Sargent Sts., involving: 175 lin. ft. armored cone. curb, \$1.40; 6-in. V.C.P. side sewer, \$1.50; 2625 sq. ft. 6-in. class E concrete pavement, \$32.

SAN FRANCISCO—M. Bertolino, 25 Shotwell St., at \$175 awarded contract lone bid to Board of Public Works to construct 5,000 sq. ft. of cement sidewalks in State St. bet. Levant and Castro Sts., etc.

LOS ANGELES COUNTY, Cal.—Following bids received Mar. 25 by State Highway Commission to grade and oil 7.5 miles between Bailey's Ranch and Neenach School.

MARIN COUNTY, Cal.—O. A. Lindberg, 448 North American St., Stockton, at \$7450 awarded contract by

superintendent of Lighthouses, San Francisco, for constructing 2.5 mile of road in Marin County, extending from Drake's Bay into the Point Reyes Lighthouse Reservation; road to have surface of decomposed granite approx. 13 ft. wide.

MONTEREY COUNTY, Cal.—Ow Truck Co., Compton, awarded contract by U. S. Forest Service, San Francisco at \$22,497.66 for grading and installing culverts in approximately 6.6 miles of road in Santa Barbara National Forest in Monterey County, involving:

- (1) 61,185 cu. yds. excav., unclassified without overhead, \$355.
- (2) 906 lin. ft. 12-in. corr. metal culverts, hatched and in place, \$52.
- (3) 488 lin. ft. 15-in. do, \$50.
- (4) 76 lin. ft. 24-in. do, \$75.

NAPA, Napa Co., Cal.—Until April 6, 7:30 P. M., bids will be received by H. H. Thompson, city clerk, (538) to construct concrete culverts in 8th St. bet. River St. and Soscol Ave. 1911 Act. Certified check 10% payable to city required with bid. Plans on file in office of clerk. H. Harrold, city engineer.

MODESTO, Stanislaus Co., Cal.—County Surveyor Geo. Macomber has completed plans to construct 2½ ft shoulders on a 3½ mile strip of highway on the Crows Landing Road and for resurfacing of the same strip. The cost is estimated at \$23,000. Shoulders will be 5-inch concrete.

SISKIYOU COUNTY, Calif.—Until April 16, 2 P. M., bids will be received by U. S. Bureau of Public Roads, 461 Market St., San Francisco, to grade 9.913 miles of Section "A" of Route 10, Weed-Medicine Lake National Forest highway in Shasta National Forest, involving:

- (1) 61 acres clearing;
 - (2) 130,000 cu. yds. unclass. excav.;
 - (3) 754 cu. yds. unclass. excavation for structures;
 - (4) 71,000 sta. yds. overhaul;
 - (5) 9,905 miles finishing extra graded road;
 - (6) 89 cu. yds. class A concrete;
 - (7) 40 cu. yds. class B concrete;
 - (8) 78 cu. yds. class D concrete;
 - (9) 19,000 lbs. reinforcing steel;
 - (10) 2,504 lin. ft. corr. galv. meta.
 - (11) 64 r.w. monuments.
- Plans obtainable from above offer on deposit of \$10, checks for same to be made payable to Federal Reserve Bank of San Francisco.

SAN FRANCISCO—Western Pipe & Steel Co., 444 Market St., San Francisco, at \$681.10 submitted low bid to U. S. Forest Service to furnish culverts in connection with Santa Barbara National Forest highway project. Other bids: California Corrugated Culvert Co., Berkeley, \$838.31; Golden Gate Culvert Co., Oakland, \$780.93.

PLUMAS-LASSEN COUNTIES, Cal.—As previously reported, bids will be received April 15 by the State Highway Commission to surface with untreated crushed gravel or stone 25.3 miles between Chester and Willards. Subject involves:

- 1450 cu. yds. roadway excav. without class;
- 1590 cu. yds. imported borrow (shoulders);
- 482 stations side borrow (shoulders);
- 5440 sta. yds. overhaul;
- 21,300 cu. yds. untreated crushed gravel or stone (Location A);
- 1420 cu. yds. untreated crushed gravel or stone surfacing (Location B);
- 1050 tons cut-back asphalt, Grade B;
- 15.2 miles mixing cut-back asphalt and surfacing material;
- 1233 lin. ft. timber guard rail to be reset;
- 1175 lin. ft. woven wire fence to be reset;
- 934 M. gals. water applied to surfacing;
- 758 stations preparing subgrade and finishing roadway.

SANTA BARBARA, Cal.—Atkins & Arch. 1241 Ethel St., Glendale, at 175 submitted low bid to city council to improve Canyon Perdido St., involving in the main 150,000 sq. ft. 8-5-8-in. conc. pavement at 22.5c. Taken under advisement.

SAN FRANCISCO.—Architect H. A. Anton, 525 Market St., desires graded bids in connection with the proposed women's college to be constructed on Lone Mountain, Turk and Park Sts., San Francisco, for the San Francisco College for Women. Approximately 170,000 yards are involved.

CHICO, Butte Co., Cal.—Gilmore Oil Co., Los Angeles, awarded contract by city council to furnish three grades of oil for resurfacing streets. The oil prices will be bought at following price during the present year: No. 1, 80 cents a barrel, for which transportation price to Chico will be .667 per barrel; grade 2, 65 cents a barrel; transportation cost; grade 3, asphaltum road oil, \$9.50 a ton, with 30 the transportation cost per ton. Transportation is to be purchased the open market.

- (2) 344 cu. yds. class B 2500-lb. corr. walls, stairs and tallustrade;
- (3) 27,000 lbs. bar reinf. steel;
- (4) 1171 lin. ft. 12-in. V.C.P. sewer;
- (5) 792 lin. ft. 8-in. V.C.P. sewer;
- (6) 467 lin. ft. 6-in. V.C.P. sewer;
- (7) 39 15x6-in. Y or T branches;
- (8) 26 8x6-in. Y or T branches;
- (9) 11 brick manholes;
- (10) 10 brick catchbasins;
- (11) 17 lin. ft. 10-in. V.C.P. culvert;
- (12) 3300 lin. ft. 2x16-in. redwood curbs;
- (13) 146 lin. ft. 2x8-in. redwood curb;
- (14) 42,360 sq. ft. 8-in. Wa curb at macadam pavement;
- (15) 16,221 sq. ft. 4-in. Wa curb at macadam sidewalk;
- (16) 3 red warning reflections.

Certified check 10 per cent to clerk of the Board of Supervisors required with bid. Plans obtainable from B. Hall, on deposit of \$10, returnable.

We all know of the slogan—"Concrete for Permanence"—

"Wood for Permanence"—how about it?

A current magazine article calls attention to the fact that the recently opened tomb of the ancient Egyptian Queen Hetepheh, supposed to contain the oldest furniture in existence well illustrates the effects of tin on the long-lived utility of wood. The tomb was built about 5,000 years ago. The articles found in the tomb included the carrying chair in which the Queen was transported on the shoulders of slaves through the streets of ancient Memphis. This chair is of wood embossed with gold. It was the best preserved piece found in the tomb. One of the panels was perfectly preserved, although it has shrunk 1 one-sixth of its normal volume. Another piece of furniture found in the tomb was the Queen's gold-cased bed. Parts of the bed were well preserved and in its restored form it contained the original wood in two of the legs. The species of the material had not been accurately ascertained, but it appears to have been in part Syria fir or cedar, and in part a local EGYPTIAN hardwood.

"Wood for Permanence"—how about it?

A Pointer on **P**rinting

Printing matter is not a commodity—it is a necessity, like the salt in our soup. Without printing matter modern business is unthinkable. The more we invest in printer's ink—that is *in the right kind of printing*—the greater the results. Therefore it is of vital interest to select the RIGHT kind of printer. — There are printers AND printers—but few are self-containing in mechanical and creative ability.— Put us on the track, and, like this pointer in suspense, we will bring back the bacon.

NEW BUILDINGS OF UTILITIES SUBJECT TO LOCAL TAXATION

Various California cities and counties learned last Tuesday they could add thousands of dollars to treasuries under a state supreme court decision holding buildings of public utilities corporations under construction are subject to local taxation.

The decision was handed down in a test case brought by the Southern California Telephone Company and the Pacific Telephone and Telegraph Company against Los Angeles county. Under protest the companies paid \$78,384 in taxes on exchange buildings under construction.

They brought suit to recover and the trial court ruled in favor of the utilities but the supreme court reversed the finding. The plaintiffs contended the assessed buildings were "operative property" and were subject only to state taxation, assessed on a basis of utility receipts.

Written by Justice W. H. Langdon and concurred in unanimously, the state supreme court's ruling stated in part:

"Since property under construction is not in use and does not contribute to gross receipts, it escapes taxation altogether unless taxed locally; this court holds it should be locally taxed."

FEDERAL TRADE BODY SEEKS CEMENT DATA

A request has been received by Senator Herbert C. Jones, San Jose, from the Federal Trade Commission for full reports of the proceedings of the legislative committee which in 1929 investigated the price of cement in California.

Senator Norris of Nebraska has presented in congress a resolution asking for an investigation of cement prices throughout the country, and the probe is expected to ascertain whether or not prices are fixed by agreement between cement companies.

The senate, at its 1929 session, adopted a resolution by Senator Henry E. Carter, Los Angeles County, calling for an investigation of the operations of the so-called cement trust in California.

Senator J. M. Inman of Sacramento, was made chairman. The committee gathered considerable testimony, but its work was hampered by a ruling of the state supreme court which declared the senate was without authority to compel the appearance of company officials with certain books and documents, and could not punish them for failure to give certain evidence before the committee.

However, the committee made a report, and a complete transcript of the proceedings, together with the report will be forwarded by Jones to the commission.

SKYSCRAPER

Stone, steel and concrete,
Rivets, tiles and drains;
Bricks, skill and brains.

But, above all, brains.

All these together,

In a proper blend,

Cause the proud structure

Skyward to ascend.

Hopes, bitter heartaches,

Failure and success;

Big thoughts and petty,

Fears, foolhardiness—

In will move all these

On the opening day.

To remain tenants

Till the walls decay.

—A. N. Weeber.

According to an Associated Press dispatch from New York, the skyscraper obsession is denounced by Louis Le Beaume, St. Louis architect, in a study prepared for the Architectural League of New York. He writes that we are "excluding ourselves in the faith that heaven may be reached in an elevator."

LEASE ATTORNEY FOR BOULDER CITY NAMED BY WILBUR

Honorable Louis C. Cramton of Michigan, former member of Congress, has been appointed as Special Attorney to the Secretary of the Interior, to have charge of the appraisement of lands and the making of lease concessions for residential and business property at Boulder City, Nevada, the new town which is to be the place of abode of the workers who will build Hoover Dam, it is announced by Secretary Wilbur.

Cramton's headquarters will be at Washington, D. C., but much of his time will be spent at the townsite. The land at Boulder City will be owned by the Government and leased by those who want to live on or conduct business establishments on it. Cramton will pass on these leases.

Leases of lots will provide the conditions under which they may be continued or terminated. Violations of law as, for example, bootlegging, and gambling, will automatically terminate these leases. Thus Boulder City will have means of law enforcement that will be peculiar to itself.

Public notice will be given when applications for leases can be filed and it will probably be May 1st before lots have been appraised and the necessary application blanks prepared for distribution.

February wholesale prices of six standard plumbing fixtures for a six-room house, ascertained by the Bureau of the Census from reports of 12 representative manufacturers: a n d
bath, averaged \$96.49 as compared with \$99.26 in January, \$102.69 in February, 1930, and \$98.41 in February, 1929.

EDWARD R. BACON TAKES ON NEW LINES

In line with the company's policy of constantly striving to serve the entire construction industry with the most complete and up-to-date construction equipment, Edward R. Bacon, president of the company bearing his name, announces the acquisition of four well-known lines of machinery which will round out the already well-balanced representation of the company. The new additions to this list are the Lakewood Engineering Company, of Columbus, Ohio, the Lidgerwood Manufacturing Company, Elizabeth, New Jersey, the Midwest Locomotive Works, Hamilton, Ohio, and the Ohio Locomotive Crane Co., Bucyrus, Ohio.

"From a very small beginning in 1910, we have attempted to build up an organization in the West, capable of furnishing Western contractors with a complete line of machinery and with a capable service organization," stated Mr. Bacon. "The addition of these four famous manufacturers marks another step forward in the realization of our ambition."

The Lakewood Engineering Co. manufactures a complete line of large and small construction equipment, including road pumps, road forms, finishing machines, batch boxes, sub graders, grade rosters, float bridges and straight edges.

The Lidgerwood Manufacturing Co. specializes in construction hoists, aerial equipment and catwalks. Lidgerwood equipment has an enviable reputation in America, having been used almost exclusively on many large projects, including the Panama Canal.

"Efficiency that matches your haulage needs," is a slogan that clearly indicates the field covered by the Midwest Locomotive Works. They manufacture gasoline, Diesel, gas electric and Diesel-electric locomotives in sizes ranging from 4 to 80 tons.

The Ohio Locomotive Crane Company manufactures erection cranes, logging cranes, wharf, barge and gantry cranes, railroad pile drivers, crawler cranes and the Ohio Tractor Dump Wagon.

The main office of the Edward R. Bacon Company is a 17th and Folsom Streets, San Francisco, where a large warehouse is maintained. Immediate delivery on a majority of the lines handled can be made direct from this warehouse. In addition, the company maintains sales, service and display facilities at San Jose, Fresno, Oakland and Sacramento, Calif., and at Reno, Nev., and Honolulu, T. H.

According to newspaper dispatches from New York, dated March 28, a new corporation to be known as the Penn Heat Control Company, in which General Electric Company has a controlling interest, has been formed to take over all assets, including patents and good will, of the Penn Heat Control Corporation of Philadelphia, specializing in apparatus for automatic regulation of temperature in household heating.

IMMEDIATE INAUGURATION OF FIVE-DAY WEEK URGED BY UNION CHIEF AS ONLY LASTING RELIEF MEASURE FOR UNEMPLOYED

(Radio Address of Charles P. Howard, President of the International Typographical Union)

The condition from which the workers, business, and industry is now suffering constitutes a most serious indictment against our industrial leaders. While there were being developed methods and machinery by which one worker would produce as much as many who had been previously employed, those who control industry resisted reduction of the work day and the work week. Their failure to recognize the simplest and most obvious economic truth is largely responsible for the present condition of depression, bankruptcy, and unemployment. Refusal to deal upon a collective basis prevented complete organization of the workers. Now that all elements are confronted with a condition, the seriousness of which but few recognize, the agencies through which the necessary remedies might be applied are lacking. In industries which are unorganized there is not the machinery for co-operation of all elements so essential to success. Industries in which the workers are partially organized presents a problem equally difficult. We are without the one agency through which it is possible to establish and maintain conditions which prevent destructive competition with its inescapable effect upon elements which must be fixed.

It must be realized that criticism will not solve our problem. It is apparent that machines are "producers," but they have not the ability to purchase and consume that which is produced. The goods are the consumers, and a vast majority are workers who can consume only that which they can buy with the wages for which they can sell their labor.

Through the development and use of machines in almost every line of production one worker engaged eight hours per day, six days per week, will produce more than two workers could under methods previously used. In the domestic and export market it is not possible to dispose of that which is produced by the more than two million wage earners working a full week. As a consequence with their machines and modern methods it requires the services of but one-half the number of workers to produce the same quantity as was formerly produced by all those engaged in the industries.

Some of those displaced by machines have been absorbed by newly developed lines of industry. Those who could not be absorbed have involuntarily enlisted in the army of unemployed. Not being able to sell their labor, they were unable to buy and consume that which was being produced by their more fortunate brothers and the machines they operated. This resulted in reducing the "domestic demand" upon which the prosperity of the Nation rested. Because of the inability of those displaced to buy, other industries were unable to sell and discontinued or curtailed operations. This added more workers to the lists of the unemployed and continued the operation of the vicious circle which has brought loss of profit or bankruptcy to the investor, hard times to management, and hunger, misery, and suffering to the unemployed millions and their dependents.

Conferences have been held under Federal, State and municipal direction to deal with the problem. Officials of high and low degree have discussed and deplored the condition. But few have had the courage to deal with the question in other than gen-

eralities, and fewer have expressed a willingness to apply the only remedy which will permanently improve the condition.

In the enjoyment and practice of our democracy the control of industry has remained autocratic. Not even the Federal Government can require our industrial captains, either individually or collectively, to do the one thing that will substitute peace for bankruptcy. The responsible head of each industry ignores the situation or naively suggests that some other line should apply the remedy. Apparently it does not occur to them that the co-operative system as practiced in America is facing its severest test. They refuse to recognize that American ideals and institutions are on trial. Resting on the security of full stomachs and satisfying their desires from accumulated profits, they are content to "let the clouds roll by" and await the return of prosperity's sunshine. They comment that we have suffered panics in the past, and in due time prosperity returned.

But what must be the feeling of the unemployed husband and father who is willing to work but unable to sell his labor for money with which to buy bread? What must be the workings of his mind as he walks the streets, half fed and poorly clad, looking into the glowing windows of comfortable homes the occupants of which know nothing and appear to care less about his condition? How long will he and the millions suffering from involuntary unemployment remain true to American ideals and satisfied with this conception of industrial liberty now practiced when he thinks of a wife and children at home suffering because of insufficient food, clothing and fuel? Is it possible for those who know not the pangs of hunger, or the suffering from cold, to understand what it means? Winter and unemployment means just that—and nothing less—to millions who are willing to work but unable to find it. Under such a condition in the richest Nation in the world, where there can be no question about the ability of industry to meet the needs of all, are we not justified in asking: Is business and industry serving the people, or have they become the master of our workers?

The remedy should be apparent. To meet the immediate need, governments, corporations, and individual industries should create every job possible. Opportunity for employment should be extended to the greatest number of workers by the adoption of the five-day week. It is not suggesting that industries should close down one day during the week other than Sunday. Such a plan of operation would not bring best results. In one establishment which comes under my attention recently five hundred workers were employed six days per week. This meant the use of three thousand days of man power. The operation was organized upon a five-day basis. One hundred additional workers were employed, making five hundred working five days. The result was the same—three thousand days per week. One hundred workers were off each day during the week instead of six days, and the industry operated six days with five hundred workers each day. In thus staggering the work week, twenty per cent more workers were employed. The same system can be applied to in-

dustries employing a larger or smaller number with the same result.

Another employer who recognized the seriousness and danger of the present situation declares: "The only way to remedy the present economic depression is to remedy unemployment. And the best way to remedy unemployment is for American employers to accept the five-day week."

Official spokesmen for both the Republican and Democratic parties have declared that the five-day week must become permanent and universal for workers in America. And in giving their indorsement, the Scripps-Howard newspapers declare there is evidence of a "revolution in American economic thought," and assert "that machine production must be kept in relation to mass purchasing power."

There is no problem of greater importance, or more dangerous to established order, than unemployment when it affects millions of citizens of a nation. In those industries where the workers have been able to establish and maintain effective organizations the situation has been relieved by dividing employment and payment of out-of-work benefits from funds created by the union assessing its members who remain at work. In the unorganized industries nothing remains for unemployed workers but charity.

We repeat to add force to the statement. The present condition constitutes a serious indictment against business and industrial leaders. The responsibility can not be evaded or the consequences avoided. Immediate inauguration of the five-day week offers the only lasting relief. This change permanently established will return the necessary balance between production and consumption to place the economic situation upon an even keel. In a nation of intelligent people it should not require a revolution to distribute the benefits resulting from invention and mechanical progress.

CONSTRUCTION ACTIVE IN HAWAIIAN ISLANDS

According to recent reports from Honolulu more than the usual number of construction jobs have been started in that city, says Engineering News-Record. Bids have been asked by the board of water supply on three projects involving the expenditure of \$1,000,000 clearing Nuuanu No. 2 reservoir with the enlargement of the spillway and relocation of the Nuuanu Pali road, the Kaimuki reservoirs and water mains in the lower Wilhelmina and Kaimuki Valley sections and installation of 16-in. water mains in the Kapahulu-Kaimuki district.

Plans have been announced for three projects to be financed from the \$580,000 fund recently made available for Honolulu by the federal government; a 5-mile extension of highway on the Kamehameha system from Wahiawa junction to Kemoo, extension of the Dillingham road to Puuloa and the Kamehameha highway between Kahuku and Hauula.

Honolulu has plans for a \$2,876,505 road program to extend over the next five years, of which the city will pay \$1,263,485, the federal aid will provide \$230,000 and assessments will provide the remainder.

Contract for construction of a block of 32 buildings at the Schofield Barracks has been awarded to the Marks Construction Company for \$388,880, and work will be started soon.

ST. THOMAS AQUINAS PAROCHIAL SCHOOL AT RENO, NEVADA

F. J. DeLONGCHAMPS, Architect.

(Courtesy Reno Gazette)

Construction is progressing rapidly on the new parochial school for the St. Thomas Catholic Aquinas Church in Reno, Nevada. The building will be two-story and basement of brick and concrete construction and when completed will involve an expenditure of \$135,000. J. C. Dillard of Reno, is the general contractor.

THE OBSERVER

What He Hears and Sees on His Rounds

Times are good in the wall paper industry, reports E. D. Eelnap, executive vice president of the Wall Paper Association, who says factories are running full time to fill demands for paper that has set a record for recent years. He attributes it to the development of non-fade paper and designs in brilliant colors.

The California Lime Products Company of Sacramento, with sales offices in San Francisco, has purchased limestone properties and a mill site, comprising 145 acres, on the main line of the Southern Pacific near Towle, Sacramento County, for a consideration of \$125,000. In making this announcement, R. E. Mittelstaedt, president of the company, said the deposits constitute the largest and most accessible in the state. Work of opening the quarry will start at once, so the company may produce solid carbon dioxide, known as "dry ice," agricultural lime, chicken grits and other lime products at a plant to be constructed near Sacramento. Mittelstaedt said the project will give employment to 100 men.

Setting his liabilities at \$128,046, Charles G. Adams, contractor of San Mateo, has filed a petition in bankruptcy. He is joined by his wife, Mary E. Adams. The only assets are listed as \$4207 due him.

A study of the opportunities for American engineers in Russia and the conditions in that country will be made by a committee of the American Society of Civil Engineers consisting of Philip W. Henry, chairman; George H. Pegram, George W. Kittredge, John R. Slattery and R. W. Howard. It is not the intention of the committee to send any of its members to Russia, but information will be sought from engineers who have engaged in work in that country and returned here. It is expected that the committee will be able to make at least a preliminary report to the board of directors at its meeting in Norfolk, Va., in April.

Inventories in lumber mills are being reduced weekly and are lower than at this time last year, the West Coast Lumbermen's Association says in reporting 342 mills operated at 40.98 per cent of capacity for the week ending March 21, compared with 73.03 per cent for the period a year ago, and 41.77 per cent for the week ending March 14. Current new business reported by 222 mills was 20.36 per cent over production and shipments 50 per cent under. During the last sixteen weeks orders have averaged 12.57 per cent over production.

The annual convention of the National Terrazzo & Mosaic Assn. will be held at Atlanta, Ga., April 27 to 30 inclusive. Headquarters will be maintained at the Biltmore Hotel.

According to newspaper dispatches from Modesto, the Superior Tile and Products Company of Oakland, has sued George F. Covell, owner of the Hotel Covell and the Hotel Covell annex. E. K. Nelson, a contractor, and the Southern Surety Company of New York, for \$4295, alleged due for materials and labor furnished in building the annex. Violation of a contract is alleged in the complaint.

The regular monthly index figure computed from realty deeds recorded in sixty-four cities by the National Association of Real Estate Boards is 66.7 for February, showing an increase of more than a half a point over the figure of 66.0 in January. These figures are based on the norm 100 used for deeds recorded in the year 1926.

Directors of Pacific Portland Cement Company last Friday declared the regular quarterly dividend of \$1.62½ per share on the preferred stock. The dividend will be payable April 4 to stockholders of record March 31.

Grace Perigo of San Francisco has accepted appointment as chairman of the women's division, northern area, of the California Real Estate Association, for the second successive term. Her objectives are membership increase, service to and by the State association, permanency of the women's committees, and closer contact with other women brokers.

Side order contractors were aided by the Oakland city council through the passage to print of amendments to the rumbling ordinance introduced by Commissioner Frank Colbourn. Colbourn explained that the amendments remove discriminations which have worked a hardship on the contractors by making the posting of a cash bond optional and permits them to pay the license in quarterly installments of \$12.50 instead of \$50 annually in advance. Master plumbers have recently granted permission to pay their licenses quarterly.

This country uses 55 million pounds of copper a year—roughly 3% of domestic production—for electric wiring purposes, according to a survey just made by the Copper & Brass Research Association. There are about 24 million consumers, nearly 85% of them domestic users. Only 627,000 out of our 6 million farm houses are wired, but progress in that field is steady. The survey finds that electric equipment manufacturers and others are favoring a heavier gage wire than previously considered adequate for service requirements. Change from 14-gage to 12-gage wire would increase copper consumption 7 million pounds.

February, 1931, shipments of steel-furniture stock goods, as reported to the Bureau of the Census by 34 manufacturers in the "business group," totaled \$1,598,808, as compared with \$1,797,619 in January, \$2,549,650, in February, 1930; \$3,287,818 in February, 1929, and \$2,908,527 in February, 1928. February shipments of shelving, computed from reports of 16 companies, totaled \$358,564, as compared with \$392,884 in January, \$682,752 in February, 1930, \$974,305 in February, 1929, and \$681,999 in February, 1928.

Holders of common stock of United States Steel Corporation increased 7215 in the three months ended with the date for closing the books for the March dividend. The total on that date was 149,122, compared with 141,967 in December. At the end of September there were 135,555 holders of common stock and in March, 1930, the total was 124,069. The February preferred dividend went to 58,701 stockholders, against 59,171 in November and 61,312 in February of 1930.

ALONG THE LINE

H. N. Bishop, consulting civil engineer of San Jose, addressed the Engineers' Club of that city last Tuesday. Bishop described his experiences as a civil engineer with the Great Northern Railroad.

W. W. Lane, state highway engineer of Arizona, has tendered his resignation. He gave as his reason reductions by the state highway commission of salaries of employees in the department amounting to more than \$30,000 a year, which, he said, would make it impossible to maintain an efficient organization.

Henry Ives Cobb, 71, nationally known architect, died in New York City March 28. Mr. Cobb was credited with being the designer in 1889 of the Owings Building in Chicago, said to be one of the first successful steel construction type structures.

Chas. W. Manly has been appointed to succeed Jean L. Vincenz as deputy county surveyor of Fresno county. It is announced by Chris. P. Jensen, Fresno county surveyor. Manly was formerly employed as a draftsman in the Fresno Department of Public Works. He resigned that position two years ago to enter private practice. Vincenz has declared his intention of being a candidate for the office of city commissioner of public works of Fresno at the coming municipal election.

George W. Roberge, secretary of the Board of Public Works, has been appointed acting head of the Seattle Municipal Lighting Department, a position recently vacated by J. D. Ross.

W. C. Miller, head of the Columbus Lumber Co., Seattle, has been re-elected president of the Western Retail Lumbermen Association.

HAWAIIAN NAVAL PROJECT TO BE UP FOR BIDS SHORTLY

Bids will be asked in the immediate future by the Bureau of Yards and Docks, Navy Department, Washington, D. C., for the development of the Naval Ammunition Depot at Oahu, Hawaii. The project covers the construction of 131 buildings, approximately 1½ miles of railroads, 14½ miles of paved roads and electrical, telephone and water supply systems.

The bureau expects to have the drawings and specifications available for distribution about April 10 for the receipt of bids approximately sixty days thereafter.

ARIZONA LEGISLATURE DEFEATS DAY LABOR

A bill proposing to use day labor in the construction of the highways of Arizona, instead of using the contract system which has prevailed in that state, was defeated recently by the legislature by a vote of 36 to 26. The use of day labor had been urged by Governor Hunt as an unemployment relief measure but the legislature opposed this suggestion, saying that the use of day labor would mean more helpful toward this end than the contract system and that funds were lacking to purchase the equipment needed in order to put a day labor system into effect.

TRADE LITERATURE

Dual compressor control, a method of regulation which compensates for varying air demand, thus decreasing power consumption and reducing unnecessary wear on the compressor is described in a 4-page folder issued by the Pennsylvania Pump & Compressor Co., Easton, Pa.

A discussion of modern principles and practice in floodlighting is presented by the Westinghouse Lamp Company and the Westinghouse Electric & Manufacturing Company in a new joint publication entitled, *Skylines Beyond the Twilight Zone*, identified by the companies as A-1203 and assigned A.L.A. No. 31-P-24. In this 23-page publication, D. W. Atwater, Commercial Engineering Department, Westinghouse Lamp Company, describes the advantages of floodlighting and gives recommendations useful in making floodlighting installations. Included are several photographs showing floodlighted office buildings, monuments, towers, industrial plants, residences, athletic fields, filling stations, and other structures. Photographs and descriptions of Westinghouse floodlighting equipment are also included.

"Back of the Mack" is the title of a 20-page booklet issued by Mack Trucks, Inc., 25 Broadway, New York City, which tells the history of the Mack organization and gives a brief résumé of its products, including motor trucks, tractors and trailers, buses, fire apparatus and switching locomotives.

G. M. DEALERS GET GROUP INSURANCE

General Motors Corp. becomes the first half-billion policy holder in the history of life insurance with the extension of its group life plan to include its 19,000 dealers and their employees. This will bring in 150,000 individuals in addition to the 160,000 employees of the corporation already covered.

General Motors Corp. employees already have \$347,000,000 of life insurance in force and the new policies will increase the total to well above the \$500,000,000 mark. The policies are written by the Metropolitan Life Insurance Company.

Insurance will be issued without medical examination, as is usually the case, and will include total and permanent disability clauses. Since 1926, when the corporation adopted group insurance, over \$7,000,000 have been paid to beneficiaries of 4,380 General Motors employees. At the beginning of the year 99.6% of all G. M. employees eligible were insured under the plan.

An involuntary petition in bankruptcy was filed in Los Angeles last Monday against Claus Spreckels, San Diego capitalist. The plaintiffs were George I. Strobeck, claiming a judgment of \$41,320; W. A. Adams, claiming \$20,000; and W. E. McDonald with a \$12,000 claim. The petition alleged that the San Diego financier committed acts of bankruptcy, among them allowing the Pacific Portland Cement Company, a creditor to obtain a judgment of \$144,672, constituting a lien against his property.

HERE—THERE EVERYWHERE

The Master Plumbers' Association of Sonoma County has petitioned the county supervisors to pass a county ordinance providing for plumbing regulations and inspection outside incorporated districts.

Truscon Steel Co., Youngstown, O., announces the appointment of Clark P. Pond as vice-president, engineering and sales. Mr. Pond was formerly connected in a similar capacity with the David Lupton's Sons Co.

After more than a year's work, the Health Committee of the San Francisco Board of Supervisors has discarded a proposed new ordinance to regulate installation of gas appliance fixtures and named a new committee to draft another plan.

The Builders' Exchange of Newport Beach has elected the following officers to serve for the ensuing year: Charles E. Dunn, Costa Mesa, president; Irving G. Gordon, Newport Beach, vice-president; Lester L. Isbell, president of the Newport Harbor Chamber of Commerce, secretary-treasurer; I. G. Gordon, Ross Hostetter, C. E. Dunn, George Headley, Ralph Vele, all of Newport Beach, directors.

Members of the Santa Rosa Builders' Exchange and interested citizens at a recent meeting outlined tentative plans for a joint advertising campaign to stimulate building. The aid of the local newspapers will be enlisted in furthering the program.

The annual convention of the National American Wholesale Lumber Association, Inc., will be held at Atlantic City, April 15 and 16. Headquarters will be maintained at the Ambassador Hotel.

The quarterly meeting of the Associated Marble Manufacturers will be held at St. Louis, Mo., April 18. Headquarters will be maintained at the Hotel Statler.

Makin and Kennedy, material dealers, and the Melrose Building Materials Company of Oakland, have organized the Quality Concrete Company and will specialize in the marketing of ready-mixed concrete. Offices will be maintained in the Building Exchange Bldg., Oakland.

LEGISLATION AIMED TO REGULATE TRUCKS

A bill regulating the height, weight and length of trucks has been passed by the Indiana legislature and the signature of the governor is looked for because stringent limits on motor trucks were recommended by him in his message to the legislature. The bill provides that trucks shall be not more than 8 ft. wide and 12 ft. high. The length of a single vehicle is limited to 33 ft. and combination vehicles coupled together shall not be more than 40 ft. long. The axle weight on pneumatic tires shall not be more than 16,000 lb. and on solid tires 50 per cent of the weight on pneumatic tires. The bill, if signed, will become effective on January 1, 1932. It was bitterly fought by the Motor Truck Association of Indiana and by many industries.

ENGINEERING SOCIETIES EMPLOYMENT SERVICE

Further information regarding positions listed in this column is obtainable from Newton D. Cook, Room 715, 57 Post Street, San Francisco. (Phone SUTter 1634).

- R-2125-S STRUCTURAL DRAFTSMAN, experienced on Class A buildings, for temporary work in connection with a remodeling job. Salary, \$250 per month. Location, San Francisco.
- R-3212-S ENGINEER, preferably civil graduate, 28-35 years old, for design of tanks, pipe lines, pressure vessels and some structures. This experience essential. Salary \$200-\$250 per month. Apply by letter. Location, San Francisco.
- R-3213-S FLOTATION OPERATOR, for a mill in Washington. Practical operator for steady position. Apply by letter with references.
- R-3221-S SHIFT OPERATOR for cyanide plant. Prefer young man with some training in metallurgy and willing to follow instructions. \$4.50 per day. Apply by letter. Location, Alameda County.
- R-3317-S MECHANICAL SPECIALIST, 28-35 years old, to deal with problems arising in connection with operation of pumps, compressors and other mechanical equipment of large industrial plant. Applicant should have had experience as draftsman and mechanic; technical education required but not necessarily a college graduate. Permanent opportunity. Salary depends on experience. Apply by letter. Location, S. F. Bay Region.
- W-2410-C-S (K-346) MINING ENGINEER with prospecting experience on gold, both placer and quartz. Capable man with about \$25,000 could make over lease and operate on royalty basis in rich virgin territory now held by principal under concession from Peruvian Government. Healthy location. Apply by letter with references. Headquarters, Peru.
- W-119-ASSISTANT EDITOR, graduate, mechanical engineer with practical experience in steam, refrigeration, maintenance and plant engineering. Apply by letter. Salary \$2500 a year. Location, South.

LARGEST STRUCTURAL STEEL ORDER PLACED

The largest single order for structural steel ever placed has just been secured by the U. S. Steel Corporation, involving 125,000 tons to be used in the Metropolitan Square building group, popularly known as "Radio City," in New York. Metropolitan Square includes three blocks, each 200,000 ft. of flatting on Fifth Ave. While each block is to be improved separately, the ten different buildings have been planned as a group to secure the greatest possible advantage under the setback ordinance. The central unit is a 68-story office building containing 2,000,000 sq. ft. rentable floor area. It will be flanked by two 45-story buildings, a picture theatre to seat 4500, a vaudeville theatre to seat 6500 and an elliptical building 14 stories high and several ordinary office buildings. Work is scheduled to start in June on the two theatres and the low portion of the central unit.

The entire project is to be completed in 1932. Three architectural firms are associated on the job, which is estimated to cost \$250,000,000. They are Reinhard & Hofmeister, Corbett, Harrison & MacMurray and Raymond Hood, Godley & Foulhoux. H. G. Baldwin is the structural engineer.

EMPLOYMENT STABILIZATION ACT REQUIRES FEDERAL CONSTRUCTION PLANNING SIX YEARS IN ADVANCE

The employment stabilization act of 1931 requires that the Federal construction agencies have their work constantly planned for six years ahead.

For this purpose there is established a board to be known as the Federal Employment Stabilization Board, and to be composed of the Secretary of the Treasury, the Secretary of Commerce, the Secretary of Agriculture, and the Secretary of Labor. It shall be the duty of the board to advise the President from time to time of the trend of employment and business activity and of the existence or approach of periods of business depression and unemployment in the United States or in any substantial portion thereof; to co-operate with the construction agencies in formulating methods of advance planning; to make progress reports; and to perform the other functions assigned to it by that act.

In advising the President the board shall take into consideration the volume, based upon value, of contracts awarded for construction work in the United States, or in any substantial portion thereof, during any three-month period in comparison with the corresponding three-month period of three previous calendar years.

Whenever, upon recommendation of the board, the President finds that there exists, or that within the six months next following there is likely to exist, in the United States or any substantial portion thereof a period of business depression and unemployment, he is requested to transmit to the Congress by special message such supplemental estimates as he deems advisable for emergency appropriations.

Such emergency appropriations are authorized and shall be expended only—

(a) For carrying out the provisions of the Federal highway act, as now or hereafter amended and supplemented;

(b) For the preservation and maintenance of existing river and harbor works and for the prosecution of such projects heretofore and hereafter authorized as may be most desirable in the interest of commerce and navigation;

(c) For prosecuting flood-control projects heretofore or hereafter authorized;

visions of the public buildings act, ap-

proved May 25, 1926, as now or here-

(d) For carrying into effect the proffer amended and supplemented, in respect of public buildings within and without the District of Columbia; and

(e) For prosecuting such other construction as may now or hereafter be authorized by the Congress and which is or may be included in the six-year advance plans, as hereinafter provided.

Acceleration of Emergency Construction

For the purpose of aiding in the prevention of unemployment during periods of business depression and of permitting the Government to avail itself of opportunity for speedy, efficient, and economical construction during such periods the President may direct the construction agencies to accelerate during such periods, to such extent as is deemed practicable, the prosecution of all authorized construction within their control.

Advance Planning

It is declared to be the policy of Congress to arrange the construction of public works so far as practicable in such manner as will assist in the stabilization of industry and employment through the proper timing of such construction, and that to further this object there shall be advance planning, including preparation of detailed construction plans, of public works by the construction agencies and the board.

Each head of a department or independent establishment having jurisdiction over one or more construction agencies shall direct each such construction agency to prepare a six-year advance plan with estimates showing projects allotted to each year. Such estimates shall show separately the estimated cost of land, the estimated cost of new construction, and the estimated annual cost of operation and of repairs and alterations.

Such programs, plans, and estimates for the six-year period shall be submitted to the board and to the director of the bureau of the budget. The director of the bureau of the budget shall report to the President from time to time consolidated plans and estimates.

Each construction agency shall keep its six-year plan up to date by an annual revision of the plans and estimates for the unexpired years and by annually extending the plan and estimates for an additional year.

PRIVATE ARCHITECTS URGED FOR FEDERAL BUILDING UNITS

To hasten unemployment relief, the office of the Supervising Architect should cease its efforts to prepare all plans and specifications for Federal building projects and should confide this task to outside architects and engineers, declares a report transmitted by the American Engineering Council to Col. Arthur Woods, chairman of the President's Emergency Committee for Employment.

Red tape must be out if the Government's building program is to be swiftly carried out, according to the engineers, who urge condemnation instead of negotiation by the Attorney General in acquiring sites, and executive orders by the President to speed the co-operation of departments and bureaus.

The report was prepared by a com-

mittee of the American Society of Mechanical Engineers, headed by Ralph E. Flanders of Springfield, Vt., in response to an urgent request by Col. Woods for aid from the engineering profession. The engineers' recommendations follow:

'The Government should immediately proceed to employ well established and thoroughly competent architectural and engineering firms best qualified to do the work for the various building construction projects that have been authorized.

'The Office of the Supervising Architect should divest itself of its many plans to prepare all plans and specifications for the projects, and become, as its name implies, more supervisory and less detailed in its functions. The vast amount of Government work au-

thorized and under contemplation warrants a less detailed policy on the part of the Supervising Architect's Office and the employment of architectural and engineering firms.

'The Supervising Architect's Office should definitely address itself to a form of emergency supervision which will enable employed architectural and engineering concerns to conduct swiftly the preparation of drawings and specifications for the various projects, which work thus be assigned, with reference to the legal and administrative restrictions that must necessarily surround Government work. To that end the reorganization within the Supervising Architect's Office would have special reference to directed acceleration.

'The revision of the supervisory organization should include clearance of all possible causes of dispute in the Comptroller's Office, at the same time being brought from the Comptroller's Office in advance rulings in the light of the emergent situation which will clear authorized Government projects in that direction, and insure their not being hampered in their actual execution by contractors that may be engaged in their performance.

'The issuance of suitable executive orders should be obtained which will strengthen the Supervising Architect's Office in obtaining information from departments and bureaus in which Government projects originate. The importance of this is clear when it is realized that no plans and specifications can be drawn unless the authorities designate their requirements clearly and are compelled to make decisions as the logical and swift development of the various projects in the employed architects' and engineers' offices requires.

'Direct orders of authority from the President should be issued to the various departments and bureaus and other agencies that have to do with the structures to be built that, in the failure of these agencies to make early and prompt decisions, such decision will be made by the Supervising Architect's Office, thus avoiding delays of decision which would otherwise originate outside of the Supervising Architect's Office.

'The Attorney General's Office should exercise its right of condemnation of sites by the local sections of the building projects have been authorized, instead of employing the slower process of negotiation which has heretofore hindered and continues to hinder the Government in the swift completion of its building projects. Such condemnation proceedings are the right of the Attorney General and should be fully resorted to in the present emergency.'

A nationwide investigation was made by the local sections of the American Society of Mechanical Engineers and of the American Institute of Electrical Engineers "to ascertain, first, the ways and means adopted by employers throughout the country to stabilize employment during this period, and second, what they have done to stabilize employment permanently."

The data obtained has been turned over to the American Engineering Council for the use of the President's Emergency Committee. It reveals that the Committee's program has won widespread support in all sections of the country.

Paul J. Ost, city electrical engineer, has been directed by the Supervising Architect's Office to study the feasibility of replacing the city's gasoline-driven busses and certain of the municipal street car routes by electrically operated busses. The plan, which entails trolley- equipped vehicles, would reduce operation cost, Ost said.

CONDITIONS EXISTING IN RUSSIAN LUMBER CAMPS ARE DESCRIBED BY NOTED ECONOMIST

Carl Bahr, economist of the National Lumber Manufacturers' Association, in a radio address last month told of some of the conditions in north Russian lumber camps, disclosed to him during a three-month trip in Russian border countries by escaped "convicts" and by those whose business it is to keep in touch with what is going on in Russia. Personal interviews, with sworn statements, were secured by Mr. Bahr. His radio talk is published herewith.—Editor.

"The center of the lumber and pulpwood industries is at Archangel on the White Sea. There is as much difference between it and Moscow, the capital, as there is between Sitka, Alaska and New York City. The hinterland of north Russia is a vast region of forests, rivers, lakes and swamps, cold and dark in winter and hot, swampy and infested with mosquitoes in summer. It is penetrated by one thin railway line with infrequent train service. The only foreign visitors are the select few thoroughly trusted by the Soviet government whose business relations with Russia demands their presence.

"A prisoner, escaping with a forged passport from Archangel to Vologda, a distance of 375 miles, saw at every station where logging operations were conducted, convict camps surrounded by barbed wire and guarded by armed watchmen.

Vast Number of Convicts

"The exact number of convicts used in north Russia has never been published, but probably runs into the hundreds of thousands. The number of convicts is variously reported by the prisoners as from 150,000 to more than 1,000,000. While traveling to the north of Europe I saw everywhere told by well-informed people that it would be impossible to secure first-hand evidence. This is incorrect. There are far more escaped prisoners than is commonly supposed; they are usually quite willing to relate their experiences, if assured that their names would not be publicly used. They were afraid to speak openly of their experiences for fear of reprisals on their families left in Russia. But they hoped the United States, with its great power and standing, could exert influence to such an extent that conditions in the north of Russia would be improved.

"Throughout north Europe even greater than the hatred is the fear of Russia. Some people were afraid to talk of Russia at all; others who talked in private asked that the most careful precaution be taken not only to conceal the fact that information was secured from them, but even that they had talked about, or were interested in Russia. One man refused to leave his house in the evening for fear of being followed by Russian spies and came to see me at his noon mealtime only after being assured that even, if watched, no one would know he was talking to me. In other cases the men insisted on arriving at meeting places at different hours and leaving at different entrances. Some whom I had been assured could aid me, upon being questioned, plead complete ignorance.

"The fear of Russia is quite understandable. The escaped convicts have had demonstrations of what occurs to those who get into the bad graces of Soviet officials; the others are all residents of states bordering on Russia and almost only at its pleasure and can be destroyed at will.

"Crimes" of Exiles

"As to the prisoners themselves. One man was imprisoned as an anti-Eolshevik spy; another as a smuggler of a few highly prized sewing needles; a third, for having participated in a revolt; a fourth, as the spy of a foreign government; a fifth, for being a 'kulak'; that is, a peasant who is more prosperous than others in his community; a sixth, a business man sentenced for speculation; a seventh, for resisting the grain delivery system which required that farmers turn over to the government a certain portion of their crop; an eighth, as an American spy; a ninth, for a crime the nature of which was never disclosed; the prisoner, a tenth, as an influential person unsympathetic with the existing regime; an eleventh, for being in communication with relatives who had taken part in revolts against the Soviet government; a twelfth, for distributing religious literature; another, as a hostage.

"A ship's captain returning from Russia described a dinner in a prison camp: 'An enormous cauldron was slung between two posts. In this was a kind of stew consisting of some indefinable meat and water. All the prisoners were provided with a spoon and a tin basin each, and they fetched their rations in turn. The sight was revolting. It was pitiful to see these poor prisoners, tired out and tortured by heat and vermin. They were indiscriminately mixed, both male and female, and were of all ages. Some devoured their food with the avidity of starving wolves; others sat staring into space. Some wept and looked as if death would be a relief. We met an old man who could not have been less than 50 years old, and he walked around in circles, shedding bitter tears.

"There was general agreement among all the prisoners that by far the worst spot in north Russia is on the Solovetsky Islands. No more striking picture of conditions can be drawn than to repeat the statement of one prisoner who asserts that in the winter of 1929-30, about 19,000 prisoners out of 226,300 on the island died from typhus."

In conclusion Mr. Bahr said:

"There is obviously some little truth in the statement that what goes on in that country is their business, not ours; we may sympathize with the Russian people, but officially there is no business of ours. Nothing that we can do about it. But we have a legitimate interest in what goes on in Russia if the results of their systems extends its effects to our markets. If Russia uses convicts in its forests and sends lumber to the United States we surely have the right to ask the government for protection against the products of slave labor. We have the right to defend both our labor and our industry from the competition of the products produced by slaves from raw materials and machinery stolen from private owners and brought to our shores at a money cost scarcely greater than the charge for ocean freightage.

Forty Years' Precedents

"For at least 40 years our laws have provided protection against foreign goods produced by convicts. But technical difficulties have made their enforcement difficult and during the past year the Treasury Department was unable to keep Russian lumber and pulpwood out of the country. It has now adopted new regulations which, it hopes, will cure the difficulties previously encountered. Congress

has also taken up the question of amending the law so as to make effective enforcement possible. Its effort to prohibit the importation of slave-made goods should command the active support of every American citizen. Unfortunately it does not have such support. There has been and is considerable opposition to the effort to pass legislation which will effectively bar shipments of convict-made goods into the United States. This opposition comes, I believe, largely from those who do not fully realize the situation.

"Opponents of this legislation say that we now sell much more to Russia than it sells to us; that we should not destroy the opportunity of increasing our sales to Russia by interfering with Russian sales to the United States. They propose in effect to gain an export trade with Russia of doubtful value because it is based largely on credit by corporations one of the fundamental principles of our government—the freedom of labor. On this freedom of labor is based our general prosperity and high standards of living, our high wages, short working hours and reasonable working conditions. It takes little imagination to outline the future if our laborers are required to compete against the laborers whose stories you have just heard. Such competition is inevitable unless legislation necessary to bar from the American market the products of slave labor is promptly passed by Congress. The flood of imports has started; it is still small, but growing rapidly. Failure to protect our markets against such working labor is, in effect, placing our economic future in the hands of Russia; it gives to Russia material assistance and support far more valuable than formal recognition of the Russian government, which we have consistently withheld for the past 13 years."

STEELTEX LATH SHIPMENTS INCREASE

The Soule Steel Company has just received a report showing a large increase in the shipment of Steeltex lath by the National Steel Fabric Company for whom the Soule people are distributors in this territory.

The report shows that January, 1931 shipments of Steeltex were 82.9 per cent greater than the corresponding month of 1930. It is further reported that February, 1931, shipments show a further increase of 20 per cent over January of this year.

The National Steel Fabric Company give credit for this remarkable showing mainly to their progressive sales efforts and their faith in the principle that there is plenty of business for those who work for it.

Reports of new orders for fabricated structural steel for the week ending March 7, 1931, were received from 101 establishments, whose capacity represented 47.1 per cent of the total capacity of all plants in the United States. The bookings represented by these establishments amounted to 24,120 tons, representing 78.4 per cent of the total capacity of the reporting establishments. Reports of shipments of fabricated structural steel for the same week were received from 99 establishments, whose capacity represented 47.6 per cent of the total capacity of all plants in the United States. The shipments reported by these establishments amounted to 16,261 tons, representing 37.7 per cent of the total capacity of the reporting establishments.

Frank C. Reed, general sales manager of the Westinghouse Electric Elevator Company, has been elected vice-president of that company to fill the vacancy caused through the resignation of R. L. Phillips.

MARCH BUILDING IN S. F. \$2,090,129

Building operations undertaken in San Francisco during the month of March, 1931, involved an expenditure of \$2,090,129, according to figures compiled by the Bureau of Building Inspection, Department of Public Works. During the month 536 permits were issued; of these 229 were for new structures involving an expenditure of \$1,574,071. The balance of the operations called for an expenditure of \$216,058 and covered alterations, additions and repairs to standing buildings. Public building construction involved an expenditure of \$106,233.

During the month of March 1930, figures of the department show a total of 584 permits issued for construction involving \$3,502,312. The cost figure, however, includes \$1,237,338 for public building construction making the private construction expenditure \$2,214,924.

For the first three months of this year, records of the building department show a total of 1522 building permits issued for improvements involving an expenditure of \$5,633,783 as compared with 1689 permits for the corresponding period in 1930 when the money expenditure registered \$6,978,357.

The following is a segregated listing of the March, 1931, activities as compiled by the Bureau of Public Inspection:

A	2	\$206,504
B	3	109,240
C	10	43,875
Frames	203	858,223
Alterations	327	216,058
Public Bldgs.	1	550,000
Hartor Bldgs.		
State Bldg.	1	20,926
U. S. Govt. Bldgs. .	9	83,297

In January of this year, 486 permits were issued for projects costing \$1,831,083 and in February, 501 permits for projects costing \$1,712,571.

SHORT HOURS, HIGH WAGES, CALLED VITAL

Not only must hours be reduced to absorb the unemployed by-products of machine production, but "real" wages must materially be increased if prosperity is to return to America, in the belief of John P. Frey, labor economist and head of the metal trades department of the A. F. of L.

Frey, in an interview, questioned the theory that machines are making the masses wealthy. He showed that while machinery is increasing the nation's wealth in terms of billions, the buying power of the workers has been increased in terms of millions. He held that the American worker today receives a much smaller proportion of the wealth they help produce than they did in 1849. He adds that the gap between wealth produced and the workers' share was widened "much more rapidly" in 1928 and 1929 than in previous years.

"Industry is staggering, an army of unemployed is clamoring for work because industry and commerce, particularly since the war, have been paying wages that are unsound," Frey declared. "The wage rates have been altogether too low."

"Unless industry and commerce desire to strangle themselves, real wages must increase with industry's capacity to produce. Dividends and interest cannot be paid unless wages are materially increased."

Emil Bou, son of Prosper Bou, San Bruno general contractor, will walk or ride the street cars for the next six months, due to a sentence imposed by Police Judge Rudolph Rapsey. Bou had his operator's license suspended for driving 52 miles an hour through the business district.

Architects Planning "Architectural Clinic"

An "architectural clinic" for Santa Barbara is planned by members of the Santa Barbara Chapter, American Institute of Architects. Representatives of building and loan associations are expected to co-operate to further proposal.

The purpose of the "clinic" would be to provide architectural advice and assistance for home builders who have not the funds with which to purchase complete plans and specifications.

INSIDE ELECTRIC WORKERS ORGANIZE

The State Association of Inside Electrical Workers of California was organized at a recent meeting in Oakland of electrical workers from every section of the state.

The object of the organization is to be a medium through which the problems of the inside electrical workers of California may be discussed and solutions suggested whereby the most benefit may be derived. Conventions are to be held annually.

One of the most important actions taken by the new organization was the drafting of a resolution, later presented to and approved by the annual convention of the State Building Trades Council of California, requesting that body to present to the California Legislature a bill providing the necessary means for the efficient enforcement of the provisions and requirements of the electrical safety orders of the Industrial Accident Commission of California, especially in those districts where regular city or county electrical inspection bureaus are not maintained.

Officers of the association are: Chairman, A. O. Hansen of Sacramento; secretary-treasurer, Albert E. Cohn of San Francisco; executive committee, E. B. Eschleman of Oakland, Henry J. Tornwall of Eureka, Walter Strake of Santa Rosa, W. M. Bertman of Santa Barbara, W. G. Casey, of Richmond.

CAMPBELL WINDOW SHIPMENT ARRIVES

Fifteen carloads of steel windows have just arrived in San Francisco from New York for the Campbell Industrial Window Company, according to an announcement made yesterday by Alvin M. Karstensen, Pacific Coast manager, for the concern.

Fire Protection Products Company of 1101 Sixteenth Street, San Francisco, is the Campbell Company representative for Northern California and Nevada. The Company will specialize in the field of industrial windows and doors including casement windows, horizontally pivoted industrial windows, projected windows of the commercial architectural and office type, utility windows, and continuous windows and doors. These windows have ventilators which are protected by weather stripping which shuts out wind, rain and snow, and excludes dust, dirt, smoke and soot, and reduces the cost of heating a building. This feature is practically the only improvement made in this class of window in the last 20 years and eliminates the only objection to this type of window, the manufacturer declares.

Campbell Windows have another special feature which can be included—Vitallglass, which creates health light giving; ultra violet rays of sunlight pass through, these being the rays which are barred by ordinary glass.

HOUSE INSULATION FACTS IN BOOKLET

The appointment of a sub-committee to prepare a booklet which will acquaint builders, as well as present and prospective home owners, with the facts in regard to insulating a house, is announced by Secretary of Commerce Robert F. La Follette, who is chairman of the National Committee on Wood Utilization. The preparation of this publication is one of the special projects of the Committee.

One of the primary purposes of the new booklet will be co-operative project between government and industry, to inform the nontechnical consumer of the advantages and economies of house insulation. The discomforts of excess heat in summer and cold in winter are known to everyone. The publication will set out the conditions may be remedied, and, therefore, should be of special interest to every home dweller. These factor and many others will be studied in detail by the subcommittee, and the results of their findings incorporated in the booklet.

The National Committee on Wood Utilization has for its object the furthering of efficient wood-using practices. The preparation of the insulation booklet is a logical step in this direction, the committee says, because the vast quantities of insulating materials on the market are made from wood. The publication will be prepared from an impartial viewpoint, treating practically all types of insulating materials.

Members of the subcommittee sponsoring this project and the organizations they represent are as follows: LeRoy E. Kern, American Institute of Architects, chairman; M. C. Betts, American Society of Agricultural Engineers; Wm. F. Chew, National Association of Builders' Exchanges; W. H. Hays, Better Homes in America; E. J. Harding, Associated General Contractors of America, Inc.; C. H. Osborne, Building Officials' Conference; Wm. S. Quinter, U. S. League of Building and Loan Assns.; Leonard F. Reaume, National Association of Real Estate Boards; F. B. Rowley, American Society of Heating and Ventilating Engineers; W. A. Stetson, consulting engineer; James S. Taylor, Bureau of Standards; S. Percy Thompson, National Retail Lumber Dealers Association.

BUILDING-LOAN BILL IS PASSED

The building loan bill by Senate J. M. Inman of Sacramento, strengthening the building and loan laws of the state, designed to give the Building and Loan Commissioner more power in regulation, has been passed by the Legislature without a dissenting vote. The bill was amended more than 300 times in an effort to make it satisfactory to companies and the state.

A similar bill, by Milton M. Golden of Hollywood, is in the Assembly, Building and Loan Committee.

Both the Inman and Golden bills were prompted by the \$3,000,000 Bess emeyer defalcation in Los Angeles. Chairman Woods of the President's Emergency Committee announced on March 30, that nearly \$1,000,000, worth of contracts for public work had been let since December 1, 1930. The total, including \$4,550,537 of contracts let last week, was \$967,692,735. The projects include public and semi public work, post offices and other federal buildings, state and municipal buildings, courts, hospitals, schools and other similar work. Reports last week covered 264 projects in 39 states and the District of Columbia.

APARTMENTS

Contract Awarded.
APARTMENTS Cost, \$17,650
SAN JOSE, Santa Clara Co., Cal.
 NE Santa Clara Ave. and Moreland Street.
 Two-story frame and stucco apartments—6 3-room apts.)
 Owner—R. DeBaere, Berkeley.
 Architect—F. H. Stoccombe, 62 York Drive, Oakland.
 Contractor—Harry Knight, 6532 Dover St., Oakland.

Sub-Contracts Awarded.
APARTMENTS Cost, \$45,000
REDWOOD CITY, San Mateo Co., Cal.
 29 Clinton Street.

Three-story and basement frame and stucco apartments (15 apts.)
 Owner—W. J. Bridgland, 560 Presidio Ave., San Francisco.
 Plans by Owner.

Contractor—Daley Brothers, 1104 Vancouver Ave., Burlingame.

Plumbing and Heating—Morrison and Blair, 415 Villa, San Mateo.

Painting—Doolittle & Wilson, 420 Arch St., Redwood City.

Insulation—McCormick Ltr. Co., 1401 Army St., San Francisco.

Electric Work—Coast Electric Co., 952 Folsom St., San Francisco.

As previously reported, lumber contract awarded to San Mateo Planing Mill, San Mateo; concrete to Redwood Materials Co., Redwood City; concrete labor to John Morley, San Mateo. Sub-bids are wanted on all other portions of the work.

Sub-Contracts Awarded.
APARTMENTS Cost, \$175,000
SAN FRANCISCO, N Jackson Street
 E Gough Street.

ix-story and basement Class C concrete apartments (26 apts.)

Owner & Builder—E. Jose, 251 Kearny St., San Francisco.

Architect—H. C. Baumann, 251 Kearny St., San Francisco.

Hardwood Flooring—Legal Floor Co., 620 Fourth St., San Francisco.

Electric Work—Aetna Electric Co., 1337 Webster St., San Francisco.

Plumbing—Malott & Peterson, 3221 20th St., San Francisco.

Painting—Herman Wachter, deYoung Bldg., San Francisco.

Refrigeration—Holbrook, Merrill & Stetson, Inc., 665 6th St., S. F.

As previously reported, steel forms awarded to Concrete Engr. Co., 1280

dian St.; plastering to Marconi

fastening Co., 1737 Beach St.; ornamental plaster to Mixx Mindner, 450

5th St.; terra cotta to Western Clay

products Co., 1501 Harrison St.; brick

work to Martin Nelson, 2547 Army

St.; sheet metal to Morrison & Co.,

Duboce Ave.; heating to A. Harper,

50 8th St.; mill work to L. H. Birth,

15 10th St.; lumber to Loop Lum-

ber Co., Central Basin; concrete to

California Concrete Co., 1632 Steiner

St.; steel to McClintic-Marshall Co.,

50 Bryant St.; reinforcing steel to

C. Hauck Co., 280 San Bruno Ave.;

electric work to Aetna Electric Co.,

37 Webster St.; plumbing to J.

bbbs & Son, 1706 Geary St.

Instruction to Start in One Week

Owner and Builder—Max Bakar, Alameda County Title Insurance Bldg., Oakland.

Plans by Clay N. Burrell, American Trust Bldg., Oakland.

Contract Awarded.
APARTMENTS Cost, \$15,000
SAN FRANCISCO, SW 43rd Ave. and Geary St.

Two-story and basement frame and stucco apartments (4 apts.)

Owner—Mrs. E. Petersen, 1625 Balboa Street.

Architect—A. H. Larsen, 447 Sutter Street.

Contractor—Maas & Sauer, 336 Church Street.

Sub-contracts will be awarded within a few days.

Plans Being Prepared.
APARTMENTS Cost, \$60,000
SAN FRANCISCO, SE Beach and Fillmore Streets.

Three-story and basement frame and stucco apartment (nine 3-room and three 4-room apts.)

Owner and Builder—Viggo Rasmussen, 1900 Jefferson Street.

Architect—R. R. Irvine, Call Bldg.

Sub-bids will be taken in one week.

Sub-Bids Being Taken.
APARTMENTS Cost, \$40,000
SAN FRANCISCO, NW Union and Baker Streets.

Three-story and basement frame and stucco apartments (6 3-room and 3 2-room apts.)

Owner and Builder—Guido Moriconi, 2341 Franklin Street.

Plans by Irvine & Ebbets, Call Bldg.

Contract Awarded.
APARTMENTS Cost, \$200,000
OAKLAND, Alameda Co., Cal. Lennox Ave. near Montecito St.

Six-story steel frame and brick Apts. (48 apts.)

Owner—Withheld.

Architect—Leonard Ford, 1435 Harrison St., Oakland.

Contractor—Fred. Miller, Syndicate Bldg., Oakland.

Construction will start shortly.

SALES . SERVICE . RENTALS

mately 75 per cent of which will be expended for new construction work. The issue for the high school district amounts to \$6,350,000 and for the elementary district \$5,750,000. Proceeds will be used for the construction of new buildings, additions to existing buildings, equipment, pedestrian subways and school sites, and will be distributed over the school districts as follows: \$2,642,400 for the central area, providing \$801,000 for elementary schools, \$1,267,700 for junior high schools and \$533,700 for senior high schools, \$2,097,800 for the southern area, providing \$825,000 for elementary schools, \$667,600 for junior schools and \$665,200 for senior high schools; \$526,600 for the harbor area, providing \$75,000 for elementary schools, \$58,500 for junior high schools and \$392,800 for senior high schools; \$767,700 for the San Fernando Valley, providing \$474,000 for elementary schools and \$233,700 for high schools; \$1,713,700 for the northern area, providing \$344,000 for elementary schools, \$1,250,000 for junior high schools and \$121,700 for senior high schools; \$1,128,400 for the eastern area, providing \$474,000 for elementary schools, \$521,800 for junior high schools and \$132,600 for senior high schools; \$1,601,000 for the western area, providing \$624,000 for elementary schools, \$725,000 for junior high schools and \$552,000 for senior high schools. In addition to the above allocations, \$500,000 will be spent on retaining walls, fences, etc., and \$500,000 for pedestrian tunnels. \$7,000,000 will be set aside for additional buildings, lands and improvements not entirely segregated.

TUCSON, Ariz.—Tucson School District has called an election for April 17 at which time it is proposed to vote bonds in the sum of \$200,000 for the construction of additions to and remodeling three school buildings. The district proposes remodeling the Rosekrue School and adding two rooms each to the Ochoa and Mission View Schools.

MARYSVILLE, Yuba Co., Cal.—Linda School District defeats proposal to issue bonds of \$7,500 to finance erection of 2-classroom addition to the present school. This is the second election that has failed.

SACRAMENTO, Cal.—October 10 is the date set by the Sacramento Board of Education to vote bonds of \$1,146,000 to finance erection of three new junior high schools.

CHURCHES

Plans Completed.
CHURCH Cost, \$40,000
SAN PABLO, Contra Costa Co., Cal.

Church and Market Streets.

One-story reinforced concrete church (Mission style) (tile roof) (to seat 350).

Owner—St. Paul's Catholic Church

Rev. Eyston Tozzi, San Pablo.

Architect—John Foley, 770 Fifth Ave., San Francisco.

Contractor—S. Rasori, Call Building, San Francisco.

 Until April 29, 11 A. M., under Spec.
 No. 6460, bids will be received by the
 Bureau of Yards and Docks, Navy De-
 partment, Washington, D. C., for
 floating derricks for the Navy Yard
 at Mare Island and the Naval Operat-
 ing Base at San Diego. The work con-
 sists of two 25-ton floating steel beam
 derricks of the stiff-leg type with bull
 wheel having steel pontoons, steam
 engines, and oil burning boilers; one
 derrick for the Navy Yard, Mare Is-
 land, and the other to the Naval Base
 (Destroyer Base), San Diego. Specifi-
 cations No. 6460 and accompanying

drawings may be obtained by forward-
 ing a check or postal money order for
 \$10, payable to the Chief of the Bu-
 reau of Yards and Docks, to the Eu-
 reau, to the Commandant, Navy Yard,
 Mare Island, Calif., or to the Com-
 mandant, Naval Operating Base, San
 Diego, Calif. Attention is invited to
 the fact that alternates providing sep-
 arate bidding items will be called for
 the following:

(a) Revolving Cranes in lieu of der-
 ricks.

(b) Diesel Engines in lieu of oil
 burning boilers and steam engine
 drive.

(c) Diesel-electric drive in lieu of
 oil burning boiler and steam engine
 drive.

Further information obtainable from
 the Commandant Navy Yard, Mare Is-
 land, on deposit of \$10, returnable.

Plans Being Figured—Bids Close Apr.

16th, 11 A. M.
OFFICERS' QUARTERS Cost, \$90,000
SAN FRANCISCO, Presidio.

Fifteen double sets of non-commis-
 sioned officers' quarters (each 2-
 story and basement, brick con-
 struction).

Owner—United States Government.
 Plans by Quartermaster General's Of-
 fice, Washington, D. C.

Bids on this project were scheduled to
 be opened March 25, but action
 was deferred upon orders from Wash-
 ington, D. C., ordering cancellation of
 the bid call pending passage of the
 Bacon-Davis Act, which commands
 payment of the prevailing wage scale
 in the territory where the project is
 undertaken. The bill is effective April
 3. Prospective bidders published Mar.
 2nd.

Plans Being Prepared.
THEATRE Cost, \$100,000
RICHMOND, Contra Costa Co., Cal. S. Macdonald Ave., bet. Seventh and Eighth Streets.
Class A concrete theatre (to seat 1200).
Owner—United Artists of California, 1966 S. Vermont St., Los Angeles, (Lewis Angler in charge).
Architect—Walker & Eisen and C. A. Balch, Western Pacific Bldg., Los Angeles.

Completing Plans.
ALTERATIONS Cost approx. \$60,000
SAN FRANCISCO, 4631 Mission St.
Alterations to present theatre.
Owner—Golden Gate Theatre & Realty Co., 25 Taylor St.
Architect—Frederick H. Meyer, 525 Market Street.
Bids will be called for shortly.

BERKELEY, Alameda Co., Cal.—United Artists Corp., Los Angeles, is reported to be negotiating with A. O. Donogh for property in the west side of Shattuck Ave. adjoining the Art Museum and the public library on

which the corporation proposes to erect a \$350,000 theatre. The site has a 35-ft. frontage on the west side of Shattuck Ave. and includes an 80-ft. frontage on Bancroft Way with a depth of 160 feet. The property, it is understood, would have to be re-zoned by the City Planning Commission before construction will be started. Walker & Eisen, Western Pacific Bldg. Los Angeles, will probably be the architects.

Sub-Bids Being Taken.
ALTERATIONS Cost, \$50,000
WATSONVILLE, Santa Cruz Co., Cal. Remodel theatre.
Owner—Fox & California Theatre (Douglas Graham, Mgr.), Watsonville.
Private plans.
Contractor—Alfred J. Hopper, 176 Pleasant Valley Ave., Piedmont.
Sub-bids are wanted on structural steel (for tower), plastering, tile work tile roofing (on tower), wrought iron railings and plastering.

Work will involve complete remodeling and redecorating in addition to a neon marquee, Spanish style organ loft, carpets, drapes and new seating.

MISCELLANEOUS CONSTRUCTION

Contract Awarded.
UNDERTAKING PARLORS \$40,000
SAN FRANCISCO, Sacramento Street bet. Van Ness Ave. and Polk St.
Three-story frame and stucco undertaking establishment and apartments (50x100-ft.).
Owner—Jos. Hagan, 175 Sacramento.
Architect—Henry C. Smith and A. R. Williams, Humboldt Bank Bldg.
Contractor—Reavey & Spivock, Shelton Bldg.
Sub-bids are in and will be awarded within one week.

MARTINEZ, Contra Costa Co., Cal.—City council has instructed City Engineer Ben Greene to make preliminary surveys and submit estimates of cost for two municipal tennis courts on city property at Pacheco Blvd. and Brown St.

Preparing Working Drawings.
TRACK Cost, \$200,000
BERKELEY, Alameda Co., Cal. University Campus.
Reinforced concrete track Stadium Bowl (to seat 20,000 approx.)
Owner—University of California.
Architect—Warren C. Perry, 260 California St., San Francisco.

TUOLUMNE COUNTY, Cal.—Until April 13, 2 P. M., bids will be received by R. E. Pierce, district engineer, State Highway Commission, 502 State Office Bldg., Sacramento, to construct hogtight property fence and install new property gates in Tuolumne county between 1½ miles west of Key- stone and Keystone.

SAUSALITO, Marin Co., Cal.—Until April 11, 8 P. M., bids will be received by S. G. Ratto, clerk, Sausalito School District, to improve playground areas of the Central School yard, Litho and Calendonia Streets, and at the South School yard, North and Third Streets. Certified check or bid bond 10% payable to Board of Trustees of district required with bid. Specifications obtainable from clerk.

BOULDER CITY, Nevada—Architect Geo. deColmesnil, 110 Sutter St., San Francisco, has been commissioned by the Six Companies, Inc., Financial Center Bldg., San Francisco, general contractors on the Hoover Dam project, to lay out a town to house employees adjoining Boulder City. Approximately \$600,000 will be expended.

OAHU, Hawaii—See "Government Work and Supplies," this issue. Bureau of Yards and Docks, Navy Department, Washington, D. C., will ask bids in the immediate future for the development work in connection with the Naval Ammunition Depot at Oahu, Hawaii, involving the erection of 132 buildings, approximately 11½ miles of railroads, 14½ miles of paved road and electrical, telephone and water supply systems. Bidding data on this project will appear in Daily Pacific Builder in subsequent issues.

Commissioned To Prepare Plans.
MOTOR INNS (each unit) \$180,000
CALIFORNIA. Sacramento, Los Angeles, Santa Barbara, Bakersfield, Paso Robles and Fresno.

Six motor inns.
Owner—National Motor Inns, Inc., Carroll S. Bucher and Marvin Currier, Jr., 1035 Russ Bldg., San Francisco (organizers).

Architect—Raymond W. Jeans, 605 Market St., San Francisco.
Contractor—Geo. L. Leiter, 3700 West 5th St., Oakland.

Each unit will cover an area of approximately five acres and will consist of administration building, kitchen, dining room, service station, plunge and 120 guest rooms. Financing arrangements are being made.

GLENDALE, Los Angeles Co., Cal.
—Grand View Memorial Park, E. H. Dimity, president, Security Title Insurance Bldg., Los Angeles, contemplates erecting a new mausoleum in Glendale. Project will probably not mature before 1932.

MISCELLANEOUS SUPPLIES AND MATERIALS

SAN FRANCISCO—Until April 20, 1 P. M., under Proposal No. 695, bids will be received by Leonard S. Leavy, city purchasing agent, 270 City Hall, to furnish and deliver:

Under Class 7—Hardware and castings;

Under Class 11—Lumber.

Above materials to be delivered is ordered from time to time during the semi-annual term commencing July 7 and ending December 31, 1931.

Specifications obtainable from above.

SACRAMENTO, Cal.—Until April 13, 5 P. M., bids will be received by Chas. C. Hughes, secretary, Board of Education, to furnish and deliver fuel oil as required by city school department throughout the fiscal year ending June 30, 1932. Specifications obtainable from above.

BUSINESS OPPORTUNITY

Solar Corporation, Beaver Dam, Wisconsin, manufacturers of storage batteries for automobile, radio, farm lighting power plant and marine use, inquire for list of exporters of this type of merchandise.

Shinzake Engine and Iron Works, Kobe, Japan, desires to receive names of firms supplying equipment for oil burning installation suitable for house and small building heating.

Joe Zrolanek of the Barber-Colman Co., Rockford, Ill., desires representation in Northern and Central California for the sale of an electric system of temperature control.

John A. Toomey of the Industrial Bureau, Worcester Chamber of Commerce, Worcester, Mass., represents a manufacturer of tools who wishes to secure a jobber in this section.

Chas. Melhads, president of Thermolar, Inc., 323 Lafayette St., New Orleans, La., manufacturing a heating appliance for the home, desires representation in this district.

Amendment of the State law to limit expenditure of gasoline taxes returned to the counties for the construction and maintenance of roads, avoidance of further increases in tax levies until a financial plan can be developed for road improvement based on traffic importance and a pooling of convict labor forces and road machinery purchases are the major recommendations of a report just published by the Bureau of Public Roads, U. S. Department of Agriculture, following an investigation of the financing and administration of county road work in North Carolina.

These recommendations, together with others were based upon a cooperative survey of county roads and local financial operations in the 100 counties of North Carolina made by the State Highway and Tax Commission and the Federal bureau. The survey was made at the request of Governor O. Max Gardner. The recommendations of the three agencies may be grouped in two general divisions—those covering finance and those pertaining to administration.

The recommended amendment of the law to limit the use of gasoline taxes to road purposes is coupled with suggestions that for the present no more local roads be transferred to the State system and that no increase of taxation be made until local roads are classified on the basis of traffic surveys and until a financial plan is developed to provide for their progressive construction and annual maintenance consistent with their traffic importance and the available resources, the State Highway Commission to have general supervision over improvement of roads of major importance.

Under the present law, counties may, at their option, use the gasoline tax for general county debt service or for road purposes. In 1930 the local road program was financed almost entirely from local taxes, \$2,000,000 was though approximately \$2,000,000 was made available to counties from State funds, only 15 of the 100 counties spent their shares on roads. The others applied their contributions to the debt service fund used to pay interest and principal on outstanding county obligations. The investigating committee takes the stand that the gasoline tax is imposed upon motorists to provide for highway improvement and upkeep, and that it should be used for those purposes directly and for no others.

The investigation revealed that under the present county and township organizations road funds are, in many instances, expended without regard to traffic importance of the particular roads improved. It also showed an enormous total expenditure for gasoline, oil and grease, probably because of the use of machinery heavier than required. The investigation indicated that a part of the cost of State county law enforcement is being paid through the guise of road expense. Many counties also issue bonds for ordinary annual expenses of maintenance and repairs, a practice which, in the opinion of the investigators, should be abandoned.

Recommendations for an economical and practical administrative program include the pooling of convict labor forces under control of the State prison, and the pooling of road machinery purchases and equipment under control of the State Highway Commission; the abolition of all township and special road district organizations with control of the roads by organizations having wider territorial jurisdiction, and the enlargement of authority of the county government through the county commission to include supervisory and regulatory powers over budget and accounting affairs in the counties.

Recognizing that the county unit is not sufficiently large to include areas of rich and poor development within the same administrative borders, and that the area of the average county and its road mileage are not sufficient to permit of full utilization of the force and equipment needed for economic highway operations, the agencies believe that at least half of the present counties would benefit by consolidation and the residents of the larger counties would still be in close touch with the county seat than the inhabitants of the present counties were ten years ago.

With respect to pooling of convict road forces and of machinery for the common use of several counties comprising a group of subdivisions may permit an equalization of the financial burden and a more complete utilization of resources, they suggest, as a practical measure, that the grouping represented by the twenty judicial districts of North Carolina merits careful consideration.

The survey showed that purchases, operation and upkeep of machinery for local roads cause much uneconomical expenditure. The agencies favor some adequate State supervision and control so that in purchasing machinery the road organizations may receive the benefit of the reduction in price for quantity purchases. Machinery could also be selected more in accord with actual needs and large units of equipment needed for only occasional work could be moved from one point to another to end waste by idleness.

Fifty-seven counties of the State now maintain convict camps. To work county convicts economically, the agencies suggest that they be divided into two groups: honor prisoners, who can be worked without guards, and can be used in ordinary maintenance work; and prisoners who have to be worked under guard. The two groups under guard could be organized by districts and would be under the control of the State prison. Local road organizations could then obtain, when funds were available, groups of prisoners for construction work. The district camp could develop such other county work as would supplement the road work.

County roads, in general, the agencies find, are not built to the standard in width, alignment or grade set by the State Highway Commission. Of the county mileage taken over by the State, the greater part requires widening, easing of curves or addition of materials. With the present additions of county roads to the State system, and with its present supply of funds, the Commission will not be able for many years to improve in accordance with traffic requirements the mileage now under its control.

The mileage survey also disclosed that the estimated total of 65,311 miles made in 1926 by county road officials was about 17,500 miles greater than the actual count of 45,900 miles, allowing for the transfer, over the four-year period, of 2645 miles to the State system.

The three agencies conducting the survey divided their work as follows: The State Highway Commission, operating through its nine divisions, collected road mileage data on prepared maps. The Tax Commission and the bureau, operating through field parties which obtained data from county records, collected data on highway income, expenditure, bonded indebtedness and tax rates.

The atlas of maps, one for each county, shows the exact local mileage of the State and the location of the roads. It is perhaps the first complete set of county maps containing such information ever made for any State.

Engineering News Section

BRIDGES

SAN DIEGO COUNTY, Cal.—Until April 22, 2 P. M., bids will be received by State Highway Commission to construct a reinforced concrete girder bridge across San Dieguito River about 1 mile north of Del Mar, consisting of eleven 54-ft. spans on concrete piers and abutments with wing walls, all on pile foundations.

PLACER COUNTY, Cal.—Until April 22, 2 P. M., bids will be received by State Highway Commission to construct a reinforced concrete girder bridge across Coon Creek 3.6 miles north of Lincoln, consisting of six 34 ft. 6 in. spans on reinforced concrete pile bents.

MARTINEZ, Contra Costa Co., Cal.—J. H. Fitzmaurice, 354 Hobart St., Oakland, and J. P. Breda, county boards by city trustees to construct concrete bridge over Alhambra Creek in Green street. See complete bid listing in a separate tabulation published in this issue.

STOCKTON, San Joaquin Co., Cal.—Early construction of the proposed \$70,000 Garwood Ferry bridge and the \$5000 Beaver Slough bridge is assured with the signing by Governor Ralph the Crittenden bridge measure, according to County Surveyor Julius Mantley. The bid committee consists of boards of supervisors to construct bridges across navigable waterways and was hurried through legislative channels as an emergency measure. Outside engineering assistance will be required to hasten the preparation of building plans. The United States War Department has approved construction of the Garwood Ferry bridge, and an application to proceed with the Beaver slough project is on file with the Government.

MERCED, Merced Co., Cal.—Until April 14, 11 a. m., bids will be received by P. J. Thornton, county clerk, to reconstruct bridge No. 239, involving reconstruction of the floor system of the steel portion of the Cox Ferry bridge over the Merced river on the Cox Ferry road. Certified check 10 per cent payable to chairman of the Board of Supervisors required with bid. Plans obtainable from W. E. Bedesen, county surveyor, on deposit of \$10, returnable.

PLACER COUNTY, Cal.—As previously reported, bids will be received April 22 by State Highway Commission to construct a reinforced concrete girder bridge across Coon Creek, 3.6 miles north of Lincoln, consisting of six 34 ft. 6 in. spans on reinforced concrete pile bents. Project involves:

- (1) 650 cu. yds. roadway embankment (detour);
- (2) 820 sq. yds. detour surfacing;
- (3) 1 only, detour bridge complete;
- (4) 1 only, existing bridge to be removed and disposed of;
- (5) 1450 lin. ft. reinf. concrete piles, including test piles;
- (6) 335 cu. yds. class A Portland cement concrete;
- (7) 16 cu. yds. class E Portland cement concrete;
- (8) 82,000 lbs. reinf. steel;
- (9) 590 lbs. bronze expansion plates;
- (10) 1 lot miscellaneous items of work.

MERCED, Merced Co., Cal.—Until April 14, 11 a. m., bids will be received by P. J. Thornton, county clerk, to construct timber bridge No. 229 over Dry Creek on the Amsterdam and River Road. Certified check 10 per cent payable to chairman of the Board of Supervisors required with bid. Plans obtainable from W. E. Bedesen, county surveyor, on deposit of \$10, returnable.

MARIPOSA COUNTY, Cal.—Until April 21, 2 p. m., bids will be received by C. H. Sweetser, district engineer, U. S. Bureau of Public Roads, 461 Market St., San Francisco, to construct a bridge across the south fork of the Merced River and grading approaches on Section B2 of Route 2, the Wawona Road, Yosemite National Park, and constructing a bridge across big Creek and grading approaches and grade rectification on Section E of Route 47, Oakhurst National Forest Highway, Sierra National Forest in Mariposa County, involving:

6,760 cu. yds. unclassified excavation;
750 cu. yds. unclassified excav. for structures;
460 cu. yds. unclass. excav. for borrow;
6,900 sta. yds. overhaul;
34 cu. yds. Class A concrete;
58 cu. yds. Class D concrete;
100 cu. yds. Class C concrete;
9,250 lbs. reinforcing steel;
353 cu. yds. masonry;
22 in. ft. 10-in. C.M. pipe in place;
101,000 lbs. structural steel;
335 sq. yds. asphaltic plank wear surface;
27.2 M.B.M. untreated timber;
244 lin. ft. log handrails;
240 lin. ft. long stringers.

Plans obtainable from engineer on deposit of \$10, returnable; checks for same to be made payable to Federal Reserve Bank of San Francisco.

SAN LUIS OBISPO, Cal.—City council has called an election for April 6 to vote bonds of \$12,000 to finance widening of the present bridge in Essex St. near Pismo St., over San Luis Obispo Creek and widening the present culvert in North Broad St. over Old Garden Creek. Callie M. John is city clerk and Leon Moore, city engineer.

STOCKTON, San Joaquin Co., Cal.—George Owen, Petaluma, at \$948.50 awarded contract by county supervisors to construct culvert at Woodbridge Irrigation District's canal and Harney Lane in Road District No. 2. Complete list of bids follows:

Geo. Owen, Petaluma.....	\$ 848
Nelson Bros., Stockton.....	865
Carl Nelson, Stockton.....	1000
J. Hachman, Stockton.....	1045
P. L. Hansen, Stockton.....	1600

CALIFORNIA.—See "Streets and Highways" this issue. Announcement of State Highway Commission with regard to revised forms for Contractors' State of Experience and Financial Condition.

SANTA BARBARA, Calif.—Until 10 A. M., April 13, bids will be received by county supervisors to construct a steel bridge, with reinforced concrete deck, located on the Goleta Pothole Blvd., over San Roque Creek, in the 3rd Red District, County of Santa Barbara. Proposed guarantee, 10%.

The estimated cost is \$53,000. Owen T. O'Neill, county engineer. Plans obtainable from the county engineer on deposit of \$10. D. H. Hunt, county clerk.

EAKERSFIELD, Kern Co., Calif.—Wm. Eissler, Bakersfield, at \$2,194.66 awarded contract by county supervisors to construct timber bridge on the Bakersfield-Glennville Highway over Poso Creek, involving:

- (a) 145 cu. yds. excavation;
- (b) 30,756 ft. timber, board measure, including all incidentals.

Complete list of bids follows:

Wm. Eissler.....(a)	\$.50 (b)	\$69.00
F. A. Greenough.....(a)	.50 (b)	62.50
C. H. Likely.....(a)	.45 (b)	73.00
W. A. Croft.....(a)	.75 (b)	74.30
Currie & Dugan.....(a)	.30 (b)	77.00
P. W. Faynter.....(a)	.40 (b)	77.00
J. F. Shepardson.....(a)	1.01 (b)	74.85
Greene Const. Co., (a)	1.00 (b)	73.60
Glen H. Burger.....(a)	1.00 (b)	75.75

MONTEREY, Monterey Co., Cal.—Hanahan Co., Standard Oil Bldg., San Francisco, at \$37,835 awarded contract by State Highway Commission to construct a reinforced concrete bridge across Garrapata Creek about 16 miles south of Monterey, consisting of one 150-ft. arch span and five 25-ft. girder spans on concrete abutments and bents and about .28 mile of roadway to be graded. Complete list of the unit bids received on this project published in issue of March 28th.

EL CERRITO, Contra Costa Co., Cal.—Schurow Bros., 5717 Claremont Ave., Berkeley, at \$359.57 awarded contract by city trustees to construct concrete culvert in Liberty Street extension between Pink and Moesser Avenues. Other bids: J. R. Conahan, \$444; J. T. Clinch, \$464; Martin Murphy, \$600.

MERCED COUNTY, Calif.—M. E. McGowan, 74 New Montgomery St., San Francisco, at \$102,400 submitted low bid April 1 to State Highway Commission to construct steel stringer overhead crossing over the tracks of The Atchison, Topeka & Santa Fe Railway about 2½ miles east of Merced, consisting of thirty-one 40-ft. spans and seven 26-ft. spans with reinforced concrete deck on steel pile bents and steel frame bents on concrete footings with timber pile foundations and approaches to be graded and paved with Portland cement concrete. Complete list of bids follows:

M. E. McGowan, S. F.....	\$102,400
Bodenhammer Const. Co., Oak- land.....	105,481
Rocca & Coletti, San Rafael.....	106,789
Lindgren & Swinerton, S. F.....	107,238
Gutleben Bros., Oakland.....	107,351
Frederickson & Watson and Frederickson Bros., Oak- land.....	108,650
J. F. Knapp, Oakland.....	108,825
Merritt-Chapman & Scott, San Pedro.....	108,715
A. W. Kitchen, S. F.....	110,484
D. G. Johns, Santa Monica.....	110,777
Oberholzer Bros., Los Angeles.....	111,523
G. F. Atkinson Co., S. F.....	112,905
Ralph McLeran & Co., S. F.....	113,643
Mercer-Praser Co., Eureka.....	120,280
Barrett & Hilp, E. F.....	not totaled
C. W. Wood, Stockton.....	not totaled

Bids held under advisement.

PLACER COUNTY, Calif.—P. F. Bender, North Sacramento, at \$9,764 submitted low bid April 1 to State Highway Commission to construct a three-lane Auburn Ravine about one-half mile west of Auburn, consisting of six 19-ft. timber spans and six 40-ft. steel beam span on timber ends with concrete footings. Complete list of bids follows:

P. F. Bender, North Sacramento, \$9,764
J. Ulrich Const. Co., Modest, 9,791
Young, Yreka, 10,898
W. Hoops, Sacramento, 11,517
Johnston Roberts Co., L. A., 11,671
H. Nielsen, Orland, 11,730
B. McGowan, S. F., 11,754
J. H. Hansen, Oakland, not totaled
Hinton-Stephens Const. Co., San Francisco, not totaled
Bids held under advisement.

SANTA CLARA COUNTY, Calif.—Berg Bros., 3470 Hollenbeck Avenue, Los Angeles, at \$50,158 submitted low bid April 1 to State Highway Commission to construct a reinforced concrete girder bridge across Carnadero Creek about 1.7 miles south of Gilroy, consisting of four 35-ft. spans on concrete pile bents and concrete abutments, and approx. 0.25 mile of roadway approaches to be graded and paved with Portland cement concrete. Complete list of bids follows:

Berg Bros., Los Angeles, \$50,158
Hermitite Const. Co., San Jose, 51,121
J. T. Ralsch, San Jose, 51,426
B. McGowan, S. F., 53,853
Frederickson and Watson and Frederickson Bros., Oakland 54,025
Neves & Hart, Santa Clara, 55,135
L. W. Kitchen, S. F., 56,098
Peter McHugh, S. F., 59,574
D. J. Johns, Santa Monica, 62,500
Hart & Hilp, S. F., not totaled
Bids held under advisement.

DREDGING, HARBOR WORKS & EXCAVATIONS

MONTREY, Monterey Co., Cal.—Section will be held May 11 to vote bonds of \$22,550 to finance purchase of reawater shore connection and the necessary materials storage yard.

RICHMOND, Contra Costa Co., Cal.—U. S. Engineer Office, Customhouse, San Francisco, rejects bids received for dredging in Richmond Harbor, involving 523,500 cubic yards. Bids were:
Franks Contracting Co., San Francisco, 14.9c cu. yd.;
San Francisco Bridge Co., 15.1c cu. yd.
Engineer's estimate, 12.38c.

STOCKTON, San Joaquin Co., Cal.—Following is a complete list of bids received by U. S. Engineer Office, Sacramento, under Circular Proposal No. 31-265, Specifications No. 3081, for excavating approx. 216,000 cu. yds. of material and constructing spoil-receiving levees on Venice and Landella Islands in the San Joaquin river delta, about 16 miles northwest of Stockton:
Delta Dredging Co.—Borrow 6c; bucket 9c.
R. P. Easley—Borrow 6.45c; bucket 14.5c.
Parla Bros.—Borrow 7.34c; bucket 15.4c.
E. T. Fisher—Borrow 9c; bucket 11c.
A. S. Dutra—Borrow 10.35c; bucket 14c.
Dutton Dredge Co.—Borrow 11.5c; bucket 13.45c.

SACRAMENTO, Cal.—Following is a complete list of bids received by U. S. Engineer Office, Sacramento, under Proposal No. 31-266, Specifications 2025, for raising the existing levee along the easterly side of Yolo Bay-Pase in Reclamation District No. 755, involving 180,000 cu. yds.:

Ajax Dredging Co.—9.9c.
E. T. Fisher—10.2c.
Pennell & Co.—10.3c.
Delta Dredging Co.—12.9c.
Parla Bros.—12.9c.
D. A. Foley Const. Co.—12.45c.
John Phillips Co.—13.5c.
R. L. Oakley—13.7c.
R. P. Easley—14.25c.

IRRIGATION PROJECTS

LINDEN, San Joaquin Co., Cal.—Calling of an election by the Linden Irrigation District to vote bonds to finance replenishment of the underground water supply and surface irrigation, will be delayed due to protests filed with the California Bond Certification Commission by 125 Mormon Channel property owners. Fred H. Tibbitts, engineer, Alaska Commercial Bldg., San Francisco, in a report to the directors of the district proposed two plans involving an expenditure of \$137,000.

In outlining two separate bond proposals, Engineer Tibbitts recommended an issue of \$50,000 for the installation of a pumping plant at Bellota to divert waters into the old Calaveras channel, running through the district, and an expenditure of \$44,000 to purchase the Salt Spring Valley reservoir, an old mining storage basin nine miles east of Milton, owned by the California Company of Pittsburg.

Under the first proposal, one dam would be constructed in the old Calaveras river bed at Bellota, and four below that town, from which water could be pumped into the district and an adequate supply also backed up into a series of ponds for percolation through the underground strata. The second issue would provide for the purchase of the Salt Spring reservoir at a price of \$30,000, and the repairing of a canal between five and six miles long for diversion of water into a gulch which ends at the Calaveras river about seven miles above Bellota.

STREET LIGHTING SYSTEMS

SAN FRANCISCO—Butte Electric & Manufacturing Co., 956 Polson St., at \$4,340 awarded contract by Board of Public Works, to install ornamental street lighting system in Dernal Ave., involving: 29 ornamental iron standards, erect, paint and assemble; 39 luminaries and lamps, furnish and install; 39 concrete foundations with conduit beds; 11,800 5,000-volt single conductor R and L C wire; 2 series transformers, furnished and installed.

MACHINERY AND EQUIPMENT

OAKLAND, Cal.—Until April 8, 5 p. m. (previously reported April 3), bids will be received by John H. Kimball, secretary, East Bay Municipal Utility District, to furnish one portable gasoline engine driven electric welder mounted on steel skids. Proposal No. 284 obtainable from Room 21, 512 16th St.

MARE ISLAND and San Diego, Cal.—"Government Work and Supplies," this issue. Bids wanted for two 25-ton floating steel derricks of stiff-leg type with ball wheels having steel pontoons, steam engines and oil burning boilers for Mare Island Navy Yard and San Diego Destroyer Base.

OAKLAND, Cal.—Colby Steel Engineering Co., Seattle, at \$10,475 submitted low bid to City Port Commission to furnish and install a 10-ton cargo hoist for use at the Inland Waterways Terminal. Otis Elevator

Co., San Francisco, at \$14,885 only other bidder. Taken under advisement.

RAILROADS

KAHU, Hawaii—See "Government Work and Supplies," this issue. Bureau of Yards and Docks, Navy Department, Washington, D. C., will ask bids in the immediate future for the development work in connection with the Naval Ammunition Depot at Kahu, Hawaii, involving the erection of 131 buildings, approximately 11½ miles of railroad, 145 miles of paved road and electrical, telephone and water supply systems. Bidding data on this project will appear in Daily Pacific Builder in subsequent issues.

FIRE ALARM SYSTEMS

GRASS VALLEY, Nevada Co., Cal.—City council plans to install additional boxes in connection with fire alarm system.

FIRE EQUIPMENT

FRESNO, Fresno Co., Cal.—American-La France Co., at \$11,900 net, submitted the low bid to the city council to furnish a 100-gallon pumping engine for the Fire Department, including allowance for machine no longer required by city. Mack Motor Truck Co., only other bidder at \$12,200. Taken under advisement.

HAWTHORNE, Nev.—As previously reported, T. G. Rowland, Salt Lake City, Utah, at \$100,000 submitted low bid to the Bureau of Yards and Docks Navy Department, under Specification No. 6165, to construct Cat Creek Dam in connection with Naval Ammunition Plant at Hawthorne. The following is a complete list of the bids received:

T. G. Rowland, Salt Lake City, Utah \$100,000.
C. Dudley De Velbiss, 369 Pine St., San Francisco, \$118,049.
C. F. Dinsmore & Co., Ogden, Utah, \$121,000.
W. E. Kier Const. Co., 1st National Bank Bldg., San Diego, \$123,000.
Robert E. McKee, Central Bldg., Los Angeles, \$124,800.
Gist & Bell, Arcadia, Calif., \$126,450.
Thomas Haverly Co., 216 E. 5th St., Los Angeles, \$128,345.
Utah Const. Co., 760 Market Street, San Francisco, \$141,000.
Mitty Bros. Const. Co., Los Angeles \$145,525.
Ward Engineering Co., 315 Montgomery St., San Francisco, \$147,000.
McDonald & Kahn Co., Ltd., Financial Center Bldg., San Francisco, \$149,060.

Nevada Contracting Co., Fallon, Nevada, \$155,802.
A. Guthrie & Co., Inc., Sherlock Bldg., Portland, Ore., \$157,500.
Siems, Helmers & Schaffner Inc., St. Paul, Minn., \$158,550.
Guy F. Atkins Co., Russ Bldg., San Francisco, \$168,384.
Schuler and MacDonald, Inc., 1723 Webster St., Oakland, Calif., \$297,000.

The work consists of constructing a constant angle type concrete dam approximately 120 feet in height requiring rock excavation, concrete work, drilling grout holes; pressure grouting; pipe and fittings for grouting and drainage systems, and intake pipe and screens.

PIPE LINES, WELLS, ETC.

OAKLAND, Calif.—Berkeley Steel Const. Co., Inc., 2nd and Camella Sts., Berkeley, at \$3,877 ft. submitted low bid to the East Bay Municipal Utility District to furnish and deliver 22,000 lin. ft. of ¼-inch thickness 30-in. dia. electric welded sheet steel pipe for

distribution system. Complete list of bids follows:

Berkeley Steel Const. Co., Berkeley — 3.87
Western Pipe & Steel Co. of California, San Francisco — 4.23
Steel Tank & Pipe Co., Berkeley — 4.29
Steel, Inc., Los Angeles — 4.65
Standard Boiler & Steel Works, Los Angeles — 4.56
* If permitted to furnish in 26-ft. lengths, unit price to be \$4.45, total \$89.100.

** Informal due to failure to enclose certified check with bid.

FRESNO, Fresno Co., Cal.—American La France Co., at \$11,000 net, awarded contract by city council to furnish one 1000-gallon capacity fire engine to replace machine recently wrecked in collision. 27

LOS ANGELES, Cal.—Lindgren and Swinerton, Inc., 225 Bush St., San Francisco, and 523 Pacific Mutual Bldg., Los Angeles, awarded the contract by the Southern Fuel Co., Garland Bldg., Los Angeles, for the construction of approximately 25 miles of natural gas pipe line of 24-in. dia. between Long Beach and Glendale as part of the 216-mile line from the Kettleman Hills to the Long Beach plant of the Southern California Edison Co. The Southern Fuel Co. is owned jointly by the Southern California Edison Co. and the Southern California Gas Co. Pipe for this line will be furnished by the A. O. Smith Corp., 315 W 9th St., this company having been awarded contract for 151 miles of 26-in. pipe. Western Pipe & Steel Co. of Los Angeles, was awarded a contract for furnishing the balance, the greater part of which is to be used at the Kettleman Hills end of the line.

ABERDEEN, Wash.—Until April 15, 5 P. M., bids will be received by Nelle Thrift, city controller, for the reconstruction, rebuilding or replacement of sections of the Wishkah Gravity Supply Pipe Line, in connection with the water system. The project involves the reconstruction of approximately 20,300 lin. ft. of 28-inch inside diameter pipe line, together with all appurtenances to such. Monthly payments will be made in warrants against the city water fund. Plans obtainable from City Controller on deposit of \$15, returnable.

SEWERS AND SEWAGE DISPOSAL PLANTS

GONZALES, Monterey Co., Cal.—Until April 17, 3 P. M., bids will be received by Enos DeCarli, secretary, Gonzales Sanitary District, to construct sewer mains, lateral sewers, etc., as follows:

(1) SEWER MAINS, OUTFALL AND SEPARATE SLUDGE DIGESTION PLANT, the principal items being as follows:

- (1) 600 lin. ft. 8-in. sewer;
- (2) 2400 lin. ft. 10-in. sewer;
- (3) 10,700 lin. ft. 12-in. sewer;
- (4) 21 manholes;
- (5) 450 cu. yds. excavation for treatment plant structure;
- (6) 125 cu. yds. concrete;
- (7) 11,000 lbs. reinf. steel;
- (8) clarifier equipment, sludge pump, pumphouse, etc.

The district has voted \$40,000 of general obligation bonds bearing 5% interest to care for the cost of this work and incidental expenses, and the successful bidder will be expected to arrange for sale of those bonds.

Plans and specifications for this work may be secured from the engineers by making a deposit of \$10, one-half of which will be refunded upon the return of the plans within ten (10) days of letting.

(2) LATERAL SEWERS, the principal items being as follows:

- 5,746 lin. ft. 8-in. sewer;
- 11,802 lin. ft. 6-in. sewer;
- 516 vye branches;
- 55 manholes;
- 5 manholes.

Lateral sewers to be constructed under 1911 Act. Plans and specifications for lateral sewers may be secured from the engineers by making a deposit of \$10, one-half of which will be refunded upon return of plans within ten (10) days of letting. Plans obtainable from Burns-McDonnell-Smith Engineering Co., 455 Western Pacific Bldg., 1021 S-Broadway, Los Angeles, or from Cozzens & Davies, engineers, County Court-house, Salinas.

SANTA CRUZ, Santa Cruz Co., Cal.—W. H. Oliver, Soquel Ave. and San Jose Road, Santa Cruz, engineer for the Capitola Sanitation District, is preparing plans for sewer system to include two extensions of two trunk line sewers to serve territory north of the Santa Cruz-Watsonville Highway and up Noble Gulch to the highway. The system will cost in excess of \$50,000. Fund will be voted to finance the work.

LOS ANGELES, Cal.—Until 1:30 P. M., April 8, bids will be received by the Los Angeles County Sanitation District No. 2, 202 Law Bldg., 139 N Broadway, for furnishing of equipment for an activated sludge sewage-treatment plant delivered at the plant site, near the intersection of Weston and Machado Sts., as follows:

- (1) Two 4-in. or larger horizontal centrifugal sewage pumps each capable of delivering from 300 to 700 gallons per minute at maximum speed; each with a direct connected, 440-volt, 3-phase, 50-cycle slip ring motor complete with all appurtenant equipment;
- (2) One 4-in. or larger horizontal centrifugal sewage pump capable of delivering from 300 to 700 gallons per minute at maximum speed, with a direct connected, 440-volt, 3-phase, 50-cycle slip ring motor complete with all appurtenant equipment;
- (3) One horizontal centrifugal water circulating pump capable of circulating approximately 50 gallons per minute, with a direct connected, 440-volt, 3-phase, 50-cycle induction motor complete with all appurtenant equipment;
- (4) One gas pump for boosting 160 cu. ft. per minute of gas at atmospheric pressure to 4-lb. gauge pressure, with a direct connected, 440-volt, 3-phase, 50-cycle induction motor complete with all appurtenant equipment;
- (5) One gas pump for boosting 160 cu. ft. per minute of gas at atmospheric pressure to 1-lb. gauge pressure, with a direct connected, 440-volt, 3-phase, 50-cycle induction motor complete with all appurtenant equipment.

Plans and specifications may be obtained from the Chief Engineer, A. K. Warren, 202 Law Bldg., 139 N Broadway, Los Angeles. A. S. Soule, secretary.

SAN FRANCISCO—Until April 15, 2:30 P. M., bids will be received by S. J. Hester, secretary, Board of Public Works, to construct additions to the Baker and Pierce Street Outfall Sewer. Estimated cost \$15,000. Lump sum bids will be received. Certified check 10% payable to Clerk of the Board of Supervisors required with bid. Plans obtainable from the Bureau of Engineering, 3rd floor City Hall, on deposit of \$10, returnable.

PLEASANTON, Alameda Co., Cal.—Consideration is being given by the town trustees to a bond issue to finance construction of a sewage disposal system, the municipality having outgrown the present system.

positional system, the municipality having outgrown the present system.

SAN BRUNO, San Mateo Co., Cal.—City council declares intention (1284 City sewer El Camino Real bet. San Felipe Ave. and Crystal Springs Ave. involving 6-in. and 8-in. vit. pipe sanitary sewer with 4-in. vye branches 8 brick manholes. 1911 Act. Bond Ac 1915. Hearing April 22. Emil A. Bohn city clerk. R. A. Klassen, city engineer.

SAN LUIS OBISPO, Cal.—City council calls election for April 6 to vote bonds of \$18,000 to construct digester mechanism and other mechanical equipment, distributing mains and other additions to the sewage disposal plant. Callie M. John is city clerk and Leon Moore, City engineer.

STOCKTON, San Joaquin Co., Cal.—County supervisors reject bids to construct sewer at San Joaquin county fair grounds and new bids will be asked at once. Julius Manthey is county surveyor.

WATER WORKS

GRASS VALLEY, Nevada Co., Cal.—City Superintendent of Public Works George F. Bennetts is making surveys to replace the Alta Hill water line with a view to replacing same. Estimates of cost will be submitted to the city trustees shortly.

SAN LUIS OBISPO, Cal.—R. E. Burgrid, 806 Kodak Dr., Beverly Hills, at \$12,290 submitted low bid to U. S. Property and Disbursing Office for California, State Capitol, Sacramento, for installation of cast iron water distributing system to replace existing distributing system at the National Guard Training Camp at San Luis Obispo. Jas. Currie, Burlingame, at approx. \$13,500 next low bidder. Project involves approx. 12,500 ft., 10-in., 6-in. and 4-in. c. l. pipe and gate valves. Taken under advisement.

OAKLAND, Cal.—Rolph, Mills Co., 525 Market St., San Francisco, at \$14 per ft. awarded contract by East Bay Municipal Utility District to furnish 50,000 ft. of 3-in. seamless steel tubing. A complete list of bids was published in our issue of March 20.

FRESNO, Fresno Co., Calif.—City Clerk Harry Foster will ask bids at once to furnish and install three deep well turbine pumps for municipal water department. Pumps to be installed at Fresno and O Sts.; estimated cost, \$7,500. Specifications on file in office of clerk.

SEATTLE, Wash.—Until April 10, 10 A. M., bids will be received by W. D. Freeman, city purchasing agent, 511 County-City Bldg., to furnish two Gould triplex, double-action pumps 10x12-inch, direct-connected to 90-hp. Pelton water motors. Specifications obtainable from above.

OAHU, Hawaii — See "Government Work and Supplies," this issue. Bureau of Yards and Docks, Navy Department, Washington, D. C., will ask bids in the immediate future for the development work in connection with the Naval Ammunition Depot at Oahu, Hawaii, involving the erection of 121 buildings, approximately 11½ miles of railroads, 14½ miles of paved road and electrical, telephone and water supply systems. Bidding data and project plans will appear in Daily Pacific Builder in subsequent issues.

LOS ANGELES, Cal.—Contracts awarded by city purchasing agent, Thomas Oughton, for furnishing

brought steel galvanized pipe under specifications No. 2402, were awarded as follows: Steel Inc., items 1, 2, 3 and 4 at \$3973; Smith, Booth, Usher, items 5, 6 and 7 at \$2108.50. The items were: (1) 350 lengths of 3-in.; (2) 400 lengths of 1-in.; (3) 300 lengths of 1/2-in.; (4) 300 lengths of 2 1/2-in.; (5) 100 lengths of 2 1/2-in.; (6) 100 lengths of 3-in.; (7) 50 lengths of 4-in.

FRESNO, Fresno Co., Cal.—Until April 8, 1930 A. M. bids will be received by H. S. Foster, city clerk, to furnish and install:

One Deep Well Turbine Pump, 700 P. M., 150 ft. head, with Air line and gauge all installed; with direct connected or built in double and vented or equal. Motor of required HP, 440 Volt, 3 phase, 60 cycle, 1750 P. M. to start directly across line; with G. E. Magnetic Switch or equal, installed complete less electric wiring.

The bids submitted on the above pump, made subject to the condition that the successful bidder shall purchase from the City one 8-inch Byron-Jackson Centrifugal Pump, direct connected to 1-60 HP. G. E. motor, which may be seen at Station No. 15.

Also on Two (2) Deep Well Turbine Pumps, 1000 P. M., 150 ft. head, with air lines and gauges all installed, with direct connected or built in double end vented, or equal. Motor of required HP, 440 volt 3 phase, 60 cycle, 1750 P. M. to start directly across line; and with G. E. Magnetic Switch or equal, installed complete less electric wiring.

The bids submitted on the 2 pumps above mentioned shall be made subject to the condition that the successful bidder will purchase from the City one 8-inch Byron-Jackson Centrifugal Pump, direct connected to 1-100 HP. Westinghouse C. C. L. Motor which may be seen at Station No. 21.

Certified check 10% payable to city required with bid. Specifications obtainable from city clerk.

PLAYGROUNDS & PARKS

ALAMEDA, Alameda Co., Cal.—Until April 7, 8 P. M., bids will be received by W. E. Varcoe, city clerk, to erect 400 lin. ft. of chain link fence 3 ft. high at Lincoln Park. Certified check 10% payable to city required with bid. Specifications on file in office of clerk.

MARTINEZ, Contra Costa Co., Cal.—City council has instructed City Engineer Ben Greene to make preliminary surveys and submit estimates of cost for two municipal tennis courts on city property at Pacheco Blvd. and Brown St.

SAUSALITO, Marin Co., Cal.—Until April 11, 8 P. M., bids will be received by S. G. Ratto, clerk, Sausalito School District, to improve playground area of the Central School yard, Litho and Calendonia Streets, and at the South School yard, North and Third Streets. Certified check or bid bond 10% payable to Board of Trustees of district required with bid. Specifications obtainable from clerk.

STREETS AND HIGHWAYS

SONOMA COUNTY, Cal.—Until April 15, 12 noon, (to be opened 1:30 P. M.), bids will be received by Geo. P. Sanborn, county clerk, for asphaltic oil surfacing on 6.9 miles of road in the Fourth Supervisor District, including:

- (a) 420 barrels light oil;
 - (b) 140 tons heavy oil;
 - (c) 1750 tons rock and screenings.
- Above to be placed on Grant St. extension, 0.5 miles; Pitch Mountain Rd.

1.0 miles; Skaggs Rd. from Dutch Creek to Broad bridge, 1.4 miles; Alexander Valley Hill Rd., 3.5 miles; Mills St. extension, 0.5 mile.

Specifications obtainable from E. A. Peugh, county surveyor.

LAKE COUNTY, Calif.—Chas. Kupplinger, Lakeport, at \$1,314 submitted lowest bid to State Highway Commission, Sacramento, to treat with light fuel oil as a dust palliative, 10.9 miles between Upper Lake and Lucerne. Following is a complete list of bids: Chas. Kupplinger, Lakeport.....\$1,214.00 D. McDonald, Sacramento.....1,584.00 Basalt Rock Co., Napa.....1,656.30 per bbl., \$3.20.

SANTA CRUZ COUNTY, Cal.—Edw. A. Peres, Richmond, submitted low bid to John H. Skaggs, district engineer, State Highway Commission, San Francisco, to treat with light fuel oil as a dust palliative, 14 miles between California Redwood Park and Waterman Switch Back, involving 1,800 bbls.

Following is a complete list of bids: Edward A. Peres, Richmond, \$1.80 per bbl., \$3.20.

C. W. Wood, Stockton, \$1.85 per bbl., \$3.30.

Jack Casson, Hayward, \$2.14 per bbl., \$3.85.

Edward M. Dearborn, Redwood City, \$2.15 per bbl., \$3.870.

Basalt Rock Co., Napa, \$2.25 per bbl., \$4.050.

Granite Const. Co., Watsonville, \$2.35 per bbl., \$4.230.

J. P. Holland, San Francisco, \$3.60 per bbl., \$5.460.

All bids held under advisement.

YUBA AND NEVADA COUNTIES, Cal.—Until April 13, 2 P. M., bids will be received by C. H. Whitmore, district engineer, State Highway Commission, State Office Bldg., Sacramento, to treat with light fuel oil as a dust palliative, 12.4 miles in Yuba and Nevada Counties, between Seven Mile House and Rouch and Ready and in Nevada, Yuba and Sierra Counties, 20.7 miles between Nevada City and Downville. Specifications obtainable from district engineer.

MENDOCINO CO., Cal.—Basalt Rock Co., Napa, and C. F. Frederickson & Sons, Lower Lake, submitted identical bids at \$2.10 per bbl. to J. H. Skaggs, district engineer, State Highway Commission, San Francisco, to treat with light fuel oil as a dust palliative, 38 miles between McDonald and Flynn Creek, involving 4,000 barrels.

Following is a complete list of bids: Basalt Rock Co., Napa, \$2.10 per bbl., \$8.400.

C. P. Frederickson & Sons, Lower Lake, \$2.10 per bbl., \$8.400.

Jack Casson, Hayward, \$2.16 per bbl., \$8.640.

C. W. Wood, Stockton, \$2.25 per bbl., \$9.000.

Peres & Gatto, Richmond, \$2.41 per bbl., \$9.640.

E. M. Dearborn Co., Redwood City, \$2.55 per bbl., \$10.200.

All bids held under advisement.

SANTA ROSA, Sonoma Co., Cal.—Until April 15, 12 noon (to be opened 1:30 P. M.), bids will be received by Geo. P. Sanborn, county clerk, for asphaltic oil surfacing on 7.4 miles of road in the Second Supervisor District, including:

- (1) 444 barrels light oil;
 - (2) 143 tons heavy oil;
 - (3) 1110 tons rock;
 - (4) 750 tons screenings.
- Above to be placed on the following roads: Liberty road, 1.2 miles; Washee road, 1.4 miles; Mills road, 1.2 miles; Trenton road, 2 miles; Pleasant Hill road, 1.6 miles.

Specifications obtainable from E. A. Peugh, county surveyor.

MENDOCINO COUNTY, Cal.—Chig-ris & Sutsos, 2211 18th St., San Francisco, at \$11,297.60 awarded contract by State Highway Commission, Eureka, for grading 0.6 mile between Devoey Grove and the north boundary.

PLACER & EL DORADO COUNTIES, Cal.—Until April 13, 2 P. M., bids will be received by C. H. Whitmore, district engineer, State Highway Commission, State Office Bldg., Sacramento, to treat with light fuel oil as a dust palliative, 21.9 miles between Auburn and Placerville and between El Dorado and the Cosumnes River. Specifications obtainable from the district engineer.

BUTTE AND PLUMAS COUNTIES, Cal.—Until April 13, 2 P. M., bids will be received by C. H. Whitmore, district engineer, State Highway Commission, State Office Bldg., Sacramento, to treat with light fuel oil as a dust palliative, on 47.8 miles between Miner's Ranch and Quincy. Specifications obtainable from the district engineer.

OAHU, Hawaii—See "Government Work and Supplies." Bids issued. Bureau of Yards and Docks, Navy Department, Washington, D. C., will ask bids in the immediate future for the development work in connection with the Naval Ammunition Depot at Oahu, Hawaii, involving the erection of 131 buildings, approximately 11 1/2 miles of railroads, 14 1/2 miles of paved road and electrical, telephone and water supply systems. Bidding data on this project will appear in Daily Pacific Builder in subsequent issues.

HAYWARD, Alameda Co., Cal.—Until April 15, 8 P. M., bids will be received by M. B. Templeton, city clerk, to widen Castro St. bet. A and C Sts., and A St. bet. Castro and C Sts., involving:

- (1) 1557 lin. ft. concrete curb to be removed;
 - (2) 1347 sq. ft. concrete gutter to be removed;
 - (3) 4579 sq. ft. concrete sidewalk to be removed;
 - (4) 1529 lin. ft. concrete curb to be constructed;
 - (5) 5444 sq. ft. concrete gutter to be constructed;
 - (6) 4735 sq. ft. concrete sidewalk to be constructed;
 - (7) 1916 sq. ft. asphaltic concrete paving to be constructed.
 - (8) 1715 lin. ft. conduit to be laid;
 - (9) 3500 lin. ft. cable to be installed;
 - (10) 11 electrolier standards to be moved and reconnected;
 - (11) 1 traffic signal standard to be moved and reconnected;
 - (12) 73 lin. ft. cast iron and concrete drain culvert to be moved and reset.
 - (13) 1 catchbasin and inlet to be moved and reset.
- Certified check 10% payable to city required with bid. Plans obtainable from city clerk and from Jesse E. Holly, city engineer, on deposit of \$5. returnable.

PLUMAS COUNTY, Cal.—As previously reported, bids will be received April 22 by State Highway Commission to grade 1.4 miles between Spanish Creek and 1 mile south of Keddie. Project involves:

- (1) 13 acres clearing and grubbing right of way;
- (2) 157,550 cu. yds. roadway excavation without class;
- (3) 459,600 sta. yds. overhaul;
- (4) 1320 cu. yds. structure excavation;
- (5) 500 cu. yds. class A Portland cement concrete (structures);
- (6) 460 cu. yd. bar reinforcement (structures);
- (7) 750 lin. ft. 18-in. corr. metal pipe;
- (8) 180 lin. ft. 24-in. corr. metal pipe;
- (9) 80 lin. ft. 30-in. corr. metal pipe;

- (10) 80 lin. ft. 26-in. corr. metal pipe;
(11) 670 cu. yds. rubble masonry retaining wall;
(12) 71 stations finishing roadway;
(13) 30 each, monuments complete in place.

The state will furnish corrugated metal pipe.

TULARE COUNTY, Calif.—As previously reported, bids will be received April 22 by State Highway Commission to grade and pave with asphalt concrete 12.1 miles between Goshen and Kingsburg. Project involves:

- (1) 50 each, trees removed and disposed of;
(2) 42,200 cu. yds. roadway excavation without class;
(3) 73,000 sta. yds. overhaul;
(4) 200,200 cu. yds. imported borrow;
(5) 1490 cu. yds. struc. excavation;
(6) 26,000 sq. yds. subgrade for pave;
(7) 330 cu. yds. class A Portland cement concrete (struc.);
(8) 42,400 lbs. Lar reinf. steel (struc.);
(9) 54,800 tons asphalt concrete;
(10) 400 tons oil treated crushed gravel or stone surfacing;
(11) 77,700 sq. yds. asphalt binder;
(12) 4925 bbls. fuel oil (shoulders);
(13) 2020 lin. ft. 18-in. corr. metal pipe;
(14) 60 lin. ft. 30-in. do;
(15) 30 lin. ft. 36-in. do;
(16) 100 cu. yds. drainage sumps;
(17) 14.4 miles move and reset property fence;
(18) 1000 cu. yds. Portland cement concrete removed from existing pavement and structures;
(19) 5000 tons crusher run base;
(20) 1500 lin. ft. laminated timber guard rail;
(21) 633 stations finish roadway;
(22) 79 each, monuments, complete in place.

The state will furnish corrugated metal pipe.

TEHAMA COUNTY, Cal.—As previously reported, bids will be received by State Highway Commission April 22 to surface with bituminous treated crushed gravel or stone surfacing, 7.3 miles between Dales Ranch and Paynes Creek. Project involves:

- (1) 3200 cu. yds. imported borrow;
(2) 19,000 cu. yds. untreated crushed gravel or stone surfacing;
(3) 430 tons cut-back asphalt, grade E;
(4) 7.3 miles mixing cut-back asphalt and surfacing material;
(5) 1200 M gallons water applied to surfacing and shoulders;
(6) 334 stations finishing roadway.

WILLOW GLENN, Santa Clara Co., Cal.—City trustees have started proceedings to improve approximately 2 miles of streets involving an expenditure of \$150,000.

SANTA ROSA, Sonoma Co., Cal.—Until April 15, 12 noon, (to be opened 1:30) bids will be received by Geo. P. Sanborn, county clerk, for asphaltic oil surface on 31.7 miles of road in Third Supervisorial District, involving:

- (a) 1870 bbls. light oil;
(b) 640 tons heavy oil;
(c) 4755 tons rock;
(d) 3170 tons screenings.
Roads to be surfaced are Ludvig Ave., 2.5 mi.; Wright Ave., 2.5 mi.; Todd Rd., 1.7 mi.; Petrified Forest Rd., 7.5 mi.; Mark West Station Rd., 4.5 mi.; Windsor Rd., 2 mi.; Mountain View Ave., 1.7 mi.; Ballou Rd., 2.6 mi.; Wilson Ave., 1.6 mi.; Rincon Rd., 3.5 mi.; McMin Ave., 0.6 mi.; Palos Verde Lodge, 1 mi. Specifications obtainable from E. A. Peugh, county surveyor.

CAKLAND, Cal.—Bids will be asked at once by City Port Commission, 424 Oakland Bank Bldg., for grading warehouse site at the Outer Harbor Ter-

minal, involving 5,000 cu. yds. Specifications obtainable from above.

SANTA ROSA, Sonoma Co., Cal.—Until April 15, 12 noon, (to be opened 1:30) bids will be received by Geo. P. Sanborn, county clerk, for 11.5 miles of asphaltic oil surfacing in the Fifth Supervisorial District, involving:

- (a) 690 bbls. light oil;
(b) 230 tons heavy oil;
(c) 1725 tons rock;
(d) 150 tons screenings.
Roads to be surfaced are Monte Rio to Austin Creek; 2.5 mi.; Armstrong Wood road, 2 mi.; Hulbert Creek Rd., 1 mi.; Duncan to Markham, 3 mi.; Guernwood to North Wood, 3 mi. Specifications obtainable from E. A. Peugh, county surveyor.

SANTA ROSA, Sonoma Co., Cal.—Until April 15, 12 noon, (to be opened 1:30) bids will be received by Geo. P. Sanborn, county clerk, for asphaltic oil surfacing 5.5 miles on roads in Fifth Supervisorial District, involving:

- (a) 330 bbls. light oil;
(b) 110 tons heavy oil;
(c) 825 tons rock;
(d) 550 tons screenings.
Roads to be surfaced are New Occidental, 3 miles; Valley Ford, 0.5 mi.; Bay to Salmon Creek, 2-mi. Specifications obtainable from E. A. Peugh, county surveyor.

E. Jameson, fence contractor and dealer in fence wire and posts, is prepared to furnish bids on such construction. Bids will be submitted but charges will be made for any advance work in preparing such estimates and costs for sub-bid propositions. Address E. Jameson, P. O. Box 353, Sacramento.

SAN JOSE, Santa Clara Co., Cal.—John Doyle, 600 North Tenth Street, San Jose, awarded contract by city council (5306) to improve Empire Alley bet. First and San Pedro Streets, involving grading, 5-inch cement concrete pavement, cement concrete sump basin covered by two cast iron 17-in. top gratings, 8-in. vitrified pipe drain cement concrete walks, curbs and gutters, 6-in. cement concrete driveways.

MONTEREY, Monterey Co., Cal.—Until April 7, 7 P. M., bids will be received by Clyde A. Dorsey, city clerk, (3085) to improve Teresa Street bet. Monroe and Clay Sts. and Garrett St. from Clay to High St. and from High St. to the U. S. Military Reservation, involving grading, 2½-in. asphalt concrete base course with 1½-in. asphaltic concrete surface, concrete curbs, gutters and walks, twenty-two 4-inch house connection sewers. 1911 Act. Bond Act 1915. Certified check 10% payable to city required with bid. Plans on file in office of clerk.

ALAMEDA, Alameda Co., Cal.—Bids will be asked shortly by U. S. Federal Government for grading 15-acre site for the projected federal base on Government Island to house the district headquarters of the U. S. Coast Guard, U. S. Bureau of Public Roads and the U. S. Forest Service. Bids for this construction will probably be received by the U. S. Bureau of Public Roads, 461 Mark Street, San Francisco, and the work carried on under the supervision of C. Morris, senior engineer of that bureau.

WASHOE COUNTY, Nevada.—As previously reported, bids will be received April 8, by State Highway Commission, Carson City, to widen an surface existing concrete base with asphaltic concrete on 9.16 miles highway in Washoe County from Wash Summit to Huffakers on the Reno Carson City Road, involving:

- 53,400 cu. yds. roadway excavation;
1,550 cu. yds. structure excavation;
25,300 cu. yds. selected borrow;
132,192 sta. yds. overhaul;
32,704 sq. yds. prepare subgrade for paving;
18,681 sq. yds. prepare subgrade for widening;
3 demolish headwalls and (5) demolish siphon;
150 cu. yds. A and 43 cu. yds. B complete;
284 ft. 15-in., 660 ft. 18-in., 160 ft. 24-in. and 12 ft. 30-in. corr. pipe;
232 ft. 24-in. and 150 ft. 18-in. corr. siphon;
140 ft. 18-in. and 100 ft. 24-in. vit. pipe;
144 ft. remove corr. pipe;
203 cu. yds. remove concrete;
566 ft. reset and remove corr. pipe;
73 corr. pipe and 8 vit. pipe cut extensions;
270 cu. yds. cement rubble masonry;
1,504 ft. timber guard rail;
56 monuments, 2 posts for F. A. markers;
9 mi. finish roadway, 674 ft. fencing;
10 remove stumps, 6573 ft. re construct fence;
1 wood divers box, 4 later: headgates;
5,200 sq. yds. demolish concrete paving;
5,000 lin. ft. enlarge expansion joints;
13,000 tons asphalt concr. base course;
10,500 tons asphalt concr. leveling course;
13,000 tons asphalt concrete wearing surface;
96,683 ft. side forms;
9.16 miles construct shoulders.
S. C. Durkee, State Engineer.

 - (4) 20,000 sq. ft. resurfacing;
 - (5) 7,193 lin. ft. concrete curb;
 - (6) 72 driveway entrances;
 - (7) 6 part circle culverts;
 - (8) 330 lin. ft. sewer connections;
 - (9) 44,325 sq. ft. concrete sidewalks.
- 1011 Act. Bond Act 1915. Estimated cost \$20,000. Hearing April 14. Fancile I. Kurtz, city clerk. Bert J. Mehl, city engineer.

MONTEREY, Monterey Co., Cal.—Peninsula Paving Co., Standard Oil Bldg., San Francisco, at \$469,353 awarded contract by State Highway Commission to grade and pave with Portland cement concrete 11.1 miles between two miles north of Salinas and fourth boundary. Complete list of unit bids of the nine lowest bidders on this project were published in this issue of March 23.

CALIFORNIA—The California State Highway Department has published an announcement of interest to contractors as follows:

"Revised forms for Contractors' Statement of Experience and Financial Condition will be mailed within the week to all contractors who are on the qualified list for plans, specifications and proposal forms for state highway work. These revised forms provide for the affidavit of accountant to be made by a Certified Public Accountant, but, in those cases where the contractor does not desire to qualify for above \$50,000, the accountant's affidavit will not be required. Effective April 20, 1931, no names will be retained on the qualified list except those who have filed the revised form statement or whose present statement shows the financial condition of a date not prior to Dec. 31, 1930.

"Accompanying the statement forms will be a limited supply of forms to be used when requesting plans and specifications. On this latter form

there is a provision for a supplemental statement of contracts covering the period subsequent to the date of the filed copy of the Contractor's Statement of Experience and Financial Condition. This supplemental statement will be required in all cases."

SAN FRANCISCO—Until April 15, 2:30 p. m., bids will be received by S. J. Hester, secretary, Board of Public Works, to improve west half of 36th Ave. bet. Vicente St. and Sloat Blvd. Est. cost \$14,000. Project involves:

- (1) 1886 lin. ft. unarmored conc. curb;
- (2) 12969 sq. ft. 1-course conc. sidewalk;
- (3) 100 lin. ft. 6-in. V.C.P. side sewer;
- (4) 2 brick catchbasins;
- (5) 107 lin. ft. 10-in. V.C.P. culverts;
- (6) 35 lin. ft. 15-in. V.C.P. sewer;
- (7) 42,428 sq. ft. asph. conc. pavement

2-in. asph. conc. wearing surface on 6-in. class F concrete base. Certified check 10% payable to the Clerk of the Board of Supervisors required with bid. Plans obtainable from Bureau of Engineering, 3rd floor, City Hall.

SAN FRANCISCO—Until April 15, 2:30 p. m., bids will be received by S. J. Hester, secretary, Board of Public Works, to improve west half of 36th Ave. bet. Judah and Noriega Sts.; estimated cost, \$17,000. Project involves:

- (1) 2542 lin. ft. unarmored conc. curb;
- (2) 15,391 sq. ft. 1-course conc. sidewalk;
- (3) 3 brick catchbasins;
- (4) 105 lin. ft. 10-in. V.C.P. culverts;
- (5) 35 lin. ft. 15-in. V.C.P. sewer;
- (6) 35 lin. ft. 18-in. do;
- (7) 169 lin. ft. 6-in. V.C.P. side sewers;
- (8) 55,340 sq. ft. asph. conc. pavement,
- 2-in. asph. conc. wearing surface on 6-in. class F concrete base.

Certified check 10% payable to the Clerk of the Board of Supervisors required with bid. Plans obtainable from Bureau of Engineering, 3rd floor, City Hall.

SAN FRANCISCO—Until April 15, 2:30 p. m., bids will be received by S. J. Hester, secretary, Board of Public Works, to improve 37th Ave. bet. Vicente and Van Ness Sts., and the crossing of 37th Ave. and Van Ness St. Est. cost \$5,000. Project involves:

BOULDER CITY BUILDINGS STARTED

Thirty buildings, each 16x24-ft., are being erected in the industrial zone of Boulder City, Nevada, to temporarily house the workmen who will erect The Six Companies' share of the permanent city and build the construction railroad in Black Canyon at the site of Hoover dam, which the contractors must provide to handle delays and materials on the project.

The 30 buildings will be celled and plastered. They are being erected on skids so that they can be moved later on into the residential section of the town and converted into dwellings for employes by putting in partitions and the necessary fixtures. Twelve men will be quartered temporarily in each of the buildings.

A mess hall to serve 350 men is also under construction. This will consist of three wings, each 24x32-ft., joined to a central kitchen. These wings are also being erected on skids so that they can be moved later to permanent locations and remodeled.

C. A. Williams of the Morrison-Knudson Co., one of the Six Companies, is in charge of the construction of the buildings.

BOLT AND RIVET ASS'N. DISSOLVED ON COURT ORDER

Dissolution of the Bolt, Nut & Rivet Manufacturers Association, Pittsburgh as a price-fixing body in restraint of trade was ordered March 17 by Judge Frank J. Coleman of the U. S. District Court in New York City. Counsel for the association, which is said to control an annual business of approximately \$75,000,000, equal to 95 per cent of the industry's output, agreed to the issuance of the order.

Practices forbidden include the compilation and use of preferential lists of customers and the fixing of prices in concert. The 50 members propose forming a new trade association which will meet the requirements of the government.

STEAM PLANT UNIT HALTED BY MERGER

"Construction of the San Joaquin steam plant on the San Joaquin river has been delayed at least one year by the merger of the Pacific Gas & Electric Company and the San Joaquin Light & Power Corporation. Put it eventually will be constructed as planned in order to care for anticipated increases in power load."

This is the declaration of Executive Engineer L. J. Moore of the San Joaquin Corporation in response to questioning as to the effect of the acquisition of control of the San Joaquin by the P. G. & E.

Pressed for a reason for the deferring of work on the more than \$1,000,000 project, Moore said that additional power facilities made available through the tying together of the several power systems now controlled by the P. G. & E. has placed within reach sufficient electric energy as to make the San Joaquin river steam plant for the present unnecessary.

The present estimated lull in previously anticipated power consumption is apparently regarded as a comparatively temporary situation.

New orders for 516 steel boilers were placed in February, 1931, according to reports submitted to the Bureau of the Census by 74 manufacturers, comprising most of the leading establishments in the industry, as compared with 598 boilers in January, 1931, and 873 boilers in February, 1930.

John Etatch of the Brown-Etatch Construction Company, engaged in grading a terminal yard for the Great Northern Railway, five miles south of Bieber, Lassen County, was fined \$39 by Justice of the Peace Philibert when he pleaded guilty to the charge of violating the labor camp sanitation act. Etatch was charged with housing workmen in insanitary quarters and making no attempt to keep the bunkhouses and grounds clean.

An investigation to determine the form of the water table and its usual fluctuation in an area of about 400 square miles in the lower portion of the drainage basin of the Calaveras River, California, has been conducted since September, 1926, by the United States Geological Survey, Department of the Interior, in co-operation with the City of Stockton. A short report has been prepared by George H. T. L. and Thomas W. Robinson, discussing the water table and giving tabulated measurements of depth of water in 80 observation wells for September and April of each year since the investigation was started. The report includes maps showing the location of movement of the ground water, the position of the water table in September and April of each year, and the depth to the water in the September, 1929. This report, together with the maps, is now on file for public inspection at the office of the city engineer of Stockton and the office of the United States Geological Survey, Lodi, Calif.

Howard G. Bissell, architect, secretary of the Stockton City Planning Commission, addressed the Central Labor Council of Stockton Monday evening. Bissell explained features of the new city planning ordinance for Stockton, now being drafted.

Woodcraft Manufacturing Co., manufacturers of display fixtures, opened showrooms at 720 Mission with Miss Helen Whiting in charge. The company maintains a plant at Fourth Street, Oakland, under the direction of C. W. Stevenson, manager.

When the new Portland, Ore., telephone directory is issued in Spring, it will feature a listing of members of the Portland Association of Master Plumbers. The listing will be captioned with a preamble clothed in the standards of association membership. That's sensible and effective advertising.

A "Pittsburg" Automatic Water Heater installed in the Home indicates high quality throughout.

Recommended and specified by all the leading architects, plumbers and builders.

Consider the high merit of the Pittsburg coupled with "Pittsburg Perfect Service."

"Hot water quick as a wink."

Pittsburg Water Heater Co.

Makers of "Pittsburg Automatic"—"Bungalow Automatic" Storage Systems and "Lyon" Tank Water Heaters.

A Pointer on **P**rinting

Printing matter is not a commodity—it is a necessity, like the salt in our soup. Without printing matter modern business is unthinkable. The more we invest in printer's ink—that is *in the right kind of printing*—the greater the results. Therefore it is of vital interest to select the RIGHT kind of printer. — There are printers AND printers—but few are self-containing in mechanical and creative ability.— Put us on the track, and, like this pointer in suspense, we will bring back the bacon.

SPARKING CONCRETE FLOORS BANNED IN AMMUNITION PLANT

One of the safety requirements laid down for the powder magazines constructed at the new naval ammunition depot, Hawthorne, Nev., was that the concrete floors should have non-sparking surfaces, says Engineering News-Record. The importance of this requirement is apparent from the fact that 71 tons of castile soap stored in each magazine unit and the ultimate total for the depot as a whole is about 6000 tons.

The non-sparking requirement was met by treating the thoroughly cleaned concrete floor surface with a solution of 2 lb. of castile soap completely dissolved in 4 gal. of water. This solution was applied liberally to the surface at a temperature not less than 200 deg. F. and worked into the surface with a long-handled brush in a manner to remove air bubbles, without forming a lather. After thorough drying, the floor was treated with a solution of 1/2 lb. of potassium alum dissolved in 4 gals. of lukewarm water. When this application had dried, another complete treatment of soap and water, followed by alum and water, was repeated. After drying again, the floor was finally washed to remove the light coating of potash which formed on the surface. On floors treated in this way it was practically impossible to draw sparks by striking the concrete surface with hard objects.

OHIO BILL TO LICENSE ENGINEERS VETOED BY GOVERNOR

Governor White of Ohio has vetoed a bill which was passed by the legislature proposing to create a state board of registration for professional engineers and land surveyors and to require such engineers and surveyors engaged in public works to be licensed by the board.

The governor gave as one of his reasons for the veto that the bill provided that a firm, copartnership or corporation might engage in the practice of engineering and surveying, and he holds that "the professional relationship is essentially a confidential relation to which an impersonal corporation cannot well be a party."

Another reason given for the veto was that the bill would require the services of a professional engineer upon any public work costing more than \$500, a limit which the governor thinks is too low.

PRIZE AWARDS FOR QUANTITY SURVEYORS

With a view to establishing a Uniform Method which will be beneficial to the entire construction industry, the American Institute of Quantity Surveyors is offering prizes for the best quantity surveys on each trade in the building industry. This competition is open to all quantity surveyors and estimators connected with building construction. Contestants are requested to forward their surveys to the Institute Secretary, F. E. Dischner, 810 Empire Bldg., Detroit, Mich. The competition closes May 15th and the winners will be announced at the Sixth Annual Convention of the Institute May 25, 26 and 27 at Netherlands Plaza Hotel, Cincinnati, Ohio.

For the first three months of this year, City Building Inspector Shields reports, 332 permits issued for improvements involving an expenditure of \$1,132,758 as compared with 352 permits for the corresponding period in 1930 when the valuation registered \$865,090.

BACON COMPANY GETS LIDGERWOOD AGENCY ON COAST

The Lidgerwood Manufacturing Co., Elizabeth, New Jersey, announces the recent appointment of the Edward R. Bacon Co., of San Francisco, as distributors of their complete line of construction hoists and cableways in Northern California, Western Nevada and Honolulu.

Lane McLean, vice-president and general manager of the Lidgerwood Company, was recently in San Francisco concluding the sales agreements between the two companies.

The Lidgerwood Company manufactures and designs a line of aerial equipment, particularly suitable to construction on dams, the company placing practically all of the aerial equipment used in the construction of the Panama Canal, the only peacetime project to exceed Hoover Dam in size.

The Edward R. Bacon Company has offices, sales and display rooms in San Francisco, Oakland, Sacramento, Fresno and San Jose, California; in Reno, Nevada, and in Honolulu, T. H., where they maintain a complete display of contractor's equipment.

PENINSULA PLUMBERS PERFECT ORGANIZATION

The Peninsula Merchant Plumbers' Association was organized at a recent meeting in Palo Alto of merchant plumbers operating in the Peninsula district.

Officers of the association are: President, P. E. Brand, Redwood City; First Vice-President, Chas. Merritt, San Jose; Second Vice-President, W. F. Craig, San Mateo; Secretary, Frank Lindstrom, Burlingame; Treasurer, H. P. Hansen, Palo Alto.

The Board of Directors is composed of the officers and the following: John Peabody, San Jose; Fred Berryman, Los Gatos; J. E. Bracesso, Menlo Park; H. R. Parks, Burlingame, and W. E. Allen, Burlingame.

Monthly meetings will be held by the association at various points on the Peninsula.

DEATH CLAIMS DUDLEY M. MILLS

Dudley M. Mills, vice-president of the Musto-Keenan Marble Company and manager of the company's business in Los Angeles, died suddenly of heart disease at his home in the southern city March 31. He had been in apparently good health up to the time of his death.

Mr. Mills was born in New York in 1878 and came to California in 1900, establishing a marble business. Two years later he went to Los Angeles as vice-president and general manager of the Musto-Keenan Company.

His widow and a daughter survive.

SUBWAY WAGE PROBE DEMANDED BY UNIONS

Reiterating that J. F. Knapp, Stockton contractor, awarded the building of the Seventh Street subway under Southern Pacific tracks, was still paying small wages to laborers, Charles R. Gurney, secretary and treasurer and business representative of the Alameda County Building Trades Council, appeared before the Oakland city council and demanded an investigation.

Commissioner George H. Wilhelm stated that the provision of the charter referred to contracts entered into between the city and contracting firms and that the Seventh street subway was a contract between Knapp and the railroad company.

C. Stanley Wood, city attorney, declared that he had talked to Gurney and was gathering facts, but still believed that the city had no jurisdiction.

The city is to pay one-half the cost of construction, estimated at \$205,000.

Southern Pine Association, New Orleans, La., announces that manufacturers of longleaf pine are prepared, through the association, to furnish certificate of species to shippers of their products.

DIFFICULTIES OF THE BUILDING INDUSTRY ARE DUE TO CHANGING CONDITIONS, SAYS BUSINESS CHIEF

By JULIUS SEIDEL

In addressing the meeting this morning, it becomes necessary to digress from the subject that was assigned to me, this to make an intelligent presentation of facts as to the why's and wherefore's, reasons, so-called, for the formation of the Construction Industries Division of the Better Business Bureau of St. Louis.

Your trade, namely sheet metal, is a part of the construction industry and you are to be complimented upon the desire to perfect an organization and continue to improve its usefulness to yourselves, your state and national association. It is my understanding that you have been organized about eleven years and that you have a membership of 110 in the state of Missouri.

The very first essential in forming an organization is a definite aim or objective. Generally speaking, an organization aims to correct abuses that develop and even multiply from time to time, and to decide upon a rational constructive method of commercial uplift. Humankind is so constituted and constructed that the majority desire to do that which is right and just according to their viewpoint. When such an individual contacts with men of and with similar values, there is a communion which builds up respect and friendship; for it is well said that acquaintanceship begets friendship and friendship begets confidence and confidence begets business.

Confidence Begets Business

Confidence is the backbone of our faith, whether it be in religion, in our government or in men. Associations must, therefore, begin with confidence in the men who are affiliated for a common good—confidence in each other and in accomplishing the work for which they are convened and from which they hope for improvement. In these endeavors we must not get away from the one fact that we are not born for ourselves alone, that our state, our friends and society demand and are entitled to some part of our ability and efforts. Now, all men are not leaders and that being so, it often becomes necessary for men of talent to accept the responsibilities and also penalties of leadership. The difficulty is to find the leaders and when that is done, for those whose interests they have at heart and whom they desire to help, and do help, to stand steadfastly by them so as to make their burden lighter and their duties more pleasant.

With a life of experience in organization matters I would say that, since to err is a human failing, it is always well to openly and freely discuss mutual interests when in caucus or attending councils or trade one that when away on the side lines.

The individual today is unable to successfully cope with the quickly changing business and economic conditions in his field and must organize and contact with his competitors to make his calling or trade one that has the respect of his fellow-members as well as that of the business world and the interlocking industry of which he is a component part.

Ten often men are prone to consider an association as a price-fixing medium. If that were the object, you would fall of progress and success, because the inefficient would, in order to remain in business, need the aid of the efficient. It would be purposeless because by helping the inefficient to

Mr. Seidel is chairman of the Construction Industries Division of the Better Business Bureau of St. Louis. The address published herewith: "Modern Trends in the Building Construction Industry and the Necessity of a Broader View on Operation," was delivered before the Missouri Sheet Metal Contractors' Association at Saint Louis, February 25, 1931.—Editor.

add and maintain a profit, it would be encouraging incompetency.

Efficiency in Production

Present-day methods of organization are based upon study of overheads. To stay in business you must produce efficiently and as a natural consequence cheaply. Comparisons and experiences reduced to positive fact-finding go to build up definite savings in which the public is concerned and participates. Profits can be made by surveys far more dependable and permanent than by the outlined trade pooling. You must be willing to determine overhead costs of doing business by your books and pay for the knowledge. These surveys are not considered expense, but are a definite part of overhead in doing business. This suggestion is one that can be applied to business associations generally and more particularly to mechanical trades.

Mechanical trades are too prone to figure on getting out the mechanical work with utter disregard of systematized accounting and the allocating of expense in so doing. Associations are the means of changing these conditions and prove their wisdom and they only, for the following reasons.

Individuals who know costs and have ability in their line are beset by the competition of those who do not know them. Hence, success or failure is predicated upon a comparison and study of problems by the men engaged in a similar field.

Now there is another point that is of grave importance, namely the interlocking responsibility to others with whom you do business, trade and co-operate. The maker of the raw materials which you use certainly expects you to assist in promoting the use of his material, and no one can be enthusiastic about a business that does not prove a success. He expects you to be a success and whether or not you believe it selfish, has a right to that opinion because it is sound. The manufacturer of raw products does in these times seriously consider the ultimate consumer and feels that the final user of a fabricated product is the one who must be considered for continued desire and repeat orders. The public, hence, is the all-deciding factor for a product. The raw products of forest, mine and soil used in building materials are interested in and vitally affected by the actions of the factory, producer, contractor or merchant in the final distribution of a finished product to the ultimate consumer.

Formerly the customer sought his source of supply, today the source of supply seeks the customer. You see from this that you, as a part of building operations, owe an obligation to others, as they in turn do to you. I sometimes believe that the building business is an uncontrolled industry in many of its workings, caused by changing of conditions.

There was a time when the carpenter was the boss on house building, and consistently so because at that time buildings were largely constructed of wood. However, new materials for identical purposes were brought forward and became fair competitors for the business. This created new trades. As this is an age of specialists, quite naturally the building trades became specialized trades and we created new trade lines. The general contractor today might be identified with many lines such as the carpenter, bricklayer, mason, concrete worker or structural iron manufacturer, since any one of these lines might, with perfect consistency, have the major contract. So the subcontractor became a master of his own trade, working, however, under a general contractor.

Complexity of Modern Building

In my survey I found about 33 major lines, consisting of material dealers and contracting groups, employed on a house. Just imagine how complex the building business has become. The complexity of this situation has been apparent for many years and while the erection of large buildings was under control and supervision, generally speaking, of technical men, by which I mean engineer or architect, it was not so with the small dwelling. The housing of our people had, under the general idea of mass production, brought out the same urge in buying a finished house that as usually the result in boom periods, we found that in our respective lines—whether contracting, material or financial groups—we are beset with a new competition—that of the uninformed and inexperienced and those who, engaged temporarily in a line, for the money that could be earned or made out of a stable business while conditions were above normal. The "jersey-built house" was the result of these conditions.

We must consider building today from the standpoint of a complete unit—the finished house ready for occupancy—since that is the way the public buys and will continue to buy as far as the masses of our nation are concerned. Then again, we must create the desire to buy a building, make it one of our main objectives, and this desire must find its boost through the firms engaged in the various contracting lines and manufacturing or selling, as all are a part of the building business.

Naturally, therefore, we find it necessary to create and establish confidence in our lines and the building business as a whole, and we must so educate the buyer and assist him to decide wisely and well in his purchases. Selling of buildings, whether for homes or investment, needs our earnest attention and help.

It was after a survey of cause and effect that we had to conclude how we could correct the situation. The words referred to. We concluded that the Better Business Bureau could be instrumental in clarifying the atmosphere if they would co-operate with us. You ask why the Better Business Bureau? Because we believe in their ideals as best expressed in their own words: "To promote and maintain fair competition and dependability in advertising and selling and to protect the public against misrepresentation, deception and fraud." The building

dustry can wholeheartedly subscribe those fundamental ideals. Our industry represents groups, con- rared with their own problems. Said say, the respective groups are not ways organized, and as a result chaotic conditions exist which are re- cted in the building business as a hole. The building business as a hole is strongly affected, as in any her line of business, by the short- mner of the few. Other lines were helped by the bu- au because the bureau represented e public and public opinion is a minating force to be reckoned with. The Building Construction Indus- es, when accepted, became a part of bureau. Six directors of our di- sion are active on the board of 65— outstanding business executives, e do have the experienced advice of ees men to determine proper pol- icy and which are sound in any business. This board represents fi- nancial and manufacturing and mer- andising—all in short, business inter- ts of all kinds interlocked, yet co- ordinated for the common good. Our first problem was the necessity of determining some standard of easure, or yardstick, to evaluate the vestment in building. We failed to id any textbook on the component rts of an entire building. Our job is definitely determined to be one of determining a yardstick through hich all factors could be welded to- gether to make up a finished building, ected and ready for occupancy. We eeded a textbook of fundamentals, vering every major line of material, and connecting groups, and that itter in language to be understood the layman. We appreciated fully at not until that work was done ould there be a minimum of stand- ds to enable the bureau to separate id place building in a class of good, d and indifferent.

Determining Standards
To accomplish this aim, o prepare ch a treatise, meant organizing the pective groups to reach a common nderstanding as to what should be e law of good practice. We decid- on preparing and issuing "Good ctice Specifications." Progress necessarily was slow. We ganized material dealers, contrac- g groups, and quite naturally in- cluded the professional men: archi- ts, engineers and general contrac- rs. The department of public safe- ty and the building commissioner were our conferences and proved most eful. Finance being the keynote of y business arch, we concluded that e financial interests which were eemed as a part of building fi- nance should be invited to sit in on ur group and so the mortgage bank- s, building and loan associations, id real estate interests voted a rep- resentative director to our body. We e our group organization committees re professional, three finance, six contracting and eleven material dealer ctors.

The result of our labors, covering ajor lines, meant the adoption of 27 equirements in the erection of a complete building. The work re- sulted over a year for completion at a st of over \$20,000, underwritten by idividual and group support. No man e the board of directors received any mpensation, but accepted the grave ty and responsibility for the good of e cause—that is, to help building perations to correctly function under ntrol of a supervising body.

Good Practice Specifications
On December 9, 1930, we had our eeting of the construction industry, t which time the "Good Practice pifications" were released. We have e a local job with a national sig- nificance. Since that date trade or- ans have commented very favorably e the constructive benefits of what e have done and organizations are

partnering after us, who have blazed a trail.

We concluded to cover the field of small dwellings first, as that field needed urgent help and involved the greatest public interest. Elements of safety, permanence and attributes in material and workmanship inherently essential to all good building construction is fully covered.

The endorsement of the American Institute of Architects, St. Louis Chapter; Society of Engineers, Associated General Contractors, Master Builders, Department of Public Safety, Mortgage Bankers' Association and Building and Loan Associations should be a guarantee of the correctness of the practical and technical work, not to forget the approval of financial inter- ests.

We have all sensed the necessity of interesting the public in building work and it means much to determine good times or bad times to our people. Building operations, directly and in- directly, give employment to our me- chanics, but in our survey we must not be unmindful of the influence of build- ing operations on the manufacture of building material involving clay prod- ucts, steel, lumber, cement, roofing, glass, paint and the like, not to men- tion the furnishings when a home is occupied.

We are still organized, for we have contacted the public in our work. We want you to realize what we collectively have done for the building construction industry as a whole. To im- prove conditions you must take your- self seriously and feel that you do have obligations to others when work- ing for the general good. Industry is helped by all pulling at the tow line. Applause means little when you all fail to co-operate or withhold moral or financial support.

S. F. UNEMPLOYMENT REPORTED ON DECREASE

Decrease in average monthly employment and payrolls of manufactur- ings establishments during 1930 was less in San Francisco than in other parts of the state, according to statistics made public by the State Employment Committee. San Francisco County's decrease in employment was 5 per cent, against 12.7 per cent in the remainder of the state, and the decrease in payrolls was 4.9 per cent in San Francisco to 15.9 per cent in the rest of California.

Decrease in Los Angeles County was 12.7 per cent in employment and 18.1 per cent in payrolls. This is accounted for in the report by the greater expansion of manufacturing activity in Los Angeles during 1929.

ROAD BILLS GET ASSEMBLY APPROVAL

Two bills designed to facilitate arrangements between counties and the state and federal governments for the building of roads have been given the approval of the assembly roads and highways committee and sent to the floor for action.

One of them, S. B. 289, permits counties to spend money outside their boundaries in co-operation with the federal government. The bill is waned particularly by some of the moun- tain counties.

The other, A. B. 58, provides the machinery for co-operation by the state with two or more counties in building roads.

The committee recommended adoption of two resolutions by Assembly- man George M. Biggar calling for an investigation of grade crossings and for an additional survey of secondary roads.

EMPLOYMENT IMPROVING SAYS STEEL INSTITUTE

A marked improvement of business in the steel construction industry is fast eliminating the employment emergency in that group, according to a statement received in General Arthur Woods, chairman of the President's Emergency Committee for Employment, from Charles N. Fitts, president of the American Institute of Steel Construction.

"With the opening of spring construction," says W. M. Fitts, "the firms reporting to the American Institute of Steel Construction state that their hours of labor, number of working days per week, and total pay roll have consistently increased, and if continued at the present rate, will be back to normal again by the beginning of summer. Our employment outlook has been greatly improved by the tonnage lettings which have been heavier during the first three months of 1931 than during the same period of 1929.

"During the peak of the depression, which was reached in the winter months, drastic measures were adopted by the steel construction industry to retain as many men as conditions permitted. Now that improvement is setting in, our member companies are able to return to a more normal regime.

"One firm in the South writes: 'About six or eight months ago we cut down our shop hours from nine to seven per day. About six weeks ago, however, we increased the time to eight hours per day due to improve- ment in our business. In the office, in an effort to reduce overhead, for a period of about two months we laid off two employees at a time without pay. Now that we are busy, we have discontinued this.'

"From New England, a report was received stating: 'We have discontinued making cuts in our force and are holding our organization intact in the hope that business soon will improve. We are inclined to believe that things already are on the mend.'

"Following are some of the practices applied by steel construction companies during the depression to keep employment at a maximum. A firm in the West adopts the expedient of working in six-hour instead of eight-hour shifts. In Pittsburgh, the office forces were held intact, but some firms reduced the shop force to four-day weeks. On the West Coast, the shop force was put on a 44-hour week and workmen rotated on the jobs. In other cases, the work week was reduced to 40 hours. In the Middle West, where the slump was for a time most acute, plants adopted the practice of using the men on repairs and plant improvements.

"Full recovery will mean the re-em- ployment of about 10,000 persons who have been out of work, and will in- crease the working hours of about 15,000 who have been on part time. Normal employment in the steel construction industry is about 40,000."

This is the second report received by the President's Emergency Committee from the American Institute of Steel Construction. More than 100 other industrial groups are cooper- ating with the committee and similarly have been applying emergency mea- sures to the successful maintenance of employment.

J. R. Wilson, a former executive of the Lathrop Electric Co., plumbing and electrical contractor of Sacra- mento, will return to that city about May 15. Since leaving Sacramento about a year ago Wilson has been managing the Fred J. Kiesel estate in Ogden. He will still be connected with the Kiesel interest upon his re- turn.

THE OBSERVER

What He Hears and Sees on His Rounds

The Federal Trade Commission has announced completion of the task of reviewing the rules of business practice adopted by nearly 80 industries at trade practice conferences held at various times, mostly in the last five years. The rules for each industry will be announced separately after each industry has been given an opportunity to adopt changes made by the commission.

The nationwide average hourly rate paid skilled building mechanics is \$1.35-75, compared with \$1.36-85 a month ago and \$1.37-95 a year ago, according to Engineering News-Record. The average common labor rate is 53.59 cents compared with 53.71 a month ago and 55.46 a year ago.

Proposed amendments to the Manitoba Architects' Act under which plans and specifications for public buildings costing over \$10,000 were to be prepared by a registered architect or engineer, were recently thrown out by the Law Amendments Committee during the course of the present sittings of the Legislature. Western Canada Contractor reports. The clause defining grounds of proof for offences under a statute in respect to unregistered architects was passed and the Bill as amended was ordered to be reported to the House.

Proposal that an eight hour day on public works in Contra Costa be made effective, that citizens or declarants for citizenship alone be employed and that a pay scale equal to the highest in private work be operative is constitutional, District Attorney James F. Hoey has informed the Contra Costa County Supervisors.

Hoey's opinion was given on a resolution proposed for adoption by Supervisor James N. Long of Richmond as a means of insuring favor for Contra Costa County labor and materials on county projects and other public building work.

Hoey informed the board that the citizen employment provision is now embraced in state law but that constitutionality of a provision that Contra Costa labor and materials be given preference is questionable. He said, however, that such a provision might be embraced in the resolution and that if objection should arise it would be up to the objector to sustain his attack.

Other provisions of the Long resolution, the district attorney said, are legal in his opinion.

The section of favor to labor and materials may be cleared up, however, through possible passage by the legislature at this session of a law that would permit boards of supervisors to allow a five per cent differential in prices in favor of county firms.

The business handled during 1923 by the 1923 wholesalers in San Francisco handling lumber and building materials, according to census bureau data, amounted to \$83,459,354, or 5.23 per cent of the total volume of wholesale business in that city, paid their 1155 employees salaries and wages of \$3,619,292 and had stocks on hand at the end of the year worth \$11,364,884. The 39 wholesalers handling lumber alone did a business of \$33,718,520, paid out more than \$1,000,000 in salaries and wages to 392 em-

ployees and had stocks at the end of the year worth \$4,151,360. Three wholesalers handling millwork reported a volume of \$3,622,304, paid 49 employees \$167,373 and had stocks worth \$226,340.

The attention of contractors is directed to the Nevada statute regarding public works contractors which was passed by the 1931 State Legislature. This law requires all public works contractors to secure a license prior to engaging in the business, or acting in the capacity, of a public works contractor in the State of Nevada. The State Controller of the State of Nevada, Carson City, Nev., is made registrar of the contractors. An application for the license must be made through his office. The license fee is \$200 for the first year and the renewal fee is \$100. No proposal for highway work will be accepted by the State Highway Department unless the contractor has secured the necessary license.

Building conditions throughout the nation show a slight general improvement, but the recession from the dormant state of the building industry of the past 16 months is reflected largely in the construction of public type of building and not in homes or industrial building.

This opinion was expressed by E. M. Craig, the Executive Secretary of the National Association of Building Trades Employers, after completing an analysis of reports from builders in forty principal American cities.

Mr. Craig stated the construction industry today is largely dependent upon federal, state and municipal construction to tide it over until there is renewed activity in construction on an extensive program of homes and other types of building. He points out that since December 1, 1930, the federal government has awarded approximately one billion dollars in contract for work. Mr. Craig said this federal reservoir has materially cut unemployment among the building artisans of the country, and prevented the entire building from becoming almost totally dormant.

Mr. Craig declares the recovery of the stock market has been slow and lags behind the desire of prospective builders to retrieve some of their losses and accumulate sufficient surplus to finance building. Banks, he says, have been holding paper on property which became frozen with the general industrial depression.

"Banks are in the strongest position they have achieved since the depression started. They are simply able to finance any improvement in business. The Federal Reserve Board issued a formal statement to that effect this week," says The Business Week, in reporting developments for the week ending March 28. "This is the first clear statement from the board which has indicated that it feels better about the banks' condition," the publication continues. "Some observers read into it the natural implication that the board is now assuring the business that expansion ought not to find any obstacle at the bank. The fact that the board should make such a statement is regarded as highly significant."

Reports of new orders for fabricated structural steel for the week ending March 14, 1931, were received from 10 establishments, whose capacity represented 51.0 per cent of the total capacity of all plants in the United States. The bookings reported 19 these establishments amounted to 19,798 tons, representing 42.1 per cent of the total capacity of the reporting establishments. Reports of shipments of fabricated structural steel for the same week were received from 104 establishments, whose capacity represented 49.3 per cent of the total capacity of all plants in the United States. Shipments reported by these establishments amounted to 23,344 tons, representing 52.4 per cent of the total capacity of the reporting establishment.

Having been directed by the United States Senate to investigate competitive conditions in the cement industry, including the importation of cement, and to report the findings to the Senate, the Federal Trade Commission has delegated the details of the inquiry to its chief examiner, who will cooperate with the commission economic division, which has already obtained numerous data on the subject through its investigation of price bases. The Senate resolution calls for an inquiry concerning (1) the cement, and especially the price activities of trade associations, (2) the distribution of cement, and (3) activities of the industry in the light of its anti-trust laws.

After a brief hearing, the Senate mines and mining committee, tabled S. B. No. 744, by Senator R. R. Inge of Mendocino County, fixing an 8-hour work day for the employees of cement plants. The bill was approved by Senator George Cleveland of San Cruz County.

State Senator Haldiman of Arizona has introduced a measure providing a plumbing code to be under direct of the state board of health and the appointment of a plumbing inspector to receive \$2400 annually. Compensation for the inspector and other employees would be provided from fees to be charged for licenses.

Nation-wide agitation to pass an labor injunction laws in all industrial states where legislatures are in session is being carried on by state labor federations in conjunction with the National Committee on Labor Injunctions, headed by Charles F. Amidt, former federal judge in North Dakota. Bills to prevent courts from issuing injunctions in labor disputes without giving both sides a hearing have been introduced in eight states: Kansas, Maine, Massachusetts, Minnesota, Missouri, North Carolina, Tennessee, and Wisconsin. These measures are based on a model anti-injunction bill sent out by the National Committee, and drafted by Nath Greene, New York attorney, co-author with Prof. Felix Frankfurter of a recent book, "The Labor Injunction."

An ordinance designed to regulate contractors engaged in municipal work to employ only residents of the city has been introduced to the Fresno city council by City Commissioner Finance William Glass. The ordinance provides that every contract which the city engages must provide that preference in employment shall be given to persons who have actually resided in the city at least six months prior to the date of the contract, and that the ordinance shall be mentioned in every city contract. If this clause is not observed the contract shall be null and void.

TRADE LITERATURE

Accomplishments of the Pittsburgh Testing Laboratory, Pittsburgh, Pa., during the past 50 years are recorded in a 32-page illustrated bulletin issued by that company.

A 20-page bulletin listing supplies or are welding, ranging from portable welders to protective clothing, has been issued by the Lincoln Electric Co., Cleveland, Ohio.

Colloy, a colloidal-type inert workability admixture for concrete, is described in form 201-C, a 4-page leaflet issued by the Colloy Products Co., 630 Chouteau Ave., St. Louis, Mo.

Principles of operation and fields of application for the Nuveyor ash-removal system are outlined in a 20-page illustrated bulletin of the United Conveyor Corp., Old Colony Bldg., Chicago, Ill.

Two new lines of fittings made by a special process involving forging in two halves and then electric machine welding are described in a 12-page circular 236 prepared by the Crane Co., 856 South Michigan Ave., Chicago, Ill.

Advantages of Cleveland tramrail installations on the exteriors of buildings to form a permanent window-washing system are outlined in a 4-page folder issued by the electric tramrail division of the Cleveland Crane & Engineering Co., Wickliffe, Ohio.

An account of six recent tests held to demonstrate the resistance to heat and flame of Fire-safe treated lumber is compared with untreated lumber is given in a 4-page folder produced by the Chesbro-Whitman Co., Inc., Long Island City, N. Y.

Catalog 14, issued by Sauerman Bros., Inc., 433 South Clinton, St. Chicago, Ill., contains a detailed description of Sauerman power drag scraper equipment, accompanied by photographs and operating data. Various fields of activity in which this equipment is used is treated in separate chapters. The booklet contains 2 pages and many illustrations. An entirely new section on tower machines has been added, showing the latest improved mobile equipment for the construction of levees and embankments for any time of work where the scraper must make long continuous cuts or fills.

A twenty-three page, illustrated publication, titled, Banishing The Twilight Zone from Modern Buildings, and Identified as A-1204, has been announced recently by the Westinghouse Lamp Company and the Westinghouse Electric & Manufacturing Company, and presents a discussion of present-day principles and practice in the interior lighting of modern buildings. The booklet discusses the reasons and means for raising the level of illumination in modern buildings to the point most beneficial to the ultimate consumer of light — the human eye. Considerable engineering data and photographs showing lighting installations in offices, lobbies, drafting rooms, bedrooms, and many other building interiors are included. The new publication has been assigned A.I.A. No. 11-F-232.

HERE—THERE EVERYWHERE

Unions of Dennison, Tex., requested a one dollar per day cut in skilled wages with common labor rates unchanged, according to Engineering News-Record.

Bricklayers at Atlanta, Ga., walked out on March 9, last, because employers wanted a 20 per cent wage reduction and would not accept a 10 per cent cut.

Fiftieth annual convention and exhibition of the American Electric Railway Association will be held Sept. 26 to Oct. 2 at Atlantic City. The closing date for the receipt of applications for space at the exhibition is April 20.

Thirteenth annual convention of the California State Association of Master Plumbers will be held in San Diego, May 18-21, inclusive. Headquarters will be maintained at the U. S. Grant Hotel.

The Colorado state house of representatives, by a vote of 33 to 24, passed House Bill No. 171, providing for the licensing of plumbers and regulating sanitary measures.

Plans for a permanent home for the Santa Rosa Builders' Exchange, with a full-time secretary and exhibits of various products used in the construction of buildings, were laid at a meeting last week. A housing committee has been appointed to secure permanent quarters.

Manufacturers of the sheet metal industries will hold a conference and exhibit in Louisville, Jan. 25, 1932. The National Sheet Metal Contractors Association, the Roofing Division of the National State Association and the United Roofing Contractors Association will be held the same week at the same place. Warner S. Hays, secretary of the National State Association, Philadelphia, is chairman of the committee arranging details for the Louisville meeting.

The Building Trades Employers of New York City with over 900 members and the Building Trades Employers' Association of Boston, Mass., with 250 members, have become associated with the National Association of Building Trades Employers with headquarters in Chicago.

All labor in connection with the construction of the Hoover Dam will be employed through an office at Las Vegas, Nevada, established by the contractors, the Six Companies, Inc. It is announced by officials of that company. The same arrangement follows in Minneapolis, is selling newspapers a complete advisory and consultation service, with feature releases and other supplementary services designed to help the residential builder. Mats in various sizes for weekly release, giving plans and illustrations for houses and a question and answer service, are also offered. The price of the service ranges from \$3 a week for papers of 10,000 or less circulation to \$15 for papers of over 250,000 circulation.

The Architects Small House Service Bureau, a professional, non-commercial organization with headquarters in Minneapolis, is selling newspapers a complete advisory and consultation service, with feature releases and other supplementary services designed to help the residential builder. Mats in various sizes for weekly release, giving plans and illustrations for houses and a question and answer service, are also offered. The price of the service ranges from \$3 a week for papers of 10,000 or less circulation to \$15 for papers of over 250,000 circulation.

ALONG THE LINE

Henry C. Collins, architect, will be candidate for the office of city council at the coming municipal election in Palo Alto.

Geo. L. Simpson, 79, formerly connected with the Simpson & Roberts Planning Mill of Santa Rosa, died in that city April 1, following a paralytic stroke.

Edgar E. Elliott, 53, Sacramento roofing contractor, died in that city April 3. Death was due to a heart attack. Elliott was formerly connected with the Elliott Brothers Foundry of Sacramento.

John W. Roberts, president of the Puget Sound Bridge & Dredging Co., with headquarters at Seattle, has resigned the presidency of that company and will retire from business life, taking up his permanent residence in California.

Colonel O. B. Perry, consulting mining engineer of San Francisco, is one of six chemists awarded the honorary doctor of laws degree at Bloomington, Ind., in connection with the dedication of Indiana University's \$500,000 chemistry building.

O. W. Irwin of the Truseon Steel Co., Youngstown, Ohio, was elected president of the Concrete Reinforcing Steel Institute at the annual convention held in Biloxi, Miss., March 16-18. Charles M. Gunn of Gunn, Carle & Co., of San Francisco was elected vice-president. M. A. Brennan was re-elected secretary and Hugh J. Baker of Hugh J. Baker & Co., Indianapolis, was re-elected treasurer.

Emory E. Smith of Smith, Emery & Co., San Francisco and Los Angeles, consulting industrial and chemical engineers, was the principal speaker at the weekly luncheon meeting of the Sacramento Section, American Society of Civil Engineers, held last Tuesday in the capital city. Harry Scanlan, president of the section, presided.

Appointment of C. W. Whitney of San Francisco executive secretary of the Purchasing Agents' Association of Northern California, as California representative of the American Standards Association is announced. Mr. Whitney will serve as a contact point between the industries of California and the American Standards Association. A file of the 181 national standards approved by the American Standards Association is maintained by Whitney for reference by local engineers and industries.

Cars and locomotives developed especially to meet the requirements of central stations and large industrial power plants are described in a 16-page bulletin of the Atlas Car & Mfg. Co., Cleveland, Ohio.

A discussion of the need for expansion joints and directions for installing these by means of the Flex-Plane and Cleft-Plane joint installing machines are given in a 12-page illustrated bulletin L-5 issued by the Flexible Road Joint Machine Company, Warren, Ohio.

The Colorado state highway department will require contractors to pay a minimum wage of 50 cents for common labor on road work and to state the rate in submitting bids.

TRADE NOTES

Schneider, Chappell & Jones, paint firm established in Sacramento for twenty-seven years, will lose its identity about May 1st, when a consolidation with W. P. Fuller & Company becomes effective. The announcement is made by W. J. Argall, co-owner of the business of the old Capital City concern and manager of the store for the past twenty-four years. Argall will become identified in a new wallpaper department of the Fuller Company.

Browning Crane & Shovel Co. is the new name adopted by the organization formerly known as the Browning Crane Co., Cleveland, Ohio. There has been no changes in personnel of products.

King Lumber Company has purchased the Wasco Lumber Co. at Wasco, Kern County. The latter concern was operated by A. R. Carter who assumed control last January from the Wasco Creamery & Construction Company.

Planning mill of Burnett and Sons of Sacramento, will be located after May 1 on a site founded by Tenth, Twelfth, B and C Streets. Leroy J. Miller is manager of the company.

Electric Equipment & Repair Co., announces the opening of a plant in El Camino Real opposite Selby Lane, Redwood City, for the design and manufacture of wrought iron hardware.

Owens-Illinois Glass Co., Ltd., of San Francisco, has been incorporated. Directors are: Wm. E. Lewis, H. G. Phillips and Harold Boeschstein.

Charles A. Robertson, for twenty years engaged in industrial engineering, designing, production and sales work, has been appointed western district manager of the Novo Engine Company of Lansing, Mich., with headquarters at 465 Bellevue Avenue, Oakland. The Novo Engine Company manufactures Novo pumps, engines and hoists.

BUILDING TRADES EMPLOYERS ELECT

O. W. Rosenthal of Chicago, was elected president of the National Association of Building Trades Employers at the annual conference of that body in Washington last month. Other officers are: C. G. Norman, New York, first vice-president; A. J. Schutz of Pittsburgh, second vice-president; R. A. Whidden, of Boston, third vice-president; A. C. Preble, of Chicago, treasurer. E. M. Craig of Chicago was re-elected secretary.

Members of the Executive Committee of the association are: David T. Riffle, Pittsburgh; W. P. Carroll, Cleveland; J. O. Barnett, Cleveland; Max Baumann, New York; P. W. Elder, New York; E. M. Craig, Chicago.

Building permits in Palo Alto for the month of March involved an expenditure of \$85,775, bringing the total operations for the current year to \$222,475.

Fridgeford Planing Mill at Sebastopol, Calif., was destroyed by fire last Sunday morning.

\$17,536,874 IS PACIFIC COAST BUILDING EXPENDITURE IN MARCH

Building permits issued in the Pacific Coast states during the month of March, 1931, totaled 8,840, involving an expenditure of \$17,536,874, as compared with \$26,734,220 for the corresponding period in 1930. The following is a complete report of the March, 1931, activities together with the month of March, 1930, as reported by municipal building department executives in the cities listed:

CALIFORNIA

City	No.	March, 1931		March 1930	
			Cost		
Alameda	47		\$ 96,677	\$	138,844
Albany	23		48,218		37,701
Alhambra	59		239,150		252,000

WAGNER BILL TO
STABILIZE BUSINESS

Enactment at the last session of Congress of the Wagner Bill for the acceleration of public construction has placed in the hands of the President of the United States a sure means of maintaining general business stability in the future, officials of the Associated General Contractors of America declare.

With a six-year advance plan of public construction laid down in detail, as required by the new law, several billion dollars worth of business will always be in reserve to be thrown into the breach as needed when business begins to lag, the contractors pointed out.

"The theory of using the construction industry as a business balance wheel—of accelerating this work in times of depression—has been generally accepted for more than a decade," A. B. Greisdorf, president of St. Louis, president of the association, explained, "but the available means of acceleration heretofore have been too slow to be entirely effective."

In the past, he said, it has required months of preparation before any great amount of additional government construction could be brought to the job stage and under these conditions the best that could be hoped was that acceleration might pull the country out of a depression which slow pick-up then provided, without avoiding. Under the six-year advance planning, however, a sagacious and well-advised chief executive, with the cooperation of Congress, will be able to apply the necessary stimulus before the slowing down of business is generally appreciated, he declared.

Members of Mr. Greisdorf's cabinet also pointed out that, following the example of the Federal Government, the establishment of similar advance planning procedure is expected to be provided for in 18 states by the present legislative sessions. They also believe that advance planning of private construction will be given greater consideration than in the past.

Federal Court Holds
Neon Rights Infringed

Neale Inc., infringed the right of the Electrical Products Company to manufacture, use and sell Neon lights in California, Oregon and Washington, Federal Judge George Cosgrave of Los Angeles, ruled last Saturday in a decision that may result in the award of damages aggregating several hundred thousand dollars.

Edward G. Neale and Thomas N. Neale, who, the decision said, own all stock of Neale Inc., are liable for damages caused by infringement and sale of the product, Judge Cosgrave ruled.

At the same time the judge held that Harry H. Greer, a creditor of the firm, and also named in the complaint, is not liable for damages.

Another hearing will be held later in federal court, after which the exact amount of damages will be determined Judge Cosgrave said.

In his ruling, the judge held that the Electrical Products Corporation was licensed by the Claude Neon Lights Inc., exclusively to sell Neon lights in the three states named.

Patents titles vested in the Claude Neon Lights Inc., were clearly infringed by the Neale company, the decision held, through use of the Neon process in the manufacture and distribution of signs sold and distributed in western territory.

TRADE EXTENSION WILL BE
MAIN TOPIC AT LUMBER MEET

The Twenty-ninth Annual Meeting of the National Lumber Manufacturers Association will be held at the Congress Hotel, Chicago, April 22, 23, and 24, with a plan for the continuation of organized lumber trade extension activity as the most important topic for consideration.

The business depression now believed to be drawing to a close marks the end of an industrial period and the beginning of a new one, it is pointed out by economists. A salient phase of the new epoch will be more intense competition than which characterized the last decade. It will be a period of lower and descending price levels, narrower margins of profit and greater rivalry between materials. It will be marked by increasing favor for research and merchandising genius and the administration of business on the basis of scientific facts.

These and other factors which might be mentioned will make the next few years a period in which every industrial group, as well as individual industries, will have to avail themselves of every weapon, actual or potential, in their trade battle armory if they may hope to get their share of the business. The first four years of lumber trade extension work have "held the fort" for lumber and established the broad outlines of an organization that can be made much more effective hereafter if there are adequate sinews of war and sufficiently general support of the work throughout the industry. It is considered probable that under the circumstances, notwithstanding discouragements of the moment, the leaders of the lumber industry will take a firm stand at the Chicago meeting for better and more aggressive trade extension effort. An outlined plan for the years following 1932 will be presented at the meeting by the Trade Extension Committee and the Board of Directors.

Another subject on the program is that of improving cooperation between national and regional and species groups in projects for realizing a large total use of lumber. The underlying thought is that without a better coordination there is a tendency for competition between lumber groups to result merely in a larger field for competitive materials and less for lumber. The Technical Ad-

visory Committee meetings tentatively consider this and other vital questions.

A third topic of obvious importance will be means of enabling member companies to make better individual use of results of trade extension both national and regional.

A fourth subject for consideration will be a plan of campaign to be carried out during 1931 to obtain more general support for trade promotion by all the categories of the lumber industry and trade, such as timber owners, the various classifications of lumber manufacturers and processors, the distributing groups and the wood consuming industries.

Another vital subject which will become more and more important in the near future is that of cooperation with the new U. S. Timber Conservation Board.

Wilson Compton, secretary and manager, will submit an analysis of the present economic situation of the lumber industry and will outline affirmative action needed. This discussion will fall under two general heads, namely, (1) maintenance of the lumber industry's organized research and promotion work, and (2) the means of correcting the results of over-production and preventing its recurrence, scheduled to begin April 17 will also

OPEN WEB STEEL
JOIST SIMPLIFIED

Simplified practice recommendation R94-20 covering open web steel joists is now available in printed form, and can be obtained from the Superintendent of Documents, Government Printing Office, Washington, D. C. for 5 cents a copy, according to the division of simplified practice of the Bureau of Standards.

This recommendation is confined to joists between 8 and 16 inches in depth and not longer than 24 times their depth, and specifies properties and allowable loads in pounds per linear foot. In establishing this simplified list of definite depth dimensions, it was necessary to include designs, stresses, resisting moments in inch-pounds, and maximum end reaction in pounds.

HOUSING RESEARCH IS URGED FOR BETTER AND CHEAPER HOMES

Factory-made houses again break into the news with a report of the Regional Plan of New York in which Grosvenor Atterbury urges the formation of a research institute for economic housing, says Business Week. Mr. Atterbury believes that standardization and mass production would cut housing costs at least 50 per cent, with increased values. This estimate is based, to some extent, on an experimental development of 40 houses in which a factory-made wall section, 3x15 feet, cost \$45 erected compared with \$85 for a similar section of conventional brick or terra cotta wall.

The ready-cut house has been exploited for years by various companies. It was taken up aggressively last year by Sears, Roebuck and Montgomery Ward. In this type of construction, factory machines replace all hand cutting and fitting on the job. Actual erection varies little from conventional practice.

Another method has been evolved by the Steel Frame House Co. (McClintic-Marshall subsidiary), in the substitution of factory-cut steel-frame members for conventional wood. Fire-proof insulating materials are employed for sheathing and interior partitions; floors are laid on a concrete base. This company for several years has offered to furnish its standard materials for houses of any design; recently it has developed a standardized, complete factory-built, small steel frame house for delivery by truck to the building site.

The chief difficulty in adapting steel to house construction has been the utilization of conventional building materials with steel of standard spacing for frame members avoids dimensional difficulties, but at the expense of excessive use of steel. There is still trouble in securing wall board, ceilings, door and window frames to steel work. Few makers of these materials have given much thought to the subject.

Mr. Atterbury believes that old methods should be scrapped bodily and entirely new building types de-

veloped, using modern materials and practices. T. J. Foster, chairman, National Bridge Works, says that, without the development of any new materials or methods, it is possible to provide, for less cost than is customary, houses with the following general specifications:

Steel framework, strong and rigid enough to take all stresses; partitions and floors of cementitious material to take only local stresses and transfer them to the frame; exterior material of mineral origin, fire and water-proof; exterior walls and roof insulated against heat, walls against sound, partitions against fire and sound.

Such construction would ensure structural security, safety from fire, economy of upkeep, permanence, protection from vermin, comfort in winter and summer. To accomplish these desirable results, Mr. Foster and Mr. Atterbury contemplate making full use of steel and pre-cast materials. Vertical steel frame members would be placed on 9 to 12 feet centers—at room corners. Properly sized steel girders would transmit stresses to these columns. As in skyscrapers, walls would serve the one purpose of screening the interior. Outside, inside and basement walls would consist of pre-cast slabs, a story or more in height. Exterior slabs could be cast to resemble brick, stone, stucco; interior slabs could be papered, painted with conventional finishes.

For slab material, Mr. Foster has been successful with gypsum cement, aerated to weigh but 30 pounds per cubic foot. Large slabs can be easily handled by two men. Materials are cheap, labor costs would be small for making and erecting.

When one realizes, as Mr. Atterbury says, that no practical art has made less progress through the ages than home building; that we still use the same brick hand and employed in building the walls of churches, there is ample room and need for greatly improved practices, which the proposed research institute might expedite.

BUSINESS DEPRESSION TENDS TO ADVANCE 5-DAY WEEK PLAN

A large net gain in the number of industrial and business establishments operating a five-day basis when the depression subsidies is foreseen by Commissioner Elbert H. Stewart, of the Bureau of Labor Statistics, Department of Labor.

The impetus given the five-day week policy by poor business conditions has been "very, very great," according to Stewart. Obstacles have been removed from the path leading to adoption of the shorter working week by the lack of sufficient work, in many instances, to keep plants busy more than three days weekly. Further information was supplied by the commissioner as follows:

"There will, of course, be a certain portion of establishments operated by persons with backward ideas of business management which will revert to the five and a half or six-day week when business gets back to normal. But the majority of plants which have been forced to go on the reduced schedule will keep it reduced, as the feasibility and economic soundness of the five-day week may now be said to have been demonstrated successfully.

"Night work and Sunday operations in such industries as the cotton textile will be found to have declined, also, when conditions again become normal, it is believed.

"The beneficial effects of shorter hours on the employment situation have not been noticed as yet because of the fact that operations have been cut down greatly. When enough orders are received, however, to keep factories busy six days a week, it will become necessary for those retaining the five-day week to add more workers to their pay rolls than they formerly carried.

"When the change was made in numerous plants from a six to a five and a half day basis, in many cases the four hours removed Saturday afternoons were spread throughout the balance of the working week. It is not expected, though, that there will be a similar spread when the four hours of Saturday mornings are eliminated.

"Another factor that is inducing the change to the five-day week program is the growing realization of the fact that it is often unprofitable to operate only a half day on Saturdays, profit,

The overhead arising from starting operations for only four hours is proportionately larger than if the plants were active an entire day.

"The depression has focused attention on the five-day week, and there is little tendency, apparent to raise agitation for minimum wage legislation.

"One favorable aspect of the present business conditions and scarcity of employment has been a sizable reduction in labor turnover. With few positions open, workers have not been leaving their jobs. It costs perhaps \$75, on the average, for a single placement. For skilled workers the figure is undoubtedly higher. The result of a smaller turnover, therefore, has been a considerable saving.

"Economic recession is not solely responsible for the smaller rate of turnover, as greater co-operation of labor and its employers, and the substitution of 'managers' for 'bosses' have been influential. In some instances fear of strikes has induced the employer to improve working conditions in an effort to keep his men satisfied."

WAGE AGREEMENT PENDS AT SEATTLE

More than 8000 workmen in the Seattle Building Trades may be assured, in a few days, that there will be no wages cut during the next few years, according to negotiations now nearing completion.

The Seattle Building Trades Council and Seattle Construction Council are nearing an agreement providing continuance of present wages with no important change in working conditions. Members of all crafts affiliated with the building trades union signed the agreement, and all but one of the construction council members have done likewise.

ENGINEERING COURSE AT UNIVERSITY OF CALIF.

During the University of California intercession, May 11 to June 20, the department of mechanical and electrical engineering will offer a course in machine drawing, consisting of preparation of technical free-hand sketches and of working drawing with an introduction to the elements of theoretical design; a course in engineering mechanics, and a course in machine design, dealing with the application of principles of mechanics and shop processes to the design of machine parts and power transmitting machinery.

Information containing detailed information relative to admission requirements, fees, credit, and hours may be obtained from the Dean of the Summer Session, 102 California Hall, Berkeley.

ARCHITECTS SUE THEATRE INTEREST

George M. Thompson, accountant, has been appointed receiver for the Los Angeles Theatre on application of Architects S. Charles Lee and S. T. Den Norton to the Federal district court at Los Angeles. The architects have filed suit against the Gambel Theatrical Enterprises, Inc., owner of the theatre, to collect \$52,747 allegedly due for architectural services on the theatre. They claim they were to receive 10 per cent on the cost of the playhouse, which was \$494,681, and have been paid only 5 per cent of the amount due them under the contract. The receivership is for the protection of creditors. It is stated the playhouse being operated at

CHURCHES

Construction Postponed Indefinitely.
CHURCH Cost, \$19,000
SAN FRANCISCO. Thirty-second Ave.
 and Ulloa Street.
 One- and two-story frame and stucco
 church with slate roof (to seat
 400).

Owner—St. Stephens Protestant Epis-
 copal Church.
 Architect—Charles Strothoff, 2271 15th
 St., San Francisco.
 Three lowest bids held under advisem-
 ent.

Preparing Plans.
SUNDAY SCHOOL Cost, \$125,000
HONOLULU, T. H.
 Sunday school building.
 Owner—St. Andrew's Parish.
 Architect—C. W. Dickey, Damon Bldg.
 Honolulu.
 Plans will be completed about May
 15.

Commissioned To Prepare Plans.
CHAPEL Cost, \$100,000
SAN RAFAEL, Marin Co., Cal. Grand
 Ave. and Locust.
 College Chapel.
 Owner—Dominican College, San Ra-
 fael.

Architect—Arnold Constable, 580 Mar-
 ket St., San Francisco.
 Structural Engineer—K. Theill, 580
 Market St., San Francisco.
 Mechanical Engineer—Coddington Co.,
 222 Kearny St., San Francisco.
 The building will be designed in the
 early perpendicular Gothic style of the
 14th century. The exterior will be of
 natural stone with a slate roof. The
 chapel will have accommodations for
 500 students on the main floor while
 on the gallery over the main entrance
 vestibule there will be additional ac-
 commodations for 100 students. The
 sisters' choir is provided in the south
 transept. The total cost of the build-
 ing is estimated at \$100,000. It is ex-
 pected that the plans will be ready for
 bids in August and the architect will
 invite a selected list of contractors to
 figure this work.

FACTORIES AND WARE- HOUSES

Contract Re-Awarded.
POULTRY BLDG. Cost, \$—
SACRAMENTO, Sacramento Co., Cal.
 State Fair grounds.
 One-story brick poultry building.
 Owner—State of California.
 Architect—George E. McDougall, state
 architect, Public Works Building,
 Sacramento.
 General Contract—Guth and Fox, 1528
 27th St., Sacramento, \$48,226.
 Plumbing—Carpenter and Mendenhall,
 907 Front St., Sacramento, \$5,974.
 Electric Work—J. W. Thomas, Sacra-
 mento, \$1,750.

The general contract for this work
 was originally awarded to Yoho and
 Dager, Sacramento, at \$43,743, who
 were permitted to withdraw their bid.

Bids Opened—Under Advisement.
BAKERY Cost, \$—
SAN FRANCISCO. Block bet. How-
 ard, Folsom, 13th and 14th Sts.
 One-story brick bakery.
 Owner—Peerless Bakery, 73 Erie St.
 Architect—E. Neumarkel, 544 Market
 Street.

HOLLISTER, San Benito Co., Cal.—C. A. Gardner, manager of the Lathrop Hay and Grain Co., whose warehouse and packing plant was recently destroyed by fire, will rebuild the structure at a cost of \$10,000.

Plans Being Completed.
PLANT Cost, \$100,000
SAN JOSE, Santa Clara Co., Calif. Three- or four-story concrete or brick manufacturing and refining plant. Owner—Liquid Sugar Corp., 637 Battery St., San Francisco.
Plans by Eng. Dept. of Owner.
Plans will be ready for bids in about three weeks.

Bids Opened.
HANGAR, ETC. Cost, \$65,000
SACRAMENTO, Sacramento Co., Cal. Municipal Airport.
Steel frame and wood hangar and air terminal station.

Owner—City of Sacramento, H. G. Denton, city clerk.
Architect—Starks & Flanders, Forum Bldg., Sacramento.

Following is a complete list of bids:
W. C. Keating, Forum Bldg., Sacramento.....\$51,544

Bids referred to City Manager for award.

BUREANK, Los Angeles Co., Cal.—Cooper's, 750 S. Los Angeles St., Los Angeles, are negotiating for the purchase of property at the corner of Front St. and Verdugo Ave., Burbank, as a site for a new underwear manufacturing plant. It is expected that the deal will be completed and construction of the building started soon after May 1. It will be a two-story structure, approximately 90x200 feet in area, and will be the first of three units to be erected on the site by Cooper's.

Prospective Bidders.
SUPERSTRUCTURE Cost, \$—
OAKLAND, Cal. Foot of Webster St. Superstructure for Inland Waterways Terminal (exclusive of structural steel).

Owner—City of Oakland (Port Commission), 424 Oakland Bank Bldg., Oakland.

Plans by Eng. Dept. of Owner.
Will be sheet-iron construction with 20-year guaranteed roof; 97x280-ft., with 20-ft. side hall clearance. Plans obtainable from office of secretary.

Following is a partial list of the contractor:
E. T. Lesure, 87 Ross Circle, Oakland.

Strehlow & LeVole, Central & Webster Sts., Alameda.

A. Frederick Anderson, 1093 Longridge Road, Oakland.
Emil Person, 829 San Luis Road, Oakland.

E. T. Leiter & Son, 311 37th Street, 4:30 P. M.
Bids are to be opened April 13th.

Plans Being Completed.
CREAMERY Cost, \$100,000
BERKELEY, Alameda Co., Cal. San Pablo Ave. near Delaware St. Two-story brick creamery and store. Owner—G. R. Heath, 2930 Garber St., Berkeley.

Plans by Engineer—Names withheld. Contractor—E. H. Wendt, 2116 Allston Way, Berkeley.
Sub bids will be taken in one week.

Plans Being Completed.
BUILDING Cost 1st unit \$75,000
Total Cost, \$400,000
CONCORD, Contra Costa Co., Cal.
Immediately adjoining the city limits and extending approximately 7 miles.

Group of approximately 20 poultry buildings, administration buildings, offices, warehouses, etc.)
Owner—Wickham-Havens, Inc., 1510 Franklin St., Oakland.

Plans by Eng. Dept. of Owner, (H. Sylvester, engineer), 1510 Franklin St., Oakland.

It is expected to call for bids in about one week.

Construction will be carried over a period of four years. Corrugated iron roofs and backs, wood frame, concrete base and runs. Poultry buildings will be 18x350 feet.

Plans Being Completed.
SALINAS, Monterey Co., Cal.

Cost, \$75,000
One-story brick vitamin manufacturing plant.

Owner—Lettisvine Vitamin Co., Inc., Watsonville.

Plans by Mr. Brositt, Eng. Department, Chas. Dickens and Staff, 4 Key Route Arcade, Oakland.

Incorporators are: Dr. Chas. Dickens of Oakland; H. F. Boyer, James T. Mann, Harry B. Sears, Ned B. Strong and James R. Cutler of Watsonville.

SEBASTOPOL, Sonoma Co., Cal.—Bridgford Planing Mill destroyed by fire April 5. The loss, including adjoining structures, is estimated at \$50,000.

GARAGES AND SERVICE STATIONS

Sub-Contracts Awarded.
REMODELING Cost, \$10,000
MONTEREY, Monterey Co., Cal. Fremont and Munras Sts.

Remodel garage for super service station.

Owner—Standard Oil Co., 225 Bush St., San Francisco.

Plans by Eng. Dept. of Owner.
Contractor—C. N. Swensen, 355 Stockton Blvd., San Jose.

San Jose Iron Works, 535 W-San Carlos St., San Jose, awarded contract for structural steel, iron folding gates and miscellaneous iron.

Preparing Working Drawings.
SERVICE BLDG. Cost, \$50,000
VALLEJO, Solano Co., Cal. NW Sonoma and Main Sts. (130x150-ft.)

Two-story automobile plant and service building (probably brick construction).

Owner—Acme Motor Co. (Vallejo Ford dealers), Vallejo.

Architect—Claude Barton, 522 Grand Ave., Oakland.

Plans will be ready for bids in about thirty days.

Sub-Contracts Awarded.
REMODELING Cost, \$10,000
MONTEREY, Monterey Co., Cal. Fremont and Munras Streets.

Remodel garage for super-service station.

Owner—Standard Oil Co., 225 Bush St., San Francisco.

Plans by Eng. Dept. of Owner.
Contractor—C. N. Swensen, 355 Stockton Blvd., San Jose.

Plumbing—Anderson—Dougherty-Hargis, Salinas.

Electric Wiring—Carroll and Searle, Monterey.

Millwork—Work Lumber Co., Monterey.

Brick Work—Ernest Jimenez, Carmel. Iron—San Jose Iron Works, San Jose.

GOVERNMENT WORK AND SUPPLIES

MARCH FIELD, Riverside Co., Cal.—C. P. and W. P. Stover, 116 Alexander Ave., Claremont, awarded contract at \$175,370 by Col. W. C. Gadsden, constructing quarters at March Field, for the construction of 36 sets of noncommissioned officers' quarters at March Field. Each building will be a four-room structure; hollow concrete wall construction with stucco exteriors and tile roofing.

PHOENIX, Ariz.—Until April 30, P. M. bids will be received by T. Chief of the Division of Supplies, Department of Commerce, Washington, D. C., to install illumination facilities on the Phoenix-El Paso section of the San Diego-El Paso division of the government air mail line. Work will involve installation of about 26 involving beacons, 6 electric code beacons, an acetylene blinker, etc. Sp. obtainable from above.

BOULDER CITY, Nev.—Dorr C. Inc., Denver, Colo., at \$25,169 awarded contract by U. S. Bureau of Reclamation, Denver, to furnish water pump and sewage disposal equipment at Boulder City.

Colorado Fuel and Iron Co., Pueblo, Colo., at \$10,468 awarded contract to furnish track materials for Heav Dam Project.

International Filter Co., Chicago, at \$9,900 awarded contract for filter in connection with Boulder City project.

SUNNYVALE, Santa Clara Co., Cal. Public Works Officer, Twelfth Nat District, 100 Harrison St., San Francisco, has postponed indefinitely the opening of bids for wood and concrete piles and core borings at the Naval Air Base, Sunnyvale. The work provided for under Specification N 6476. The bids were scheduled to be opened April 8th.

SAN DIEGO, Calif.—M. H. Golde, 404 California Bank Bldg., San Diego has been awarded contract at \$93,4 by Bureau of Yards and Docks for extension of barracks buildings at the Naval Operating Base (Air Station) San Diego; specification No. 648. Award was based on propositions Nos. 1 and 5.  Bids will be taken in one week.

Sub-Contracts Awarded.
STORES Cost, \$1,000,000
OAKLAND, Alameda Co., Cal. NW 28th St. and Broadway.
 Eight-story and basement class A re-

inforced concrete furniture display rooms and stores, 100x280-ft.
 Owner—Pacific States Auxiliary Corp.
 Lessee—John Brunner Co., 15th and Clay Sts., Oakland.
 Architect—Albert P. Roller, 1st National Bank Bldg., San Francisco.
 Engineer—H. J. Brunner, Sharon Bldg., San Francisco.
 Contractor—P. J. Walker Co., Sharon Bldg., San Francisco.
Terra Cotta—Gladwin, McBean & Co., 660 Market St., San Francisco.
Elevators—Otis Elevator Co., 1 Beach St., San Francisco.
Reinforcing Steel—Soule Steel Co., Rialto Bldg., San Francisco.
 As previously reported, concrete piles awarded to Raymond Concrete Pile Co., Hunter-Dulin Bldg., S. F.; excavation to J. Catucci, 1212 18th Ave., Oakland; wrecking to Symon Bros. Wrecking Co., 22nd and E 14th St., Oakland.

THEATRES

Sub-Contracts Awarded.
ALTERATIONS Cost, \$60,000
RICHMOND, Contra Costa Co., Calif. (California Theatre)
 Alterations to class C steel frame and brick theatre (change balcony, etc.)
 Owner—Fox West Coast Theatres, Inc.
 Architect—Clayson and Amandes, Hearst Bldg., San Francisco.
 Contractor—James L. McLaughlin Co., 251 Kearny St., San Francisco.
Plumbing—R. W. Timmons, 703 Nevins Ave., Richmond.
Mill Work—Sunset Lumber Co., 400 High St., Oakland.
Sheet Metal—Central Sheet Metal Works, 2847 Hannah St., Oakland.
Electric Work—Alta Electric Co., 338 Howard St., San Francisco.
 As previously reported, plastering awarded to Henry Gregoire, 357 12th St., San Francisco.

Plans Being Figured.
THEATRE Cost, \$—
PASADENA, Los Angeles Co., Cal. S. Colorado St. E Madison Ave.
 Reinforced concrete theatre (to seat 900) (106x66 feet).
 Owner—First Trust & Savings Bank, Pasadena.
 Architect—Walker & Eisen and C. A. Balch, Los Angeles.

Completing Plans.
THEATRE Cost, \$100,000
WHITTIER, Los Angeles Co., Cal. Greenleaf St. near Philadelphia.
 Class A reinforced concrete theatre (10x380 feet) to seat 1000.
 Owner—A. Wardman.
 Architect—David S. Bushnell, Warner Bros. Theatre Bldg., Whittier.
 Lessee—Hughes Franklin Theatre Co.

Plans Being Prepared.
THEATRE Cost, \$100,000
POMONA, Los Angeles Co., Cal.
 Brick and stone tile theatre (to seat 1000).
 Owner—Hughes-Franklin Theatres.
 Architect—Louis E. Korn, 6332 Warner Drive, Los Angeles.

Plans Being Prepared.
THEATRE, ETC. Cost, \$—
LOS ANGELES, Cal. NW Hollywood Blvd. and Vine St.
 Two-story reinforced concrete theatre, offices and stores (118x142-ft.)
 Owner—Carl Lacombe.
 Architect—Walker & Eisen & C. A. Balch, Western Pacific Bldg., Los Angeles.

WHARVES AND DOCKS

Plans Being Figured—Bids Close April 16, 2 P. M.
ALTERATIONS Cost, \$—

SAN FRANCISCO. On Waterfront.
 Raise and reconstruct bulkhead wharf structures at Sections 9A and 9B of the seawall and for repaving The Embarcadero adjacent thereto.
 Owner—State of California (Harbor Commission), Ferry Bldg., E. P. Engineer—Frank G. White, Ferry Bldg., San Francisco.

The work to be done is divided into two separate contracts as follows:
 Contract A for raising and reconstructing the bulkhead structures, and Contract B for raising and repaving the Embarcadero. The materials to be used in this work shall consist of the requisite quantities of Portland cement (which will be furnished to the Contractor by the Board), hydrated lime, plastering sand, inert admixture, aggregate for concrete and bituminous mixture, steel reinforcement, structural steel, metal lath, galvanized iron, lumber, green piles, roofing materials, painting materials, asphaltic cement and such other materials as may be called for in the plans and specifications or are necessary for the proper completion of the work.

Certified check 5% payable to Secretary of the Board of Harbor Commissioners required. Plans obtainable from engineer on deposit of \$10, returnable.

MISCELLANEOUS CONSTRUCTION

SACRAMENTO, Calif.—Until April 12, 10 A. M., bids will be received by Harry W. Hall, county clerk, to install lawn sprinkling system on grounds of Sacramento County Hospital. Certified check 10% payable to Chairman of the Board of Supervisors required with bid. Plans obtainable from Chas. Deterding, county engineer Courthouse, Sacramento.

SAN FRANCISCO.—Meyer Rosenberg, 1755 San Bruno Ave., at \$39 c. yd. awarded contract by Board of Supervisors, under Quotation No. 1795, to furnish loan for the park department for delivery to Golden Gate Park between Tenth Ave. and Great Highway and Sunset Square, 26th and Vicente Sts., involving 10,000 cu. yds.

Plans Being Prepared.
MORTUARY Cost, \$15,000
SACRAMENTO, Sacramento Co., Cal. O Street.
 Two-story frame and stucco mortuary building.
 Owner—G. L. Klump, 830 O St., Sacramento.
 Architect—Harry D. Evans, California State Life Bldg., Sacramento.
 Bids will be taken in two weeks.

SAN FRANCISCO.—Nine firms submitted identical bids to Leonard S. Leavy, city purchasing agent, to furnish and deliver cement to the city as may be required from time to time during the fiscal year commencing July 1, 1931, and ending June 30, 1932. Bidders were: Pacific Portland Cement Co., S. F. Materials Co., Eclipse Lime and Cement Co., Henry Covell Lime and Cement Co., J. S. Guerin Co., Yosemite Portland Cement Co., Santa Cruz Portland Cement Co., Pacific Coast Aggregates and Western Lime and Cement Co. These firms bid \$2.64 per barrel for 30,000 bbls in carload lots, delivered spur tracks; \$2.64 per bbl. for 1,000 bbls. carload lots, warehouse, and \$2.74 per bbl. in less than carload lots, 2,000 bbls.

Felix Gross bid \$2.44 per bbl. in paper sacks, \$2.64 cloth sacks, and \$2.74 and \$2.54, respectively, on less than carload lots.

Sub-Contracts Awarded.
STAGE DEPOT
 VALLEJO, Solano Co., Cal. Sonoma
 and Yorks Streets.
 One-story frame and stucco stage
 depot.
 Owner—Pacific Greyhound Lines, 6
 Main St., San Francisco.
 Plans by Charles Dawe, 951 Peralta
 St., Berkeley.
 Contractor—Charles Dawe, 951 Peralta
 St., Berkeley.
Sheet Metal—Monarch Sheet Metal
 Co., Vallejo.
Plastering—Grover Ellam, 1409 Santa
 Fe Ave., Berkeley.
Electric—Rhodes Electric Co., Vallejo
Roofing—Western Roofing Co., 24th
 Poplar St., Oakland.
Plumbing—Wilder Plumbing Co., Val-
 lejo.
Sash and Doors—Hager Sash & Door
 Co., 1290 Cedar St., Berkeley.
Lumber—Vallejo Lumber & Supply
 Co., Vallejo.
Cement—Cowell Lime & Cement Co.,
 81 Franklin St., Oakland.
Plumbing Fixtures—Tay - Holbrook,
 Inc., 10th and Harrison Sts., Oak-
 land.
Kitchen Equipment—Dohrmann Hotel
 Supply Co., 972 Mission St., S. F.
Bolts—Payne's Bolt Works, 201 Main
 St., San Francisco.

OAKLAND, Cal. — Ariss-Knapp Co.,
 961 41st St., Oakland, at \$33 cu. yd.
 submitted low bid to city City Port
 Commissioner for grading dredge
 filled area east of Warehouse B, in-
 volving 5,000 cu. yds. Complete list
 of bids follows:
 Ariss-Knapp Co., \$0.33
 Heafey-Moore Company, 0.349
 Lee J. Immel, 0.35
 Jack Carson, 0.37
 A. J. Grier, 0.389
 Harris Bros., 0.405
 Chief Construction Co., 0.44
 All bids taken under advisement.

QUINCY, Plumas Co., Cal.—Clover
 Valley Lumber Co., Beckwith, Calif.,
 at \$1500 awarded contract by county
 supervisors to furnish 10,000 heart ce-
 dar posts, 6x6-inches by 7-ft., deliv-
 ered on highway in vicinity of Beck-
 with. Complete list of bids follows:
 Clover Lumber Co., \$1,500
 R. C. Stoukey, Sloat, Calif., 1,700
 Thors, Dorothy, Loyalton, 2,000
 B. L. Handley, Chico, 2,100
 E. Nelson, Calpine, 2,250
 W. E. Coppen, Sierra Vista, 2,399
 Union Lbr. Sales Corp., Portland
 Oregon, 2,600
 Jas. Hall, San Francisco, 2,625
 R. B. Stoddard and Ed. Larson,
 Quincy, 5,000
 G. A. Ferguson and Wm. Epper-
 person, Nevada, 5,300
 Diamond Match Co., Chico, 5,500
 Union Lbr. Co., San Francisco,
 (redwood), 5,900

SAN FRANCISCO—Bureau of Engi-
 neering, Department of Public Works,
 is preparing specifications and will ask
 bids shortly to furnish 400 No. 2 type
 reflector safety zone buttons in re-
 placement of such No. 1 type reflector
 safety zone buttons as may from time
 to time be destroyed by the Board of
 Public Works, credit allowance to be
 made by contractor on such reflectors
 as are replaced.

ALAMEDA, Alameda Co., Calif.—
 Michel & Pfeffer Iron Works, Harri-
 son and Tenth Sts., San Francisco, at
 \$1,943 submitted low bid to city
 council to erect 400 lin. ft. of chain
 link fence, 23-ft. high at Lincoln Park.
 Following is a complete list of bids:
 Michel & Pfeffer Iron Works, \$1,943.00
 West Coast Wire & Iron Wks, 1,943.20
 Wickwire Spencer Co., 1,943.20
 California Ornamental Iron &
 Fence Co., 1,943.20

Vosberg Hardware Co., 1,943.20
 California Wire Cloth Co., 1,943.20
 Standard Fence Co., 1,953.29
 All bids rejected. New bids will be
 called for at a later date.

YUBA CITY, Sutter Co., Cal.—Ad-
 vance Sprinkler Co., 50 Alice St.,
 Oakland, at \$1400 awarded contract
 by county supervisors to install lawn
 sprinkler system at courthouse
 grounds. Complete list of bids fol-
 lows:
 Advance Sprinkler Co., 50 Alice
 St., Oakland, \$1,400
 J. Crowther, 523 5th St., Marys-
 ville, 1,450
 Newway Lawn Sprinkler Co., 142
 McAllister St., S. F., 1,467
 Frank M. Looth, 220 3rd St.,
 Marysville, 1,480
 J. C. Woodard, 401 St., Marysville 1485
 Rain-On-Tap Co., 424 Howard
 St., San Francisco, 1,610
 D. F. Brown, 329 Plumas St.,
 Yuba City, 1,697
 Engineer's estimate 1,196

BUSINESS OPPORTUNITIES

Harry Wilbur, sales manager, Ot-
 tawa Furniture Co., Holland, Mich.,
 manufacturing a radio cabinet with
 radio installed or otherwise, desires
 representation in this territory.

Frank E. Drew, 97-A Newbury St.,
 Boston, Mass., represents a firm with
 facilities for representing local com-
 pany who has Eastern territory open
 and desires contact.

R. E. Brewer Co., Inc., 135 S Main
 St., Salt Lake City, Utah, distributors
 and sales agents, are desirous of con-
 tacting a good reliable warm air heat-
 ing manufacturer with idea in view of
 acting as factory representatives in the
 intermountain territory.

H. H. Ward, Jr., vice-president of
 H. H. Ward Co., Chester, Pa., manu-
 facturing iceless refrigeration access-
 ories and special sheet metal work
 wish to establish sales representation
 in this territory.

Maison Georges Thiebaut, S. A., 36
 Quai de Commerce, Brussels, Bel-
 gium, exporters of plaster for ceilings
 and plaster for modeling are looking
 for a local market.

**OAKLAND DEALERS
 SEEK LIEN PRIORITY**

The Material Dealers' Credit Asso-
 ciation of Oakland is fostering an
 amendment to the present Mechanics'
 Lien Law which will give a mechanic
 lien priority over all encumbrances on
 real property except the first mort-
 gage. The legal department of the
 association, it is announced by J.
 Rosberg, manager, has been in Sacra-
 mento during the legislative session
 drafting a bill which, it is claimed,
 will eliminate all speculation and give
 the material dealers and sub-contract-
 ors better protection in their ex-
 tension of credit.

This bill, if passed, Rosberg de-
 clares, will aid in putting the building
 industry on a sound and constructive
 basis and will eliminate the specula-
 tive conditions that have been ex-
 isting under the present Mechanics'
 Lien Law.

Local wage surveys to provide ac-
 curate data as to the range of pay
 prevailing for the building trades and
 labor in every community in the
 United States, to be conducted by the
 Associated General Contractors of
 America in co-operation with its more
 than one hundred chapters and
 branches, is planned by the executive
 cabinet of the association. A canvass
 of the local groups of contractors is
 to be conducted at once to determine
 if accurate wage data can be com-
 piled.

The surveys would be made to en-
 able general contractors to arrive at
 some conclusion as to the actual pre-
 vailing wage they they must pay on
 government construction work under
 the new Davis-Bacon Act and to
 fortify them against charges of viola-
 tion of this law.

**VET CHIEF RAPS
 CONSTRUCTION SLATE**

The omission of California projects
 from the new construction schedule of
 the United States Veterans bureau
 is described as "outrageous" by John
 J. Hayes, state commander of the Dis-
 abled American Veterans of the World
 War.

California needed part of the \$20,-
 \$77,000 fund because 27 per cent of all
 the world war disabled veterans are in
 this state and many need hospitaliza-
 tion but lack the funds to obtain it,
 Hayes said.

"Conditions in San Francisco are
 bad enough," he continued. "but in
 Los Angeles there are a disgraceful
 years ago an appropriation of \$11,
 000,000 was made for improving the
 Sawtelle Soldiers' Home. L's than
 \$3,000,000 was spent and the balance
 of the money still is available, but has
 not been released."

"Meanwhile the veterans are living
 in firetraps, insanitary barracks and
 exposed to deplorable housing con-
 ditions."

**TRADE BODY TO
 PLACE ENGINEERS**

As a practical aid in reducing un-
 employment among business execu-
 tives and professional engineers, the
 American Trade Association Execu-
 tives has established a volunteer
 placement committee whose services
 some of the offered free of charge both
 to those seeking such position and to
 organizations seeking such men,
 similar to the service rendered by the
 leading engineering societies for a
 small fee. At present there are many
 experienced men available to fill pos-
 itions. These have been authorized by
 engineers or technicians are required
 to write to Walter V. Brown, Engi-
 neering Societies Building, 31 West
 29th St., New York City, and those
 desiring executives are asked to com-
 municate with the American Trade
 Association Executives, 45 E a t
 Seventeenth St., New York City.

Creation of a Bureau of Electricity
 and the appointment of Dan Wallace,
 city engineer, as superintendent of the
 bureau, has been authorized by the
 Berkeley city council, on recom-
 mendation of City Manager H. R.
 Thompson. Heretofore, the city ordi-
 nance has designated the bureau as a
 department of electricity and in
 charge of an electrical engineer.

Six Companies, Inc., contractors for
 the Hoover Dam, has placed orders
 with Ingersoll-Rand Company for all
 air compressor and rock drilling
 equipment that will be required for
 the project. The stationary air plant
 will consist of a battery of large Class
 "PR" type direct connected, electric-
 driven compressors having a combined
 output of 25,000 cubic feet per minute.
 These compressors will supply air for
 driving the four diversion tunnels that
 will carry the waters of the Colorado
 River through the canyon walls
 around the damsite. The dam
 proper is being built. Smaller com-
 pressors of the portable type will op-
 erate the rock drills that will be used
 to scale down the canyon walls on
 either side of the damsite to guard
 against rock slides.

Engineering News Section

BRIDGES

TRINITY COUNTY, Cal.—Until Apr. 2 P. M., bids will be received by the Highway Commission to construct a reinforced concrete girder bridge across Browns Creek, consisting of one 32-ft. 6-in. span on concrete abutments with wing walls.

SHASTA COUNTY, Cal.—Until Apr. 2 P. M., bids will be received by the Highway Commission to construct bridge across Clear Creek about miles south of Redding, consisting two 50-ft. steel stringer spans on concrete piers with pile foundations 14 eleven 42-ft. steel stringer spans concrete pile bents.

JUMBOLD COUNTY, Cal.—Until 11:29 A. M., bids will be received by State Highway Commission to construct a bridge across South Fork of Eel River at Dyerville, consisting of one 250-ft. through steel girder span, two 60-ft. reinforced concrete girder spans, four 45-ft. 6-in. reinforced concrete girder spans and 33-ft. reinforced concrete girder span on concrete piers, concrete bents and a concrete abutment.

MODESTO, Stanislaus Co., Calif.—County Surveyor George Macomber preparing plans to widen Dry Creek bridge from 26 ft. to 40 ft. Bridge is ft. long.

RIVERSIDE COUNTY, Calif.—Bids to be asked next month by the State Highway Commission to widen the Edison Blvd. bridge over the Santa Ana river at the foot of Mount Rubidoux. The project includes widening bridge from 21- to 42 ft., constructing new concrete approaches at each end and marking of four lines traffic lanes. Est. cost \$150,000.

VALLEJO, Solano Co., Calif.—Following bids received by city council replace existing timber trestles supporting the 14-in. Green Valley water supply main. Work involves:

- a) 53.80 yds. excavation;
 - b) 29.2 yds. concrete;
 - c) 24.6 yds. backfill;
 - d) 250 lbs. reinforcing steel;
 - e) lump sum for erection;
 - f) total bid.
- A. Frederick Anderson, 1093 Longridge St., Oakland.

PLACER COUNTY, Cal.—Peter F. Bender, North Sacramento, at \$9,764 awarded contract by State Highway Commission, to construct a bridge across Auburn Ravine about one-half mile west of Auburn, consisting of six 19-ft. timber spans and one 40-ft. steel beam span on timber bents with concrete footings. Project involves: 140 cu. yds. struc. excav.; 31 cu. yds. class A Portland cement conc. (struc.); 71 cu. yds. class A Portland cem. conc. (pave); 30 cu. yds. class E Portland cem. conc.; 13,000 lbs. reinf. steel; 24,000 lbs. struc. steel, fabricating and erecting; 19,000 lbs. struc. steel; 30 M. ft. b.m. redwood timber, dense select all-heart struc. grade; 25 M. ft. b.m. redwood timber, select all-heart struc. grade; 1 lot, misc. items of work. The state will furnish structural steel.

VISALIA, Tulare Co., Calif.—Until May 4, 2 P. M., bids will be received by Gladys Stewart, county clerk, to construct reinforced concrete bridge No. 90 in Dinuba Blvd., over St. Johns River, involving:

- (1) 576.59 cu. yds. class A concrete, including excavation;
- (2) 57.39 cu. yds. class F concrete;
- (3) 453.35 cu. yds. class A concrete in pavement;
- (4) 1632 lin. ft. concrete piling (driving only);
- (5) 4500 cu. yds. earth fill, approaches (detour (lump sum bid).

All the material to be used in the construction of the bridge will be furnished by the County of Tulare f.o.b. Visalia siding either of the Southern Pacific Railroad or of the Santa Fe Railroad, excepting as otherwise stated in the specifications.

Certified check 5% payable to Chairman of the Board of Supervisors required with bid. Plans on file in office of clerk and obtainable from the County Surveyor, T. W. Switzer, on deposit of \$10, returnable.

SANTA BARBARA, Cal.—A. V. Montin, 1057 W. 80th St., Los An-

geles, awarded contract by county to construct reinforced concrete bridge over San Antonio Creek in the Third Road District.

VALLEJO, Solano Co., Cal.—A. Frederick Anderson, 1093 Longridge St., Oakland, at \$649.27 awarded contract by city council to replace existing timber trestle supporting the 14-in. Green Valley water supply main. Bids follows: 53.80 yds. excavation, \$1.00; 29.2 yds. concrete, \$.18; 24.6 yds. backfill, \$.50; 250 lbs. reinf. steel, \$.05; lump sum for erection, \$125; total bid, \$649.27.

OKLAND, Calif.—Until April 27, 10:30 A. M., bids will be received by George E. Gross, county clerk, for painting iron and steel work on the Fruitvale Avenue bridge; estimated cost, \$1800. Specifications and further information obtainable from clerk.

LANE COUNTY, Ore.—J. K. Holt, Salem, at \$116,980 awarded contract by State Highway Department to construct bridge over Cape Creek on the Oregon Coast Highway about 12 miles north of Florence, requiring approximately 2400 cu. yds. excav., 7800 lin. ft. untreated piling, 3200 lin. ft. treated piling, 2610 cu. yds. concrete, 350,000 lbs. metal reinforcement and 1070 lin. ft. concrete handrail.

DREDGING, HARBOR WORKS & EXCAVATIONS

REDWOOD CITY, San Mateo Co., Cal.—H. W. Crozier, consulting engineer, 58 Sutter St., San Francisco, commissioned by city trustees to make a survey of Redwood Harbor with a view to compiling data for submission to the War Department, preliminary to making extensive improvements.

IRRIGATION PROJECTS

TURLOCK, Stanislaus Co., Cal.—Until April 27, 2 P. M., bids will be received by Anna Sorensen, Secretary, Turlock Irrigation District, for improvements in Improve District No. 64, involving:

- Schedule No. 1.—11,872.2 sq. ft. 2-in. conc. canal lining;
- Schedule No. 2.—4 concrete structures, involving 5.27 cu. yds. concrete;
- Schedule No. 3.—5 concrete structures, involving 5 cu. yds. concrete.

This work will be paid for in cash by property owners.

Certified check 5% payable to district required with bid. Plans on file in office of clerk and obtainable from R. V. Meikle, chief engineer of district.

CALIFORNIA—Following permits to appropriate water were granted during the month of March by the State Department of Public Works, Division of Water Resources, Edward Hyatt, state engineer:

Permit 3812, Application 6703 (Shasta County) Elmer Gastineau, Los Angeles, for .02 c. f. s. from unnamed spring for irrigation and domestic use on 20 acres. Est. cost \$250.

Per. 3663, App. 6700 (Butte Co.) Harvey C. Adams, Chico, 3 c. f. s. from drains along from Drainage Dist. #2 for irrigation use on 120 acres. Est. cost \$250.

Per. 3664, App. 6744 (Mono Co.) Raymond S. Macmillan, Los Angeles, 200 g. p. d. from unnamed spring for domestic purposes. Est. cost, \$150.

Per. 3665, App. 6824 (Sierra Co.) Langdon Smith, Greenville, 903 c. f. s. from unnamed spring for domestic purposes. Est. cost \$500.

Per. 3666, App. 6794 (Monterey Co.) Stuart Haldorn, Monterey, 2 c. f. s. from Higuera Creek for power purposes.

Per. 3667, App. 6795 (Monterey Co.) Stuart Haldorn, Monterey, for 0.12 c. f. s. from Higuera Creek for irrigation and domestic uses.

Per. 3668, App. 6669 (San Bernardino Co.) Geneva Catherine Baxter, Lucerne Valley, Calif., 0.14 c. f. s. from (1) Deep Creek Canyon and (2) unnamed spring for irrigation and domestic use on 20 acres. Est. cost \$150.

Per. 3669, App. 6410 (El Dorado Co.) Emil E. Larsen, Placerville, 0.5 c. f. s. from South Fork Brush Canyon for irrigation and domestic use on 60 acres. Est. cost \$300.

Per. 3670, App. 6868 (Inyo Co.) H. J. Halliday, Bishop, 0.035 c. f. s. from small unnamed stream for domestic and recreational uses. Est. cost \$155.

Per. 3671, App. 6706 (Humboldt Co.) E. F. Barker and Beatrice B. Barker, Orleans, 0.1 c. f. s. from unnamed gulch for irrigation and domestic use on six acres.

CALIFORNIA—Following applications seeking permits to appropriate water were filed during the month of March with the State Department of Public Works, Division of Water Resources, Edward Hyatt, state engineer:

Application 6902 (Butte County) R. M. & H. L. Stafford, Live Oak, for 2.0 c. f. s. from Morrison Slough (Main Drain Ditch of Dist. 2056) tributary to Sacramento River for irrigation purposes (150 acres). Est. cost \$2000.

App. 6903 (El Dorado Co.) U. S. Eldorado National Forest, Placerville, for 3000 gals. per day from Granite Lake Creek tributary to Emerald Bay, Lake Tahoe, for domestic and fire protection purposes. Est. cost \$450.

App. 6904 (Lake Co.) C. G. Haycock, 264 27th St., Sacramento, 0.5 c. f. s. from Middle Creek tributary to Clear Lake and Cache Creek for irrigation purposes (40.26 acres).

App. 6905 (Butte Co.) California Mutual Building & Loan Association, a corp., San Jose, 1478 c. f. s. from Lateral "A" Drainage Canal of Reclamation District tributary to Butte Creek, thence Sacramento River for irrigation purposes (591.2 acres of rice).

App. 6906 (Santa Barbara Co.) Union Realty Co., P. O. Box 829, Santa Barbara, 7 gals. per min. from San Marcos spring for irrigation and domestic purposes (5 acres). Est. cost \$1200.

SONOMA COUNTY, Cal.—J. V. Galbraith, Petaluma, at \$14,399 submitted low bid April 8 to State Highway Commission to grade and pave with Portland cement concrete, 1.1 miles at Lytton Overhead Crossing. Clark and Henry Const. Co., Chancery Bldg., San Francisco, only other bidder at \$15,239.

CLARK COUNTY, Nev.—As previously reported, bids will be received April 15, 3:30 P. M., by S. C. Durkee, state highway engineer, Carson City, Nevada, for furnishing asphaltic fuel oil, applying and mixing it with a crushed rock or crushed gravel surface on a portion of the State Highway system in Clark County from the California-Nevada State Line to Jean, a length of 12.62 miles. Project involves:

- (1) 333,107 gals. asphaltic fuel oil applied to roadway surface;
- (2) 12.62 miles mixing asphaltic fuel oil with crushed rock or crushed gravel surface;
- (3) 12.62 miles rebuild and finishing shoulders.

Note: The oil shall be delivered at the following railway sidings and in the quantities shown:

Clark Siding, 191,935 gallons.
Jean, 141,172 gallons.
Average haul on entire contract, 3.307 miles.

Certified check 5% required with bid. Plans on file in office of the U. S. Bureau of Public Roads, 461 Market St., San Francisco, and obtainable from the engineer on deposit of \$15, of which \$10 is returnable.

28

SAN MATEO COUNTY, Cal.—H. E. Casey, San Mateo, at \$30,225 submitted low bid April 8 to State Highway Commission to surface with crushed rock and screenings to be stockpiled on 6.6 miles between Rancho San Mateo and Half Moon Bay Road. Reed, White, Belmont, only other bidder at \$34,200.

ELKO COUNTY, Nevada.—As previously reported, bids will be received April 15, 3:00 P. M., by S. C. Durkee, state highway engineer, Carson City, Nevada, for grading, constructing structures, placing surfacing material and furnishing asphalt fuel oil, applying and mixing it with a crushed rock or crushed gravel surface between the South Elko County Line and Wendover, a length of 53.54 miles. Project involves:

- (1) 5600 cu. yds. roadway excav.
- (2) 2000 cu. yds. structure excav.
- (3) 5.90 miles prepare subgrade and shoulders;
- (4) 1 demolish headwalls;
- (5) 47.64 miles prepare shoulders;
- (6) 49,800 cu. yds. crushed rock or crushed gravel surf. in place;
- (7) 55 cu. yds. class A concrete;
- (8) 4 lin. ft. 18-in. corr. metal pipe in place;
- (9) 1282 lin. ft. 24-in. do;
- (10) 76 lin. ft. 30-in. do;
- (11) 148 lin. ft. 36-in. do;
- (12) 11 lin. ft. remove corr. metal pipe;
- (13) 480 lin. ft. remove and reset corr. metal pipe;
- (14) 515 cu. yds. cement rubble masonry in place;
- (15) 100 cu. yds. riprap in place;
- (16) 1,280,383 gals. asphalt fuel oil applied to roadway surface;
- (17) 53.54 miles mixing asphalt fuel oil with crushed rock or crushed gravel surface;
- (18) 53.54 miles rebuild and finishing shoulders.

Certified check \$5% required with bid. Plans on file in office of the U. S. Bureau of Public Roads, 461 Market St., San Francisco, and obtainable from the engineer on deposit of \$15, of which \$10 is returnable.

ELKO COUNTY, Nevada.—As previously reported, bids will be received April 15, 2:00 P. M., by S. C. Durkee, state highway engineer, Carson City, Nevada, for grading, constructing structures and placing surfacing material between Deeth and Wells, a distance of 18.53 miles. Project involves:

- (1) 169,700 cu. yds. roadway excav.
- (2) 1500 cu. yds. structure excav.
- (3) 26,100 cu. yds. selected borrow excavation in place;
- (4) 276,930 yd. sta. overhaul;
- (5) 17.86 miles prepare subgrade and shoulders;
- (6) 9 demolish headwalls;
- (7) 0.60 mile prepare shoulders;
- (8) 58,630 cu. yds. crushed rock or crushed gravel surf. in place;
- (9) 850 cu. yds. crushed rock or crushed gravel in stockpile;
- (10) 319 cu. yds. class A concrete;
- (11) 112.5 cu. yds. class B concrete;
- (12) 1552 lin. ft. 18-in. corr. metal pipe in place;
- (13) 910 lin. ft. 24-in. do;
- (14) 140 lin. ft. 30-in. do;
- (15) 366 lin. ft. 36-in. do;
- (16) 48 lin. ft. 24-in. corr. metal pipe in place;
- (17) 146 lin. ft. remove corr. metal pipe;
- (18) 58 corr. metal pipe culvert extensions;
- (19) 5744 lin. ft. standard timber guard rail in place;
- (20) 86 monuments in place;
- (21) 5 furnish and install posts for Federal Aid markers;
- (22) 18.53 miles finishing roadway;
- (23) 4656 lin. ft. remove timber guard rail;
- (24) 41,607 lin. ft. constructing fence;
- (25) 5526 lin. ft. remove and reconstruct fence;
- (26) 10,910 lin. ft. remove fence.

Certified check \$5% required with bid. Plans on file in office of the U. S. Bureau of Public Roads, 461 Market St., San Francisco, and obtainable from the engineer on deposit of \$15, of which \$10 is returnable.

REDWOOD CITY, San Mateo Co., Cal.—County Surveyor Jaa. S. James

in a report to the county supervisors, estimates the cost of the proposed 19th Ave. extension in East San Mateo from the Bayshore Highway to Seal Creek at \$50,000. The project would involve a roadway 30-ft. wide, consisting of a rock base, 6-in. thick.

A preliminary survey to improve 1½ miles of Ralston Avenue, running to Skyline Blvd. west of Belmont, according to estimates submitted by County Surveyor James would cost \$30,000.

ENGINEERING SOCIETIES EMPLOYMENT SERVICE

Further information regarding positions listed in this column is obtainable from Newton D. Cook, Room 715, 57 Post Street, San Francisco. (Phone Sutter 1984).

W-2205-S ENGINEER to set up a Complete plant for the galvanizing of sheets and to instruct permanent staff in the operation of the plant. Practical experience in the operation of sheet galvanizing machinery essential. Knowledge of Spanish an asset, but not a necessity. Apply only by letter. Ocaton, Mexico.

W-2329-C-S (K-345) MINING ENGINEER with good placer experience, to take charge of operation in healthy section of Peru. Salary, living expenses and share in profits. Small investment desired. Apply by letter giving references. Headquarters, Peru.

W-2440-C-S (K-346) MINING ENGINEER with prospecting experience on gold both placer and quartz. Capable man with about \$25,000 could take over leases and operate on royalty basis in rich virgin territory now held by principal under concession from Peruvian Government. Healthy location. Apply by letter with references. Headquarters, Peru.

W-2511 OPERATING ENGINEER, preferably single, to operate steam and refrigeration plant, and be responsible for repairs and maintenance, with little skilled labor but plenty of common labor. Contract for one year or more. Salary depends on man. Apply by letter. Location, small community in Colombia, South American tropics, unsuitable for children.

W-2571-C-S (K-352) SALES MANAGER for large fertilizer company. Commercial experience in some Oriental market essential. Technical agricultural training desirable but not indispensable. Only highest type of man will be considered. Apply by letter giving complete record of previous employment particularly full details of all foreign experience, salaries received, age, education, nationality, references, etc. Location, China.

W-2572-C-S (K-353) AGRICULTURAL EXPERT for service with large fertilizer company. Must be a graduate of agricultural college or have had equivalent training. Apply by letter giving complete details of education, training and experiences, record of previous employment and salaries received, age, nationality, references, etc. Location, China.

A. S. Holmes, city building inspector of Oakland, reports the issuance of 276 building permits in March for construction aggregating an expenditure of \$967,545.

STATEMENT OF OWNERSHIP, MANAGEMENT, CIRCULATION, ETC., REQUIRED BY THE ACT OF CONGRESS OF AUGUST 24, 1912.

OF BUILDING & ENGINEERING NEWS, published weekly at San Francisco, California, for April 1, 1931, State of California, City and County of San Francisco, etc.

Before me, a Notary Public in and for the state and county aforesaid, personally appeared J. I. Stark and R. J. Rath, who, having been duly sworn according to law, depose and says that they are the owners of the **BUILDING & ENGINEERING NEWS**, and that the following is, to the best of their knowledge and belief, a true statement of the ownership, management (and if a daily paper, the circulation), etc., of the aforesaid publication for the date shown in the above caption, required by the Act of August 24, 1912, embodied in Section 411, Postal Laws and Regulations, printed on the reverse of this form, to wit:

1. That the names and addresses of the publisher, editor, managing editor, and business managers are:

Publisher, Stark-Rath Printing & Publishing Co., 547 Mission St., San Francisco.

Editor, J. P. Farrell, 1258 39th Ave., San Francisco.

Managing Editor, J. P. Farrell, 1258 39th Ave., San Francisco.

Business Managers, R. J. Rath, 786 31st Ave., San Francisco, and J. I. Stark, 778 30th Ave., San Francisco.

2. That the owners are: Stark-Rath Printing & Publishing Co., 547 Mission St., San Francisco.

R. J. Rath, 786 31st Ave., San Francisco.

J. I. Stark, 778 30th Ave., San Francisco.

A. R. Miller, 869 Treble Glen Road, Oakland.

3. That the known bondholders, mortgages, and other security holders owning or holding 1 per cent or more of total amount of bonds, mortgages, or securities are: none.

4. That the two paragraphs next above giving the names of the owners, stockholders, and security holders, if any, contain not only the list of stockholders and security holders as they appear upon the books of the company but also, in cases where the stockholder or security holder appears upon the books of the company as trustee or in any other fiduciary relation, the name of the person or corporation for whom such trustee is acting, is given; also that the said two paragraphs contain statements embracing affiant's full knowledge and belief as to the circumstances and conditions under which stockholders and security holders who do not appear upon the books of the company as trustees, hold stock and securities in a capacity other than that of a bona fide owner; and that affiant has no reason to believe that any other person, association, or corporation has any interest direct or indirect in the said stock, bonds, or other securities than as so stated by them.

ENGINEERING GROUP
WILL STUDY EUROPE

Under the direction of Prof. N. Miller, head of the Rutgers University extension division, Europe, including Russia, will be toured by a party of educators and engineers next summer. The engineering division of the tour under the direction of Parker H. Duggan, dean of the college of engineering at Rutgers, will visit important factories and industrial plants as well as conferences with engineers, business executives and labor leaders. Practical education and engineering will be combined through a course in engineering economics to be conducted on the tour.

The countries to be visited include Germany, Austria, France, Sweden, Finland, Denmark, Switzerland, Russia and Poland. The party will arrive from New York on July 4.

A "Pittsburg" Automatic Water Heater installed in the Home indicates high quality throughout.

Recommended and specified by all the leading architects, plumbers and builders.

Consider the high merit of the Pittsburg coupled with "Pittsburg Perfect Service."

"Hot water quick as a wink."

A Pointer on **P**rinting

Printing matter is not a commodity—it is a necessity, like the salt in our soup. Without printing matter modern business is unthinkable. The more we invest in printer's ink—that is *in the right kind of printing*—the greater the results. Therefore it is of vital interest to select the RIGHT kind of printer. — There are printers AND printers—but few are self-containing in mechanical and creative ability.— Put us on the track, and, like this pointer in suspense, we will bring back the bacon.

"RATING" PROPOSED IN BUILDING FINANCE

Steps toward a finance system for building, including "rating" under national codes of Certified Building Registry, modified for local conditions and limited by community councils, will be discussed during the cabinet meeting of Associated General Contractors of America in Washington next month. The discussion of details during the convention of American Institute of Architects at San Antonio, Texas, April 14-15, will then be reported.

The "A. G. C." has been asked for recommendations of an outstanding contractor to represent the contractor group on the Governing Board of the "C. B. R." together with men who will represent the A. I. A., engineering societies, realty management, realty builders, fire underwriters, public utilities, building trade, regional planning and housing reform organizations and lenders. Among these who will be members of the enlarged governing board, it is said on good authority, are N. Max Dunning, architect of Chicago; Rudolph P. Miller, consulting engineer of New York; Douglas L. Elliman, management operator of New York; Louis G. Walker, of Detroit, realty builders; and a representative of a national association of fire insurance agents, who produce the bulk of stock company business.

"Certified value" as a factor which rating discloses, in respect to gross income permanence, maintenance and operating expense, has been advocated as an essential for appraisers to consider in the improvement of practice by which stimulus can be given to rebuilding of city slums.

LABOR STABILIZATION BOARD BEING FORMED

The Federal Employment Stabilization Board, authorized by one of the Wagner Bills passed during the last session of Congress, will be organized this month, says The Business Week. Appointment of a director is expected to be made by the President shortly. Congress appropriated \$90,000 for the board's work and, upon nomination of a director, activities can be started at once since two of its units are already available in working order—the public construction branch of the Department of Commerce and a section of the President's Emergency Committee for Employment.

The Federal Board is composed of the Secretaries of Commerce, Treasury, Agriculture and Labor. The Secretary of Commerce will be in direct charge. Main function will be to inform the President of trends of employment and business activities. When business depression is anticipated, the President is expected to ask Congress for additional appropriations for accelerated public works programs.

JOHN G. LITTLE, ENGINEER, CHARGED WITH INCOMPETENCY

"John G. Little has committed acts of gross incompetency in his practice of civil engineering, in that on Nov. 17, 1930, he rendered to a special committee on water supply investigation of the Board of Supervisors a purported engineering report on the San Francisco water system, which report was made without proper or adequate investigation."

The above charges have been filed with the State Board of Registration for Civil Engineers by M. M. O'Shaughnessy, city engineer of San Francisco, and Nelson Eckart, assistant city engineer.

The charges are based on a report made by Engineer Little to the San Francisco Board of Supervisors last November wherein he declared there was danger of a serious water shortage for the city and recommending the bringing of Hetch Hetchy water into San Francisco through the proposed Altamont Pass pipe line.

STOCKTON BUILDERS TO FIGHT LABOR LAW

Efforts to educate the public as to why the proposed city and county ordinances which would require only local labor on public projects should be defeated will be made by the Stockton Builders' Exchange. It was decided in a special meeting of the board of directors last week.

Members pointed out that if nearby communities should adopt similar ordinances, local contractors would have to hire entirely new crews in other cities and would be put to great inconvenience and expense, since 40 per cent of the members of the exchange now have 75 per cent of their work in other places.

If the city and county passed such ordinances, it was pointed out, skilled and unskilled workers from anywhere in the country could work on county projects, but residents in the subdivisions of Stockton could not work on city projects because the city ordinance suggested would limit the employees to residents within the city proper.

Contractors and sub-contractors would have to hire personnel managers to make certain that only local labor was employed and the sworn affidavits of those so hired would be required to seek to insure that they were qualified by residence, it was stated.

The provision of a year's residence, it was declared, would cause a hardship to skilled workers from outside who would come here to work on public projects and would invest in a home and pay taxes, only to find that they were not eligible by length of residence.

ENGINEERING CONTRACT AWARDS LESS THIS YEAR

Engineering construction contracts totaled 663 millions for the first quarter of 1931, compared with 826 in 1930 and 1122 in 1929, Engineering News-Record reports. This drop of 15 per cent from last year occurred entirely in the Middle Atlantic and Southern states and was in private work. In New England and the Middle West volume was exactly the same as a year ago. West of the Mississippi River there was an increase of 15 per cent, that in the Far West amounting to 26 per cent. The decreases were 41 per cent in the Middle Atlantic states and 22 per cent in the South.

Building construction is down 31 per cent; residential 6; industrial and other buildings 42 per cent each. Other structures, including public utility work, are down 37 per cent.

Public-works contracts are 24 per cent heavier than last year, due to a 22 per cent gain in highway work and a very heavy increase in federal construction except buildings. Volumes of the last two years balance each other for water-works, sewers, excavation and unclassified. Public bridges totaled 24 millions this year and 22 millions last year, buildings 56 and 70 millions respectively.

Local Architecture Changing, Says Hobart

The architecture of San Francisco will undoubtedly undergo an almost complete new development during the next generation, adding to the attractiveness of the city as one of the most delightful places in which to work and live, according to Lewis P. Hobart, San Francisco architect and designer of the new Mills Tower. His observations in this connection were made in the course of an investigation of the Crocker First National Bank to project the future of San Francisco in all phases, including industrial and commercial possibilities and general civic development.

"San Francisco's unsurpassed location, with its marvelous waterfront of both bay and ocean, and with the topography of hills, should be one of the most beautiful cities in the world," said Mr. Hobart.

In the San Francisco of the future Architect Hobart sees: "A modern trend of high buildings; opportunities for a wonderful waterfront with several elevated landings over the Embarcadero for transcontinental and trans-Pacific airplanes; the city's hills crowned with great apartment buildings; beautiful parks and boulevards developing as the city grows and spreads down the Peninsula; and Chinatown, North Beach, Potrero and other districts each adopting its own individual and characteristic architecture."

PRACTICAL APPLICATION OF TRADE PRACTICE RULES

(By Arthur Fisher, Counsel for the Concrete Reinforcing Steel Institute, Chicago, Illinois)

Trade practice rules refer usually to the rules of the Trade Practice Conferences held under the auspices of the Federal Trade Commission. They are not necessarily the only type of trade rules. You can have identical rules in associations or institutes which have not actively cooperated with any organ of government in formulating a code. Trade practice rules are, of course, but one development and one activity of the general trade association movement.

I suppose the trade association movement had its origin far back in the guild movement, in the early beginnings of business and industry. The modern trade association movement in the United States concerned itself at the start primarily with questions of scientific production, market extension, simplified practice, the gathering of statistics, and similar issues.

The trade practice movement, on the other hand, refers more specifically to that phase of trade association work dealing with the relationships of competitors to each other, with those points where individuals tend to clash, in their competitive relationships with each other or with other groups and the public, a much more difficult and delicate field of association activity.

In the past three or four years some 126 industries in the United States have elected to promulgate trade practice rules in cooperation with the Federal Trade Commission dealing with these competitive inter-relationships of their members. These industries include many of the largest and most important in the country. The grocery conference includes some 400,000 different business units. The petroleum industry of the United States has over eighteen thousand members to its trade practice rules, has had a large budget and has adjudicated some 4,000 or 5,000 cases under its rules.

In the iron and steel industry a number of conferences have been held. We have worked closely with the Concrete Reinforcing Steel Institute and have had some contacts with the conference of the structural steel industry and of the metal lath industry, which has also had a trade practice conference.

In addition to these trade practice conferences conducted in cooperation with the Government, many other industries have promulgated trade and competitive rules based, with variations, on the rules of the conferences held in cooperation with the Federal Trade Commission. So the total list of associations that have promulgated trade practice rules of one sort or another would number many more than 126.

So far as I personally am concerned, and so far as the organization of which I am a part is concerned, we do not wish at the present time to appear in any sense as an advocate of the trade practice conference in cooperation with the Federal Trade Commission. So long as the existing uncertainty exists with reference to the attitude of the Commission towards the rules and their administration in the case of industries which have heretofore held conferences, it is not possible for us to advise new industries or groups to undertake to cooperate with the Commission. The members of the Commission must first adopt a clear and consistent policy with reference to the scope of the rules and their revision before any new groups can wisely expend their time and money

Address delivered by Mr. Fisher at the Seventh Annual Conference of the Iron, Steel and Allied Industries of California, at Del Monte, California, February 12-14, 1931.

In conferences held under federal supervision, The Commission and its divisions charged with this effort to deal with the most vital and difficult problems of American business life have a great opportunity. It is to be hoped there will be no failure to take advantage of it through vacillation and incompetence.

Nevertheless whatever may be the wisest procedure for groups which have not yet held conferences, industries that have already adopted trade practice rules either in cooperation with the Government or by borrowing from the codes adopted under the auspices of the Commission, must go forward with their rules rather than backward. They have the practical problem on their hands of the effective administration of their rules.

It has been customary in some quarters to view sceptically pious codes of ethics. I believe that there is some value even in an unenforced code of ethics. The Ten Commandments have been of some use even though it has been said they have never been tried. Certainly they have never been effectively policed or administered. Any statement of an ideal or principle is worth some thought. But it is true that codes of ethics have come somewhat into disrepute because of the fact that people have considered them more as pious expressions of good intentions than actual working principles.

Mr. Kerr spoke just now of the experience of the banking world. I have been much impressed for a number of years with the success of the banking world in handling many of the problems of its competitive relationships. One of the chief instrumentalities in our large cities for handling the competitive relationships of the bankers, and which go beyond mere expressions of good intentions, are the banking clearing houses. We have similar instrumentalities for carrying out codes of ethics and rules of administration in the case of our stock exchanges and our boards of trade. Each of these three groups of American industry have standards, have codes of business relationships which mean something because they are actually administered. They are not statements of good intentions. Of course, in each of these three cases, stock exchanges, boards of trade and banking clearing houses, the chief method of successful administration has been the offering of a facility so desirable to the men in that industry that they cannot afford to be deprived of it. The association interested in the standards of its code has afforded such vital and essential services that the threat of taking away these services has been the chief means of policing and effectively administering its rules.

We find that beyond the primary problem of education and holding up of a standard, higher often than the standard of competitive and market relationships, one of the most effective means of practically administering these codes is the offering of certain services which are so vital to the individual that the industry needs only to suggest that the service will

be shut off if the code is not lived up to. Where such a cooperative service can be developed it is often a more effective means of policing and administration than any threat or punitive measure of any sort can ever be. Such services may include the exchange of statistical information or closed transactions, quantity estimates and engineering work, numerous other services, continuous use of which tend to build confidence and to make a man or firm jealous of its good standing and reputation in the industry.

In dealing with problems of actual policing and enforcement, two general types of trade practice rules should be distinguished. The first type, which in those groups that have dealt with the Federal Trade Commission are called Group I Rules, are rules that attempt to write out in the language of the industry the standard of the existing law, that of the Sherman Act, the Clayton Act, or the Federal Trade Commission Act, and the judicial decisions thereunder. Usually an effort is made to translate the broad generality of the law into the language of the particular industry, into terms of flat glass, nuts and rivets, of bricks, structural steel, groceries, or whatever the commodity of the industry in question is.

In dealing with these problems of competitive relationships, which are the heart of the trade practice rules, you are not merely dealing with that phase of the Anti-Trust Laws which are written to protect the public, but also with that other large section of the Anti-Trust Laws which has been developed and written to protect business itself—that section of the Law, which is perhaps more than half of the law, which does not deal with monopoly or restraints upon the consuming public, but with unfair competition between the members of the industry themselves. The ultimate philosophy of even this portion of the law may be to protect the public, but in the process it prevents, for example for example, a powerful market factor from maintaining a high price in one geographical locality and going out and killing off competitors of smaller size one by one in their separate localities. This portion of the Anti-Trust Laws was written and has been administered, developed, and evolved by the courts for the purpose of establishing higher standards within business itself than that which the pirate, the racketeer, and the business outlaw would adhere to if left to himself.

This part of the Anti-Trust Laws has, in a great many cases, been written into concrete trade rules and is administered by defining organizations within industry. In some cases complaints are referred in the first instance to district or state organizations, with later appeal to a central committee, and if the central committee cannot get results or obedience to its decisions, then to the Federal Trade Commission itself, or to the courts. These Group I rules include the rules against unfair price discrimination, unfair secret rebates for the purpose of eliminating competition, rules condemning acts of predatory pricing, including breaches of contract, rules that seem more or less axiomatic, since they are statements of existing law, but which, nevertheless, in my experience in the administration of

these codes give rise to numerous cases of violations which, if ignored, tend to undermine confidence, tend to do back-biting and retaliation which Mr. Foster just referred to, and which often fester in the minds of the executives of different companies. If, however, the facts are developed and brought out in the open, the cases adjudicated promptly and efficiently, they may be the means of very definitely promoting general confidence and thus react to the improvement of general competitive and market conditions.

It is often important, in administering such rules, to go beyond the mere statement of the rule and promptly issue clear interpretations of the broad language of rules in the light of the particular facts of given industries. For example, take this rule of the reinforcing steel industry, which is Rule of Group I:

"Any wilful attempt to induce a breach of any existing bona fide contract, or to prevent the performance of any contractual duty or service under any bona fide contract for the sale of reinforcing materials, is an unfair method of business."

That sounds simple, almost self-evident, and yet a great many difficult questions of interpretations may arise under that rule. A common problem we have had to deal with, in connection with that rule is this: How is he fact to be established that there is a bona fide contract? If you have such a rule you will find a number of people attempting to use the rule itself unfairly. One competitor will say to another, "I have got a contract with X. Keep off my contract. If you do not, I will appeal to the Executive Committee of the industry and from them to the Federal Trade Commission." But perhaps the man who says that has no contract at all. His salesman has perhaps only telephoned a from the field and said, "I have an important contract and I will get the contract the day after tomorrow if you can do something to keep Z out of the picture." Therefore, it becomes necessary to go further and issue an interpretation of the rule to meet this situation. We have required of the reinforcing steel group that if a seller claims a contract, and his competitor is charged with inducing its breach, and his competitor doubts the existence of that contract the burden is thrown on the seller who claims the contract to offer to send a copy of that contract to the other party. And unless he does that he cannot claim that the second party has induced a breach.

We have similar questions in connection with the rule against commercial bribery. The rule says: "Commercial bribery, whatever the form and wherever given, is hereby declared an unfair trade practice, an unfair method of competition, and contrary to the public interest."

The question has arisen as to whether it is bribery for a seller to make a special payment to the engineer of the owner, when the seller has no direct relationship to the owner but is merely dealing with the contractor as buyer. Is that bribery when no payment is made by the seller or any of his representatives, to any other person in relationship to the man with whom he contracts? The interpretation which we are now promulgating in the reinforcing steel industry is to the effect that any payment to any third party or to any person in a relationship of trust or confidence or who owes an obligation to the owner, is bribery whenever made without full knowledge of both the buyer and of the owner.

These are more or less typical illustrations of Group I Rules. Viola-

tions of these rules may be punished by Executive Committees of the industry, in some cases by requiring direct restitution of money damages, and if the authority of the Conference is flouted, there may be direct appeal to the Commission or the courts.

We have another set of rules that I think are, in many ways, more important and more interesting to us. They are so-called Group 2 Rules which, in the case of the Federal Trade Commission Conferences, are merely received by the Commission as the expression of the industry to those standards and principles which the industry wishes to have adopted as controlling competitive relationships. Such rules usually set a higher standard than the law, either a higher absolute standard or a higher recommended standard. The recommended rules are often rules which are promulgated to prevent unfair competition arising. In business, as in the practice of medicine, the preventative rules, the rules which develop customs and practices which prevent the necessity for policing, are often much more vital and important than those rules which require enforcement and punitive measures. It is as to Group 2 Rules that the Commission has done most of its recent tacking and filing.

One of the Commissioners, who has been active in conducting the conferences of a very important group of industries with volume of business running into several hundred millions of dollars, has taken the position publicly within the last thirty days, that any agreement to carry out a Group 2 Rule which prevents a business man doing that which he can lawfully do under the Anti-Trust Laws is improper. Such a position is untenable. That is practically saying to American business that it cannot attempt to create any higher standards than the pitifully low standard of the criminal law. It is the equivalent of saying to a banking clearing house that it cannot establish standards to prevent its members doing those things which they could do outside of the clearing house without committing a crime. It would prevent the Board of Trade, or the Stock Exchanges of Chicago and New York, from requiring, by an Exchange rule, the reporting of closed transactions. Such an interpretation of the law, which has been apparently acted on in certain industries in the last few weeks, goes back before the promulgation of the rule of reason in the tobacco and oil cases. It is saying that any restraint on competition is improper whether reasonable or unreasonable. To have a Commission composed of specialists supposed to be experts in their insight and ability to handle business problems, take such a position, seems to me so preposterous that I cannot find words too strong to characterize the pronouncement.

However, let me give you some illustrations of the Group II rules that have been adopted by industries and have been efficiently administered without objection from the Commission. I might say, first, that among the industries that have adopted trade practice rules, there are some groups that have done nothing with their rules; they have just approved them, as of course approved of the Ten Commandments, and done no more. Another group has taken the viewpoint that the rules would be sufficiently enforced by the Federal Trade Commission itself. This group of industries has apparently thought that all that is required is just to adopt the rules, in cooperation with the Government, and then to sit back on its haunches and somehow the Government will do all the rest. Then there has been a third group which has taken the viewpoint that the rules do not mean much unless, in the first instance,

there is a vigorous and competent association following them. The original invitation for the Conference comes from the Commission. The rules are promulgated by the Commission, but you must have an organization of your own to see that the Government performs its function. This third group has said, "This code is a mere instrument, a tool, which may be useful if we have the skill and the ability to use it effectively."

An example of this latter group that has been efficient in the carrying out of its rules is the plumbing and heating industry. The industry has a vigorous administration. They have, I believe, 1800 signers to their rules. They have handled many questions of interpretation and many decisions and complaints. The industry, prior to this catastrophic action of the Commission ten days ago, was effective, perhaps too effective, in administering its rules.

I must admit that a certain small section of industries that have held these conferences have possibly intended to use the industry as a smoke-screen. They have wanted to use the conference as window dressing so that if they get into trouble they could claim that they had the approval of the Commission for all their activities. One of the causes for the recent back-sliding on the part of the Commission has been the revelation to the Commission of certain specific cases where the rules were not adopted in good faith, but a cover for something else that was not laid out on top of the table. I do not believe that such practices have characterized any substantial part of the conferences.

The Department of Justice supports the trade practice conference movement. Last May, at a meeting of the Congress of Industries, Mr. John Lord O'Brien, in charge of the Anti-Trust Division of the Department of Justice, stated that the Department of Justice was in accord with the trade practice conference movement, believed the movement as a whole was sound, just exactly as the original trade association movement in its statistics and on closed transactions has been on the whole sound. Since then Attorney General Mitchell has permitted himself to be quoted in an article published in Collier's Weekly some months ago to precisely the same effect.

It is true that in this movement we are pioneering into new fields. Business is not static, and especially the field of competitive relationships is not static. We went through a five to ten year period when the whole question of what trade associations could do in the field of the exchange of information and statistics was full of doubt. The Department of Justice took the view that many of such activities were improper and as a result business men for a period of years were subjected to suit and indictment. Finally we secured the Supreme Court sustaining the right of associations to engage in that field of activity. But after having secured these two lighthouse decisions in that field we have moved forward into new twilight zones, and we will always be moving forward into new zones of uncertainty so long as American business progresses and commercial relationships become more intricate and complex.

One of the great values of the trade practice movement, one of the things that has led many groups to cooperate with the Commission, has been the opportunity afforded the business to promulgate a rule and to ask the Commission, "Is this rule sound or is it improper? It is most important for us to have a definite and correct answer to that question, and to be able to rely on your decision." For a num-

her of years under Assistant Attorney General Donovan, associations could go to the Department of Justice and get an authoritative answer to such questions. But this service was abandoned by Attorney General Mitchell.

The trade practice conference movement developed partly in the belief that through trade practice rules groups could secure from the Federal Trade Commission authoritative answers to such questions. When they had the Commission's approval they could have confidence that there would at least, be no criminal penalties for reasonably acting on any rule.

It was recognized, of course, that the Commission reserved its right to change its mind and modify its approval as it learned more about the facts, and as the situation itself changed, but business expected to rely on its right to effectively administer these trade practice rules which the Commission had itself promulgated.

Dealing now with the field of prevention, with the setting up of standards preventive of unfair competition higher than the minimum legal standard, one of the most conspicuous things that has been done has been in connection with the practice of publishing individual prices. We are still in the twilight zone as to just how far business men can go, first in agreeing with each other that they will publish their prices, publish them not to their competitors, but primarily to the buying trade. And, second, how far they can go after publishing prices in committing themselves to the consuming public that they will not depart from those prices without public announcement of a change or withdrawal. Mr. Abbott has spoken here about the importance of that policy merely as a matter of general business policy and its importance in preventing individual instances of discrimination slowly undermining a generally sound market, and leading to sales below cost and severe and uneconomic price wars.

The trade practice rules with reference to price publication which still, despite the recent decision in the petroleum industry case with reference to posting prices, stand approved by the Commission in the case of many industries, commends the practice of each individual seller publishing his firm net price and standing on it. The seller arrives at the price by an act of individual judgment and at its sole discretion, and reserves the right to revise that price whenever it wishes, but commits itself, so long as that price is out to the buying trade over the signature of the individual firm, that the published price shall mean just what it says.

My own interpretation of the action of the Commission in its decision under Rule 17 of the petroleum industry which I might remark in passing had indirectly received the O. K. of the Department of Justice in a consent decree, is that a distinction has been made between the case of an industry which requires every member of the industry who had signed the rules to publish a price and to agree not to depart from that price while it remained posted, and the case of an industry rule which merely recommends the policy and leaves the individual firm free to publish or not, with the right to withdraw entirely from publication if he wishes to withdraw, and without any agreement not to depart, beyond the announcement over its own signature to the buyers that any price, when published, is a firm net price. My own experience leads me to believe that it is more important to get firms to so commit themselves in writing, over their own signatures, and to distribute their prices to the buying trade, with a statement that their prices are not fictitious prices from which discounts

are figured, but net prices from which no employee, agent or representative is authorized to make a discount, than it is to enter into a private agreement with competitors not to depart from published prices. The strongest position, both in practical application and in the eyes of the law, arises from an individual firm's publication of prices to the buying trade itself, without any agreement with competitors either as to the publication or its withdrawal.

I find it is harder to induce each firm in a group to put out its price to the buying trade, with a statement that the prices are prices from which no employee is authorized to make any discount until they are withdrawn or a new price put out, than it is to secure an agreement not to depart from published prices. The average firm is more ready to sign a statement before the public and more careful about a public announcement over its own name than it is as to any private or secret agreement with its competitors.

Therefore, I think that the recent rescission of Rule 17 in the oil case is not a vital matter. I think that American industry can still go ahead with the substance of the price publication plan. I think the practice is sound economically and therefore legally, if any doubt exists on that point, organized business of the United States should fight the issue thru until it is won. American business must have the right to commit itself, if an industry so elects, to publish its individual prices, and, if those prices are individually published and outstanding, that they shall mean what they say. From the attitude and expressions of the Supreme Court of the United States in the American Can and Ladoga Can cases, in which the elements of fraud based on publication figured equally with that of discrimination, I believe we can count on the intelligent support of our highest tribunal on this matter.

You may properly ask what are the means of enforcement for these Group II rules, inasmuch as they set up a higher standard than existing law. Can any disciplinary measures be used in the case of an individual or firm which has indicated its acceptance of such recommendatory rules and then fails to observe the publication of individual prices, and thereafter departs from both the spirit and the letter of the rule? In general it may be said that adherence to the Group II rules must be based primarily on voluntary acquiescence rather than coercion. I have already referred to the importance of educational work and acceptance of the rules as a condition of access to association and trade services. The best horse is that which can be driven with a rein with the least yanking and pulling around.

Experience, however, has developed a series of measures which may be taken to secure obedience even to Group II rules. The first step is to set up a procedure which will tend to discourage departures ever before they originate. In the case of published prices the reporting to a central source, in the form of original copies of contracts if possible, of all closed transactions is an important feature of this sort. If a firm knows that all its sales will become a matter of written record subject to check, it will be hesitant to depart from its outstanding price bulletins without public withdrawal or change. The move towards the market practice of a firm or single bid system, the fixing of definite dates for openings of bids are of value. The same may be said of standard specifications and accurate and impartial quantity estimates.

If, despite those measures, departures are detected or a complaint

thereof is filed, the first step is to ascertain the facts. The mere investigation is a form of discipline and may develop either that the complaint is unfounded, that the rule was innocently misinterpreted, or that the violation was by some minor employee or agent. Bringing the situation to the attention of the Executive of the company or chief of the department with reprimand or possibly dismissal of the responsible representative, may be all the enforcement indicated.

But the head of the concern may himself have acquiesced in the violation, which may have been intentional. A full report of the facts, with opportunity for defense, may then be made to some authorized committee or tribunal of the industry. Exposure of the facts before the opinion of the profession is an important enforcement measure, not to be disregarded because of its apparent mildness. In the case warrants, the defendant may be required to sign a stipulation admitting the facts, accepting the decision of the administrative tribunal and agreeing to discontinue the practice in the future. In most instances the signed stipulation of a first offender may be filed without further action. Even in cases of violation of federal law the Trade Commission now disposes of the great majority of its instances of unfair competitive behavior by stipulation.

If deemed desirable, or if warrants as a precedent or because of the interest of the issue of interpretation the facts and decision in the stipulation may be bulletined to the trade without revelation of any names identifying circumstances. However the administering committee should reserve the full privilege, in the event of a repeated offense, of publishing the stipulation in full. Fictitious publicity is an enforcement measure of great power. Industries who deem teeth behind their rules here have fangs which they will do well to use with great discretion—not because of their iniquity, but because of the penetrating power of the threat. The club is the one which is held in reserve and does not have to be used. A concern's reputation before the trade is a matter both of pride and of highest financial value. Publicity, unnecessary, should be carded direct to the buying trade as well as to the competitive industry itself.

Business outlaws, of course, exist whose acknowledged practices an methods make any control through their reputations entirely ineffective. Callous to criticism or the public opinion either of their customers or their competitors, they accept rule and ethical codes only as smokescreens and blinds for their depredations. Where the issue is one of so heated controversy that no published commitments, no legal restraints are seen why a financial penalty can not be exacted in the form of requiring the removal of the discrimination between buyers of the same quantity during a certain period and an indefinitely similar conditions by refunding to buyers who have previously paid the full price the amount of the rebate. The extent of the adjustment must be commensurate with the seriousness of the discrimination and the conditions primarily carried through so as to remove the unfair discrimination between the buyers and only incidentally to correct the fraud and imposition on other competitors.

Failing satisfaction through resort to any of these methods, the remedy in the event of complete disregard of the administrative officers and tribunal, appeal may be made directly to the Commission. While violations of Group II rules may deal with recommendatory provisions, it may be found in any statute with whose administration the Commission is charged

ed, the effects in particular cases of departures from such rules will often prove serious issues of fraud or discrimination of which the Commission or the courts may properly take cognizance. A number of industries have, however, handled some hundreds of complaints with substantial and effective results without coming to the point where direct governmental assistance was necessary or desirable.

You have heard something this morning about the condition of the railways of the United States and their efforts to meet the needs of the automotive industry and our modern highways. It seems to me,—the picture is not any more perfect than most analogies,—that in this trade practice conference movement and in the development of trade practice rules, we have a situation something like this: For some years the trade association movement was engaged chiefly in promotion and scientific work. Remarkable results have come from such work in the enlargement of markets and productive capacity. So it was in the development of the automobile, which began as a more or less crude piece of machinery and now has achieved that unbelievable precision, which is seen in the quantity production of a Ford car. We have developed an almost unlimited plant capacity in all aspects of production. But in most of our large cities our arteries of traffic, our highways, have not kept up with our productive capacity. In a city like Chicago today, where I live, or in Washington, or New York, it has become practically impossible to drive a private car. I would, ordinarily, not think of driving a car from where I live, twenty miles out of Chicago, into Chicago. We have a tremendous capacity to produce, and to produce more efficiently and cheaply, so that anybody can buy a car, and yet the complication of the movement of these individually operated cars in any urban area is so great that it constitutes one of the chief limitations upon the further growth of the automotive industry.

As I take it, these trade practice rules do not deal directly with problems of production, the scientific aspects of increased precision, the problems of market extension. Rather they deal with the points where these cars meet each other or meet at the crossings; they deal with the development of the decencies of movement of automobiles along the highways; they deal with the problems of developing a standard of conduct in traffic which will perhaps become automatic. After all, the best code of ethics is that which is so thoroughly understood that its functioning has become unconscious through habit and custom. Nevertheless, some administrative control is desirable. In the administration of the Federal Income Tax Law we do not expect to go out and discipline everybody that files an income tax, although here and there a check may have to be made. Even though only one case in five thousand may be checked in detail, it may be just that use of the "spot check" which makes the whole thing work.

We have a certain group of trade practice rules that are like the ordinary decent rules of traffic necessary to permit automobiles to move at all on our modern congested highways. But the most important rules that we are working on, the best practices that we are trying to develop in the handling of the output of our unlimited productive and plant capacity are those that are farthest in the direction of prevention, those which eliminate grade crossings entirely, which permit the traffic to flow smoothly and automatically without any stop and go, any red and green lights whatsoever.

I believe, rules like those recommending published prices are closely analogous to the elimination of the grade crossing, because they produce a practice where discrimination is eliminated at its inception. The more we can develop a procedure for eliminating the occasion for discrimination, the more we can eliminate the occasion for fraud and misrepresentation, the further we have gone in the smooth flow of commercial relationships.

No problem is more vital at the present time in American business, particularly in a period of depression such as we are now passing through, than that of competitive relationships and methods. The trade practice movement as it aids in the development of a higher standard in this direction is distinctly in line with the best traditions of American business and American life. It is desirable that we permit individual business units so far as possible to continue in operation, to permit the individual American business man to continue his independent existence. If you do not raise the competitive standards and cooperate for the purpose of its administrative control, if you do not permit individuals to work out higher standards for individual competitive relationships, business will be inevitably driven into outright mergers and consolidations. The standards that we are working on in this field are the means of permitting the small and medium sized units to keep out of those morasses which are so often the breeding ground of more horizontal or vertical mergers and consolidations.

You will usually find that the biggest units of American business give the trade practice movement their sympathetic support, but that they are not the groups primarily responsible for or interested in the effective administration of the rules. The real burden must be assumed by those moderate-sized and smaller and average-sized units which desire to continue an independent existence in which their relationships to their competitors shall be sufficiently harmonious and based on sufficiently sound economic and legal principles as to avoid market demoralization and its consequences.

To return to my picture—The ideal of many independent units on our highways seems preferable to that of long chains of trailers, or railroad train operation. But in order to permit the smooth movement of a great number of small units, it is necessary to develop and administer a traffic code which permits all those units to flow along smoothly and harmoniously. So in our American business life the ideal of the independent operation of individual productive and distributive units, the ideal of cooperation in a free society of free men, can only persist and flourish if we have developed high competitive standards and are able effectively to administer clear and intelligent principles of business inter-relationships and practice. The rules of trade practice codes, like our traffic codes, are the means to that end. The re-design of our commercial highways is another.

C. W. Sullough & Son, contracting painters and decorators, with headquarters at 734 Brown St., Hialeah, announce the opening of a branch office at 709 Washington St., Santa Rosa.

H. L. Sweeney of Santa Barbara was the principal speaker at the regular monthly luncheon-meeting of the San Luis Obispo Builders' Exchange last Friday. He spoke on the necessity of organization and stressed the need of unified co-operation of members in a builders' exchange.

ENGINEERING SOCIETIES EMPLOYMENT SERVICE

Further information regarding positions listed in this column is obtainable from Newton E. Cook, Room 715, 67 Post Street, San Francisco. (Phone Sutter 1684).

R-3535-S TEACHER of mathematics and surveying in a California Junior College. Preference will be given to a man who could also teach a 3 hour course in physics. Apply by letter. Location, Northern California.

R-3536-S MINE FOREMAN, experienced worker in heavy ground requiring square-set timbering. Must know how to handle men for efficient production. Quicksilver mining experience preferred. Salary \$200 month. Location, California. Headquarters, San Francisco.

W-2632-C-S (K-355) CHEMICAL ENGINEER for engineering company experienced in the sales of chemical machinery to establish branch office for the sale of chemical machinery. Persons with a following in their territories preferred. Straight commission basis. Apply only by letter. Locations, Middle-west, Far West and South.

R-3536-S CHEMIST, college graduate, American, 25-30 years old, for analytical work in oil refinery laboratory. Salary \$2000 month to start, working 5 days per week. Apply by letter. Location, Bay Region.

W-2625-S (K-354) ENGINEER, 35-45, who would act in an engineering capacity and be fully qualified for estimating both tools and production. Should have had experience in job shops rather than in manufacturing plants, as he would have a better understanding of the problems involved. Should be a mechanical engineer with sufficient actual experience at the bench to thoroughly qualify him for the design of tools and dies for both short run and high production jobs. Should be thoroughly familiar with the various materials which must be used in this business and with the various forms in which these materials are available, and have sufficient business instinct to fit him for estimating work. Opportunity. Apply only by letter. Location, West.

W-1954-C-S SUPERINTENDENT of motive power for steam railroad. Must have had recent experience in such position with prominent American railroad. Salary, \$20,000-\$25,000 a year of which one-third to one-half will be paper rubles for living expenses. Balance in United States money to American bank. Contract for one year, renewable. Applications only by letter which will be forwarded to Moscow for decision. Location, Russia.

Paraffine Companies, Inc., has appointed as sales engineer E. A. Trafer, formerly with the Celite Products Co. and the Johns-Manville Corp. in the Los Angeles district.

Water Works Manufacturers Association, through its exhibit committee, is planning to award a prize to the manufacturer who has the most instructive exhibit at the annual convention of the American Water Works Association to be held in Pittsburgh, Pa., May 25-29. The award will be decided by a vote of American Water Works Association members at the convention.

THE OBSERVER

What He Hears and Sees on His Rounds

An ordinance proposing to compel contractors to employ local labor and pay the prevailing wage scale on all public projects, failed to receive the endorsement of the Stockton Builders' Exchange. The proposed ordinance is being considered by the Stockton city council and the supervisors of San Joaquin county. Directors of the exchange termed the proposal "an American in principle" and declared the measure would work a hardship on contractors.

The New York Building Congress is giving serious consideration to the advisability of establishing an old-age pension and life insurance for the 125,000 building trade workers of the city. Murray H. Latimer, pension expert of Industrial Relations Counselors, Inc., is directing a survey of the situation in cooperation with a Congressional committee headed by Thos. Holden of F. W. Dodge Co.

Proposed public works for the year 1921 amounting to \$110,298,000 have been reported by California counties and municipalities to Will J. French, chief of the State Department of Industrial Relations. A check-up by the State unemployment committee of the volume of public works contemplated, shows that 29 counties and 127 municipalities, with a population of 4,963,407 have reported to the department. Counties and municipalities were urged by French to speed their public works programs in order to help alleviate the present unemployment situation.

One of two bills essential to construction of the San Francisco-Oakland bay bridge, passed the Senate last Tuesday without a dissenting vote. The bill, introduced by Senators Roy Fellom and Arthur H. Breed, authorizes the State Department of Public Works to take over the bridge after its completion.

By this "friendly gesture," according to State Highway Engineer Chas. H. Purcell, a lower interest rate may be obtained on the revenue bonds for construction of the bridge. This reduction, Purcell predicts, will save State motorists approximately \$750,000 a year.

The second measure authorizing a \$550,000 loan to complete final design was given a hearing before the Senate Finance Committee. The bill provides for a return of the loan at a percent interest upon sale of the revenue bonds.

With this money available it will be possible to sell revenue bonds and start construction of the bridge within a year, according to Purcell and Colonel Walter Garrison, director of the State Department of Public Works. The bill was taken under advisement pending action on the budget bill. It is expected that it will receive the approval of the committee.

Laws providing for the licensing of contractors on public works and providing for the prequalifications of bidders on state highway work have been passed by the Legislature of Nevada and have been signed by Governor Balzar. The license law was signed March 31 and went into effect at once. In principle it follows the California law, but it applies only to contractors of public works doing jobs in excess of \$10,000. The fee for a license is \$200 and it is renewable

annually at a fee of \$100 a year. In event a license is allowed to expire without renewal, a new license must be obtained, for which the applicant must pay \$200.

The prequalification bill was signed by Governor Balzar March 21 and becomes effective 60 days from that date.

Reports of new orders for fabricated structural steel for the week ending March 21, 1921, were received from 101 establishments, whose capacity represented 35.8 per cent of the total capacity of all plants in the United States. The bookings reported by these establishments amounted to 10,443 tons, representing 30.9 per cent of the total capacity of the reporting establishments. Reports of shipments of fabricated structural steel for the same week were received from 97 establishments, whose capacity represented 35.1 per cent of the total capacity of all plants in the United States. The shipments reported by these establishments amounted to 17,828 tons, representing 55.0 per cent of the total capacity of the reporting establishments.

An involuntary petition in bankruptcy was filed against the Rount Lumber Company of Fresno by three creditors in the United States District Court at Los Angeles last Thursday. The petitioners alleged the company has debts in excess of \$1,000 and has committed acts of bankruptcy within the last four months.

Creation of a general state fund to improve grade crossings is recommended after a detailed study of the problem by the State Railroad Commission. No suggestion as to how the fund should be obtained is made. The commission also urges that efforts be concentrated on the most hazardous crossings. An expenditure of \$200,000 would be required to accomplish the necessary work.

The five-hour work day or two shifts of four hours each, as a solution for unemployment was urged by Colonel Nelson Spencer, member of the British Columbia Legislature from Vancouver.

Colonel Spencer's drastic proposal is especially significant because he is a leading Conservative. He said the five-hour day can be generally applied without disturbing industrial conditions.

He suggested that the Dominion Government arrange with the President of the United States for a conference on the five-hour day.

A sub-contractor, who has had considerable experience on highway work, commends the action of the Alameda County Chapter, Associated General Contractors, in backing the suit of J. H. Fitzmaurice, Oakland cement contractor, who has started proceedings against A. F. Hanson, general contractor on the Hayward Memorial Building, for \$3100 damages. Fitzmaurice, as previously reported in these columns, claims to have entered into a written contract with Hanson to complete the cement work on the Hayward project and Hanson, upon being awarded the contract, informed Fitzmaurice that "he had made other arrangements" for the cement work.

Our sub-contractor friend, in a communication to the writer, says he had been in the same position many times and is looking for a way out. The sub-contractor, he writes, is in a position which is none too favorable at any time.

In a personal conversation with the sub-contractor the writer learned his figuring a project which cost him in traveling and hotel expenses something in the neighborhood of forty dollars. He figured the job for four concerns, one of these being awarded the contract. The other three failed to order a bid.

Confident that he had landed the contract, inasmuch as he figured with the successful bidder, he was told "unless you can reduce your price very considerably, we cannot further consider your proposition."

"Just what is the way out he asks?"

Probably a general contractor will take sufficient time to write us his side of the story. Undoubtedly, other sub-contractors will write in their misfortunes in this regard.

We shall be pleased to receive all others.

Thirty-three sewer projects will be undertaken in various sections of Oakland if the \$1,300,000 sewer bond issue carries next month. A report covering preliminary surveys and estimating of cost has already been submitted to the city council by Walter N. Frickstad, city engineer.

A price war, said to have started in the Mid-Western states, is rapidly threatening to embroil the whole cement industry. It could not have broken out at a worse time. State highway departments, county and municipal governments are now receiving bids for seasonal road improvements. Should the bulk of the year's cement output be covered by commitments made at present reprisal prices, the producers will have no opportunity to improve their position materially during the remainder of 1921. — (The Business Week).

With an amendment providing for a residence of one year in the city instead of six months, the ordinance providing that all contractors engaged in municipal work shall employ only qualified residents of the city was adopted unanimously by the Fresno city commission. The ordinance provides that any contract between the city of Fresno and the contractor is void if this clause is not observed.

TRADE LITERATURE

Rix "36" and Rix "34," portable compressors, known as the General Utility Units, are featured in an 8-page folder issued by the Rix Company, Inc., 400 Fourth St., San Francisco. The folder is illustrated and features specifications of the equipment pictured.

Hercules Fence Co., Ltd., of San Francisco, has been incorporated. Directors are E. F. Holloran, R. E. Tremoreux and A. W. Ploda.

Bay City Shovels, Inc., Bay City, Mich., has completed arrangements for the manufacture of its complete line in Canada by the John Inglis Co., Ltd., of Toronto. Sales of Bay City equipment in Canada will continue through the present Canadian distributor under the supervision of the home office at Bay City, Mich.

ALONG THE LINE

TRADE NOTES

HERE—THERE EVERYWHERE

W. Todd, 59, former painting contractor of Fresno, died in San Jose Friday, following a year's illness.

C. Pales, San Francisco civil engineer and formerly connected with the Colusa Irrigation District, has filed application with the Alameda City Council seeking the appointment of city manager, which office will become vacant on April 20, when the resignation of Clifton E. Hickok becomes effective. Others who seek the position are: F. T. Hopkins, city manager of Mason City, Ia.; Ralph Innett, consulting engineer for the city of Los Angeles, and Col. E. E. Riley, U. S. A., retired, of Chicago.

Clifton E. Hickok, who resigned as city manager of Alameda will become effective April 20, has been requested to submit his qualifications to the city council of Dallas, Tex., now engaged considering possible appointees as the city's first city manager. The Dallas post will pay a salary of from \$10,000 to \$25,000 a year under the city adopted council-manager system. John N. Edly, former city manager of Berkeley who recently resigned, already applied for the Dallas position, a similar post in Flint, Mich., also.

Ernest B. Townsend, 46, chief deputy county surveyor of Stanislaus county, died last Sunday following an extended illness. Townsend underwent a serious operation about a year ago and had suffered intermittently since then. His widow, three children, a sister and two brothers survive.

Pelton Water Wheel Co. of San Francisco, has appointed W. H. Holm general sales manager in charge of the sales distribution of all company products. Holm was formerly manager of the pump department.

Albert V. Heinrich, 52, electrical contractor of Niles, was found dead in a rooming house at Monterey last night. He had a bullet hole through the temple.

Sean L. Vincenz was elected city commissioner of public works at the recent municipal election in Fresno.

E. E. Mueller, city engineer of Seattle for several years, has submitted his resignation to the city trustees. His successor will be appointed shortly.

Suit for \$4,671 in engineering fees has been filed against San Luis Obispo county by Charles E. Watt, engineer. Watt charges failure of the board of supervisors to go through with a contemplated street improvement project at Atascadero last year, for which he claims to have expended. Work was ordered for the improvement Feb. 3, 1930, the engineer charges, but has never been carried out.

The Tuolumne mill of the Pickering Lumber Company is not likely to open this season and no logging operations, so far as the plant is concerned, may be attempted. This is the reported announcement of J. C. Rassenfuss, assistant manager for the Pickering interests at Standard, after returning from a trip to Kansas City, the company headquarters.

South Steel Co. announces appointment of T. H. Howard as manager of the Portland, Ore., branch with headquarters at 1210 Linnton Road. The territory covered by the Portland office includes the entire state of Oregon.

W. D. Punning, former sales manager of The Little River Redwood Co. of San Francisco, is now in charge of Southern California sales for Hammond and Little River Redwood Co., Ltd., with offices in the Los Angeles Chamber of Commerce Building.

C. V. Dorothy, credit manager of the Sacramento branch of W. P. Fuller & Company for the past five years, has been advanced to the position of credit manager for the Seattle branch of the firm, it is announced by Lester Wilkinson, Sacramento branch manager. R. L. Warren will assume Dorothy's position in the capital city. Warren was formerly connected with the Fresno branch and will be succeeded there by J. C. Saunders.

W. H. Smith & Co., 1350 East Ninth St., Los Angeles, have been appointed California distributors for the Universal Cooler Corporation of Detroit, electrical refrigeration manufacturers.

Acme Building Material Co. has purchased the George Sanders Lumber yard at Yreka, Calif. The Acme concern is operated by George R. Phelan, manager of Bray, C. L. Clause, formerly of Bray and now of Lakeview, Ore., and Wilson Strawn, formerly of Lakeview and the Sacramento valley.

Contra Costa County has adopted Ordinance No. 6, amending Ordinance No. 16, governing electrical inspection fee charges.

The Building Material Dealers' Club of Ventura County has been organized with Walter Riley of the Peoples Lumber Co., Oxnard, as president and H. B. Adams as secretary.

The annual convention of the Apartment House Association of California will be held at San Diego, September 10, 11 and 12.

Plans to establish a building material display room and office quarters for the Santa Rosa Builders' Exchange are being worked out. Wm. Herbert, Harry Huntington and W. J. Meeker comprise the committee which has the matter in hand.

The city council of Richmond, Calif., is considering adoption of an amendment to the plastering and electrical ordinances. Heretofore the bonds of plasterers and electricians were approved by the city council. The amendment gives the power of approval to the city manager and the city attorney.

Plant and yards of the A. W. Wells Lumber Company at Menominee, Mich., suffered a \$1,000,000 fire loss April 13. About 30,000,000 feet of lumber and 2,000,000 feet of saw logs were included in the loss.

According to word from Oklahoma City, the House of Representatives has passed a bill to provide for the establishment of a state cement plant, to be manned by prison labor.

A "Pittsburg" Automatic Water Heater installed in the Home indicates high quality throughout.

Recommended and specified by all the leading architects, plumbers and builders.

Consider the high merit of the Pittsburg coupled with "Pittsburg Perfect Service."

"Hot water quick as a wink."

Pittsburg Water Heater Co.

Makers of "Pittsburg Automatic"—"Bungalow Automatic" Storage Systems and "Lyon" Tank Water Heaters.

Engineering News Section

BRIDGES

REDWOOD CITY, San Mateo Co., Cal.—See "Streets and Highways," this issue. Bids wanted to improve main street, including construction of a reinforced concrete bridge of two 30-ft. spans with 4-wing walls over Redwood Creek.

TRINITY COUNTY, Cal.—Until May 3, 2 P. M., bids will be received by State Highway Commission to construct bridge across North Fork of the Trinity River near Helena, composed of one 150 ft. through steel truss span and two 47-ft. 2-inch concrete girder spans on concrete piers and abutments.

SAN FRANCISCO.—Golden Gate Bridge and Highway District, Financial Center Bldg., will ask bids about April 22 on the first unit of the construction in connection with the Golden Gate Bridge for which bonds of \$35,000,000 were authorized last year. It is proposed to ask separate bids on the project under the following schedules:

(1) Superstructure, including the main towers, cables and stiffening presses; (2) two main piers and San Francisco pier fenders; (3) two anchorages; (4) San Francisco and Marin approach spans with steel superstructure; (5) the Freixido and complete exclusive of lighting; (6) Sausalito lateral road complete exclusive of lighting; (7) paving of the main span of the San Francisco and Marin approach span; (8) electric light and power installation for the entire bridge; (9) cable house and stairways, rilling and grading; (10) poll terminal; (11) cement.

SAN LUIS OBISPO, Cal.—City defects proposal to issue bonds of \$12,000 to finance widening of the present bridge in Essex St. near Pismo St. over San Luis Obispo Creek and widening the present culvert in North Broad St. over Old Garden Creek.

SANTA CLARA COUNTY, Cal.—Oberg Bros., 3170 Hollenbeck Ave., Los Angeles, at \$59,158 awarded contract by State Highway Commission to construct reinforced concrete girder bridge across Cañadero Creek about 1.7 miles south of Gilroy, consisting of four 35 ft. spans on concrete pile bents and concrete abutments and approximately 0.53 mile of roadway approaches to be graded and paved with Portland cement concrete. Complete list of unit and total bids published in issue of April 8.

SALINAS, Monterey Co., Cal.—Upon reconsideration of bids, county supervisors reject bids to construct steel and timber bridge on the Soledad-King City road over Chalona Creek near Metz and the work will be done by day labor under the supervision of County Surveyor Howard Cozenna. Ben C. Gerwick, San Francisco, low bidder at \$21,482.

PLACERVILLE, El Dorado Co., Cal.—Until May 5, 2 P. M., bids will be received by Arthur J. Koleszke, county clerk, to construct reinforced concrete girder bridge for the South Approach of the Coloma Bridge on the South Fork of the American River. Certified check 10% payable to clerk

required with bid. Plans obtainable from Henry Laboff, county surveyor, at \$4.00 of \$100, returnable. Quantities of materials involved will be published shortly.

SANTA BARBARA, Cal.—C. B. Davidson, 1517 Santa Fe Ave., awarded the contract by county supervisors at \$7,945 to construct steel bridge, with reinforced concrete deck, located on the Goleta Foothill Blvd., over San Roque Creek, in the 3rd Road District, County of Santa Barbara.

PALO ALTO, Santa Clara Co., Cal.—County supervisors of San Mateo and Santa Clara Counties contemplate widening Middlefield road bridge connecting the two counties, each county to contribute \$4500 toward the work. The bridge would be widened to 38 ft. between curbs and the grade lowered one foot.

MERCED COUNTY, Cal.—M. B. McGowan, 74 New Montgomery St., San Francisco, at \$102,500 awarded contract by State Highway Commission to construct a steel stringer overhead crossing over the tracks of The Atchafalaya, Topeka & Santa Fe Railway about 2½ miles east of Merced, consisting of thirty-one 41-ft. spans and seven 20-ft. spans with reinforced concrete deck on steel pile bents and steel frame bents on concrete footings with timber pile foundations and approaches to be graded and paved with Portland cement concrete. Complete list of unit and total bids received on this project were published in issue of April 7.

OAKLAND, Cal.—U. S. War Department has approved plans of County Surveyor Geo. A. Posey for \$709,000 bridge across the Oakland Estuary at Twenty-third avenue connecting with Park street in Alameda, to replace the antiquated structure which has been condemned as a detriment to shipping and to traffic. Will be of the bascule type, 650 ft. long, 250 ft. of which will be clear to form the span proper. War Department permit calls for a 40 ft. channel with a 15 ft. clearance. Bridge will have 4 ft. rdwy. and 6 ft. sidewalk.

EUREKA, Humboldt Co., Calif.—Chris Winkler, Ferndale, at \$6,140 awarded contract by county supervisors to construct bridge over the Klamath River at Martin's Ferry, involving the placing of a steel span between two towers now in place. Span will be 411-ft. long and 180-ft. above the river, near Martin's Ferry. Complete list of bids follows:

Chris Winkler, Ferndale.....	\$ 6,140
Henry Padgett, Fields Landing.....	6,233
Smith Bros. Co., Eureka.....	7,840
Joe Gerrick, San Francisco.....	10,518

DREDGING, HARBOR WORKS & EXCAVATIONS

PEARL HARBOR, T. H.—Standard Dredging Co., Central Bldg., Los Angeles, submitted the low bid to the U. S. Bureau of Yards and Docks, Navy Department, Washington, D. C., at \$262,000, for part 1, of the dredging at Pearl Harbor, involving 2,900,000 cu. yds. material.

Hawaiian Dredging Co., Honolulu,

submitted the low bid for parts 2, 3, and 4, amounting to \$802,000.

The bids were taken under advisement.

STOCKTON, San Joaquin Co., Cal.—Willard and Bassotti, Stockton, at \$1,000 awarded contract by City Manager Walter B. Hogan to construct permanent protection levee at east end of proposed main deep water turning basin, to be located near Mormon Channel.

PEARL HARBOR, T. H.—Standard Dredging Co., Central Bldg., Los Angeles, awarded contract by U. S. Bureau of Yards and Docks, Navy Department, Washington, D. C., at \$262,000 for part 1 of the dredging at Pearl Harbor, involving 2,900,000 cu. yds. material. Hawaiian Dredging Co., Honolulu, was awarded the contract for parts 2, 3 and 4, amounting to \$803,000.

PEARL HARBOR, T. H.—Low bidders on dredging at Pearl Harbor, opened by the Bureau of Yards and Docks, Navy Department, April 8, under Specification No. 6299, previously noted. Following is a complete list of bids received:

Entire work 2,895,000 cubic yards:	
Standard Dredging Co., 40.9 cents;	
Hawaiian Dredging Co., 27.5 cents;	
Item 2—1,992,000 cubic yards:	
Standard Dredging Co., 24 cents;	
Hawaiian Dredging Co., 27 cents.	
Item 3—18,000 cubic yards:	
Standard Dredging Co., 69 cents;	
Hawaiian Dredging Co., 58.5 cents.	
Item 4—882,000 cubic yards:	
Standard Dredging Co., 36 cents;	
Hawaiian Dredging Co., 31 cents.	
Item 5—903,000 cubic yards:	
Standard Dredging Co., 69 cents;	
Hawaiian Dredging Co., 57.5 cents.	

No bids received on items 6 to 11, inclusive.

STOCKTON, San Joaquin Co., Cal.—Until April 20, bids will be received by city council for dredging 158,000 cu. yds. of material from city-owned property on south side of Stockton Channel in the Boggs Tract. Estimated cost, \$30,000. Specifications obtainable from Lyle Tayton, city engineer.

IRRIGATION PROJECTS

TURLOCK, Stanislaus Co., Cal.—H. Johansen, Turlock, at \$1,172.25 awarded contract by Turlock Irrigation District for improvements in District No. 70, involving: 14,490 sq. ft. 2-in. concrete canal lining; 1 concrete structure, involving 14 cu. yds. concrete; 5 concrete structures, involving 5.16 cu. yds. concrete.

TURLOCK, Stanislaus Co., Calif.—Until May 4, 2:45 P. M., bids will be received by Anna Sorensen, secretary, Turlock Irrigation District, for improvements in Improvement Dist. No. 7, involving:

(a) 29,400 sq. ft. 2-in. concrete canal lining;	
(b) 9 concrete structures, involving 10.85 cu. yds. concrete.	

(Above work will be paid for in cash by property owners.)

Certified check 5% payable to district required with bid. Plans obtainable from R. V. Melkie, chief engineer of district at Turlock.

TURLOCK, Stanislaus Co., Calif.—Alldred and Anderson, Turlock, at \$1,457.12 awarded contract by Turlock Irrigation District, for improvements in District No. 65, involving 12,300 sq. ft. 2-in. concrete canal lining; 6 concrete structures, involving 8.0 cu. yds. concrete.

- TURLOCK, Stanislaus Co., Calif.**—Until May 4, 2:30 P. M., bids will be received by Anna M. Sorensen, secretary, Turlock Irrigation District, for improvements in Improvement Dist. No. 43, involving:
- (a) 20,244 sq. ft. 2-in. concrete canal lining;
 - (b) 3 concrete structures, involving 2.5 cu. yds. concrete;
 - (c) 14 concrete structures, involving 15 cu. yds. concrete;
- (Above work will be paid for by property owners in cash).
- (d) construct 1 wooden bridge.
- Certified check 5% payable to district required with bid. Plans obtainable from R. V. Melick, chief engineer of district, at Turlock.

- TURLOCK, Stanislaus Co., Calif.**—Until May 4, 2:30 P. M., bids will be received by Anna Sorensen, secretary, Turlock Irrigation District, for improvements in Improvement Dist. No. 29, involving:
- (a) 17,670 sq. ft. 2-in. concrete canal lining;
 - (b) 4 concrete structures, involving 4.74 cu. yds. concrete;
 - (c) 17 concrete structures, involving 17 cu. yds. concrete.
- (Above work will be paid for in cash by property owners).
- Certified check 5% payable to district required with bid. Plans obtainable from R. V. Melick, chief engineer of district at Turlock.

TURLOCK, Stanislaus Co., Calif.—Until May 4, 3:00 P. M., bids will be received by Anna Sorensen, secretary, Turlock Irrigation District, for improvements in Improvement Dist. No. 77, involving 705 lin. ft. 30-inch diameter concrete pipe.

Certified check 5% payable to district required with bid. Plans obtainable from R. V. Melick, chief engineer of district at Turlock.

STREET LIGHTING SYSTEMS

SAN FRANCISCO—R. Flatland, 899 Mission St., at \$9,489 submitted low bid to the Board of Public Works to install ornamental street lighting system in Lower Road of Grand Highway and on Laguna Honda Blvd., involving erection and assembling of 75 ornamental concrete standards, including underground system. City will furnish standards. Complete list of bids follows:

R. Flatland	\$ 9,489
Alta Electric Co.	8,890
Butte Elec. & Mfg. Co.	10,230
H. C. Reid	10,250
Weidenthal-Gosliner Co.	11,791
NePage-McConny St.	11,854
Butte Elec. & Equip. Co.	12,467

RENO, Nevada—City council votes to improve street lighting system involving extension of the "white way" in Chestnut St. from Windfall Park bridge to Second St.; extension of South Virginia St. electroliners from Cheney to Vassar Street and in East Fourth St. between Virginia St. and Alameda Ave.

MACHINERY AND EQUIPMENT

OAKLAND, Cal.—Hobart Bros. Company, 625 3rd St., San Francisco, at \$1060 submitted lowest bid to East Bay Municipal Utility District, to fur-

nish one portable gasoline engine driven electric welder mounted on steel skids. Following is a complete list of bids received:

Hobart Bros., San Francisco	\$1060
Schamm, Inc.	1076
H. B. Squires Co.	1090
Roberts Welding Equipment Co.	1093
E. R. Chubbery	1095
Fusion Welding Co.	1095
National Welding Co.	1098
Pacific Electric Motor Co.	1172
Ely Machinery Co.	1335
Ed. R. Bacon Co.	1481
Victor Welding Equipment Co.	1493
Lincoln Welding Co.	1535

Bids under advisement until April 17.

ROSWELL, N. M.—New Mexico Military Institute, H. B. Smyrl, secretary of the board of regents, will call for bids at once for the construction of a new barracks building at the institute to cost \$150,000.

BRAWLEY, Imperial Co., Cal.—Until 7:30 P. M., May 6, bids will be received by the Brawley Union High School District for the purchase of one chassis and bus body, having a capacity of approximately 50 pupils. Certified or cashier's check or bond for 10% required. A. S. Wolfe, clerk.

OAKLAND, Cal.—Ariss-Knapp Co., 951 11st St., Oakland, at \$130 awarded contract by City Port Commission for grading dredge filled area east of Warehouse B, involving 5,000 cu. yds.

COOLIDGE, Ariz.—Arizona Companies & Warehouse Company is taking bids for excavating the site for the company's new \$100,000 cotton compress to be built here.

SAN FRANCISCO—Until April 27, 3 P. M., under Proposal No. 709, bids will be received by Leonard S. Leary, city purchasing agent, 270 City Hall, to furnish and install shop equipment for School Department. Specifications and further information obtainable from above.

MADERA, Madera Co., Cal.—Until May 5, 11 A. M., bids will be received by L. W. Cooper, county clerk, to furnish and deliver f. o. b. Madera, one Ford Coach. Specifications obtainable from above.

ANTIOCH, Contra Costa Co., Cal.—City council rejects bids to furnish and deliver one and one-half ton dump truck and new bids will be asked at once. E. L. O'Hara is city engineer.

RAILROADS

OAHU, Hawaii—See "Government Work and Supplies," this issue, Bureau of Yards and Docks, Navy Department, Washington, D. C., taking bids for development work in connection with the Naval Ammunition Depot at Oahu, Hawaii, involving the erection of 121 buildings, approximately 11½ miles of railroads, 14½ miles of paved road and electrical, telephone and water supply systems.

SAN FRANCISCO—City Engineer M. M. O'Shaughnessy has approved the application of the Market Street Railway Co., 55 Sutter St., seeking authorization of the supervisors to extend its Turk St. line out Turk and Balboa Sts., a distance of 3 miles with the understanding that the railway company pay \$17,000 for reduction of the grade on Turk St., bet. Broderick and Baker Sts., and the grade at 24th Ave. and Balboa St. The line is to extend to a point between 30th and 31st Aves.

FIRE EQUIPMENT

LIVERMORE, Alameda Co., Cal.—Until April 27, 8 P. M., bids will be received by Elmer G. Still, city clerk, to furnish combination motor pump and pump. Certified check 10% payable to city clerk required with bid. Delivery to be made 40 days after award of contract, f. o. b. Livermore. Specifications on file in office of clerk.

SAN FRANCISCO—Hercules Equipment and Rubber Co., 11 Mission St. at \$9,112 ft. awarded contract to Board of Supervisors to furnish Park Commission with 12,000 ft. 1-in. rubber water hose, best grade; 2-brain molder; coupled in 50-ft. lengths with screw and brass bands; 1-line male coupling on one end only; delivered f.o.b. Park Lodge, Golden Gate Park.

SAN MATEO, San Mateo Co., Cal.—Until May 4, 8 p. m. bids will be received by E. W. Foster, city clerk, to furnish and install traffic signals at intersection of 12th ave. and Hobar ave., with El Camino Real. Certified check 10% required with bid. Specifications on file in office of clerk.

RESERVOIRS AND DAMS

HOOVER DAM, Nevada—Appointment of a purchasing agent and the establishing of an office to handle purchases has been announced by Frank T. Crowe, superintendent of construction for the Six Companies, Inc., contractor for the Hoover Dam. The purchasing of practically every type of material and equipment will be under the supervision of A. H. Baer, whose address is the Clark Bldg., Las Vegas, Nev. Mr. Baer states that he is particularly interested in purchasing those items which must have quick delivery. Orders will be placed on the basis of quick delivery and lowest price. The suggestion has been made that salesmen be prepared to quote prices and furnish complete information regarding their products upon first interview. Firms which desire to transact business with Mr. Baer should send him complete catalogs, quoting lowest prices. Quotations shall be f. o. b. Las Vegas, f. o. b. Boulder City and f. o. b. point of origin.

MADERA COUNTY, Cal.—Thermotite Const. Co., 580 Stockton Ave., San Jose, at \$50,784 submitted low bid to State Highway Commission April 15 to construct a reinforced concrete girder bridge across Berenda Slough, consisting of eighteen 26-foot 6-inch spans on concrete pile bents. Complete list of bids follows:

Thermotite Const. Co., San Jose	\$50,734
Neves & Hart, San Jose	32,114
G. J. Ulrich Const. Co., Modesto	32,413
Liner & Allen, Merced	32,535
A. W. Kitchen, San Francisco	33,575
L. C. Clark and C. E. Doughty, Visalia	34,507
Frederickson & Watson and Frederickson Bros., Oakland	36,267
Nead Const. Co., Wilmington	36,847
Oberg Bros., Los Angeles	37,582
Robinson-Roberts Co., L. A.	41,905

Bids held under advisement.

PIPE LINES, WELLS, ETC.

WALNUT CREEK, Contra Costa Co., Cal.—Pacific Gas and Electric Co., 245 Market St., San Francisco, will start construction this month on a natural gas sewer line from Walnut Creek to serve Danville and the Diablo Country Club. The line will cost \$50,000 and will consist of 2- and 4-in. pipe.

LOS ANGELES, Cal.—Los Angeles Co., Cal.—**Water Pipe and Steel Co.**, 5717 Sunset Ave., Los Angeles, at \$1.80 ft. each side, plus 27¢ ft. for double end, awarded contract by city council to furnish 1,210 ft. 18-in. electrically welded steel pipe.

SEWERS AND SEWAGE DISPOSAL PLANTS

OAKLAND, Calif.—City Engineer Walter Frikstad reports the status sewer plans as follows: Harrison storm sewer from 21st st. to Mission, 90 per cent completed; Grand, 90 per cent completed; Glenwood, 20 per cent completed; Glenwood district, 20 per cent completed; Diamond, 20 per cent completed; Diamond sewer district, 15 per cent completed; Moraga Ave. sewer, 20 per cent completed; Harbor Estates Drive sewers, 30 per cent completed; Mountain Blvd. and Aliso, 20 per cent completed; Leona, 20 per cent completed; Leona sewer district, 5 per cent completed. Details in connection with these projects will be published upon completion of the plans.

SAN FRANCISCO—M. M. O'Shaughnessy, city engineer, seeks \$550,000 in fiscal year budget to finance extension of main sewers in various sections of the city.

REDWOOD CITY, San Mateo Co., Cal.—Faced with threats of injunction suits if they proceed with the proposed joint South San Francisco-Bruno and Lomita Park sewer project under the Mattoon Act, the Bruno city council has voted to request the county supervisors to abandon further proceedings in connection with the project. It is probable that San Bruno will undertake construction of its own outfall sewer.

LOS ANGELES, Cal.—Bids for furnishing welded steel pipe under specifications No. 2418, opened by Los Angeles city purchasing agent, Thomas Gilchrist, April 9, follow:

- 1) 5015 lin. ft. 24-in. laying lengths, 40 in. inside diameter welded steel water pipe; minimum wall thickness 3/16 in.
- 2) same as item one, except that end sections shall be B. & S. Western Pipe & Steel Co.—(1) \$5.45, \$6.25.
- Consolidated Steel Corp.—(1) \$5.83, \$6.48.
- Los Angeles Mfg. Co.—(1) \$6.35, \$7.50.

SIGNAL HILL, Los Angeles Co., Cal.—Currie Engineering Co., Anderson, S. Bernardino, commissioned city to prepare plans for sewage disposal plant to cost \$40,000 and a collection system to cost \$50,000.

CARPINTERIA, Santa Barbara Co., Cal.—Markewich & Neeveich, 1227 E. 11th St., Long Beach, submitted low bid at \$57,394.75 to Carpinteria Sewer District to construct lateral sewer. Unit prices were: 9900 lin. ft. in. sewer main, \$1.25; 10,350 lin. ft. in. sewer, \$1.45; 5300 lin. ft. 10-in. sewer, \$1.57; 165 lin. ft. 12-in. sewer, \$2.5; 12,000 lin. ft. 6-in. house connections, \$1.25; 9 flush manholes, \$35; 4 drop manholes, \$35; 4 drop manholes, \$30; 21 manholes, \$20; 40 chimneys, \$2.50.

FRESNO, Fresno Co., Cal.—City council declares intention (119-D) to construct 6-in. vitrified clay pipe sewer portions of Belmont ave., including in. vit. clay pipe connections; 2 concrete manholes with c. i. frames

and covers, 1-in. on 6-in. vye branches. 1911 Act. Hearing April 30, 1931.

FRESNO, Fresno Co., Cal.—Until April 23, 10:30 a. m. bids will be received by H. S. Foster, city clerk, (109) to construct sewers in Coast avenue, involving:

- (a) 456 lin. ft. 6-in. vitrified pipe sewer.
- (b) 1 manhole.

1911 Act. Certified check 10% payable to city required with bid. Plans on file in office of clerk. C. C. Valkenburg, city engineer.

OAKLAND, Cal.—City will call an election in May to vote bonds of \$1,300,000 to finance construction of thirty-three sewer projects in various sections of the city. City Engineer Walter Frikstad has outlined the following program:

Grand ave., Embarcadero to Piedmont line, \$147,200.

Ninth ave., on Ninth ave., East Sixteenth st., to estuary, \$141,300.

Harrison blvd., on Santa Clara, Vernon to Harrison, on Harrison, Santa Clara to Bay place, \$13,300.

Twenty-third ave., on Twenty-third ave., Seventeenth st., to Livingston st., on Livingston, Kennedy to estuary, on East Seventeenth between Twenty-second and Twenty-third ave., on East Sixteenth st., Twenty-third to Twenty-sixth ave., \$130,500.

Nineteenth ave., on Eighteenth ave., Pothill to East Fifteenth, on East Fifteenth, Eighteenth to Nineteenth, on Nineteenth ave., East Fifteenth to East Twelfth, \$10,450.

Racine lateral—On Telegraph, Sixty-sixth st. to Alcatraz; on Alcatraz, Telegraph to Racine; on Racine, Alcatraz to Fifty-eighth; on Fifty-eighth st., Telegraph to Dover; on Dover, Fifty-eighth to Fifty-sixth st.; on Fifty-sixth st., Dover to Market; on Market, Fifty-sixth to Fifty-second st.; on Fifty-second, Market to Terminal Creek, \$146,300.

Telegraph ave.—Sixteenth st. to Twentieth st., \$13,200.

Athol ave.—Athol and Brooklyn to Park blvd., \$14,850.

Glen Echo creek—Twenty-sixth and Valdez to Harrison and Twenty-third, \$86,400.

Grove—On Grove, Thirty-sixth st. to Thirty-eighth st., \$7,150.

Hopkins st., Diamond district—On Hopkins, Lincoln ave., westerly to Sausal creek; on Thirty-eighth st., La Cresta easterly to Sausal creek, \$11,400.

Fifty-fourth ave., creek—Bond and S. P. railroad, \$73,700.

Plymouth st., lateral—Eighty-fifth ave. westerly to Seventy-eighth ave., and Arroyo Viejo creek, \$25,200.

Eighty-ninth ave., through right-of-way Ninety-second ave., to Eighty-ninth ave., \$12,650.

Thirty-fifth ave., Penniman and Davis—Penniman easterly and Thirty-fifth ave. to Penniman westerly.

Thirty-fifth ave., then westerly on Penniman, Thirty-fifth ave., to Peralta creek, Lyon ave., and Thirty-fifth ave. to Davis. Then westerly on Davis to Peralta creek, \$16,500.

Russet st., Ninety-second ave., westerly to Elmhurst outlet, \$28,600.

Monrovia blvd., Lakeshore ave. to Portia, \$30,250.

Forty-first and Broadway and Ridgeway, \$14,200.

Mountain blvd., Thorn road westerly 600 ft., \$6,650.

Maple ave., Kansas to Hopkins, \$2,200.

Park road, cross roads to 220 feet easterly of Edith and Park road, \$1,400.

Moraga road, Hampton road to Park road, \$18,200.

Thompson ave., outlet, Thompson and Walker to car line, \$7,150.

Seminary ave., sanitary relief, \$5,000.

Elmhurst sanitary relief, \$7,550.

Myrtle st., Fourteenth st. to Third st., \$14,200.

Filbert st., Twelfth st. to Third st., \$13,750.

Union st., Tenth st. to Third st., \$8,470.

Kirkham st., Tenth st. to Third st., \$8,800.

Chester st., Eighth st. to Third st., \$6,270.

Henry st., Eighth st. to Third st., \$4,720.

SIGNAL HILL, Los Angeles Co., Cal.—City Council orders plans prepared for installation of additional water mains; estimated cost \$20,000.

FAIRFIELD, Solano Co., Cal.—City trustee will call election shortly to vote bonds of \$5500 to finance repairs and replacements at outfall sewer which amount includes \$600 for incidentals. A. M. Jensen, engineer, 63 Post St., San Francisco.

SAN LUIS OBISPO, Cal.—City votes bonds of \$18,000 to construct digester mechanism and other mechanical equipment, distributing mains and other additions to the sewage disposal plant. Callic M. John is city clerk and Leon Moore, city engineer.

PALO ALTO, Santa Clara Co., Cal.—In conjunction with the Stanford University, the city of Palo Alto will file application with the State Department of Public Health, seeking a permit to dump raw sewage into San Francisco Bay at a point about 3,000 ft. north of Sand Point with the exit approximately 1,000 ft. off shore. With this in view, a 22-in. pipe line would be constructed from the junction of Arroyo Rd. and E Willow Rd. on the marsh land directly to the terminal in the bay. This step is preliminary to the plan of Palo Alto and Stanford to provide an adequate sewage disposal system to serve both communities. A bond proposition probably running in the neighborhood of \$100,000, is contemplated to finance the city's part of the expense.

SAN FRANCISCO—Louis J. Cohn, 1 De Haro st., at \$18,573 submitted low bid to Board of Public Works to construct additions to the Baker and Pierce Street outfall Sewers. Complete list of bids follows: (a) Baker street sewer, L. J. Cohn, (a) \$1,000; (b) \$9,673, \$13,673.

M. Murphy, (a) \$5,600; (b) \$8,300, \$13,900.

C. B. Eaton (a) \$5,300; (b) \$9,300, \$14,600.

C. W. and H. H. Haun, (a) \$5,900; (b) \$9,640, \$15,520.

MacDonald and Kahn, (a) \$6,000; (b) \$11,200, \$17,200.

M. B. McGowan, (a) \$9,000; (b) \$10,750, \$19,750.

Healy-Thibbitts Co., (a) \$12,645; (b) \$13,612, \$26,257.

FAIRFIELD, Solano Co., Cal.—May 23 is date set by city council to vote bonds of \$5500 to finance repairs and replacements at outfall sewer which amount includes \$600 for incidentals. A. M. Jensen, engineer, 63 Post St., San Francisco.

BOULDER CITY, Nev.—Until 2 P. M., April 20, bids will be received by the U. S. Bureau of Reclamation, 1411 Welton St., Denver, Colo., for furnishing 165 round cast iron man-holes, 21-in. dia. opening, 8-in. high, with solid, knobbed covers. The cast iron shall have an ultimate tensile strength of not less than 21,000 lbs. per square inch. Proposal No. 3123-A, Boulder Canyon. A. McD. Brooks, purchasing agent.

LOS ANGELES, Cal.—Radich & Granich, 410 N. Formosa Ave., awarded contract by board of public works at \$19,843.35 to construct complete a sewer system in 114th St., between Wilmington Ave. and Central Ave. Engineers estimate is \$116,755.78.

STOCKTON, San Joaquin Co., Cal.—Until April 27, bids will be received by city council to construct storm sewers in Edison St., bet. Harding Way and Elm St., and in San Joaquin St., bet. Channel St. and Miner Ave., and in Center St., bet. Lafayette and Stockton Channel. Plans obtainable from Lyle Layton, city engineer. Quantities of materials will be published shortly.

MISCELLANEOUS CONSTRUCTION

PALO ALTO, Santa Clara Co., Cal.—City council has referred plans for the proposed Embarcadero subway railroad crossing to the City Planning Commission and the Board of Public Works for consideration. The Council is determined, however, that no proposition will be on the general municipal election ballot regarding the construction of the subway. It proposes to ask the State Railroad Commission to allocate the cost of the project more equally between the city and the Southern Pacific Railroad than is contemplated in the provisional arrangement, by which the city would pay about two-thirds and the railroad one-third of the \$10,000, which is the estimated cost. J. P. Dyxbee, is city engineer.

WATER WORKS

GRIDLEY, Butte Co., Calif.—Until April 27, 8 P. M., bids will be received by J. L. Lewis, city clerk, to furnish and deliver f.o.b. Gridley: 1,500 ft. 6-in. class B cast iron bell and spigot pipe; 2,600 ft. 4-in. do; 8 1/2-in. double hub fittings side outward tap 2-in. standard thread 2 6x4 reducers, bell and spigot; 2 4x4 all bell tees; 12 4-in. plugs tap 2-inch standard thread; 6 6-in. do.

Bids will be accepted on plain bell and spigot, also pre-caulked or prepared joints. Previous bids rejected due to error in advertising. Certified check 10% payable to city clerk required with bid.

FAIRFIELD, Solano Co., Cal.—City trustees will call election shortly to vote bonds of \$42,500 to finance improvements and extensions to the water system. Estimates of cost for the improvements are summarized by A. M. Jensen, engineer, 65 Post St., San Francisco, as follows:
Labor and material to complete well \$13,150
New mains labor and material 18,000
1,000,000 gal. tank and 100 ft. tower, labor, material 7,750
Deep well turbine pump 1,600
Labor and material to repair breaks in old lines due to increased pressure on mains 2,000
Total \$42,500

BEN LOMOND, Santa Cruz Co., Cal.—Ben Lomond Redwood Park Corp. is having plans prepared for water system improvements, involving reconstruction of the diversion works at Jean Creek and the installation of additional storage facilities of not less than 20,000 gals.

VENTURA, Ventura Co., Cal.—Until 3 a. m., May 5, bids will be received by county supervisors to furnish one direct connected motor driven deep well turbine pump and motor, with necessary wiring, fittings, and discharge pipe line and fittings. The following is an estimate of the work and materials:

- (1) one deep well turbine pump with top of bowl set at 120 ft. below ground;
 - (2) one 40 H. P. motor;
 - (3) approx. 100 ft. 10-in. discharge casing pipe from pump to tank.
- Charles W. Pettit, county surveyor, L. E. Hayward, county clerk. Cash Contract No. 555.

OGAHU, Hawaii—See "Government Work and Supplies," this issue. Bureau of Yards and Docks, Navy Department, Washington, D. C., taking bids for development work in connection with the Naval Ammunition Depot at Oahu, Hawaii, involving the erection of 131 buildings, approximately 11 1/2 miles of railroads, 14 1/2 miles of paved road and electrical, telephone and water supply systems.

BOULDER CITY, Nev.—Until 2 P. M., April 27, bids will be received by the U. S. Bureau of Reclamation, 1411 Welton St., Denver, Co., for furnishing pipe, fittings, valves, specials and miscellaneous materials for water and sewer systems for Boulder City, Nev., under Specifications No. 517-D.

The items to be bid are on:

- (1) cast iron pipe, minimum laying length per joint 12 ft., as follows:
 - (a) 2400 ft. 2-in. cast iron bell and spigot pipe, poured lead joints, or
 - (b) 2400 ft. 2-in. inside diam. iron bell and spigot pipe, pre-poured lead joints, or
 - (c) 2400 ft. 2-in. inside diam. cast iron pipe in approx. 12-ft. laying lengths screwed joints with couplings.
- (2) cast iron bell and spigot pipe, minimum laying length 15 ft., poured lead joints, as follows:
 - (a) 33,505 ft. 6-in. cast iron pipe laying length;
 - (b) 6500 ft. 8-in. cast iron pipe laying length;
 - (c) 5200 ft. 10-in. cast iron pipe laying length;
 - (d) 2000 ft. 12-in. cast iron pipe laying length;

Prices for materials under item (2) to be lump sum.

- (3) cast iron bell and spigot fittings, as per specifications, lump sum price.
- (4) 85 two-nozzle, 2 1/2-in. fire hydrants, 2-ft. bury.
- (5) iron body, bronze-mounted, double disc, bell and bell gate valves, as follows:
 - (a) 2 2-in. gate valves;
 - (b) 181 6-in. gate valves;
 - (c) 33 8-in. gate valves;
 - (d) 11 10-in. gate valves;
 - (e) 3 12-in. gate valves.

Lump sum price for all materials under item (5).

- (6) valve boxes, covers marked "water" as follows:
 - (a) 2 with base for 2-in. valves;
 - (b) 201 with base for 6-in. to 8-in. valves,

- (c) 17 with base for 10-in. to 12-in. valves.

Lump sum price for all materials under item (6).

- (7) copper service corporation stop "Mueller" thread inlet and cover flange outlet as follows:

- (a) 629 5/8-in. corporation stop;
- (b) 5 1-in. corporation stop;
- (c) 13 1 1/2-in. corporation stop.

Lump sum price for materials under item (7).

- (8) copper roundway curb stops, inverted key type with copper flange at both ends, as follows:

- (a) 465 3/4-in. roundway curb stops;
- (b) 13 1 1/2-in. roundway curb stops.

Lump sum price for all materials under item (8).

- (9) copper pipe couplings, copper-copper type, as follows:

- (a) 150 3/4-in. two-part coupling;
- (b) 10 1 1/2-in. two-part coupling;
- (c) 15 1 1/2-in. two-part coupling.

Lump sum price for materials under item (9).

- (10) straight line valve yokes with inverted ground key roundway curb stops as follows:

- (a) 150 3/8-in. meter, 3/4-in. copper service;
- (b) 5 1-in. meter, 1-in. copper service.

Lump sum price for materials under item (10).

- (11) 150 cast iron covers for meter boxes, hinged lid with lock, inside dia. 10 1/2 in.

- (12) 13 15-in. steel washers, to be 18 in.

- (13) 13 service boxes, top marl "Water" for 1 1/2-in. curb stops.

- (14) copper service pipe No. 16 W 8 in. 60-ft. coils as follows:

- (a) 18,510 ft. 3/4-in. inside dia.
- (b) 510 ft. 1 1/2-in. inside dia.
- (c) 1,020 ft. 1 1/2-in. inside dia.

Lump sum price for materials under item (14).

- (15) water meters as follows:

- (a) 200 3/4-in. water meters, dry positive displacement type, with bronze case;
- (b) 5 18-in., same;
- (c) 1 water meter, compound, d and current type, size 6 ft x 1 1/2.

Lump sum price for materials under item (15).

- (16) lead joint materials as follows:

- (a) 30,000 lbs. virgin pig lead;
- (b) 1,200 lbs. untarred jute.

Lump sum price for materials under item (16).

- (17) alternative to item (17): clay vitrified salt glazed bell and spigot sewer pipe and fittings as follows:

- 20,000 ft. 4-in. std. strength;
- 22,000 ft. 6-in. std. strength;
- 7,200 ft. 8-in. std. strength;
- 1,600 ft. 10-in. std. strength;
- 7,700 ft. 12-in. std. strength;
- 300 pieces 18-in. std., in 24-in. lengths.

wyes, bends, tees, etc., as per specifications.

Lump sum price for materials under item (17).

- (17A) alternative to item (17): Cement concrete bell and spigot sewer pipe and fittings as follows:

- 20,000 ft. 4-in. sewer pipe;
- 22,000 ft. 6-in. sewer pipe;
- 7,200 ft. 8-in.;
- 1,600 ft. 10-in.;
- 7,700 ft. 12-in.;
- 300 pieces 18-in. std., in 24-in. lengths.

with wyes, bends, etc., as per specifications.

Lump sum price for all material under item (17A).

- (18) 8500 concrete sewer manholes with catchbasin blocks, 8-in. high and with 24-in. inner radius.

Combination bids for any two or more items may be submitted as shown on bid form.

A proposal guaranty in the sum of 10% required with each bid. R. F. Walter is the chief engineer.

SAN FRANCISCO—M. M. O'Shaughnessy, city engineer, seeks \$134,100 appropriation in coming fiscal year budget to finance extensions to high sewer water system.

LAGUNA BEACH, Orange Co., Cal.—Leon-Jackson Co., 2150 E. Stanton st., Huntington Park, awarded contract by Laguna Beach County Water District, at \$1857, to furnish one centrifugal pump of 600 G. P. M. operating against a head of 316 ft. Delavan 20 Turbine Co., bid \$1955. Allis-Chalmers Co. submitted an irregular bid.

ANTECA, San Joaquin Co., Cal.—R. Van Sandt, superintendent of municipal water system, authorized to purchase four fire hydrants and a quantity of valves to be used in connection with extensions to water system. Contract for pipe in connection with these extensions awarded to Pacific States Cast Iron Pipe Co., San Francisco, as reported in issue of April 8.

SAN BRUNO, San Mateo Co., Cal.—Until May 13, 8 P. M., bids will be received by Emil A. Bohm, city clerk, to construct extension to municipal water system in Third Addition. Project costs:

- 6,000 ft. 2-in. wrought iron pipe.
- 1,570 ft. 4-in. cast iron pipe.
- 92-in. valves.
- 74-in. valves.
- hydrants.

Certified check or bond 10% required with bid. Plans on file in office of clerk and obtainable from George A. Reese, engineer, Stafford Bldg., Redwood City.

BOULDER CITY, Nev.—Until 2 p. m. April 21, bids will be received by U. S. Bureau of Reclamation, 1441 Union St., Denver, for furnishing pipe, fittings, valves, specials and miscellaneous materials for water and sewer systems for Boulder City, Nev., under Specifications No. 517-D.

LOS ANGELES, Cal.—Until 11 A. M., April 23, bids will be received by Los Angeles city purchasing agent, Thomas Oughton, for furnishing (1) mechanical clarifier for square tank; (2) alternate proposal, one mechanical clarifier for circular tank, under Specification No. 2424, f. o. b. department of water and power construction site, Grant and McFarland st., Washington.

BOULDER CITY, Nev.—Contracts for furnishing pipe to the U. S. Bureau of Reclamation at Denver for use of the high pressure pipe line at Boulder City for the Boulder City after Supply Project has been awarded by the Department as follows:

SCHEDULE I to Midwest Piping & Supply Co., Salt Lake City, Utah, at \$721.04, involving 4453 ft. 10½-in. O. D. and 2842 ft. 12½-in. O. D. seamless line pipe, and 228 ft. 10½-in. O. D. and 1020 ft. 12½-in. O. D. pipe bent to radii as specified.

SCHEDULE III to Associated Piping & Engineering Co., Ltd., 1915 E. 8th St., Los Angeles, at \$11,198.68 involving 8720 ft. 12½-in. line pipe and 60 ft. 12½-in. O. D. bent as specified.

SCHEDULE IV to Thomas Haverly & Co., 316 East 8th St., at \$29,916.93, involving 12,746 ft. 12½-in. O. D. and 49 ft. 12½-in. bent as specified.

SCHEDULE VI to Mine & Smelter Supply Co., Denver, Colo., at \$4285, involving 1010 couplings for 10½-in. and 7½-in. pipe.

ANTIOCH, Contra Costa Co., Cal.—City Engineer E. L. O'Hara is completing plans for sewer and water extensions in the Wills Addition. Bids will be asked shortly.

FAIRFIELD, Solano Co., Cal.—May 23 is date set by the city trustees to vote bonds of \$125,000 to finance improvements to the water system for which surveys were recently completed by A. M. Jensen, engineer, 48 Post St., San Francisco. Itemized costs in connection with the work follow:

- Labor and material to complete well \$13,150
- New mains, labor and material 8,000 1,000-gallon tank and 100 ft. 4-in. water labor, material . . . 7,750
- Deep well turbine pump . . . 1,600
- Labor and material to repair breaks in old lines due to increased pressure on mains 2,000
- Total \$125,500

PLAYGROUNDS & PARKS

SAUSALITO, Marin Co., Cal.—Vincent and Maggiora, Sausalito, submitted low bid to Sausalito School District to improve playground areas of the Central School yard, Litho and Calendona Streets, and at the South School yard, North and Third Streets. Bids referred to secretary of the Board, S. G. Katter, for tabulation. Bids were also submitted by: A. T. Howe, Santa Rosa; Anchor Post Fence Co.; Standard Fence Co.; F. J. Main, Fairfax; E. P. Finnigan, San Francisco and Michel and Pfeffer Iron Works.

STREETS AND HIGHWAYS

SAN RAFAEL, Marin Co., Cal.—Until April 27, 11 A. M., bids will be received by Robert E. Graham, county clerk, for grading 3.6 miles of the San Geronimo-Nicasio Road from San Geronimo to Nicasio Valley, involving (1) 63,000 cu. yds. excavation without classification; (2) 85,000 sta. yds. overhaul; (3) 376 lin. ft. 12-in. corr. metal pipe; (4) 94 lin. ft. 15-in. do; (5) 100 lin. ft. 24-in. do; (6) 70 lin. ft. 30-in. do; (7) 120 lin. ft. 36-in. do; (8) 50 lin. ft. 60-in. do; (9) 20 lin. ft. 12-in. do; move and reset.

- (10) 90 lin. ft. 24-in. do; move and reset.
- (11) 18 cu. yds. class A Portland cement concrete (headwalls);
- (12) 600 lbs. reinf. steel (headwalls).

County will furnish corrugated metal pipe. Specifications obtainable from Rodney Messner, county surveyor.

REDWOOD CITY, San Mateo Co., Cal.—Until 10 A. M., May 4, bids will be received by E. E. Hinman, county clerk, for grading a portion of Sneath Road from south boundary of Sullivan Estate Company's 11,253-acre parcel of land to east boundary line of Ocean Shore Company's 19.95-acre parcel of land in San Pedro Reservoir and First Road District. Cert. check 10% payable to county required. Specifications on file in office of county clerk. James S. James, county surveyor.

SAN MATEO COUNTY, Cal.—Basch Bros. Const. Co., Terrance, at \$212,933 awarded contract by State Highway Commission to pave with Portland cement concrete 3.6 miles between Burlingame and San Mateo.

WILLOW GLEN, Santa Clara Co., Cal.—Town trustees declare intention (89) to improve Willow Street, Acacia and Imp. District No. 2, involving grading; 2-in. asph. concrete surface pavement on 2½-in. asph. conc. base; cement concrete curbs, gutters, walks; cement conc. pipe storm water sewer with drains, inlets and manholes. Acacia and Imp. A. 1935. Hearing May 4. Dana Thomas, city clerk. H. N. Bishop, city engineer, Bank of Italy Bldg., San Jose.

WHITE PINE COUNTY, Nevada—Until May 7, 2 P. M., bids will be received by H. L. Sweetser, district engineer, U. S. Bureau of Public Roads, 161 Market St., San Francisco, for grading 9.620 miles of Section A of Route 13, Midland Trail (Elly-Holt Creek) National Forest Highway, Nevada National Forest and Federal Lands Project No. 1, Part of Midland Trail (Elly-Tompson) State Route No. 4, White Pine County, Nevada. Project involves:

- 121,000 cu. yds. unclassified excav.; 1,151 cu. yds. unclass. excav. for structure;
- 10,800 sta. yds. overhaul;
- 9,620 miles finishing earth grad. rd.;
- 133.2 cu. yds. Class "A" concrete;
- 110.8 cu. yds. Class "B" concrete;
- 12,350 lbs. reinforcing steel;
- 102 cu. yds. cement rubble masonry
- 2,246 lin. ft. C. M. pipe;
- 300 lin. ft. move fence;
- 28 each right-of-way monuments;
- 200 cu. yds. hand laid rip-rap.

Plans obtainable from engineer on receipt of \$10, returnable, checks for same to be made payable to Federal Reserve Bank of San Francisco.

SAN JOSE, Santa Clara Co.,—Until April 27, 11 A. M., bids will be received by Henry A. Pfister, county clerk, to improve Lincoln avenue in Supervisor District No. 4. Specifications obtainable from Robert Chandler, county surveyor, on payment of \$1. Quantities of materials involved will be published shortly.

SAN JOSE, Santa Clara Co.,—Until April 27, 11 A. M., bids will be received by Henry A. Pfister, county clerk, to improve Church Ave. in Supervisor District No. 1. Specifications obtainable from Robert Chandler, County Surveyor, on payment of \$1. Quantities of materials involved will be published shortly.

SAN JOSE, Santa Clara Co.,—Until April 27, 11 A. M., bids will be received by Henry A. Pfister, county clerk, to improve Pearl Ave. in Supervisor District No. 5. Specifications obtainable from Robert Chandler, county surveyor, on payment of \$1. Quantities of materials involved will be published shortly.

ANTIOCH, Contra Costa Co., Cal.—City Engineer E. L. O'Hara is completing plans for sewer and water extensions in the Wills Addition. Bids will be asked shortly.

REDWOOD CITY, San Mateo Co., Cal.—County Surveyor James S. James is making surveys to straighten and widen the Lo Honda Road.

OAKLAND, Cal.—City council has started proceedings to improve Mountain Blvd. from Redwood Road to Bennett St.; estimated cost \$3500. Walter N. Frickstad, city engineer.

PALOS VERDES, Los Angeles Co., Cal.—The Owl Truck Co., 117 N. Tamarind St., Compton awarded contract by Palos Verdes Corp., Gardner Bldg., Palos Verdes, to construct ten miles of highway in the 13,000-acre estate of the corporation of which Frank A. Vanderlip is the principal owner. The work includes the grading of a 35-ft. roadway and paving to a width of 27 ft. with oil macadam. The approximate quantities are:

- (1) 335,000 cu. yds. grading and excavation;
- (2) 154,000 sq. yds. 3-course rock and oil pavement with 6-in. disintegrated granite sub-base.

There were 14 bids. Details of prices were withheld by the owner. Geo. Gibbs, representing Ousted Bros., landscape architects, Gardner Bldg., Palos Verdes, is the engineer.

WILLOW GLEN, Santa Clara Co., Cal.—Town trustees declare intention (\$3) to improve Elvest Avenue, Acq. and Imp. District No. 2, involving grading; 1½-in. asphalt, surface, 3-in. asphalt concrete base pavement; cement concrete curbs, gutters, walkways, Acq. and Imp. Act 1925. Hearing May 4. Dana Thomas, city clerk. H. N. Bishop, city engineer, Bank of Italy Bldg., San Jose.

WILLOW GLEN, Santa Clara Co., Cal.—Town trustees declare intention (\$80) to widen and extend Kottenberg Avenue in Acq. and Imp. Dist. No. 1, involving grading; pave with 1½-in. asphalt, concrete surface on 3-in. asphalt concrete base; curbs, gutters, sidewalks and driveways; corrugated culverts. Acq. and Imp. Act 1925. Hearing May 4. Dana Thomas, city clerk. H. N. Bishop, city engineer, Bank of Italy Bldg., San Jose.

MENLO PARK, San Mateo Co., Cal.—City trustees declare intention (31-2) to improve Oak Grove and Cherry Avenues, Laurel and Mills Streets, and Glenwood Avenue, involving:

- (1) 3,000 cu. yds. excavation;
- (2) 1,200 cu. yds. embankment;
- (3) 40,620 sq. ft. 1½-in. Emulsified asphalt, pave on 4-in. rock base;
- (4) 30,000 sq. ft. resurfacing;
- (5) 7,193 lin. ft. concrete curb;
- (6) 72 driveway entrances;
- (7) 6 part circle culverts;
- (8) 390 lin. ft. sewer connections;
- (9) 44,825 sq. ft. concrete sidewalks.

1911 Act. Bond Act 1915. Estimated cost, \$20,000. Hearing April 21. Fannie I. Kurtz, city clerk. Bert J. Mehl, city engineer.

MONO COUNTY, Cal.—Robinson-Roberts Co., Rives-Strong Bldg., Los Angeles, at \$129,621 awarded contract by State Highway Commission to grade 14½ miles between 2 miles west of Bridgeport and Sonora Junction.

LOS ANGELES COUNTY, Cal.—C. M. Morgan Paving Co., Los Angeles, at \$399,220 awarded contract by State Highway Commission to grade 5.0 miles between 4 miles north of La Canada and Colby Canyon.

SONOMA COUNTY, Cal.—J. V. Galbraith, Petaluma, at \$14,399 awarded contract by State Highway Commission to grade and pave with Portland cement concrete, 11 miles at Lytton Overhead Crossing.

LOS ANGELES COUNTY, Cal.—W. F. Peck Co., 1120 N. Las Palmas Ave., Los Angeles, at \$422,221 submitted low bid April 15 to State Highway Commission to grade 7.3 miles between Canton Creek and Little Creek. Complete list of bids follows:

W. F. Peck Co., Los Angeles.....	\$422,221
Granfield, Farrar & Carlin, San Francisco.....	505,682
H. W. Rohl Co., Los Angeles.....	530,659
Vonderhelen & Pierson, Casca.....	534,262
Geo. Pollock Co., Sacramento.....	530,476
Frederickson & Watson, Oakland.....	551,007
Gibbons & Reed, Burbank.....	678,510

Bids held under advisement.

SAN FRANCISCO—M. M. O'Shaughnessy, city engineer, seeks \$250,000 appropriation in coming fiscal year budget to finance construction of a road from Mather to Hetch Hetchy to complete an agreement between the city and the Secretary of the Interior.

ALAMEDA COUNTY, Cal.—Jones & King, Hayward, at \$34,595 submitted low bid April 15 to State Highway Commission to grade and pave with Portland cement concrete, 0.5 mile between Stanton Ave. and Foothill Blvd.

Complete list of bids follows:

Jones & King, Hayward.....	\$34,595
M. J. Bevanda, Stockton.....	39,147

Bids held under advisement.

PLUMAS-LASSEN COUNTIES, Cal.—Irving L. Ryder, 305 Almaden Ave., San Jose, at \$96,533 submitted low bid to State Highway Commission April 15 to surface with untreated crushed gravel or stone, 25.3 miles bet. Chester and Willards. Complete list of bids follows:

Irving L. Ryder, San Jose.....	\$ 96,533
Hemstreet & Bell, Marysville.....	109,824
Granite Const. Co., Watsonville.....	110,717
Tiffany, McKeynolds & Tiffany, San Jose.....	114,674
D. McDonald, Sacramento.....	119,171
C. W. Wood, Stockton.....	119,328
Fennell Co., Sacramento.....	121,636
N. M. Ball, Porterville.....	125,367
P. W. Nightbert, Bakersfield.....	129,781

Bids held under advisement.

OAKLAND, Calif.—City council declares intention to improve Mountain Blvd. between Redwood Road and Bennett Place, involving:

- (1) 15,368 sq. ft. grading;
- (2) 295 lin. ft. concrete curb;
- (3) 591 sq. ft. concrete gutter;
- (4) 3,875 sq. ft. penetration macadam pavement;
- (5) 47 lin. ft. 12-in. vit. pipe conduit;
- (6) 1 storm water inlet, 34-in. opening;
- (7) 40 lin. ft. 8-in. vit. pipe sewer;
- (8) 1 manhole;
- (9) 1 lamphole, 12-in.;
- (10) 1 lamphole, 8-in.;
- (11) 8 wye branches.

Estimated cost \$3,542.70. 1911 Act. City will pay 64½% of cost from the General Fund. Hearing May 7. F. C. Merritt, city clerk. W. N. Frickstad, city engineer.

OAKLAND, Cal.—City council declares intention to improve portions of Plymouth St., 99th Ave. and Cherry St., involving:

- (1) 4,571 cu. yds. excavation;
- (2) 2,892 lin. ft. concrete curb;
- (3) 6,692 sq. ft. concrete gutter;
- (4) 32,178 sq. ft. penetration macadam pavement;
- (5) 170 lin. ft. 8x24-in. corrugated iron and concrete culvert;
- (6) 87 lin. ft. 8x29-in. do;
- (7) 6 handholes;
- (8) 280 lin. ft. 8-in. vit. pipe sewer;
- (9) 1 8-in. lamphole;
- (10) 10 wye branches.

Imp. Act 1915. Hearing April 23. Frank C. Merritt, city clerk. Walter N. Frickstad, city engineer.

MONTEREY COUNTY, Cal.—Until May 6, 2 P. M., bids will be received by State Highway Commission to treat with heavy fuel oil to a width of 8 ft. on each side of the existing pavement, 10.1 miles between Chualar and Salinas.

SISKIYOU COUNTY, Cal.—Until April 20, 2 P. M., bids will be received by H. S. Conly, district engineer, State Highway Commission, Reddick, to treat with heavy fuel oil as a palliative, 21 miles between Shasta River and Walker Station.

PLACER COUNTY, Cal.—Until July 6, 2 P. M., bids will be received by State Highway Commission to site and pave with Portland cement concrete, 1.4 miles between Forest House and Auburn.

REDWOOD CITY, San Mateo Co., Cal.—Until April 20, 8 P. M., bids will be received by B. E. Myers, city clerk, (N-2) to improve Main Street, south line of Bradford Street to the south line of the Bay Shore Highway, involving:

- (1) reinforced concrete bridge of 30-ft. spans for full width of street with 4-wing walls over Redwood Creek;
- (2) 1100 cu. yds. excavation;
- (3) 500 cu. yds. backfill;
- (4) 522 cu. yds. concrete (1:2:4);
- (5) 72,808 lbs. steel;

Storm Sewer

- (6) 295 lin. ft. 12-in. concrete pipe;
- (7) 15 lin. ft. 8-in. do;
- (8) 2 catchbasins;

Road Levee

- (9) 200 cu. yds. excavation;
- (10) 5000 cu. yds. embankment.

Estimated cost \$26,500. 1915 Bond Act. City will pay \$10,000 of cost from general fund. Plans on file in office clerk. C. L. Dimmitt, city engineer.

CALAVERAS COUNTY, Cal.—J. L. Reeves, Sacramento, submitted a bid to the U. S. Bureau of Public Roads, San Francisco, at \$43,668.55 for grading Section B, Big Trees-Dorrington, Ebbetts Pass National Forest Highway in Stanislaus National Forest, 3.08 miles in length, involving:

- (1) 21.1 acres clearing;
- (2) 71,500 cu. yds. excav., unclass.;
- (3) 995 cu. yds. excav., unclass., for structures;
- (4) \$5,700 sta. yds. overhaul;
- (5) 3,085 miles finishing edge grade road;
- (6) 45 cu. yds. reinf. steel;
- (7) 1750 lbs. reinf. steel;
- (8) 1960 ft. corrugated metal pipe in place;
- (9) 78 lin. ft. remove, clean and relay C. M. pipe;
- (10) 16,000 lin. ft. protection ditch;
- (11) 63 right of way monuments.

Engineer's estimate, \$66,154.70.

SANTA CRUZ COUNTY, Cal.—Healy-Tibbitts Construction Co., 6 Pine St., San Francisco, at \$207,483.3 awarded contract by State Highway Commission for 6.5 miles of highway between Waterman Switchback and Saratoga Gap, 3.5 miles to be graded and surfaced with crusher run base and the entire length to be paved with bituminous macadam. Complete list of unit and total bids published in issue of April 9.

NEVADA CITY, Nevada Co., Cal. Bids received April 6 by county supervisors to construct county road on Grass Valley to Colfax, approximately 10 miles in length, returned to bidders unopened and new proceedings will be started. Plans provided for graded roadway 20 ft. wide with 12-in. run base and a bituminous seal surface 16-ft. wide, involving:

- 1) 5.10 acres clear right-of-way and 429 stations 34,800 cu. yds. roadway excavation;
- 2) 8370 tons crusher run base;
- 3) 5250 cu. yds. crushed rock to be salvaged;
- 4) 3558 tons broken stone (bituminous macadam surface);
- 5) 289 tons emulsified asphalt;
- 6) 825 barrels light fuel oil;
- 7) 1574 lin. ft. 8-in. to 36-in. corr. metal pipe;
- 8) 1.13 miles property fence.

Work under Act. & Imp. Act 1925.

F. O'Connor, engineer for district.

svada City.

LASSEN AND SIERRA COUNTIES, Cal.—Until April 20, 2 P. M., bids will be received by State Highway Commission to treat with heavy fuel oil as dust palliative, 42.2 miles between miles west of Milford and Doyle and between Long Valley Creek and Nevada State Line.

SAN DIEGO COUNTY, Cal.—Matthies, Elsinore, at \$42,065 awarded contract by State Highway Commission to grade and pave with Portland cement concrete, 1.5 miles at Bonina.

BERKELEY, Alameda Co., Cal.—Until April 21, 10 A. M., bids will be received by Florence E. Turner, city clerk, to construct pathway between uclid and Hilldale Aves., involving:

- 1) 40 cu. yds. excavation;
- 2) 40 cu. yds. concrete;
- 3) 1800 lbs. reinforcing steel.

Certified check 10% payable to city required with bid. Plans obtainable on Harry Goodridge, city engineer.

PACIFIC GROVE, Monterey Co., Cal.—City council declares intention (3317) to improve Evans Ave. bet. Farley and Central Aves., Lowey Ave. bet. Evans and Central Aves., First St., bet. Lighthouse Ave. and Central Ave. and Second St. bet. Lighthouse Ave. and Evans Ave. Project involves:

- (1) 12,000 sq. ft. 2-in. asphalt surface on 3-in. sub base;
- (2) 29,000 sq. ft. 2-in. asphalt surface on existing base;
- (3) 1,500 lin. ft. concrete curb;
- (4) 1,500 lin. ft. concrete gutter; approach;
- (5) 600 sq. ft. concrete driveways;
- (6) 300 lin. ft. 4-in. vitrified clay sewer laterals;
- (7) 20 sewer taps.

1911 Act. Bond Act 1915. Hearing April 16. Elgin C. Hurlbert, city clerk.

PACIFIC GROVE, Monterey Co., Cal.—City council declares intention (2344) to improve Ocean View Ave., bet. Eardley Ave. and Second St. Projects involves:

- (1) 23,000 sq. ft. 2-in. asphalt surface;
- (2) 23,000 sq. ft. 4-in. asphalt paving;
- (3) 1,000 lin. ft. header curb;
- (4) 800 lin. ft. concrete curb;
- (5) 800 lin. ft. concrete gutter;
- (6) 2 catchbasins;
- (7) 80 ft. 10-in. corr. iron pipe;
- (8) 20 ft. 10-in. vitrified pipe;
- (9) 10 cu. yds. concrete;
- (10) 100 lin. ft. 4-in. vitrified clay lateral sewer;
- (11) 10 sewer taps.

20998—Woodworking Machinery, Esslingen, Germany. Manufacturer of woodworking machinery is desirous of contacting interested importers.

20999—Pottery, Hamburg, Germany. Manufacturer of pottery is seeking local representation.

S. F. WINS CONTROL OF HARBOR DISTRICT

With but four dissenting votes, the Assembly passed a bill transferring control of San Francisco harbor from the state to a port district composed of San Francisco and San Mateo counties.

The bill would not transfer the properties of the harbor to the district. It provides that the state would retain title, and the members of the port commission, five in number, would be appointed by the governor. The district however, would finance the harbor under terms of the bill and underwrite bonds.
